In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

2. ***Our business is dependent and will continue to depend on our manufacturing facility, and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations or strikes, work stoppages or increased wage demands by our employees that could interfere with our operations could have an adverse effect on our business, financial condition and results of operations.***

We have one manufacturing facility situated at Meerut, two warehouses situated at Vasai, Maharashtra and Tiruppur, Tamil Nadu, respectively and one branch office situated at Tiruppur, Tamil Nadu and one virtual office situated at Bengaluru. Our business is dependent upon our ability to manage our manufacturing facility, including productivity of our workforce, which are subject to various operating risks, including those beyond our control, such as the breakdown, failure of equipment or industrial accidents, severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery, our equipment, our reactors, our automation systems, our IT systems or any other part of our manufacturing processes or systems (together, our “**Manufacturing Assets**”) may entail significant repair and maintenance costs and cause delays in our operations. However, we cannot assure you that we shall not experience any malfunction or breakdown of our Manufacturing Assets in the future. If we are unable to repair Manufacturing Assets in a timely manner or at all, our operations may need to be suspended until we procure the appropriate Manufacturing Assets to replace them. Further, there can be no assurance that in future, if we suffer accidents or if we are subject to shutdowns due to malfunctions, that we would be able to recover insurance costs covering all losses. Any uninsured losses in the future would adversely impact our results of operations and profitability. Additionally, any regulatory notices received indicating shortfall in quality or inadequacies of quality control measures or in our products could require us to make unplanned shutdowns to our manufacturing facilities in the future, resulting in losses and operational difficulties. In

addition, we may be required to carry out planned shutdowns of our facilities for maintenance, statutory inspections, customer audits and testing, or may shut down certain facilities for capacity expansion and equipment upgrades.

Success of our operations depend on availability of labour and good relationships with our labour force. As of the date of this Draft Prospectus, our employees are not members of any organised labour unions. Strikes and lockouts as a result of disputes with our labour force may adversely affect our operations. While we have not had instance of strikes, lockouts or labour disputes in the past, we cannot assure you that we shall not experience any strikes or lockouts on account of labour disputes in the future. Such events could disrupt our operations and may have a material adverse effect on our business, financial condition and results of operations. In addition, we also may face protests from local citizens at our existing facilities or while setting up new facilities, which may delay or halt our operations.

Further, we may be subject to manufacturing disruptions due to contraventions by us of any of the conditions of our regulatory approvals, which may require our manufacturing facility to cease, or limit, production until the disputes concerning such approvals are resolved.

Although we have not experienced any significant disruptions at our manufacturing facility in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shutdown of our operations or the under-utilization of our manufacturing facility, which in turn may have an adverse effect on our business, financial condition and results of operations.

3. *Our existing manufacturing facility are concentrated in a single region i.e., Meerut, Uttar Pradesh and the inability to operate and grow our business in this particular region may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.*

Our manufacturing unit is located at Meerut, Uttar Pradesh which exposes us to risks of concentration. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Although in the past we have not experienced instances of operating risks, however our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing facility could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Further, continuous addition of industries in and around our manufacturing facility without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business.

4. *We do not have long-term agreements with suppliers for our raw materials and an increase in the cost of, or a shortfall in the availability or quality of such raw materials could have an adverse effect on our business, financial condition and results of operations.*

Our business is significantly affected by the availability, cost and quality of the raw materials and components which we need to develop our products. Our principal raw materials include includes fabric, elastic, zips, elastic adjuster, buckles, hooks, threads cones, fusing films, perlon tape, mobilon tape, plastic boning, stickers, round bra pad, self-adhesive film, and sliders etc. We usually do not enter into long-term supply contracts with any of our raw material suppliers. Our raw materials are majorly procured in the domestic market from Delhi, Gujarat, Haryana, Jammu & Kashmir, Karnataka, Maharashtra, Punjab, Tamil Nadu, Telangana, Uttar Pradesh, Uttarakhand, Rajasthan and in the international market we procure our raw materials from China. We are dependent on external suppliers for certain of the materials /components. The prices and supply of these and other raw materials and components depend on factors beyond our control, including general economic conditions, competition, production levels, transportation costs and duties. If, for any reason, our suppliers of raw materials and components should curtail or discontinue their delivery of such materials to us in the

quantities we need or at prices that are competitive or expected by us, our ability to meet the requirements of our customers could be impaired and our earnings and business could suffer. Further, we may not be able to pass on any increase in the cost of manufacturing our products to our customers, which may adversely affect our results of operations. Additionally, we do not have control over the quality of raw materials and components they supply, which may adversely affect the quality and workmanship of our products. For the financial year March 31, 2023, 2022 and 2021, our cost of material consumed was ₹1,915.79 Lakhs, ₹1,259.19 Lakhs and ₹468.79 Lakhs, respectively, which represented 52.04%, 47.19%, and 32.57%, respectively of our revenue from operations. If we are unable to source raw materials from key suppliers in a timely manner, our production processes and results of operations may be adversely impacted. There can be no assurance that we would be able to source required quantities or qualities of raw materials in a cost-effective manner in future periods. In addition, we usually do not enter into long-term supply contracts with any of our raw material suppliers and typically source raw materials from third-party suppliers under contracts of shorter period or the open market. The absence of long-term contracts at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers, which may reduce our profit margins.

We face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure raw materials from alternate suppliers in a timely fashion, or on commercially acceptable terms, may adversely affect our business, financial condition and results of operations. Purchases made from our top 10 suppliers for the financial year ended March 31, 2023, 2022 and 2021, were ₹1,678.93 Lakhs, ₹1,172.10 Lakhs and ₹470.79 Lakhs representing 89.55 %, 89.64 % and 90.44 % of our total raw material purchases for the financial year ended March 31, 2023, 2022 and 2021, respectively.

5. ***We depend on the success of our relationships with our customers. We derive a significant part of our revenue from our top 10 customers and we do not have long term contracts with these customers. If one or more of such customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.***

Of our revenue from operations for the financial year ended March 31, 2023, 2022 and 2021, our top 10 customers contributed approximately 72.03%, 73.86% and 75.97%, respectively.

