SUMMARY OF INDUSTRY

Domestic Scenario

The Indian steel industry has entered into a new development stage, post de-regulation, riding high on the resurgent economy and rising demand for steel.

- Rapid rise in production has resulted in India becoming the 2nd largest producer of crude steel during 2018 and 2019 (prov), from its 3rd largest status in 2017. The country was also the largest producer of Sponge Iron or DRI in the world and the 3rd largest finished steel consumer in the world after China & USA in 2019 (prov.)
- In a de-regulated, liberalized economic/market scenario like India the Government’s role is that of a facilitator which lays down the policy guidelines and establishes the institutional mechanism/structure for creating conducive environment for improving efficiency and performance of the steel sector.
- In this role, the Government has released the National Steel Policy 2017, which has laid down the broad roadmap for encouraging long term growth for the Indian steel industry, both on demand and supply sides, by 2030-31. The Government has also announced a policy for providing preference to domestically manufactured Iron & Steel products in Government procurement.

- 1. We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.**

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Any change in the buying pattern of our customers can adversely affect the business of our Company. The loss of or interruption of work by a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, or if we are not able to provide services on a timely basis or offer services that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

2. We are a Company with limited operating history, and therefore investors may not be able to assess our prospects on the basis of historical results.

We were incorporated as a private limited company on January 08, 2015. Further, our Company had on June 10, 2019, altered the main object clause of its Memorandum of Association vide shareholders' resolution, to enable it to pursue the business of trading in metals. As on date we do not have significant operating history, and owing to the same it may be difficult to evaluate our current or future prospects on the basis of historical results. Our past performance should not be construed as an indication of our future performance. For details regarding the business and financial information, please refer to the chapter titled "**Business Overview**" beginning on page 73 of this Draft Prospectus. Given our limited operating history in the business in which we operate, there will be only limited information based on which the business and our current or future prospects can be evaluated and investment decision be made.

3. We do not own registered office and the godown which is used by us currently.

Our registered office is owned by Mrs. Kiran Mittal, Director and member of the Promoters' Group. She had, vide letter dated October 03, 2019, granted our Company to use a part of the said office premises, as our Registered Office.

Further, the premises used by us as our godown is being used in terms of Rent Agreement dated August 26, 2020. In the event, the permission to use and/or Rent Agreement under which we occupy the aforementioned premises or certain terms and conditions that are unfavourable to us are imposed on us in relation to the afore referred to premises, or if we are otherwise unable to occupy such premises, we may suffer a disruption in our operations, which could have an adverse effect on our business and financial results.

4. Our operations are significantly located in the Delhi region and failure to expand our operations may restrict our growth and adversely affect our growth.

Currently, our office is situated in Delhi and we are carrying our business mainly with market players from Delhi itself. Hence, our revenues are generated from operations in this region only. In the event that demand for our products and services in general reduces or stops due to any reason including political discord or instability or change in policies of State, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating region could impact our future revenues.

5. Our Company may have potential Conflicts of interest with Companies engaged in similar line of business in which our promoters have substantial shareholding.

Our Promoters have interests in other companies viz. Delta Industrial Resources Limited and Ispatika International Limited, being promoter group entities in terms of definition of Promoter Group, provided under Regulation 2(1)(pp) of SEBI ICDR Regulations. These entities are engaged in similar line of business and we face the risk of competition from these companies. For details please refer to the Chapter titled "**Our Management**" and "**Our Promoter**" on pages 84 and 96 respectively of this Draft Prospectus. Further, our Company has not entered into any non-compete agreement with the entities mentioned hereinabove and hence there can be no assurance of any conflict of interests which may arise in allocating or addressing business opportunities and strategies amongst our Company and our promoter group entities in circumstances where our interests differ from theirs. In cases of conflict, our Promoter may favour other Companies in which our Promoter has an interest. Hence, conflict of interest may occur between our business and the businesses of our Group entity which could have an adverse effect on our business, financial condition, results of operations and prospects.

Management Perception - Our Promoter is planning to restructure the business model of M/s Ispatika International Limited and carry on business other than trading in Iron and Steel.

