Summary of our Industry

India is one of the largest markets for gold, and growing affluence is driving growth in demand.

Gold has a central role in the country’s culture, considered a store of value, a symbol of wealth and status and a fundamental part of many rituals. Among the country’s rural population, a deep affinity for gold goes hand in hand with practical considerations of the portability and security of jewellery as an investment. Gold is considered to be auspicious, particularly in Hindu and Jain cultures. The ancient law-giver Manu decreed that gold ornaments should be worn for important ceremonies and occasions. Aside from Diwali, one of the most important dates in the Indian calendar, regional festivals across the country are celebrated with gold: in the south, Akshaya Tritiya, Pongal, Onam and Ugadi; in the east, Durga Puja; in the west, GudiPavda; in the north, Baisakhi and KarvaChauth. Gold is central to more personal life events too. Gifting gold is a deeply ingrained part of marriage rituals in Indian society—weddings generate approximately 50 percent of annual gold demand in India.

Bar and coin

Retail investment totalled 282t in Q1. This was 20% weaker than Q1’21, although the y-o-y comparison is affected by the fact that investment in the year-earlier period was very strong. From a longer-term perspective, investment demand remains healthy: 11% higher than the five-year quarterly average of 254t.

Bar and coin investment was mixed across markets. The sharp rise in the US\$ gold price did not quite reach the 2020 record, but foreign exchange movements meant that local prices in a number of currencies were at or close to new historical highs. This generated profit-taking in some markets, notable examples being Turkey and Japan, and this outweighed continued safe-haven investment elsewhere.

- Our registered office, shop and Branch office are located in northeast of central Amritsar and Ahemdabad. Any adverse development affecting such region may have an adverse effect on our business, prospects, financial condition and results of operations.*

Our registered office, Shop and Branch Office are located in northeast of central Amritsar and Ahemdabad. Any materially adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the states or local governments in this region could adversely affect operations at our shop. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts, or diseases heightened or particular to the region, may adversely impact the supply of products, local

transportation and operations at our offices and shop. Any such adverse development could result in significant loss from inability to meet inventory schedules and stock our shops appropriately, which could materially affect our business reputation within the industry. Should our supply of products be disrupted, we may not be able to procure an alternate source of supply of products in time to meet the demands of our customers, or we may not be able to procure products of equal quality or on equally competitive terms, or at all. Such disruption to supply would materially and adversely affect our business, profitability and reputation.

However Manoj Mahajan & Associates, Chartered Accountants are the current Statutory Auditor of the Company who is not in possession of the Peer Review Certificate that may have an impact which is qualitative though not quantitative. However for compliance of LODR in future, the peer reviewed auditor shall be appointed.

- 4. The COVID-19 pandemic has had, and is expected to have, a material adverse effect on our business, financial condition, results of operations and cash flows.***

In late 2019, a novel strain of coronavirus (“COVID-19”) emerged and by March 11, 2020, it was declared a global pandemic by the World Health Organization. The spread of COVID-19 and the recent developments surrounding the global pandemic have had, and may continue to have, repercussions across local, national and global economies and financial markets. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. While the recently commenced vaccination drive in India is a positive development, the COVID-19 pandemic has affected and is expected to continue to affect our business and operational performance in the near future. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have reacted by taking measures, such as instituting quarantines, restricting travel, prohibiting people from assembling in heavily populated areas, issuing lockdown orders and restricting the types of businesses that may continue to operate, ‘stay-at-home’ orders, and enforcing remote working regulations. These measures have led to a significant decline in economic activities, and has had and is having an unprecedented effect and a significant negative impact on the global real estate industry. The impact of Coronavirus on the Indian real estate sector was stifling to the point that it brought property transactions to a near-halt when the nation went into a complete lockdown during both waves. Since then, the market has taken several strides towards recovery, and just when it seemed the revival was not far, the country is struck by another variant of the virus, Omicron. However, it is too early to predict whether the emerging variant will have repercussions on housing demand and sales or not. The impact of a new and alarming variant of the COVID-19, Omicron, on the real estate sector will be entirely dependent on the severity of the infection, and resultant announcement of lockdown/s. Health experts opine that while the Omicron variant does not seem to have manifested serious symptoms so far, nothing could be said conclusively till we have more data. The realty industry has not seen any immediate impact on site visits, new bookings and launches so far. But with Delhi Government announcing a yellow alert and UP resorting to a state-wide night curfew, we might be heading to an economic slowdown, once again. Omicron could lead to a continuation of the real estate trends reported during the previous two waves. Meanwhile, the new COVID-19 variant has raised concerns across the country, considering the spike in the number of cases in metro cities, especially Delhi, Mumbai and Chennai. We have implemented certain measures and modified certain policies in light of the COVID-19 pandemic.

5. *Our Company had negative cash flow during certain fiscal years; details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.*

(Rs. in Lakhs)

Particulars	For the period ended	As on March 31		
	August 2022	2022	2021	2020
Net cash from (used in) Operating activities	(89.62)	38.89	(7.45)	(50.01)
Net cash from (used in) Investing activities	(1.66)	(10.01)	0.69	2.20
Net cash from (used in) Financing activities	48.50	7.59	(0.30)	(0.14)
Net Cash Flow	(42.78)	36.47	(7.06)	(47.95)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. For further details please refer to the section titled “*Financial Statements*” and chapter titled “*Management’s Discussion and Analysis of Financial Conditions and Results of Operations*” beginning on page no. 146 and page no. 183 respectively of this Draft Prospectus.

6. *We have entered into certain related party transactions and may continue to do so.*

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on the arms length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Draft Prospectus and, also see the section “*Related Party Transactions*” beginning on page no.146 of this Draft Prospectus.

7. *Our Company acquired a listed Company “Midland Services Limited” in past”*

Our Company as strategic investor who became Promoter Acquirer made an Offer (“Delisting Offer”/“Offer”), to the public shareholders of the Company- Midland Services Limited (“Public Shareholders”) holding fully paid up Equity Shares of the Company, seeking to acquire 1,757,055 Equity Shares, representing 54.91% of fully paid-up equity share capital and voting capital of the Company, held by the Public Shareholders to delist the Equity Shares of the Company from Metropolitan Stock Exchange of India Limited (“MSEI”) in accordance with the SEBI Delisting Regulations. The equity shares of Midland Services Limited was successfully delisted from MSEI w.e.f. 18-10-2018 and as confirmed by MSEI via its letter dated 08-10-2018 bearing no. MSE/LIST/2018/2485. Accordingly, it is difficult to predict with certainty if, we may amalgamate takeover other companies too in future which may adversely affect our revenue, cost of operation and thereby our business functioning.