Given the nature of our business, there can be no assurance that we would be able to attract new customers or reduce our dependence on any of our top customers. We expect that we will continue to be reliant on our major customers for the foreseeable future. Accordingly, any failure to retain these customers or to remain suppliers to these customers and/or negotiate and execute contracts on terms that are commercially viable, with these select customers, could adversely affect our business, financial condition and results of operations. In addition, any defaults or delays in payments by a major customer or the insolvency or financial distress by a major customer may have an adverse effect on business, financial condition and results of operations.

Cancellation by customers or delay or reduction in their orders or instances where anticipated orders fail to materialize can result in mismatch between our expectant and existing inventory levels at our unit, thereby increasing our costs relating to maintaining our inventory and reduction of our margins, which may adversely affect our profitability and liquidity. Further, we may not find any customers or purchasers for the surplus or excess capacity, in which case we would be forced to incur a loss. Further, our inability to find customers for surplus products may result in excessive inventories which may become obsolete and may be required to be written off in the future.

Additionally, our customers have high and stringent standards for product quality and quantity as well as delivery schedules. Any failure to meet our customers' expectations could result in the cancellation or non-renewal of contracts or purchase orders. There are also several factors, other than our performance that could cause the loss of a customer, which include those customers who may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their existing products with alternative products, any of which may have an adverse effect on our business, financial condition, results of operations and prospects.

6. ***Our distribution model is also based on e-retail model and we do not have any customer facing retail outlets. Lack of consumer trust in e-retail industry or in the event of lack of growth of ecommerce activities in India and Outside India, our operations may be adversely affected.***

We have PAN India presence with distributors and online sale platform spread across the country with presence in 28 states and 8 Union territories for our domestic market based on sales made for the financial year ended March 31, 2023, 2022 and 2021. In case of our distribution model for sale of our products, we have distributors spread across the country who in turn sell our products through various retailers. We follow both online and offline sales model for supply of our products and our products are registered on various online platforms such as Amazon, Ajio, Flipkart, Myntra, Nykaa Fashion, Nykaa Retail, Snapdeal and through our own website, www.dermawear.co.in. For the Fiscals 2023, 2022 and 2021 our revenue from online sales was ₹ 1,272.19 Lakhs, ₹ 901.18 Lakhs and ₹ 612.22 Lakhs which contributed

34.56%, 33.77% and 42.54%, respectively of our revenue from operations and revenue from offline sales was ₹ 2,409.26 Lakhs, ₹ 1,767.17 Lakhs and ₹ 826.90 Lakhs, respectively which contributed 65.44%, 66.23% and 57.46% respectively of our revenue from operations. Though e-retail model B2C model, offers a number of benefits such as wider reach both in geographical terms and number of people, reduced overheads, customer convenience, potential to expand invariably, etc. it also carries some inherited risks. Presently, a majority of domestic population still prefers to use traditional means of commerce to purchase products and services, especially in apparel industry through customer facing outlets. Lack of consumer trust in e-retail due to not being able to judge material's quality, size and other features may restrict our growth opportunities. Further Indian trade markets continue to be dominated by cash-based transactions due to limited banking and credit card penetration. Concerns about fraud, privacy and other related issues may discourage consumers and merchants from adopting the internet as a medium of buying of products and services. Another challenge we may face is the growth of e-commerce activities in India. We currently sell our products through our own website and various e-commerce portals. Any lack of growth of e-commerce activity in India and overseas or delayed acceptance of e-retail by consumers may adversely affect our business model and future financial performance.

Considering the present response to e-commerce industry coupled with growing internet penetration, government support, favoured demographics, e-commerce activity is expected to grow at a strong pace. We provide an online grievance facility for our customers, allowing them to communicate via a chat tool and connect with our customer care representatives through a call upon request within the chat tool. Additionally, customers can provide feedback and suggestions on our website to help us improve our services and better serve their interests.

7. *The Company may lose its revenue due to the ongoing policy of "Turn Back Cash-On-Delivery Orders" trending in the e-retail market.*

The company accomplishes its major revenue from e-retail market and does not own any outlets. We have tapped the market through major E-Commerce platforms. There has been trend in the e-retail markets for "**Turn Back Cash-On-Delivery Orders**" thereby resulting in pain at the business end of the ecommerce retail chain. If a consumer orders a product and then returns it, the Company may be liable to pay for the logistics for both ways. This may result in shrinking margins of our Company. The risk is especially high in sales made through cash on delivery (COD) mode of payment, which has been one of the defining pillars of India's ecommerce boom. Our Company generally faces return of products for multiple reasons. Though the e-commerce retailers have voiced its concerns at various forums and with e-commerce companies, there can be no assurance whether the same can be regularized or the revolution can materially benefit and favour the e-retailers. Hence, cancellations and returns pose a serious challenge and may adversely affect our financial condition and result of operations.

8. *If we fail to identify and effectively respond to changing consumer preferences and spending patterns or changing fashion trends in a timely manner, the demand for products could decrease, causing our revenue and results of operations to decline.*

The popularity and demand of products may vary over time due to changing consumer preferences, including those relating to sustainability factors such as changing fashion trends. Decline in the demand for some of the products without a corresponding increase in demand for alternative products sold through our platforms could negatively impact our revenue temporarily or permanently. These trends may also cause fluctuations in our results of operations between different periods.

The products merchandised on our website and others e-commerce portals are subject to rapidly changing trends in the fashion industry and constantly evolving consumer tastes and demands. Our success is also dependent on the ability to anticipate, identify and respond to the latest fashion trends and consumer demands and to translate such trends and demands into product offerings in a timely manner, adapt to customer preferences, and our ability to continue upgrading our platforms in a manner so as to cater to evolving consumer preferences.