6. The prices we are able to obtain for our products that we trade depend largely on prevailing market prices.

The price of the products traded by us has a significant impact on our profits. Some of our core products such as Iron and Steel have been subject to price fluctuations due to domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. As a result, any

fluctuation in prices could have a material adverse effect on our Company and our results of operations.

7. The Proposed objects of the issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

The objects of the issue for which the funds are being raised have not been appraised by any bank or financial institution. In absence of such independent appraisal, the requirement of funds raised through this Issue, as specified in the Chapter titled “Objects of the Issue”, are based on our Management’s estimates and internal research. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

8. Our Company has incurred losses during the last financial year. Such financial losses sustained by us in the most recent financial year, may not be perceived positively by external parties such as investors, clients, customers, bankers etc, which may effect our credibility and business operations.

Owing to the Covid-19 Pandemic, our business operations were impacted, which resulted in our Company incurring loss in the last financial year (FY 2019-20). The financial loss in the most recent financial year may not be perceived positively by external parties such as investors, clients, customers, bankers etc, which may effect our credibility and business operations. The brief details of our profitability during the last 3 financial years is provided below:

11. Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.

For the year ended March 31, 2021, our top 09 clients account for 100% of our sales. The loss of our major customers or a decrease in the volume of products sourced from us may adversely affect our revenues and profitability. We cannot assure you that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our operations and profitability.

12. Metropolitan Stock Exchange of India Limited, had in past levied penalty on one of the Companies, being classified as Promoter Group in terms of Regulation 2(1)(pp) of the SEBI ICDR Regulations.

Metropolitan Stock Exchange of India Limited (“MSEI”), had vide its email dated July 25, 2019 levied penalty of Rs. 25.28 Lakh on Rita Finance and Leasing Limited (“RFL”), being a Company classified as Promoter Group in terms of Regulation 2(1)(pp) of the SEBI ICDR Regulations, in connection with the bonus issued made by RFL during the year 2019. RFL had announced a bonus issue during February 2019. The in-principle approval for the same was granted by MSEI on March 28, 2019. However, the formalities regarding listing and trading approvals, could not be completed within the time prescribed under Regulation 295 of the SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018. Accordingly, fine of Rs. 25.28 Lakhs was levied on RFL in terms of SEBI Circular No. CIR/CFD/DIL/57/2017 dated June 15, 2017. RFL had made payment w.r.t. the fine levied as aforesaid on July 25, 2019 and has completed all the formalities w.r.t. listing and trading of the Equity Shares issued through bonus on July 25, 2019. As on date, no dues are pending against RFL for the said non-compliance. Such non compliances by the companies belonging to the same group, may be viewed negatively by the investors.

13. We have in the past entered into related party transactions and may continue to do so in the future

We have entered into transactions with our Promoter and other related parties. For a list of related parties, please see the chapter titled “**Restated Financial Information - Annexure VIII - Restated Statement of Related Party Transaction**” beginning on page 129 of this Draft Prospectus. While we believe that all such transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise.

14. We have not yet applied for registration of our name and logo and we do not own legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.

We have not yet applied for registration of our name and logo under the provisions of the Trademarks

Act, 1999 and do not own used in our communications and other operations as on date. As such, we do not enjoy the statutory protections accorded to a registered trademark or logo as on date. There can be no assurance that we will be able to register the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our logo in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

15. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

16. The success of our business operations is dependent on the knowledge and experience of our Promoters and Directors as well as our ability to attract and retain them.

Our success depends heavily upon the continuing services of Mr. Pawan Kumar Mittal, our Promoter and Director and his experience and vision has played a key role in obtaining our current market position. Mr. Pawan Kumar Mittal plays a pivotal role in operational area. We believe that our relation with our Promoter, who has rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoter and our success depends upon the continuing services of our Promoter who has been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoter's family has also promoted other companies / firms / ventures and may continue to do so. If the promoter's family diverts their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our Promoter or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

17. We depend on the accuracy and completeness of information about customers and counterparties and any misrepresentation, errors in or incompleteness of such information could cause our business to suffer.