8. *If we are unable to effectively manage our shop, attract new customers and operations or pursue our growth strategy through our digital platforms, our shops may not achieve our expected levels of profitability which may adversely affect our business prospects, financial condition and results of operations.*

We are engaged in bullion trading business and offer Gold and Silver bars and coins with 24K purity to our customers both through online platform i.e. Our App Aurel Bullion as well as through offline mode also. We also provide to our B2B and B2C clients the Antique Jadau Jewellery.

bars and coins to retail as well as the wholesale customers at a lowest possible price in an easy, simple and a transparent manner. We have developed a bullion trading platform, i.e. an app “**Aurel Bullion**” available at play store enabling our customers to buy and sell bullion in convenient manner. For our retail customers we have developed an E-commerce website, i.e. www.aurelbullion.com, enabling them to buy Gold and Silver Bars and coins instantly and conveniently.

The Aurel Bullion mobile app can be downloaded free from Play store for Android based mobile phones.

All of our staff in our shops undergo training to ensure they are maintaining our brand standards and demonstrating our commitment to trust and transparency through technology, introduce bullion trading and newer jewellery collections, introduce an optimal mix of merchandise which successfully meets local customer preferences at attractive prices, negotiate and obtain favourable terms from our vendors, the effectiveness of our marketing campaigns and if we are not able to hire, train and retain skilled personnel and maintain the technology; the competition that we face from incumbent and new bullion traders in the region; and exposure to expropriation or other government actions; political, economic and social instability; our expanded operations or our growth strategy would be affected which may lead to operational and financial inefficiencies, which could have a material adverse effect on our business prospects, financial condition and results of operations or at all, our sales volume, expansion plans and our results of operations, financial condition and profitability may be materially and adversely affected, and we may decide to close some of them.

- 9. *We are dependent on third parties for the production, manufacturing and transportation of all of our products. Any disruptions at such third-party production or manufacturing facilities, or failure of such third parties to adhere to the relevant quality standards may have a negative effect on our reputation, business and financial condition.***

We procure our raw materials from reputed Gold Traders based at Amritsar, Delhi and Ahmedabad allows us to offer quality products at timely manner. Our access to local Jadau jewellery manufacturers allows us to offer quality and a diverse product range. We actively engage with such traders and manufacturers to ensure that the products are as per our specifications and suggested designs. This arrangement has been beneficial for us as we are able to successfully execute our orders on time and develop strong relationships with suppliers and customers and/ or get our bullion to be manufactured through independent job wokers located in Ahmedabad. These bullions are purchased at pre-agreed rates or flexible spot-rates linked to the prevailing market benchmark. However, we do not enter into any long-term agreements with our suppliers and our arrangements with them are on short-term and spot basis. Hence, there is no assurance that in future also we will be able to source our products on timely basis and execute our orders on time or find alternative resources to source our products. Further, if we are unable to source our products at commercially acceptable prices, or at all, it may affect our ability to fulfill our supply commitments, or to fulfill them in an economical manner, which will have an adverse effect on our business, financial condition and results of operations. Further, any unscheduled, unplanned or prolonged disruption of operations at our job-workers facilities, including on account of power failure, fire, mechanical failure of equipment, performance below expected levels of output or efficiency, obsolescence of equipment or manufacturing processes, non-availability of adequate labour or disagreements with workforce, lock-outs, earthquakes and other natural disasters, industrial accidents, any significant social, political or economic disturbances or infectious disease outbreaks, could affect our vendors’ ability to meet our requirements, and could consequently affect our operations. We are also exposed to the risk of our job-workers failing to adhere to the standards set for them by us and statutory bodies in respect of quality, safety and distribution which in turn could adversely affect our sales and revenues. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

Any delay or failure on the part of our job-workers to deliver the products in a timely manner or to meet our quality standards, or any litigation involving these job-workers may have a material adverse effect on our business, profitability, and reputation. Since we typically enter into product-specific purchase orders for manufacture, we may also be unable to replace these job-workers at short notice, or at all, and may face delays in

production and added costs as a result of the time required to identify new job-workers may adversely affect our results of operations and financial condition. Our operations could be disrupted if we do not successfully manage relationships with our job-workers, if they do not perform or are unable to perform agreed-upon services, or if they are unwilling to make their services available to us at reasonable prices. If our job-workers do not perform their contractual obligations, it could adversely affect our reputation, business, financial condition and results of operations. Logistics are handled by third party which is a secured logistics movement company. We book the order with the trader and book the shipment with transporter. Transporter moves the shipment from our supplier's premises to us and any disruption in between adversely affect our business operations, failing to adhere to the standards set for them by us and statutory bodies in respect of quality, safety and distribution which in turn could adversely affect our sales and revenues.

In addition, over the years “**Aurel Bullion**” has established itself as a renowned brand in Amritsar and the adjoining areas. Our brand name “**Aurel Bullion**” provides us with the advantage of the customers relying on the quality of the product. Over the years, through the customer centric approach, our core focus on maintaining the customer trust and transparency, has been rewarded and contributed towards brand recognition and customer loyalty. All of our bullion and gold jewellery is hallmarked by BIS except gold jewellery weighing less than two grams which is not required to be hallmarked and conducting sample tests on each new batch of products we receive from our manufacturers, there is no assurance that our quality control measures will be effective. If we receive negative publicity about the quality of our bullion or our manufacturers receive negative publicity, our reputation, business and results of operations could be adversely affected.

10. Fluctuation in prices, non-availability or high cost of quality of gold and silver and other precious and semi-precious stones may have an adverse effect on our business, results of operations and financial condition.

Timely procurement of materials such as gold and silver bullion, as well as the quality and the price at which they are procured, play an important role in the successful operation of our business. Gold and Silver used in our operations, particularly for bullions to be sold within India, is primarily sourced from nominated banks and bullion dealers. An increase in the price of gold and silver may result in an increase in our income from sales assuming such increases do not adversely affect sales volumes. However, a significant increase in the price of gold and silver or a negative outlook on future gold and silver, could, in the short term, adversely affect our sales volumes and increase our procurement costs.