Similarly, our inventory management needs to adapt quickly to evolving trends. The failure to anticipate, identify or react swiftly and appropriately to new and changing styles, trends or desired consumer preferences, to accurately anticipate and forecast demand for certain product offerings or to provide relevant and timely product offerings to list on our platforms may lead to lower sales of merchandise on our platforms, which could cause, among other things, declines in goods sold and affect our relationship with consumers. In such circumstances, we may lose consumers and market share, be required to discount certain products, all of which could have an adverse effect on our business, results of operations, financial condition, cash flows and prospects.

9. *Our business depends on the growth of online commerce industry in India and our ability to effectively respond to changing user behaviour on digital platforms.*

Online commerce is still developing in India. Although we also operate through physical stores across India through our distributors. Our revenues depend substantially on the receptiveness of Indian consumers, suppliers, sellers and advertisers to the internet as a way to conduct commerce, purchase goods and services, and carry out financial transactions.

For online revenue base to grow, consumers, sellers and suppliers must continue to adopt new and alternative ways of conducting commerce, purchase goods and services and exchanging information, such as through the internet and mobile devices, and we must hence effectively respond to changing user behaviour on such digital platforms. As the development of mobile application-based e-commerce is dynamic and subject to risk of rapid disruption driven by technology innovations, we must continuously innovate to overcome the fact that potential consumers are presented with an increasingly large number of options to choose from. Such potential growth is dependent on the overall internet penetration in India which despite recent growth, is still relatively low as compared to certain developed countries. There is no assurance that a more technologically sophisticated and reliable fixed telecommunications network or internet infrastructure will develop that would further facilitate growth of online e-commerce in India. Should the telecommunications operators not sustain or invest in expanding and upgrading the telecommunications infrastructure in India, it may impact the e-commerce sector adversely.

Other factors applicable to the industry that might prevent potential consumers from purchasing products from e-commerce platforms, including our platform, include:

- concerns about buying products online without a physical storefront, face-to-face interaction with sales personnel and the ability to physically handle and examine products;
- concerns about delayed shipments or the inconvenience and cost of returning or exchanging items purchased online;
- concerns about the security of online transactions and the privacy of personal information; and
- usability, functionality and features of online platforms

If the online commerce industry in India and in particular the online market for shapewear and fashion products does not develop and grow, our business will not grow and our results of operations, financial condition, cash flows and prospects could be adversely affected.

10. Our expansion into new product categories and business verticals and a substantial increase in the number of products offered may expose us to new challenges and more risks.

Introduction of new product categories require us to understand or make informed judgements as to consumer demands, trends and preferences. We may misjudge consumer demands, trends and preferences for new products on our platforms and face challenges in inspecting and controlling quality, third party manufacturers, regulatory requirements, handling, storage and delivery of such new products. We may also need to price aggressively in new categories to obtain traction with consumers improve brand awareness, which may not be possible in instances where a product manufacturer imposes restrictions on our ability to offer such products at a discount and which would adversely affect our gross margins.

We may also make substantial investments in launching such new products on our platform Expansion of our offerings or business verticals may also strain our management and operational resources. It may also be difficult for us to achieve profitability with new products and as a result, our profit margins may be lower than we anticipate, which would adversely affect our results of operations. We cannot assure you that we will be able to recover our investments in introducing any new products or that any such new products will be successful by any measure.

11. If we fail to retain our relationships with our distributors, our business, financial condition, cash flows and operations will be adversely affected.

We have distributors spread across the country who in turn sell our products through various retailers. For the Fiscals 2023, 2022 and 2021 our revenue from offline sales was ₹ 2,409.26 Lakhs, ₹ 1,767.17 Lakhs and ₹ 826.90 Lakhs, respectively which contributed 65.44%, 66.23% and 57.46% respectively of our revenue from operations. If we experience significant relationship attrition with our distributors and fail to attract new relationships, the quantity and variety of products that are offered through our platforms may decline, consumers may use our platform less frequently or not at all, and our revenue and results of operations may be adversely affected.

12. *Our technology infrastructure and the technology infrastructure of our third-party providers are susceptible to security breaches and cyber-attacks. This could potentially result in damage to our operations, employees, consumers, third-party providers, our reputation and adversely affect our financial condition, cash flows and results of operations.*

Our business generates, stores and processes a large quantity of personal, transaction, demographic and behavioral information and data and as such we may experience disruptions, failures or breaches of our technology platforms. We also face risks inherent in handling large volumes of data and in protecting the security of such data, such as protecting the data in and hosted on our system, including against attacks on our system by outside parties or fraudulent behavior by our employees; addressing concerns related to privacy and sharing, safety, security and other factors; and complying with applicable laws, rules and regulations relating to the collection, use, disclosure, transfer or security of personal information, including any requests from regulatory and government authorities relating to such data. Any failure, or perceived failure, by us to comply with our posted privacy policies or with any regulatory requirements or privacy and data protection-related laws, rules and regulations could result in proceedings or actions against us by governmental entities or others, which could have an adverse effect on our results of operations, cash flows and business.

Although we have employed resources to develop security measures against breaches, such measures may not detect or prevent all attempts to compromise our systems, including distributed denial-of-service attacks, viruses, malicious software, break-ins, ransomware attacks, phishing attacks, social engineering, fraudulent emails and related payments scams, security breaches or other attacks and similar disruptions that may jeopardize the security of information stored in and transmitted by our systems or that we otherwise maintain. Breaches of our cybersecurity measures could result in unauthorized access to our systems, misappropriation of information or data, unforeseen disclosure or transfer of data, deletion or modification of consumer information, or a denial of service or other interruption to our business operations. As techniques used to obtain unauthorized access to or sabotage systems change frequently and may not be known until launched against us or our third-party service providers, we may be unable to anticipate, or implement adequate measures to protect against, these attacks.

We may not have the resources or technical sophistication to anticipate or prevent rapidly evolving types of cyberattacks. Cyber-attacks may target us, the participants on our platform, or the communication infrastructure on which we depend. While we constantly strive to improve our cybersecurity measures, our inability to avert all potential attacks and security breaches could subject us to legal and financial liability, harm our reputation and cause us to sustain substantial revenue loss from lost sales and consumer dissatisfaction. Actual or anticipated attacks and risks may cause us to incur higher costs, including costs to deploy additional personnel and network protection technologies, train employees, and engage third-party experts and consultants.