In deciding whether to extend credit or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the credit worthiness, we do not obtain any independent support from credit information companies or credit bureaus and/or independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

18. All of our product verticals are extremely competitive segments and we face risk of competition affecting our margins and profitability as we scale our operations.

Our purchase and sales models include various intermediaries who may connect with our competitors and share details of the specialties of our products or our sourcing processes etc. We may not be able to protect our trade secrets and may not be able to detect the same as well. We have not entered into any non-disclosure agreements with our intermediaries and thus our efforts towards marketing of our products may be leaked to other players in the market. This may affect the demand and exclusivity of our products and make us subject to fierce competition thereby adversely affecting our business, financial condition and results of operations.

19. Failure to procure inventory could have an adverse effect on our net sales, profitability and cash flow.

Our Company works on a model wherein the inventory/goods are procured by us based on the demand or customer requirement. Our inability to procure the inventory/goods in timely manner will adversely affect our net sales, profits and cash flow. Further, our inability to supply the inventory/goods in timely manner to our customers, may result in loss of business from the said customer and thereby decrease in our net sales and profitability.

20. Our success depends largely upon the knowledge and experience of our Promoters and other Key Managerial Personnel. Any loss of our key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.

Our Promoter Mr. Pawan Kumar Mittal has several years of experience in the trading business. Further, he has strong network with the trading community of Delhi. He has a circle of business associates who are into trading business. Owing to his already existing network, we are able to enter into the business of trading in metals. Our Company depends on the management skills and guidance of our Promoter for marketing and growth of our business. Our Promoter, along with our key managerial personnel, who form an integral part of our Company, have over the years built relations with suppliers, customers and other key stakeholders associated with our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our key managerial personnel are unable or unwilling to continue in his / her

present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. Further, since the demand for the key managerial personnel is very robust, in order to retain them, our Company may be required to offer them higher compensation packages by way of higher pay and more perquisites. This may adversely affect our business, financial condition and results of operations.

21. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than Rs. 10,000.00 Lakh there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

22. We have not made any alternate arrangements for meeting our regular working capital requirements. If our operations do not generate the necessary cash flow, our working capital requirements may negatively affect our operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our working capital requirements. We meet our working capital requirements through internal accruals. Any shortfall in internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations.

23. We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of confidential information. Such misconduct could result in unacceptable business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

24. Our Company has no insurance coverage and we are not protected against all material hazards, which may adversely affect our business, results of operations and financial condition.

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be compensated by insurance as our company has no insurance coverage. If our Company suffers a large uninsured loss, our business, financial condition and results of operations may be adversely affected.

25. Delays or defaults in customer payments could result in a reduction of our profits and cash flows.

We often commit resources to orders prior to receiving advances or other payments from customers in amounts sufficient to cover expenditures on orders as they are incurred. We may be subject to working capital shortages due to delays in customer payments. If the customer defaults in their payments on an order, or cancel their orders for which we have devoted significant resources or incurred expenditure, it could have a material adverse effect on our business, financial condition, results of operations and cash flows and could cause the price of our equity shares to decline. Hence, any last minute cancellations would also run the risk of not being able to sell those products to another customer. These events could have a material adverse effect on our revenues, results of operations and cash flows.

26. Our Promoter and Directors may have interest in our Company, other than reimbursement of expenses incurred or remuneration.

Our Promoter and Directors may be deemed to be interested to the extent of the Equity Shares held by them, or their relatives or our Group Entities, and benefits deriving from their directorship and shareholding in our Company. For further details, please refer to the chapters titled "Our

Promoter”, beginning on page 96 respectively and “Restated Financial Information - Annexure VIII - Restated Statement of Related Party Transaction” on page 129 of this Draft Prospectus.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

27. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “Objects of the Issue” on page 54 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

28. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public-listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which requires us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

29. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

30. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. NNM Securities Private Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price

at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the Section titled “General Information” on page 38. of this Draft Prospectus.

31. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

32. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchange, we are required to refund all the monies collected to investors.

33. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of sale of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

34. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange will be subject to capital gains tax in India and also would also be subject to Securities Transaction Tax (“STT”). STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

For more details, please refer to “Statement of Special Tax Benefits” on page 62 of this Draft Prospectus.

35. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

36. Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements.

Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax

at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

EXTERNAL RISK FACTORS

37. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

38. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, the Companies Act 2013, several provisions of which (including rules issued thereunder) contain significant changes to Indian company law, including in relation to the issue of capital by companies, related party transactions, corporate governance, audit matters, shareholder class actions, restrictions on the number of layers of subsidiaries and corporate social responsibility. Compliance with such requirements may require significant financial and administrative resources, and any failure to comply may adversely affect our business and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. If a determination is made that we were in violation of such laws, rules or regulations, including conditions in the permits required for our operations, we may have to pay fines, modify or discontinue our operations, incur additional operating costs or make capital expenditures and our business, financial positions, results of operations or cash flows could be adversely affected. For details on the laws currently applicable to the Company kindly refer the chapter titled “Key Industry Regulations” beginning on page 77 of this Draft Prospectus.

39. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India affect the cost and prices of the products we trade in and therefore demand for such product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

40. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and Steel industry contained in this Draft Prospectus.

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and the Steel industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “Industry Overview” beginning on page 68 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to

statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

41. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in a developing phase, as compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

42. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

43. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

44. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

45. A slowdown in economic growth in India and globally could cause our business to suffer.

We are highly dependent on prevailing economic conditions in India and globally and our results of operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;
- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally,

- including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. Specifically, it has been seen that in our industry, that general correlation exists between demand for pharmaceuticals and per capita income, and therefore any slowdown in per capita income would adversely affect the Indian pharmaceutical market, as well as our business. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

46. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

47. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

48. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

49. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factor The extent and severity of these natural disasters determines their effect on the Indian economy. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

Overview of the Economy

Global headwinds and challenges in the domestic financial sector moderated the growth of Indian economy in 2019-20. The real GDP growth moderated to 5.0 percent in 2019-20 as compared to 6.8 percent in 2018-19. Despite a temporary moderation in the Gross Domestic Product (GDP) growth in 2019-20, the fundamentals of Indian economy remain strong and GDP growth is expected to rebound from the first quarter of 2020-21. Fiscal situation remained close to the consolidation path and consumer price inflation was within the targeted limits set by the monetary policy committee of Reserve Bank of India (RBI). Despite continuing sluggishness in global demand the Current Account Deficit (CAD) narrowed to 1.5 percent of GDP in first half (H1) of 2019-20 from 2.1 percent in 2018-19. Global confidence in the Indian economy improved as reflected in growing inflows of net Foreign Direct Investment (FDI) and an all-time high accumulation of foreign exchange reserves of US\$ 457.5 billion as in end December, 2019. India moving up by 14 positions to 63rd rank in 2019 World Bank's Ease of Doing Business 2020 Report, has among others, contributed to the increase in global confidence in Indian economy. India has emerged as an important player in the world on the back of high GDP growth and announcement/implementation of critical measures in the current year and last few years.

The measures announced/implemented in 2019-20 include- hike in minimum support price of agricultural crops for 2019-20; reduction in corporate tax rate; policy initiatives for development of textiles & handicrafts and electric vehicles; outreach programme for growth, expansion and facilitation of micro, small and medium enterprises; incentives for start-ups in India; scheme to provide a one-time partial credit guarantee to public sector banks (PSBs) for purchase of pooled assets of financially sound non-banking financial companies (NBFCs); recapitalization of public sector banks, relaxation of external commercial borrowing guidelines for affordable housing; realty fund worth Rs. 25,000 crore for stalled housing projects; additional tax deduction of interest for affordable housing; merger of 10 public sector banks into four entities; revised Priority Sector Lending (PSL) norms for exports; and streamlining of many labour laws at the central government level. Apart from this, various steps were taken to boost manufacturing; employment generation; financial inclusion; digital payments; improving ease of doing business via schemes such as Make in India, Skill India and Direct Benefit Transfer. Government has also announced the National Infrastructure Pipeline (NIP) of projects worth ` 102 lakh crore, which will commence in phases from 2020-21 to 2024-25.