Conversely, an increase in the price of gold and silver, could lead to a decrease in demand for particular bullion and/or a decrease in our profit margins. The prices and supply of these materials depend on factors beyond our control, including general economic conditions, competition, production levels and regulatory factors such as import duties. However, such increase has not resulted in an increase in our operational cost since any increases in the prices of raw materials are passed on to the customer. We cannot assure that we will be able to procure quality raw materials at competitive prices or at all. Further, any rise in gold and silver prices may cause customers to delay their purchases, thereby adversely affecting our business, operations and financial condition.

In addition, while we have arrangements with multiple suppliers, if for any reason, a large number of our suppliers of raw materials curtail or discontinue their delivery of such raw materials to us, in the quantities we need and at prices that are competitive, our ability to meet our material requirements for our operations could be impaired, our delivery schedules could be disrupted and our business and reputation may be adversely affected.

11. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The Bullion trading sector is highly fragmented and competitive. Our Company would not only compete with organized players but also a high percentage of unorganized players at local, national and international levels. Some of them may offer better quality gold and silver at competitive prices and may be capable of providing more personalized services to each client due to the smaller number of orders placed with them. Further, these unorganized players offer their services at highly competitive prices having well established presence in their local markets. Aggressive discounting by competitors, including liquidating excess inventory, may also adversely impact our performance in the short term. This is particularly the case for easily comparable prices for

gold and silver bars & coins, for similar quality gold and silver sold through wholesaler, retailers and other traders.

In addition, there are minimal entry barriers in this sector and hence they may also face competition from new entrants. Some of our employees, who have disassociated themselves from the Company, may also compete with our Company.

12. *Our inability to identify customer demand accurately and maintain an optimal level of inventory may impact our operations net sales, profitability, cash flow and liquidity adversely.*

The success, continuous and smooth operations of our business is dependent on our ability to effectively manage our inventory, to receive the timely delivery of our finished products from our job workers, to anticipate and forecast customer demand and trends. Any error in our forecast could result in either surplus stock, which we may not be able to sell in a timely manner, or at all, or under stocking, which could affect our ability to meet customer demand. Maintaining an optimal level of relevant inventory is important to our business as it allows us to respond to customer demand effectively and to maintain a full range of products at our shop. Further, if our management misjudges the expected customer demand, it could adversely impact the results by causing either a shortage of merchandise or an accumulation of excess inventory.

13. *Our Company doesn't own the premises where its registered office, Branch office and shop is situated, and lease & license agreement have been executed for the same. Any termination or dispute in relation to this lease/ rental agreement may have an adverse effect on our business operations and results thereof.*

Our Registered office and our shop is situated at 69, 70 Deep Complex, Court Road, Amritsar-143001, Punjab, India and B.O.: 1, Building 1904/X-8, Haveli Zamadar, Guru Bazar, Amritsar-143001, Punjab, India respectively and the Branch Office at Ahmedabad. Both our Shop and branch office are on rent basis. Our registered office is owned by the Promoter of our Company-Mr. Manan Mahajan with whom we have entered into a rent agreement dated 1-04-2022 for 60 months. Further, our Ahmedabad Branch office is also on rent basis and have entered into a rent agreement with the Lessor / Owner. For details on our Property, please refer to chapter titled "**Business Overview**" on page no. 90 of this Draft Prospectus. However, if the NOC is withdrawn or the agreement is terminated by either of the parties or upon expiry of the said agreement or increase in rent or any non-compliance, we may have to either vacate the Office and re-locate to another premises or agree to pay the extra amount for using the same premises. Further, increase in rent structure will lead to increase of our expenditure which in turn will lead to decrease of revenue and increase of operational cost. Also, searching for the suitable location, setting the shops from the scratch and relocating the inventory of our office may lead to loss of clients, reduction in sales thereby affecting our profitability.

14. *Our business experiences an increase in sales during the festive, wedding season and other significant seasons. Any substantial decrease in our sales during such periods and our inability cope up with our service during this time, then our revenues and profitability will be affected and have a negative effect on our image and brand.*

Our business has experienced significant increase in our sales during the festive, wedding season and other significant seasons like Christmas, Diwali season, GudiPadwa, Dhanteras etc. Any significant shortfall in sales or our inability to cope up with the growing demands during these periods during these periods, would affect our profitability and we would experience adverse effect on our results of operations.

15. *Any change in our consumer's likes, preferences or a change in their perception regarding the quality of our products may negatively affect the image and our reputation and in turn affect our revenues and profitability.*

The industry in which we operate is highly competitive and where goodwill and reputation are of huge significance. Changes in consumer's likes, preferences, design & quality of our products is an ever changing factor. If we are not able to meet this ever changing demand at best price, it will negatively affect the image and

reputation of our company. Further, such incidences may expose our Company to liabilities and claims, adversely affect our reputation, growth, profitability thereby reducing our market share and leading to higher inventory costs.

16. If we fail to cost-effectively turn existing customers into repeat customers or to acquire new customers, our business, financial condition, and results of operations would be harmed.

The growth of our business is dependent upon our ability to continue to grow by cost-effectively turning existing customers into repeat customers and adding new customers. Although we believe that many of our customers originate from word-of-mouth and other non-paid referrals, we expect to continue to acquire additional customers, all of which could impact our overall profitability. If we are not able to continue to expand our customer base or fail to retain customers, our net sales may grow more slowly than expected or decline. Our ability to attract new customers and increase net sales from existing customers also depends in large part on our ability to enhance and improve our existing products and to introduce new products and services that appeal to the customers, in each case, in a timely manner. We also must be able to identify and originate trends, as well as anticipate and react to changing consumer demands in a timely manner. The success of new products and services depends on several factors, including their timely introduction and completion, sufficient demand, and cost effectiveness. While we expect improvements in the performance of our business and operations, any flaws or dissatisfaction with the quality, pricing of products, or changes we make to our products and services or our inability to provide high-quality support to customers or help resolve issues in a timely and acceptable manner, our ability to attract and retain customers could be adversely affected. If our number of customers declines or fluctuates for any of these or other reasons, our business would suffer and lead to negative publicity of our brand.

18. Client contracts are generally of a short duration and contain termination provisions that could decrease our revenues and earnings. Certain of our client contracts can be terminated by our clients with limited or no notice or penalty, which could negatively impact our revenue and profitability.

Most of our client contracts can be terminated by the client on short notice without penalty as majority of our client contracts are for a period of one year or less. Our clients, therefore, are not contractually obligated to continue to do business with us in the future. This creates uncertainty with respect of revenues and earnings from our client contracts.