13. *Our business depends on our ability to maintain and scale our technology. Any interruptions or delays in service on the e-commerce platforms used by us or our websites or any undetected errors or design faults could result in limited capacity, reduced demand, processing delays, and loss of consumers.*

Our reputation and ability to attract, retain and serve our consumers depend upon the reliable performance of our mobile applications and websites and the underlying network infrastructure. The volume of traffic and activity on our ecosystem of e-commerce platforms spikes on certain days, such as during our sales periods, and any such interruption would be particularly problematic if it were to occur at a time of high volume. If sustained or repeated, these performance issues could reduce the attractiveness of our products and services and platforms. In addition, the costs and complexities involved in expanding and upgrading our systems may prevent us from doing so in a timely manner and may prevent us from adequately meeting the demand placed on our systems. Any interruption or inadequacy that causes performance issues or interruptions in the availability of our mobile applications or websites could reduce consumer satisfaction and result in a reduction in the number of consumers purchasing our products and services, adversely affecting our business and financial position.

14. *We may not be able to accurately manage our inventory, this may adversely affect our goodwill and business, financial condition and results of operations.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers.

Such disruption to supply would materially and adversely affect our business, profitability and reputation. In the past we have not experienced any instances of disruptions to the delivery of product to our customer occurred for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could have led to delayed or lost deliveries or damaged products and disrupt supply of these products., but there is not guarantee that these instances will not happen in future to improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

15. *We are subject to quality requirements and any product defect issues or failure by us to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential product liability claims.*

We face an inherent business risk of exposure to product defects. We may not be able to meet regulatory relevant quality standards in India, or the quality standards imposed by our customers and applicable to our manufacturing processes, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If any of our products do not meet regulatory standards or are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace, recall or redesign such products or (iii) incur significant costs to defend any such claims.

The failure by us or any of our suppliers to achieve or maintain compliance with regulatory requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. We have implemented quality control processes and regularly conduct inspections of raw materials sourced from suppliers and finished products manufactured by job workers on the basis of our internal quality standards. However, we cannot assure you that our job workers will always adhere to such standards and that our quality control processes will not fail or the quality tests and inspections conducted by us are accurate at all times. There is no assurance that our products will always meet the satisfaction of our customers' quality standards. Although we have not faced any failure to comply with applicable regulations in the past in the past, we cannot assure in future if our failure to comply with applicable regulations could cause adverse consequences to be imposed on us, including fines, injunctions, civil penalties, the refusal of regulatory authorities to grant approvals or renewal, delays, suspensions or withdrawal of approvals, license revocation, seizures or recalls of products, operating restrictions and criminal prosecutions, all of which could harm our business. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able locate new suppliers in compliance with regulatory requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue.

16. *The successful operation of our business depends on the performance, reliability and security of network and mobile infrastructure, third-party data centre hosting facilities, and other third-party providers.*

We depend on the maintenance of reliable internet and mobile infrastructure with the necessary speed, data capacity and security, as well as timely development of complementary products, for providing reliable internet and mobile access. We also rely on services from other third parties, such as our telecommunications services, credit card processors, disaster recovery services, payment gateways, supply chain and courier counterparties, SMS service providers and online map providers, and those services may be subject to outages and interruptions that are not within our control. Failures by our telecommunications providers may interrupt our ability to provide phone support to our consumers and distributed denial-of-service attacks directed at our telecommunication service providers could prevent consumers from accessing our mobile applications or websites. In addition, we may experience down periods when our third-party credit card or gift cards or payment mobile applications processors are unable to process the online payments of our consumers, disrupting our ability to receive consumer orders.

With respect to our marketing channels, we rely heavily on relationships with providers of online services, search engines, social media, digital marketing companies, directories and other websites and ecommerce businesses to provide content, advertising banners and other links that direct consumers to our websites. We rely on these relationships to provide significant sources of traffic to our website. In particular, we rely on search engines and major mobile application stores, as important marketing channels. Search engine companies change their natural search engine algorithms periodically, and our ranking in natural searches may be adversely affected by those changes, as has occurred from time to time. If search engines change their algorithms, terms of service, display and featuring of search results, or if competition increases for advertisements, we may be unable to cost-effectively drive consumers to our mobile applications and websites.

Additionally, we rely on social media platforms as part of our marketing strategies to provide advertising content. The efficiency of our marketing strategies could be affected depending on their recommendation's algorithms, terms of service, frequency of display. Many of the parties with whom we have online advertising arrangements also provide advertising services to other companies, including our competitors. As competition for online advertising has increased, the cost for some of these services has increased.

We also rely on e-mail service providers, bandwidth providers, internet service providers, and mobile networks to deliver e-mail and "push" communications to consumers and to allow consumers to access our website. If the systems of these third parties fail, we could lose consumer data and miss order fulfillment deadlines, which could result in decreased sales, increased overhead costs and product shortages. In addition, the third parties on which we rely could face financial difficulties, including bankruptcy, which may negatively affect our business.

In addition, our technology infrastructure and the technology infrastructure of our third-party providers are vulnerable to damage or interruption as a result of software or hardware malfunctions, system implementations or upgrades, computer viruses, third-party security breaches, employee error, misuse, war, natural calamities, power loss, telecommunications failures, cyber-attacks, human error, and other similar events could lead to extended interruptions of our operations, a corresponding loss of revenue and profits, cause breaches of data security, loss of intellectual property or critical data, or the release and misappropriation of sensitive information, or otherwise impair our operations. While we have limited disaster recovery arrangements, our disaster recovery and data redundancy plans may be inadequate, and our business interruption insurance may not be sufficient to compensate us for the losses that could occur. If any such event were to occur, our business, financial condition, cash flows and results of operations may be adversely affected.