GDP Growth

As per the first advance estimates of annual national income, the real GDP growth is estimated at 5.0 percent in 2019-20, as compared to the provisional estimates of 6.8 percent in 2018-19. Correspondingly, the real growth of gross value added (GVA) is estimated at 4.9 percent in 2019-20 as compared to 6.6 percent in 2018-19. This moderation in GVA growth in 2019-20 (AE) as compared to 2018-19 is attributed to all sectors on the supply side

save public administration, defence and other services. From the demand side private final consumption expenditure, public final consumption expenditure and net exports have driven the growth GDP in 2019-20 as compared to 2018-19. Gross fixed capital formation on the other hand has slowed the growth of GDP.

Industry

The Index of Industrial Production (IIP) grew at 0.6 percent during April-November 2019 as compared to 3.8 percent in 2018-19. Mining, manufacturing and electricity sectors in IIP grew at (-)0.1 percent, 0.9 percent and 0.8 percent respectively during April November 2019. The full year growth in these three sectors in 2018-19 was 2.9 percent, 3.9 percent and 5.2 percent respectively. Under the use-based categories growth in April-November of 2019-20 stood for primary goods at 0.1 percent, capital goods at (-) 11.6 percent, intermediate goods at 12.2 percent and infrastructure/construction goods at (-) 2.7 percent. The corresponding full year growth of these categories in 2018-19 was 3.5 percent, 2.7 percent, 0.9 percent and 7.3 percent respectively.

The eight core infrastructure supportive industries, viz. coal, crude oil, natural gas, refinery products, fertilizers, steel, cement and electricity that have a total weight of nearly 40 percent in the Index of Industrial Production (IIP) remained stagnant during April-November 2019 as compared to a growth of 4.4 percent in 2018-19. The production of fertilizers, steel, and electricity increased by 4.0 percent, 5.2 percent, 0.7 percent respectively during April-November 2019 while the production of coal, crude oil, natural gas, refinery products and cement contracted by 5.3 percent, 5.9 percent, 3.1 percent, 1.1 percent and 0.02 percent respectively during the same period.

Prospects

The growth of the economy appears to have bottomed out and is expected to pick up in 2020-21. The prospects for Indian economy for the year 2020-21 need to be assessed in the light of emerging global and domestic challenges and opportunities. Major challenges for the economy arising from the external front are geo-political tensions in Middle East and rising crude oil prices due to supply disruption which may decelerate growth and increase inflation. Challenges in the domestic front are revival of investments and savings. The positive prospects for the economy are continuation of structural reforms that will revive growth and expected normalization of credit flow as investment picks up induced by a cut in the corporate tax rate and anticipated transmission of repo rate cuts earlier implemented by the Monetary Policy Committee. Global economic growth is expected to pick up in 2020 which could also support India's growth. In view of a positive outlook on economic rebound the nominal growth of the economy is expected to be 10 percent in the financial year 2020-21.

An Overview of Steel Sector

Global Scenario

- In CY 2019, the world crude steel production reached 1870 million tonnes (mt) and showed a growth of 3.4% over CY 2018.
- China remained world's largest crude steel producer in same period (996 mt) followed by India (111mt), Japan (99mt) and the USA (88mt).
- Per capita finished steel consumption in 2018 was 224.5 kg for world and 590.1 kg for China (Source: World Steel Association). The same for India was 73.3 kg in 2018 (Source: JPC) and 75.7 kg (prov) in 2019. The per capita consumption of India in 2018-19 was 74.1 kg and that in 2019-20 was 74.6 kg (prov.) (Source: JPC).
Note: World Steel Association report, Data Provisional. Data on per capita consumption yet to be released for 2019 by World Steel Association. For India, figures are quoted based on data released by JPC.