Our clients typically retain us on a non-exclusive, project-by-project basis. Many of our client contracts can be terminated by providing notice and without termination-related penalties. Additionally, most of our client contracts are typically limited to discrete projects without any commitment to a specific volume of business or future work. While we typically have carve-outs for force majeure events, many events, such as equipment

failure and third-party vendors being unable to meet their underlying commitments to us, could impact our ability to meet our service level agreements.

Our business is dependent on the decisions and actions of our clients, and there are a number of factors relating to our clients that are outside our control that might result in the termination of a project or the loss of a client, including financial difficulties for a client; change in strategic priorities, resulting in a reduced level of spending on staffing solutions; a demand for price reductions; and a change in strategy by moving more work in-house or to our competitors. Therefore, our business may be adversely affected if any of our contracts are terminated by our clients at short notice.

19. Our business is dependent on factors affecting consumer spending that are out of our control.

Bullion Trading are discretionary and are often perceived to be an exercise in luxury. As a result, our business is sensitive to a number of factors that influence consumer spending. The price of bullions relative to other products, everyday household as well as luxury items, influences the conditions, consumer confidence in future economic and political conditions, economic slowdown or fears of economic slowdown, consumer debt, disposable consumer income, conditions in the housing market, consumer perceptions of personal well-being and security, fuel prices, inclement weather, interest rates, sales tax rate increases, inflation, and war or fears of war. In addition, we compete with other retail categories, for example electronics, travel, etc. for consumers' discretionary expenditure. Therefore, the price of bullions relative to other products influences the proportion of consumers' expenditure that is spent on bullions.

20. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our results of operations are dependent on our ability to effectively manage our inventory. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of merchandise or an accumulation of excess inventory. Further, if we fail to sell the inventory we Procure, we may be required to recycle our inventory, which would have an adverse impact on our income and cash flows.

21. Significant portion of our sales is dependent on few of our seller. A loss of one or more such significant seller or a reduction in their sales, could adversely affect our financial condition thereby reducing our reducing revenues.

We are extensively dependent on a limited number of sellers for a significant portion of our income. During the period ended on March 31, 2022 our top 10 contributed around 91.77 % of our total revenue. The loss of one or more of these significant sellers or a reduction in the amount of business we obtain from them could have an adverse effect on our financial condition and result in reduction of our income. We cannot assure you that we will be able to maintain historic levels of business from our significant sellers or that we will be able to significantly reduce seller's concentration in the future. Furthermore, major events affecting our customers, such as bankruptcy, change of management, change in their country's policy and business framework, mergers and acquisitions, etc. could adversely impact our business. If any of our major customers becomes bankrupt or insolvent, we may lose some or all of our business from that customer and our receivable from that customer would increase and may have to be written off, adversely impacting our income and financial condition.

22. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.

Our Company requires certain statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said

permits and licenses would adversely affect our Company's, thereby having a material adverse effect on our business, results of operations and financial condition. Further, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Our Company requires the following statutory and regulatory registrations, licenses, permits and approvals for the business. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of the relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business. If we fail to comply with all the regulations applicable to us or if the regulations governing our business or their manner of implementation change, we may incur increased costs, or be subject to penalties or may suffer a disruption in our business activities, any of which, could adversely affect our business or results of operations. For further details, please see "*Key Industry Regulations and Policies*" and "*Government and Other Statutory Approvals*" beginning on page nos. 105 and 195 respectively of this Draft Prospectus.

23. *If any new products or brands that we launch are not as successful as we anticipate, our business, results of operations and financial condition may be adversely affected.*

We currently operate under a single brand under which we sell i.e. "Aurel" of particular designs or type. We may launch additional brands in the future in order to effectively market a wider range of our products to our customers. However, we cannot assure you that any new products or sub-brands we launch will be successful or find traction with our customers, or that we will be able to recover costs we incurred in developing such products and brands. If the products and brands that we launch are not as successful as we anticipate, our brand equity may suffer and our business, results of operations and financial condition may be adversely affected. Further, such expanded product offerings place a strain on our management, operational and financial resources, as well as our information systems.

24. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for, which may have an adverse effect on our business, financial condition and thereby on our results of operations.*

We may encounter predicaments in executing the orders placed by our customer or executing it on a timely basis. Moreover, there are factors which may be beyond our control or in the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, which may result in the postponement of executing or delivering of the necessary product(s) or cause its cancellation. Further, even though we execute orders as placed by our customers, the order could be cancelled or there could be any changes in delivery of the products. Accordingly, it is difficult to predict with certainty if, when and to what extent the delivery of the orders placed will be made. Failure to deliver our orders on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our revenue, cost of operation and thereby our business functioning.

25. *If we are unable to collect our receivables from our clients, our results of operations and cash flows could be adversely affected.*

Recovery of our receivables and timely collection of client balances depends on our ability to complete our commitments and bill and collect our contracted revenues. If we are unable to meet our requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

26. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able

to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

- 27. *Our Company may require additional capital resources to achieve our expansion plans and working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.***

Our business requires significant amount of working capital including fund requirement for payment for bulk purchases of various designed and trending jewellery and raw materials. Hence, major portion of our working capital is utilized towards debtors and inventory. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. However, if our management fails to manage our inventory or misjudges expected clients demand or shortage of materials/ products or an accumulation of excess inventory or accurately evaluate the credit worthiness of our clients, it may lead to bad debts, delays in recoveries and/or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Further, the rate of our expansion will depend to an extent on the availability of adequate debt and equity capital. Further, the actual expenditure incurred may be higher than current estimates owing to but not limited to, implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal generations and in case if the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions and unsecured loans, which may have an adverse effect on our business and results of operations.

- 28. *Strong competition in the bullion sector could decrease the market share and compel the company to either reduce the cost charged or increase the payments made to the job workers. This may have an adverse impact on the enrolments, revenues and profitability.***

The bullion sector is highly fragmented and competitive. The Company would not only compete with organized players but also a high percentage of unorganized entities such as individual jewelers, retailer stores, jewellery showrooms and galleries and small scale companies. Some of them may offer better designs and patterns to the clients and may be capable of providing more personalized services to each client due to the smaller number of orders placed with them. Further, these unorganized entities offer their services at highly competitive prices having well established presence in their local markets. Aggressive discounting by competitors, including liquidating excess inventory, may also adversely impact our performance in the short term. This is particularly the case for easily comparable pieces of jewellery, of similar quality, sold through stores that closely resemble to those that we operate. In addition, there are minimal entry barriers in this sector and hence we may also face competition from new entrants.