17. Our online marketing listings or reviews may constitute internet advertisement, which subjects us to laws, rules and regulations applicable to advertising.

Indian and international advertising laws, rules and regulations require advertisers, advertising operators and advertising distributors to ensure that the content of the advertisements they prepare or distribute is fair and accurate, is not false or misleading and is in compliance with applicable law. Violation of these laws, rules or regulations may result in, amongst other things, penalties and/or fines for issuing misleading advertisements, including fines, confiscation of advertising costs, orders to cease dissemination of the advertisements and orders to issue a corrective advertisement to neutralize the effect of a misleading advertisement. Complying with these requirements and any penalties or fines for any failure to comply may significantly reduce the attractiveness of our platform and increase our costs and could have an adverse effect on our business, financial condition, cash flows and results of operations.

In addition, for advertising content related to specific types of products and services, advertisers, advertising operators and advertising distributors must confirm that the advertisers have obtained the requisite government approvals, including the advertiser's operating qualifications, proof of quality inspection of the advertised products and services, and, with respect to certain industries, government approval of the content of the advertisement and filing with the local authorities. In certain cases, applicable guidelines (such as the Guidelines for Influencer Advertising on Digital Media, 2021) require that content created by influencers should carry a disclosure label identifying their posts as advertisements. We must also ensure we have obtained the requisite rights of use or reuse of certain video or audio content in accordance with our contractual obligations, which have to be continuously renewed and monitored, as any failures to so may lead to infringement of intellectual property rights such as copyrights. Pursuant to the internet laws in India, we are required to take steps to moderate the content displayed on our platform, such as reviews and images posted by consumers or influencers. This requires considerable resources and time, and could significantly affect the operation of our business, while at the same time also exposing us to increased liability under the relevant laws, rules and regulations. The costs associated with complying with these laws, rules and regulations, including any penalties or fines, could have an adverse effect on our business, financial condition, cash flows and results of operations. Any further change in the classification of our online marketing services by the Indian government may also significantly disrupt our operations and adversely affect our business and prospects.

18. Failure to deal effectively with fraudulent activities on our websites and e commerce platform would increase our fraud losses and harm our business and could severely diminish seller and consumer confidence in and use of our services.

We face risks with respect to fraudulent activities on our websites and e commerce platform and periodically receive complaints from consumers who assert they have not received the goods they purchased or that goods they received were fraudulent, from sellers who may not have received payment for goods that were purchased.

Although we have implemented measures to detect and reduce the occurrence of fraudulent activities, scams, combat bad consumer experiences, and increase consumer satisfaction, including encouraging reporting of concerns, gating and monitoring higher-risk activities, evaluating sellers on the basis of their transaction history, and restricting or suspending

some sellers, we cannot assure you that these measures will be effective in combating fraudulent transactions or improving overall satisfaction among sellers and consumers. We will need to evolve to combat fraudulent activities as they develop. Any failure to evolve could result in loss of consumer trust. At the same time, the implementation of additional measures to address fraud could negatively affect the attractiveness of our offerings to consumers and sellers, or create friction in our consumers' experience.

19. *We rely on third-party couriers to provide reliable, timely and satisfactory delivery of orders for consumers.*

We rely on third-party couriers to deliver orders from our warehouses to consumers. To the extent they are unable to provide satisfactory services to consumers, which may be due to events that are beyond our or their control, such as inclement weather or transportation disruptions, additional compliance costs as a result of COVID-19, we may suffer reputational damage, and our business, financial condition, cash flows and results of operations may be adversely affected.

The third-party couriers that we rely on may also subject us to additional risks. For example, traffic accidents caused by such couriers in performing their services on our behalf may cause negative publicity in the local community and may negatively affect our brand image and reputation. In addition, as our third-party couriers interact directly with our consumers, we may suffer harm, including substantial reputational harm from any misconduct, illegal actions or crimes committed by them, such as in relation to the misappropriation of cash due for "cash-on-delivery" orders which may go undetected or remain uncollectable. If we are unable to effectively address these risks, our brand image, reputation, cash flows and financial performance may be adversely affected.

20. *We are subject to payment-related risks, including risks associated with cash on delivery and payment processing risks.*

We accept payments using a variety of methods, including credit and debit cards, digital wallets, UPI, money transfers, and cash on delivery. Cash on delivery is a preferred method of payment for online purchases in India. Hence, we are subject to the risk that cash collected from consumers may be misappropriated or that a consumer may not plan appropriately for payment and the purchase will have to be returned. Returned purchases do not contribute to our revenue and we absorb the costs of return shipping fees, which would increase our operating costs and adversely affect our business, financial condition, cash flows and results of operations. We are subject to the risk of fraudulent activity associated with cash on delivery, such as payment of purchases with counterfeit currency or fake identity. For certain payment methods, including credit and debit cards, we pay bank interchange and other fees. These fees may increase over time, which would increase our operating costs and adversely affect our results of operations. We use various third parties and payment gateways to provide payment processing services, including the processing of credit and debit cards. Our business may be disrupted for an extended period of time if any of these companies becomes unwilling or unable to provide these services to us.

We are required to comply with payment card network operating rules, which are set and interpreted by the payment card networks for the third-party payment processors. The payment card networks could adopt new operating rules or interpret or re-interpret existing rules, as revised by regulatory bodies such as RBI from time to time, in ways that might prohibit us from providing certain services to some consumers, be costly to implement, or difficult to follow. If we fail to comply with these rules or requirements on service providers including in connection with nodal accounts, we may be subject to fines or indemnities or higher transaction fees or lose our ability to accept credit and debit card payments from consumers or facilitate other types of online payments, and our business could be harmed. Moreover, although the payment gateways we use are contractually obligated to indemnify us with respect to liability arising from fraudulent payment transactions, if such fraudulent transactions are related to credit card transactions, including international credit card transactions, and become excessive, they could potentially result in our losing the right to accept credit cards for payment. If any of these events were to occur, our business, financial condition, cash flows and results of operations could be adversely affected.