Domestic Scenario

The Indian steel industry has entered into a new development stage, post de-regulation, riding high on the resurgent economy and rising demand for steel.

- Rapid rise in production has resulted in India becoming the 2nd largest producer of crude steel during 2018 and 2019 (prov), from its 3rd largest status in 2017. The country was also the largest producer of Sponge Iron or DRI in the world and the 3rd largest finished steel consumer in the world after China & USA in 2019 (prov.)

- In a de-regulated, liberalized economic/market scenario like India the Government's role is that of a facilitator which lays down the policy guidelines and establishes the institutional mechanism/structure for creating conducive environment for improving efficiency and performance of the steel sector.
- In this role, the Government has released the National Steel Policy 2017, which has laid down the broad roadmap for encouraging long term growth for the Indian steel industry, both on demand and supply sides, by 2030-31. The Government has also announced a policy for providing preference to domestically manufactured Iron & Steel products in Government procurement.

Production

Steel industry was de-licensed and de-controlled in 1991 & 1992 respectively.

- India was the 2nd largest producer of crude steel in the world in 2019 (prov.).
- In 2019-20, production of total finished steel (alloy/stainless + non alloy) was 102.059 million tonnes (mt) (prov.).
- Production of Pig Iron in 2019-20 was 5.507 mt (prov.), a decline of 14.1% over last year.
- India was the largest producer of Sponge Iron in the world in 2019 (prov.). The coal based route accounted for 86% of total Sponge Iron production (37.143 mt) in the country in 2019-20 (prov.).
- Data on production of Pig Iron, Sponge Iron and Total Finished Steel (alloy/stainless + non-alloy) are given below for last five years:

Indian steel industry: Production (in million tonnes)

Demand - Availability

Industry dynamics including demand - availability of iron and steel in the country are largely determined by market forces and gaps in demand-availability are met mostly through imports.

- Interface with consumers exists by way of meeting of the Steel Consumers' Council, which is conducted on regular basis.
- Interface helps in redressing availability problems, complaints related to quality.

Steel Prices

Price regulation of iron & steel was abolished on 16.1.1992. Since then steel prices are determined by the interplay of market forces.

- Domestic steel prices are influenced by trends in raw material prices, demand - supply conditions in the market, international price trends among others.
- As a facilitator, the Government monitors the steel market conditions and adopts fiscal and other policy measures based on its assessment. Currently, GST of 18% is applicable on steel and there is no export duty on steel items.
- A Steel Price Monitoring Committee has been constituted by the Government with the aim to monitor price rationalization, analyze price fluctuations and advise all concerned regarding any irrational price behaviour of steel commodity.
- To avoid any distortion in prices in view of ad-hoc and rising imports, the Government has taken several steps including raising import duty and imposed a gamut of measures including anti-dumping and safeguard duties on a host of applicable iron and steel items. In a further move to curb steel imports, the Indian government banned the production and sale of steel products that does not meet Bureau of Indian Standard (BIS) approval and to check the sale of defective and sub-standard stainless steel products used for making

utensils and various kitchen appliances, it issued the Stainless Steel (Quality Control) Order, 2016 for products used in making utensils and kitchen appliances, that will help filter imports of the metal.

Imports

Iron & steel are freely importable.

- Data on import of total finished steel (alloy/stainless + non alloy) is given below for last five years:

Indian steel industry : Import of Total Finished Steel (in million tonnes)

Source: Joint Plant Committee; *prov.					

Exports

Iron & steel are freely exportable.

Opportunities for growth of Iron and Steel in Private Sector

The New Industrial Policy Regime

The New Industrial policy opened up the Indian iron and steel industry for private investment by (a) removing it from the list of industries reserved for public sector and (b) exempting it from compulsory licensing. Imports of foreign technology as well as foreign direct investment are now freely permitted up to certain limits under an automatic route. Ministry of Steel plays the role of a facilitator, providing broad directions and assistance to new and existing steel plants, in the liberalized scenario.