- 29. *Our Company has not taken any insurance coverage which may protect us against certain operating hazards and from all losses and this may have an adverse impact on the financial conditions of the business.***

Except as mentioned "***Business Overview***" Chapter on page no. 90 of this Draft Prospectus, our Company has not taken any insurance cover at present. Hence, we may not be able to protect ourselves from any damage or loss suffered by us. To the extent that we suffer any loss or damage, the operational results of the company could be adversely affected. The company does not maintain a directors and officers liability insurance policy for the directors or key managerial personnel of the Company.

- 30. *Any changes in regulations or applicable government incentives would adversely affect the Company's operations and growth prospects.***

Our Company is also subject to various regulations. Our Company's business and prospects could be adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can

be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which would have a material adverse effect on the Company's operations and financial results.

Our operations currently benefit from certain direct tax incentives. In the event we are unable to continue to benefit from such tax benefits, or other taxes applicable to us increase, our financial condition and results of operations may be adversely affected. Taxes and other levies imposed by the GoI or State Governments that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other charges by the Central and the State Governments or increases in existing charges may adversely affect our results of operations. Further, the central and state tax scheme in India is subject to change from time to time. Any adverse change in Indian tax rules and regulations or policy may have an adverse effect on our business, financial condition and results of operations.

31. *Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.*

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals. Failure by our Company to renew, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business. For details please refer to Chapter titled "**Government and Other Statutory Approvals**" beginning on page no. 195 of the Draft Prospectus.

32. *Certain agreements may be inadequately stamped or may not have been registered or may not have necessary disclosure as a result of which our operations may be adversely affected.*

Few of our agreements may not be stamped adequately or registered or may not have not the necessary disclosures. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company. Further, effect of non-disclosure of certain necessary points as required under the Contract Act, 1872 (as amended from time to time) and/ or under any other law, rules, regulations, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non- disclosure of necessary points/ rules/regulations/ law relating to Contract Act, 1872 (as amended from time to time) and/ or under any other law, rules, regulations may adversely impact the operations of our Company.

33. *We have not entered into any non-disclosure or confidentiality agreements with our employees or other intermediaries.*

We operate in a highly competitive industry our ability to succeed depends largely on the ability and skill of the workers to create new and creative designs. Although, we have good terms with our employees, we cannot assure that we will have continued relation with them. Although, we believe that our designs may not be compromised, we cannot assure the same as we have not entered any non-disclosure or other confidentiality agreements with them.

34. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

35. *We are dependent on our Promoter, our senior management, directors and key personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.*

Our Promoter, Directors, senior management and key managerial personnel collectively have many years of experience in the industry and are difficult to replace. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, please refer to Section “*Our Management*” on page 122 of this Draft Prospectus. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently.

Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

36. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be mainly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time over run, or cost overrun may adversely affect our growth plans and profitability.

37. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

38. *Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.*

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

39. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding in our Company.*

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding in our Company. For further information, see “*Capital Structure*” and “*Our Management*” on page nos. 59 and 122, respectively, of this Draft Prospectus.

40. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakhs. Since this Issue Size is less than Rs. 10,000 Lakhs, our Company has not appointed any monitoring agency for this Issue. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

41. *We propose to utilize the Net Proceeds for purposes identified in the section titled “Objects of the Issue” in this Draft Prospectus. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.*

We propose to utilize the Net Proceeds for purposes identified in the section titled “*Objects of the Issue*” beginning on page no 71 this Draft Prospectus. The manner deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholder`s approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholder`s approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholder`s approval may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations, 2018, as amended from time to time. If our Shareholder`s exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

42. *We have not identified any alternate source of raising the funds mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance. Further in case of any delay in the completion of the Offer, there would be a corresponding delay in implementation schedule.*

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Fresh Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for setting up the expanded unit along with Plant and machinery, which may result in us borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to consider alternative source for meeting the fund requirement. We therefore, cannot assure that we would be able to execute the proposed expansion plan within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

- 43. Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.***

After the completion of our Initial Public Issue, our Promoter, along with our Promoter Group members, will hold, approximately 40.57% of our post issue paid up equity capital of our Company. As a result, our Promoter to some extent will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoter may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoter could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoter and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "*Capital Structure*" and "*Our Promoter, Promoter Group*" and "*Our Group Companies/Entities*", beginning on page no. 59, 136 and 143 respectively, of this Draft Prospectus.

- 44. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

- 45. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

46. *We cannot assure you that we will pay dividend in future.*

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

47. *Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to; however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "**Statement of Tax Benefits**" on page no. 78 of this Draft Prospectus.

48. *We cannot assure you that our Equity Shares will be listed on the SME Platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the Equity Shares.*

In terms of Chapter IX of the SEBI (ICDR) Regulations, 2018, as amended from time to time, we are not required to obtain any in-principle approval from SEBI for listing of our Equity Shares. We have only applied to BSE to use its name as the Stock Exchange in this Offer Document for listing our Equity Shares on the SME Platform of BSE. Permission for listing of the Equity Shares will be granted only after the Equity Shares offered in this Issue have been allotted. Approval from BSE will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchanges are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 6 (six) Working Days from the Issue Closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose off your Equity Shares.

49. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares

could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. For further details of the obligations and limitations of Market Makers please refer to the section titled “**General Information – Details of the Market Making Arrangement for this Issue**” on page no. 50 of this Draft Prospectus.

- 50. *There may be restrictions on daily/monthly movements in the price of our Equity Shares, which can adversely affect shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point of time.***

Subsequent to listing, our Company may be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India, which does not allow transactions having crossed certain volatility limit in the price of its Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company’s circuit breaker is set by the stock exchanges based on certain factors such as the historical volatility in the price and trading volume of the Equity Shares. The stock exchange is not required to inform us of the percentage limit of the circuit breaker from time to time and may change it without our knowledge. This circuit breaker, if imposed, would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, we cannot assure that the shareholders will be able to sell the Equity Shares at desired prices at any particular time.

EXTERNAL RISK FACTORS

- 51. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.***

The company is subject to various regulations and policies. For details see section titled “**Key Industry Regulations and Policies**” beginning on page no. 105 of this Draft Prospectus. The company’s current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

- 52. *Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.***

The revenues recorded, and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

- 53. *The nationalized Goods and Services Tax (GST) regimes proposed by the Government of India may have material impact on our operations.***

The Government of India has proposed a comprehensive national goods and service tax (GST) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. Given the limited liability of information in the public domain covering the GST we are unable to provide/ measure the impact this tax regime may have on our operations.

54. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see “**Presentation of Financial, Industry and Market Data**” on page no. 16 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

55. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

56. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

57. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

58. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

59. *Natural calamities and force majeure events may have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. These natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Further prolonged spells of deficient or abnormal rainfall or other natural calamities in the future could have a negative impact on the Indian economy, adversely affecting our business and the price of the Equity Shares.

60. *Terrorist attacks, civil unrests and other acts of violence in India and around the region could adversely affect the markets, resulting in loss of consumer confidence and adversely affect the business, results of operations, financial condition and cash flows.*

Terrorist attacks, civil unrests and other acts of violence or war in India and around the region may adversely affect worldwide financial markets and result in a loss of consumer confidence and ultimately adversely affect

the business, results of operations, financial condition and cash flows. Political tensions could create a perception that an investment in Indian companies involves higher degrees of risk and on the business and price of the Equity Shares.

61. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond the company's control such as earthquake, fire, floods and similar natural calamities may cause interruptions in the business operations. The operations and financial results and the market price and liquidity of the equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

62. In future the company may depend on banks and financial institutions and other sources for meeting its short and medium term financial requirements.

Any delay in the disbursal of funds from these bodies can act as a bottleneck to the project execution capabilities and thereby its results of operations. The company cannot assure that it will be able to do so on commercially reasonable terms. Any increase in interest expense may have a material adverse effect on its business prospects, financial condition and results of operations.

63. Increases in interest rates may affect the results of operations.

Currently, the company does not have any debt, but it cannot be assured that it will not incur indebtedness with a floating rate of interest in the future. As such, increases in interest rates may adversely affect the cost of future borrowings.

The company has not entered into any interest rate hedging or swaps transactions. It cannot be assured to the prospective investor that the company, if it does not enter into any interest rate hedging or swap transactions, will be able to do so on commercially reasonable terms, or that any of such agreements will protect the company fully against interest rate risk. Any increase in interest expense may have an adverse impact on its business, prospects, financial condition and results of operations.

GLOBAL ECONOMY

GLOOMY AND MORE UNCERTAIN

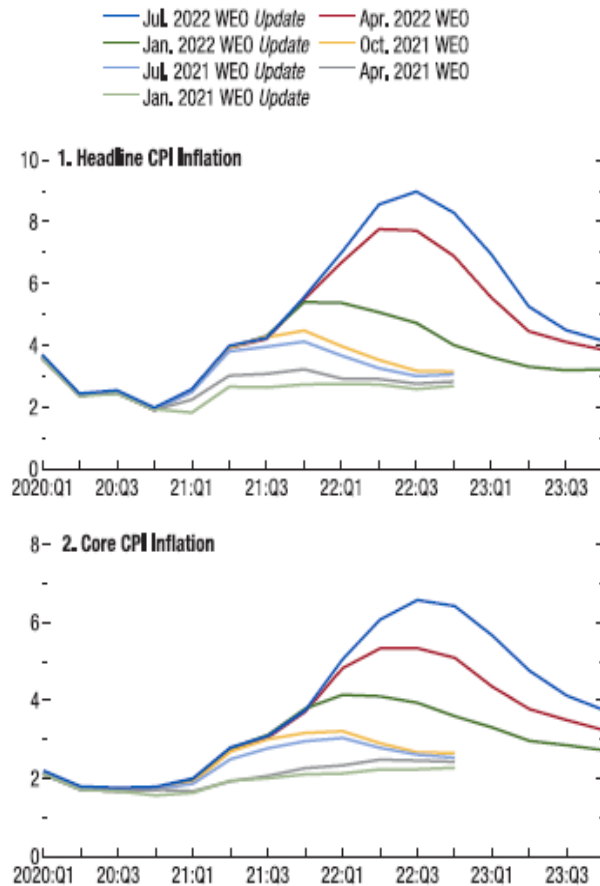

Global slowdown intensifies as downside risks materialize. A tentative recovery in 2021 has been followed by increasingly gloomy developments in 2022. Performance was slightly better than expected in the first quarter, but world real GDP is estimated to have shrunk in the second quarter—the first contraction since 2020—owing to economic downturns in China and Russia. Downside risks discussed in the April 2022 World Economic Outlook are materializing, with higher inflation worldwide, especially in the United States and major European economies, triggering a sharp tightening in global financial conditions; a sharper-than-anticipated slowdown in China, reflecting COVID-19 outbreaks and lockdowns; and further negative cross-border effects from the war in Ukraine.

Global inflation again surprises on the upside, prompting more central bank tightening. Since 2021, consumer prices have consistently risen faster than widely expected, including in the World Economic Outlook (Figure 1). In the United States, the consumer price index rose by 9.1 percent in June, compared with a year earlier, and it also rose by 9.1 percent in the United Kingdom in May—the highest inflation rates in these two countries in 40 years. In the euro area, inflation in June reached 8.6 percent, its highest level since the inception of the monetary union. Equally concerning, in emerging market and developing economies, second-quarter inflation is estimated to have been 9.8 percent. Higher food and energy prices, supply constraints in many sectors, and a rebalancing of demand back toward services have in most economies driven up headline inflation. But underlying inflation has also increased, as reflected in different gauges of core inflation, reflecting the pass-through of cost pressures by way of supply chains and tight labor markets, especially in advanced economies.¹ Wage growth has on average not kept up with inflation across both advanced and emerging market and developing economies, eroding household purchasing power. Although long-term inflation expectations have been stable in most major economies, they have started to rise according to some measures, including in the United States (Figure 2). In response to incoming data, central banks of major advanced economies are withdrawing monetary support more assertively and raising policy interest rates faster than expected in the April 2022 World Economic Outlook. Central banks in several emerging market and developing economies have raised interest rates more aggressively than during past advanced economy tightening cycles. The associated rise in longer-term borrowing costs, including mortgage rates, and tighter global financial conditions (see box) have led to precipitous declines in equity prices, weighing on growth. At the same time, public COVID-19 support packages have been wound down.