21. *We are exposed to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact our results of operations.*

We are subject to counterparty credit risk and a significant delay in receiving large payments or non-receipt of large payments may adversely impact our results of operations. Our operations involve extending credit to our customers in respect of sale of our products and consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. As a result of such industry conditions, we have and may continue to have high levels of outstanding receivables. For the financial year ended March 31, 2023, 2022 and 2021 our trade receivables were ₹ 258.52 Lakhs, ₹ 263.26 Lakhs and ₹ 221.68 Lakhs, respectively. There is no assurance that we will accurately assess the creditworthiness of our customers. Further, macroeconomic conditions which are beyond our control, such as a potential credit crisis in the global financial system, could also result in financial difficulties for our customers, including limited access to the credit markets, insolvency or bankruptcy. Such conditions could cause our customers to delay payment, request modifications

of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of dues from customers also depends on our ability to complete our contractual commitments and subsequently bill for and collect from our clients. While we have not faced such incidents in the past, if we are unable to meet our contractual obligations, we may experience delays in the collection of, or be unable to collect, our customer balances, which could adversely affect our results of operations and cash flows.

22. *We are dependent on third-party transportation providers for the supply of raw materials and delivery of our finished products.*

Our success depends on the supply and transport of the various raw materials required for our manufacturing facility and of our finished products from our manufacturing facility to our distributors, which are subject to various uncertainties and risks. Our company do not completely depend on our own transportation facility and are majorly dependent on third-party transportation providers for the delivery of our products. We also intend to purchase one more commercial vehicle to reduce our dependency on third party logistics companies. We plan to fund Capital Expenditure towards purchase of commercial vehicle from the Net Proceeds of the issue. For details, also see “*Objects of the Issue*” on page 75. While transportation restrictions, if any, could have an adverse effect on supplies and deliveries to and from our customers and suppliers. In addition, raw materials and finished products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be a delay in delivery of raw materials and products which may also affect our business and results of operations negatively. In the event we fail to maintain a sufficient volume of raw materials and delivery of such materials to us is delayed, we may be unable to meet our purchase orders in a timely manner or at all, which may result in loss of sales opportunities that our competitors may capitalize on, thereby adversely affecting our business, financial condition, results of operations, and cash flows. Any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers and distributors. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on freight charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess freight charges to maintain our selling price, which could adversely affect our results of operations, or passing these charges on to our customers, which could adversely affect demand for our products.

23. *High merchandise returns or interruption in our shipping operations could negatively impact our business*

Cost of merchandise returns in an e-commerce business is mainly absorbed by the business. This includes cost of delivery, freight and risk of fraud returns that may lead to additional cost and risk exposure with the product sold. In some cases, the returned inventory is not suitable for resale which further impacts our overall margins. Further, any changes in our shipping arrangements for reverse logistics or any interruptions in shipping could adversely affect our business, financial condition, cash flows and results of operations.

24. *If we fail to acquire new consumers or fail to do so in a cost-effective manner, we may not be able to increase revenue or maintain profitability*

Our business has grown substantially in recent years, with the increase in our customer database. Our revenue from operations has grown from ₹ 1,439.12 lakhs in Financial Year 2021 to ₹ 2,668.35 Lakhs and ₹ 3,681.45 Lakhs in Financial Year 2022 and Financial Year 2023, respectively. However, we cannot assure you that our historical growth rates will be sustainable or achieved at all in the future. If we fail to acquire new consumers, or fail to do so in a cost-effective manner, we may not be able to increase our review or maintain profitability.

Further, our ability to provide an engaging consumer experience is dependant in part on third party websites and search engines driving online consumers to our site which is not entirely within our control. Additionally, we have arrangements with other intermediaries such as digital services providers which provide certain digital services including marketing and search engine optimization services. Our ability to provide an engaging consumer experience is dependant in part on third party websites and search engines driving online consumers to our site which is not entirely within our control. If such sites choose not to send online consumers to us or search engines change their ranking algorithms such that we appear lower down the search list or not at all, our consumer base may not grow and may reduce and as a result, our revenue may decrease, even if we seek to optimize our rankings.

Furthermore, we may have to incur sustained advertising and promotional expenditures or offer more incentives than we anticipate in order to attract consumers to our platform and websites and convert them into purchasing consumers. If one or more of our marketing efforts fails to deliver the expected outcome, our business, financial position and results of operations may be adversely affected.

25. *We also outsource manufacturing of certain of our products by way of entering into an Outsourcing Agreement which exposes us to any risks/adverse developments affecting the quality of products.*

Apart from own manufacturing of products, Our Company also outsources manufacturing of some of our products such as innerwear products, T shirts and Saree shapewear and has also entered into Outsourcing Agreements dated March 01, 2023 for Garment manufacturing, entered into by and between our Company and Yamuna Tex, a Tamilnadu Corporation with principal place of business situated at 2/726-A, Senthoran Tower, 1st Floor, Vaikkalmedu, Kallagandu, Tiruppur and our Company and Senthur Tex, a Tamilnadu Corporation with principal place of business situated at 1/260, J-2, Amaravathi Nagar, Arumuthampalavam, Naranapuram post, Tirupur. By way of these agreements, our Company has outsourced the manufacturing of our innerwear products, T shirts and Saree shapewear in accordance with the specifications and requirements of our Company. The products manufactured through this outsourcing process are delivered at our warehouse situated at Tiruppur for further dispatch at the customers' location. The agreements shall commence from March 01, 2023 and shall continue till February 28, 2026.

While we enter into written arrangements with them for the work undertaken by them and even though some of them have been working with us for significantly long periods, most of them do not work exclusively for us. We have entered into outsourcing agreements with such job workers with a term of three years. We, however, cannot assure you that our job workers will be able to fulfil their obligations, including those in relation to maintenance of quality standards, under such agreements entirely, in a manner acceptable to us, or at all. Periodically we may have to discontinue business with certain job workers, for reasons including delay or insufficiency in delivery and quality defects. Any shortfall in supply of products from our job workers, or insufficiency in the quality and consistency of the products supplied may result in decrease in supply of our products, lower stock at our stores and consequently lower sales. In the event we are unable to have our products manufactured in accordance with our supply schedule, or at all, we may not be able to procure alternate sources to manufacture our products, in time to meet the demands of our customers or maintain our inventory levels. We may also be unable to control the costs of production of job workers, which may increase in the future, including due to increase in the cost of labour and other utilities. Our inability to obtain sufficient quantities or desired quality of products from job workers in a timely manner or at acceptable prices may adversely affect our business, financial condition and results of operations.