The Growth Profile

(i) Steel : The liberalization of industrial policy and other initiatives taken by the Government have given a definite impetus for entry, participation and growth of the private sector in the steel industry. While the existing units are being modernized/expanded, a large number of new steel plants have also come up in different parts of the country based on modern, cost effective, state of-the-art technologies. In the last few years, the rapid and stable growth of the demand side has also prompted domestic entrepreneurs to set up fresh greenfield projects in different states of the country.

Crude steel capacity was 142.98 mt in 2019-20 (prov.), up by 0.5% over 2018-19 and India, which emerged as the 2nd largest producer of crude steel in the world in 2019, as per data released by the World Steel Association, has to its credit, the capability to produce a variety of grades and that too, of international quality standards.

(ii) **Pig Iron:** India is also an important producer of pig iron. Post-liberalization, with setting up several units in the private sector, not only imports have drastically reduced but also India has turned out to be a net exporter of pig iron. The private sector accounted for 89% of total production of pig iron (5.507 mt) in the country in 2019-20 (prov.).

(iii) **Sponge Iron:** India, world's largest producer of sponge iron (2019), has a host of coal based units located in the mineral-rich states of the country. Over the years, the coal based route has emerged as a key contributor and accounted for 86% of total Sponge Iron production in the country during 2019-20 (prov.). Capacity in Sponge Iron making too has increased over the years and stood at 37.143 mt (2019-20) (prov.).

Appendix

1. i) As per the reporting system followed by Joint Plant Committee (JPC), which is authorized by the Ministry of Steel to collect and disseminate data on the domestic iron and steel industry, the said system prevailing till 2013-14 had (a) reported on the concept of production for sale and (b) featured the "Main Producers" and "Majors and Other Producers" as the two leading industry classifications at that time. However, effective from 2017-18, with the approval of the Ministry of Steel and following rounds of interaction with industry experts, the JPC reporting system had changed, in sync with the changing dynamics and mode of operation of steel industry and partly also in response to changes in the policy environment. Under the new system, production for sale has been replaced by Gross Production (or simply Production) with revision in past five years data as well. Secondly, with industry classification system getting dissolved vide guidelines issued by the Ministry of Steel in May 2016, the present JPC reporting system features (a) the composite group of "SAIL, RINL, TSL, ESL, JSW, JSPL" and that of "Other Producers".
1. ii) The issue of data collection and reporting by JPC was reviewed in details at various forum of interaction sessions with industry representatives as well as Ministry of Steel and it was felt that given the structural changes in the domestic steel industry as well as the present input-output dynamics, the data reporting system followed by JPC should undergo some modifications. The following modifications were made in JPC reporting system from 2018-19:-
 1. a) It introduces the method of Crude Steel to HR equivalent, covering only those items which contribute directly to Finished Steel Production starting from Crude Steel/Semis Production.
 2. b) It thus separates out Downstream and Value-Added Product Basket (CR/GP etc) which is reported separately. There is, however, no aggregate numbers of these parameters for the items in this Basket.
 3. c) Also, data on imports, exports, stock variation and consumption of items featured in this Basket are available with JPC and are reported accordingly.
 4. d) Steel Consumption is arrived at by standard procedure of adjusting Finished Steel Production with Net Imports and Stock Variation, computed by using all items across the value chain, so as to ensure no loss of data.
 1. e) Per capita steel consumption is computed by using steel consumption numbers as arrived at above and population for the country as reported by Central Statistical Organisation (CSO), Ministry of Statistics and Programme Implementation.

However, it may be noted, that all throughout such changes, the system of reporting by JPC continues to be for statistical use only.

Depreciation and Amortization

Depreciation on tangible assets is provided on “Written down Value Method” over the useful lives specified in Schedule II of Companies Act, 2013. In respect of additions to /deletions from the Tangible Assets, on prorata basis with reference to the date of addition/deletion of the assets. Intangible assets are to be amortized over the period of 5 years or such period as may be decided by the management after due consideration of economic benefits over its useful life.

e. Impairment of tangible and intangible assets

The carrying amount of Assets are reviewed at each Balance Sheet date if there is any indication of impairment based on internal/ external factors or an annual impairment testing for an asset is required. An Impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount.