China’s economic slowdown has added to global supply chain disruptions. COVID-19 outbreaks and mobility restrictions as part of the authorities’ zero-COVID strategy have disrupted economic activity widely and severely (Figure 3). Shanghai, a major global supply chain hub, entered a strict lockdown in April 2022, forcing citywide economic activity to halt for about eight weeks. In the second quarter, real GDP contracted significantly by 2.6 percent on a sequential basis, driven by lower consumption—the sharpest decline since the first quarter of 2020, at

the onset of the pandemic, when it declined by 10.3 percent. Since then, more contagious variants have driven a worrisome surge in COVID-19 cases. The worsening crisis in China's property sector is also dragging down sales and real estate investment. The slowdown in China has global consequences: lockdowns added to global supply chain disruptions and the decline in domestic spending are reducing demand for goods and services from China's trade partners.

The war in Ukraine continues, causing widespread hardship. The war's humanitarian cost is rising, with 9 million people having fled Ukraine since the Russian invasion started and continuing loss of life and destruction of physical capital. Since April 2022, major advanced economies have placed additional financial sanctions on Russia, and the European Union agreed on embargoes on imports of coal starting in August 2022 and on Russian seaborne oil starting in 2023. The European Union announced that it will block insuring and financing maritime transport of Russian oil to third countries by the end of 2022. At the same time, the Organization of the Petroleum Exporting Countries has agreed to bring forward increases in oil supply that were planned for September, and the Group of Seven plans to study the possibility of introducing a price ceiling on Russian exports of crude oil. These offsetting developments mean that the increase in international crude oil prices compared with last year is overall only slightly lower than predicted in the April 2022 World Economic Outlook. More recently, the flow of Russian pipeline gas to Europe has declined sharply to about 40 percent of the level a year ago, contributing to a steep increase in natural

gas prices in June. Russia’s economy is estimated to have contracted during the second quarter by less than previously projected, with crude oil and nonenergy exports holding up better than expected. In addition, domestic demand is also showing some resilience thanks to containment of the effect of the sanctions on the domestic financial sector and a lower-than-anticipated weakening of the labor market. Relatedly, the war’s effects on major European economies have been more negative than expected, owing to higher energy prices as well as weaker consumer confidence and slower momentum in manufacturing resulting from persistent supply chain disruptions and rising input costs.

The food crisis worsens. Global food prices have stabilized in recent months but remain much higher than in 2021 (see Figure 4). The principal driver of global food price inflation—particularly prices of cereal, such as wheat—has been the war in Ukraine; export restrictions in several countries have compounded global food price increases, although a few of these restrictions have recently lapsed. Low-income countries, where food represents a larger share of consumption, are feeling the impact of this inflation most keenly. Countries with diets tilted toward commodities with the largest price gains (especially wheat and corn), those more dependent on food imports, and those with a large pass-through from global to local staple food prices are most distressed. Low-income countries whose people were already experiencing acute malnutrition and excess mortality before the war, especially in sub-Saharan Africa, have suffered a particularly severe impact.

Global trade: Global trade growth in 2022 and 2023 will likely slow by more than previously expected, reflecting the decline in global demand and supply chain problems. The dollar’s appreciation in 2022—by about 5 percent in nominal effective terms as of June compared with December 2021—is also likely to have slowed world trade growth, considering the dollar’s dominant role in trade invoicing as well as negative financial balance sheet effects on demand and imports in countries with dollar-denominated liabilities.

INDIAN ECONOMY

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

- India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.
- According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.
- Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also launching growth-oriented policies to boost the economy. In view of this, the country witnessed many developments in the recent past, some of which are mentioned below.

- As of July 15, 2022, India's foreign exchange reserves reached US\$ 572.71 billion.

- Consumer Price Index (CPI) inflation stood at 7.01% in June 2022 compared to 7.04% in May 2022.
- In July 2022 (until 21 July 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 228,862 crore (US\$ 28.65 billion) Wheat procurement in Rabi 2021-22 and anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over the recent decade, India's rapid economic growth has led to a substantial increase in demand for exports. Moreover, many of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

INDIAN BULLION INDUSTRY

India is one of the largest markets for gold, and growing affluence is driving growth in demand.

Gold has a central role in the country’s culture, considered a store of value, a symbol of wealth and status and a fundamental part of many rituals. Among the country’s rural population, a deep affinity for gold goes hand in hand with practical considerations of the portability and security of jewellery as an investment. Gold is considered to be auspicious, particularly in Hindu and Jain cultures. The ancient law-giver Manu decreed that gold ornaments should be worn for important ceremonies and occasions. Aside from Diwali, one of the most important dates in the Indian calendar, regional festivals across the country are celebrated with gold: in the south, Akshaya Tritiya, Pongal, Onam and Ugadi; in the east, Durga Puja; in the west, GudiPavda; in the north, Baisakhi and KarvaChauth. Gold is central to more personal life events too. Gifting gold is a deeply ingrained part of marriage rituals in Indian society—weddings generate approximately 50 percent of annual gold demand in India.

Bar and coin

Retail investment totalled 282t in Q1. This was 20% weaker than Q1’21, although the y-o-y comparison is affected by the fact that investment in the year-earlier period was very strong. From a longer-term perspective, investment demand remains healthy: 11% higher than the five-year quarterly average of 254t.

Bar and coin investment was mixed across markets. The sharp rise in the US\$ gold price did not quite reach the 2020 record, but foreign exchange movements meant that local prices in a number of currencies were at or close to new historical highs. This generated profit-taking in some markets, notable examples being Turkey and Japan, and this outweighed continued safe-haven investment elsewhere.

Retail bar and coin investment fell 20% y-o-y in Q1, but held above 5-year quarterly average

Indian bar and coin investment increased 5% y-o-y to 41t – the strongest first quarter since 2014. Retail investors focused on gold’s safe haven attributes amid volatility in local equity markets and the war in Ukraine. The BSE Sensex index fell sharply between mid-January and early March in contrast to the rapid climb in local gold prices over the same period. Investors were attracted by gold’s strong relative (and actual) returns, particularly given the paltry return on government bonds.

However, increased volatility in the gold price sent a note of caution and demand tailed off towards the end of the quarter, pushing the local price to a fairly wide premium during March. Underlying investment demand remains healthy, but any further price volatility would likely discourage investment to an extent.

India’s gold market continues to make strides towards developing its position on the global stage. Trading on the India International Bullion Exchange (IIBX) launched in April, with the first bullion deposit repository (BDR) created and traded. The IIBX is expected to become a conduit for gold imports in India and the launch of trading on this platform is a first step towards establishing India as one of the world’s leading bullion trading hubs.