26. *Our sales and profitability could be harmed if we are unable to maintain or improve our brand image. Further any negative publicity with respect to our products could adversely affect our brand, business, financial condition and results of operations.*

We are operating under the brand “***Dermawear***” with our motto “*Shape up with Confidence*” and “***YDIS***” (“*Your Dress Is Shapewear*”) which has significantly contributed to the success of our business. We believe that our success depends on our ability to price the products against its quality and foresee, identify and respond to changing fashion trends in a timely manner. If we are unable to respond in a timely and appropriate manner to changing consumer demand and fail to price our products reasonably, our brand name and brand image may be impaired and may result in a significant decrease in net sales or leave us with a substantial amount of unsold inventory. In addition, any new products or brands that we introduce may not be successfully received by retailers and consumers. Although we have expanded, and expect to continue to spend significant resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brands will be effective in attracting and growing our customer base or that such efforts will be cost-effective. Further our brand may also be affected if there is any negative publicity associated with our products. Any failure to maintain and enhance our brands may negatively affect our business, financial condition and results of operations.

27. *Our Company operates under several Trademarks, brand names, Copyrights, Designs and other intellectual property rights not owned by our Company acquired upon certain terms and conditions. Our failure to adhere to the terms and conditions of the agreements end up losing the authorization for usage in which event our business shall be adversely affected.*

Our business operations and turnovers are crucial to our brand names and as we operate under highly competitive markets, maintaining and protecting our brand names and other intellectual property rights is very crucial to the growth of our business. However, our company does not own any of our trademarks / copyrights / designs as mentioned in the property schedule of our Company. We have acquired them from one of our promoters Mr. Rajendra Kumar who have licensed all the intellectual properties to us on certain terms and conditions mentioned in those respective agreements and we are not sure if we shall be able to adhere to the terms and conditions of the agreements or at all in which event we may stand to lose our rights to use those respective intellectual property rights which may create adverse effect on our business.

Further in the event of death of the licensor, we are not sure that we may equally be able to negotiate the terms and conditions with the legal heirs of those intellectual properties in which event we may end up paying higher consideration or may not even be able to acquire those rights at all in which event our business shall be adversely affected.

For further details please refer to chapter titled “Government and Other Approvals” beginning on page 210 of the Draft Prospectus.

28. *Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company have entered into certain related party transactions with our Promoters, members of the promoter group, Directors and our Group Companies in the past which are in compliance with applicable provisions of Companies Act, 2013 and all other applicable laws. For details, please see “Annexure - XXVIII Restated Statement of Related Party Disclosures of Restated Financial Statements” under the chapter titled “Restated Financial Statements” beginning on page 181 of this Draft Prospectus. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain party transactions and our undertakes that such related party transactions shall not be done against the interests of the Company and its shareholders as prescribed in the SEBI LODR Regulations. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

29. *Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.*

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Our Company is required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/licenses/ approvals. Further pursuant to change of name of the Company upon conversion from Private Limited to Public Limited, we further need to get our licenses updated. Also, we have applied for approvals which are necessary for furtherance of our objects. Failure by our Company to renew, alter, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business. For details, please refer to chapter titled “Government and Other Statutory Approvals” beginning on page 210 of this Draft Prospectus

30. *There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities.*

In the past, our company has at several instances, delayed in filing our GST returns, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

For further details of certain material legal proceedings involving our Company, our Promoter, our directors, see “Outstanding Litigation and Material Developments” beginning on page 181 of this Draft Prospectus.

31. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and Senior Management as well as our ability to attract and retain personnel with technical expertise. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them and other personnel with technical expertise could adversely affect our business, financial condition and results of operations.*

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoter, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoter for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our

Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

In addition, we may require a long period of time to hire and train replacement personnel when personnel with technical expertise terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining personnel with technical expertise that our business requires. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see “*Our Management*” on page 159 of this Draft Prospectus.

32. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.*

Our Business Operation required skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

33. *The industry in which we operate is labour intensive and our manufacturing operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management’s attention and result in increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized and we have in past not faced any instances of trouble from our labours, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management’s attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

34. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.*

Our business is working capital intensive. Summary of our working capital position as per our Restated Financial Information is given below: -

C: Working Capital (A-B)	899.33	534.54	502.73

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Issue” beginning on page 75 of this Draft Prospectus.

35. ***The Company is yet to place orders for 100% of the plant & machineries, installation of solar power plant, purchase of commercial vehicle and upgradation of existing IT Software at our existing manufacturing facility and registered office for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of plant & machineries may delay our implementation schedule and may also lead to increase in price of these plant & machineries, further affecting our revenue and profitability.***

Although we have identified the type of plant and machineries, installation of solar power plant, purchase of commercial vehicle and upgradation of existing IT Software at our existing manufacturing facility and registered office required to be bought however, we are yet to place orders for 100% of the plant & machinery, installation of solar power plant, purchase of commercial vehicle and upgradation of existing IT Software at our existing manufacturing facility and registered office worth ₹ 178.68 Lakhs, ₹ 21.00 Lakhs, ₹ 9.53 Lakhs and ₹ 18.20 Lakhs, respectively as detailed in the “Objects of the Issue” beginning on page 75 of this Draft Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s views of the desirability of current plans, change in supplier of plant & machineries, equipment’s among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machineries, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 75 of this Draft Prospectus.