The recoverable amount is the greater of the asset’s net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

f. Borrowing Cost

Borrowing costs that are directly attributable to the acquisition of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalised as part of the cost of that asset till the date it is put to use. Other borrowing costs are recognised as an expense in the period in which they are incurred.

g. Valuation of Inventories

Finished goods and stock in process are valued at lower of cost or net realizable value. Cost is measured at First-in-First-out basis and it includes cost of conversion and other expenses incurred in bringing the goods to their location and condition.

h. Earnings per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all diluting potential equity shares.

i. Employee benefits

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' service up to the end of the year and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligation in the balance sheet.

Defined Contribution Plan: The Company operates defined benefit plans for its employees, viz., gratuity liability. The costs of providing benefits under this plan is determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out for this plan using the projected unit credit method. Actuarial gains and losses for defined benefit plan is recognized in full in the period in which they occur in the statement of profit and loss.

j. Cash and Cash Equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand, INR Value of Foreign Currency in hand, fixed deposits with banks, which are short term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

k. Taxes on Income

Tax expense comprises both current and deferred taxes. Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The Company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Minimum Alternate Tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal Income Tax during the specified period.

l. Provisions and Contingent Liabilities

a. Provisions

A Provision is recognized, if as a result of past event the company has a present obligation that is reasonably estimable and it is probable that an outflow of economic benefits will be required to settle the Obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

b. Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is

not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company has provided requisite disclosure related to contingent liabilities in its restated financial statements.

SIGNIFICANT DEVELOPMENTS SUBSEQUENT TO MARCH 31, 2020 THAT MAY AFFECT OUR FUTURE RESULTS OF OPERATIONS

Impact of Covid-19

An outbreak of Covid-19 was recognized as a pandemic by the WHO on March 11, 2020. In response to the Covid-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Due to Covid-19, our business operations during initial few months of FY 2020-21 is completely washout. Our company is taking necessary steps to restart the business operations in gradual manner. However, financial results for FY 2020-21 as a whole may be severally impacted due to the impact of Covid-19. Further, India has experienced second wave of infections that has significantly increased the number of persons impacted by COVID-19 during April- June 2021. The Government of India and state governments in India have re-imposed state-wise partial lockdowns and other more restrictive measures in an effort to stop the resurgence of new infections and new variants of the virus. This has affected the business operation of our company during Q1 of FY 2021-22.

Except the impact on account of Covid-19 disclosed as above, no circumstances have arisen since the date of the last Restated Financial Statements as disclosed in this Draft Prospectus which materially and adversely affects or is likely to affect, our trading or profitability, or the value of our assets or our ability to pay our liabilities within the next 12 months of the date of the last Restated Financial Statements as disclosed in this Draft Prospectus. Except the impact on account of Covid-19, there is no development subsequent to March 31, 2021 that we believe is expected to have a material impact on the reserves, profits, earnings per share and book value of our Company.

FACTORS AFFECTING OUR BUSINESS, RESULTS OF OPERATIONS AND FINANCIAL CONDITION

The business of our Company is subject to various risks and uncertainties including those discussed in section titled “Risk Factors” on page 21 of this Draft Prospectus. Our financial condition and results of operations are affected by various factors of which the following are of particular importance:

- We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.
- Not entering into any long -term contracts with any of our customers and typically operating on the basis of purchase order basis could adversely impact our revenue and profitability
- Present concentration of our Business Operation in Delhi Region. Failure to expand our operations may restrict our growth.
- Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.
- Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.
- Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.
- A slowdown in economic growth in India and globally could cause our business to suffer.

Our Significant Accounting Policies: Our significant accounting policies are described under Chapter titled “Restated Financial Information” on page 101 of this Draft Prospectus.

Change in accounting policies in previous 3 (three) years: Except as mentioned under Chapter titled “Restated Financial Information” on page 101 of this Draft Prospectus, there has been no change in accounting policies in last 3 (three) years.

However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.