Having reached a record high in Q4’21, jewellery demand in India fell by 26% y-o-y in Q1 to 94t. The lack of auspicious gold-buying days and wedding days in January was followed by a sharp rise in the gold price in late February/early March – a combination that proved detrimental to jewellery buying. The gold price breached the key psychological Rs50,000/10gm at the end of February, before rising to above Rs53,000/10gm in March. In response, consumers postponed gold purchases, hoping for a price correction...or at least a stabilisation. Sluggish demand in March resulted in the local market discount widening as far as US\$60/oz – its highest for 18 months. The outlook for Q2 demand in India is positive, although further increases in the gold present a downside risk to demand. Demand in the second quarter will receive support from festival purchases (Akshaya Tritiya – a key gold-buying festival – falls in the first week of May) and wedding season buying. Underlying consumer sentiment is improving, which should also prove supportive: the Reserve Bank of India’s Consumer Confidence Index increased to 71.7 in March from 64.4 in January. However, demand could face headwinds should there be further increases – or heightened volatility – in the gold price, while broad-based inflation may also curb demand by squeezing disposable incomes.

Tonnes	Q1'21	Q1'22	YoY % change
Investment	181.8	550.7	203
Bar & coin	351.8	281.9	-20
India	39.3	41.3	5
China, P.R.:Mainland	86.5	49.3	-43
Gold-backed ETFs	-170.0	268.8	

Investment demand for gold in Q1 returned to levels that were last seen during the early months of the pandemic in 2020, fuelled by similar drivers: namely, safe haven flows and high/rising gold prices. Heightened geopolitical risk, caused by the invasion of Ukraine, encouraged investment flows, which fed through to a sharp rise in the gold price. Inflation concerns – already supportive for gold investment – were accelerated by the conflict, with data prints showing prices across the globe rising at a multi-decade, if not record, pace. Rising interest rates were, however, a continued headwind and this likely tempered investment inflows to an extent.

Key Industry and Business-Related Regulations applicable to our company

INDUSTRIAL LAWS

The Bureau of Indian Standards Act, 2016

The Bureau of Indian Standards Act, 2016 (“BIS Act”) provides for the establishment of bureau for the standardization, marking and quality certification of goods. Functions of the bureau include, inter-alia, (a) recognizing as an Indian standard, any standard established for any article or process by any other institution in India or elsewhere; (b) specifying a standard mark which shall be of such design and contain such particulars as may be prescribed to represent a particular Indian standard; and (c) conducting such inspection and taking such samples of any material or substance as may be necessary to see whether any article or process in relation to which the standard mark has been used conforms to the Indian Standard or whether the standard mark has been improperly used in relation to any article or process with or without a license.

Government of India has identified BIS as the sole agency in India to operate the BIS Certification Scheme for Hallmarking of Gold Jewellery (“BIS Hallmarking Scheme”). BIS Hallmarking Scheme is operating under BIS Act, Rules and Regulations. It operates on the basis of trust and thus it is desirable that aspects of quality control are in-built in the system responsible for managing quality.

The BIS Hallmarking Scheme has been aligned with International criteria on hallmarking (Vienna Convention 1972). As per this scheme, licence is granted to the jewellers by BIS under BIS Hallmarking Scheme. The BIS certified jewellers can get their jewellery hallmarked from any of the BIS recognized Assaying and Hallmarking Centre. The recognition to an Assaying and Hallmarking Centre is given against BIS criteria Doc: HMS/RAHC/GO1 which is in line with International criteria on Marking and Control of Precious metals. A Hallmark, consists of five components i.e. BIS Mark, the Fineness number (corresponding to given caratage), Assaying and Hallmarking Centre's Mark, Jeweller's identification Mark and year of Marking denoted by a code letter and decided by BIS (e.g. code letter ‘A’ was approved by BIS for year 2000, ‘B’ being used for the year 2001 and ‘C’ for 2002 and ‘J’ for 2008). The marking is done either using punches or laser marking machine.

Standards of Weights and Measures Enforcement Act, 1985:

The Standards of Weights and Measures Enforcement Act, 1985 regulates the classes of weights and measures manufactured, sold, distributed, marketed, transferred, repaired or used and the classes of users of weights and measures. The Act was passed with a view to regulating and modernizing the standards used in India based on the

metric system. The units of weight which are sought to be used in day to day trade are required to be periodically inspected and certified by the designated authorities under this act for their accuracy.

Consumer Protection Act, 2019 and Consumer Protection (E-Commerce) Rules, 2020 (“COPRA”)

The COPRA will repeal the existing Consumer Protection Act, 1986, and shall come into force on such date as the Central Government may, by notification, appoint. The Consumer Protection Act, 1986 provides a mechanism for the consumer to file a complaint against a service provider in cases of unfair trade practices, restrictive trade practices, deficiency in services, price charged being unlawful and food served being hazardous to life. It also places product liability on a manufacturer or product service provider or product seller, to compensate for injury or damage caused by defective product or deficiency in services. It provides for a three tier consumer grievance redressal mechanism at the national, state and district levels. Non-compliance of the orders of the redressal commissions attracts criminal penalties. The COPRA will, inter alia, introduce a Central Consumer Protection Council to promote, protect and enforce the rights of consumers executive agency to provide relief to a class of consumers. The COPRA has brought e-commerce entities and their customers under its purview including providers of technologies or processes for advertising or selling, online market place or online auction sites. The COPRA also provides for referring the disputes to mediation for early settlement of the disputes between the parties and also prescribes the offences and the penalties for such offences.

Phased implementation of Unified Payments Interface

SEBI has issued a ***UPI Circulars*** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

BASIS OF ALLOTMENT

Allotment will be made in consultation with the SME Platform of BSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth hereunder:

- 1) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Shares applied for).
- 2) The number of Shares to be allocated to the successful Applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- 3) For applications where the proportionate allotment works out to less than 6,000 equity shares the allotment will be made as follows:
 - i. Each successful Applicant shall be allotted 6,000 equity shares; and
 - ii. The successful Applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- 4) If the proportionate allotment to an Applicant works out to a number that is not a multiple of 6,000 equity shares, the Applicant would be allotted Shares by rounding off to the nearest multiple of 6,000 equity shares subject to a minimum allotment of 6,000 equity shares.

- 5) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Applicants in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 6,000 Equity shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Draft Prospectus.
- 6) Since present issue is a fixed price issue, the allocation in the net offer to the public category in terms of Regulation 253(2) of the SEBI (ICDR) Regulations, 2018 shall be made as follows:
 - a) Minimum fifty percent (50%) To Retail Individual Investors; and

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effect from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules.