36. ***Our business is dependent on the adequate and uninterrupted supply of electrical power at a reasonable cost. Our Company does not have suitable power back-up to meet power failure exigencies. Failure on account of unavailability of electrical power may restrict us in utilizing our full capacity and, hence, may impact our business and results of operation.***

Adequate and cost-effective supply of electrical power is critical to our operations, which entails significant consumption of electrical power. Our manufacturing process requires uninterrupted supply of electrical power in order to ensure that we are able to manufacture our products. The shortage or non-availability of electrical power may adversely affect our manufacturing process and have an adverse impact on our results of operations and financial condition. Currently, we source our power requirements from the state electricity board. There can be no assurance that electricity supplied will be sufficient to meet our requirements or that we will be able to procure adequate and interrupted power supply in the future at a reasonable cost. If the supply of electricity is not available for any reason, we will need to rely on alternative sources. However, our Company have suitable power back-up to meet power failure exigencies such as diesel generator sets. We also intend to purchase one more DG set at our existing manufacturing facility, to further decrease our power costs from the Net Proceeds of the issue. Any failure on our part to obtain alternate sources of electricity, in a timely manner, and at an acceptable cost, may have an adverse effect on our business, results of operations, cash flows and financial condition.

Further, if the per unit cost of electricity is increased by the state electricity board, our power cost will increase and it may not be possible to pass on any increase in our power cost to our customers, which may adversely affect our profit margins.

We also intend to install solar power plant at our existing manufacturing facility to further decrease our cost and dependence on state electric supply. We plan to fund Capital Expenditure towards installation of solar power plant from the Net Proceeds of the issue. For details, also see “Objects of the Issue” on page 75.

37. ***Within the parameters as mentioned in the chapter titled “Objects of this Issue” beginning on page 75 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of the Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

We intend to use Net Proceeds towards meeting the funding the Purchase of Plant and Machinery at our existing manufacturing facility, Purchase of Commercial Vehicle, Funding of capital expenditure requirements of our Company towards purchase of Solar Power System, upgradation of existing IT Software at our existing manufacturing facility and registered office, Repayment or prepayment, in full or in part, of borrowings availed by our Company from banks and financial institutions, Funding working capital requirements and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2023-24 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 75 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “Objects of the Issue” beginning on page 75 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoter and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

38. ***The orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations.***

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control caused by matters such as acts of God, strikes, civil commotion, riots, war, revolution, acts of governments, lack of adequate production capacity, failure or delay in plant start up, breakdown of machinery, shortage of raw materials, etc. or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers’ discretion or delay in procurement of raw material or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

39. ***Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.***

We have experienced negative cash flows in the past which have been set out below as per the Restated financial statements:

(₹ In Lakhs)

Particulars	March 31, 2023	March 31, 2022	March 31, 2021
Net cash generated from/ (used in) operating activities	112.31	197.59	105.46
Net cash generated from/ (used in) investing activities	(122.37)	(106.76)	(9.53)
Net cash generated from/ (used in) financing activities	9.62	(97.62)	(87.54)

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial

operations. For further details, see section titled “*Restated Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 181 and 184, respectively of this Draft Prospectus.

40. *We export our products in five countries. Any change in law or any other adverse events affecting these countries could have a significant adverse impact on our export orders and consequently on our results from operations.*

We derive a portion of our revenue from operations from exports. For the financial year ended March 31, 2023 our revenue from exports constituted 2.36%, of the revenue from operation respectively. Our Company exports to five countries namely, Canada, Germany, Australia, United Kingdom, United States of America based on sales made for the financial year ended March 31, 2023. Consequently, any adverse changes in these economies such as slowdown in the economy, appreciation of the Indian Rupee vis-à-vis the currencies of these economies, acts of terrorism or hostility targeting these countries, change in the economic laws would directly impact our revenues and results from operations. In the event of change in policies or laws in these regions with respect to Environment, Health and Safety (EHS) norms, quality standards, branding or restrictions on usage of certain products/raw materials, our financial condition and business operations may be adversely affected. In case of any contingencies in future due to which we are unable to operate effectively in these markets, our results from operations, revenues and profitability may be adversely affected.

41. *We generate our major portion of sales from our operations in certain geographical regions both domestic and exports. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

We have two business divisions (i) domestic sales; and (ii) international sales. We have PAN India presence with distributors and online sale platform spread across the country with presence in 28 states and 8 Union territories for our domestic market based on sales made for the financial year ended March 31, 2023, 2022 and 2021. We have also started our export division and are supplying products to 5 countries namely Canada, Germany, Australia, United Kingdom, United States of America based on sales made for the financial year ended March 31, 2023. For the Fiscals 2023, 2022 and 2021 our revenue from domestic sales was ₹ 3,594.63 Lakhs, ₹ 2,668.35 Lakhs and ₹ 1,439.12 Lakhs, respectively which contributed 97.64 %, 100.00 %, and 100.00 % respectively of our revenue from operations.

Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. Our inability to expand into other countries may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in such regions to expand our operations in other parts of India or internationally, due to factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside such markets may adversely affect our business prospects, financial conditions and results of operations. While our management has faith that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance. Our operations are also impacted by various risks inherent in international sales and operations, including:

- currency exchange rate fluctuations;
- regional economic or political uncertainty;
- currency exchange controls;
- differing accounting standards and interpretations;
- differing domestic and foreign customs, tariffs and taxes;
- current and changing regulatory environments;
- coordinating and interacting with local representatives and counterparties to fully understand local business and regulatory requirements; and

To the extent that we are unable to effectively manage our global operations and risks such as the above (in particular, as we implement our strategy to enter into new markets where we do not have local knowledge resources), we may be unable to grow or maintain our sales and profitability, or we may be subject to additional unanticipated costs or legal or regulatory action. As a consequence, our business, financial condition, results of operations and cash flows may be adversely affected.

42. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “*Financial Indebtedness*” beginning on page 184 of this Draft Prospectus.

43. *Our loan agreements with various lenders have several restrictive covenants and certain unconditional rights in favour of the lenders, which could influence our ability to expand, in turn affecting our business and results of operations.*

We have entered into agreements for short term and long-term borrowings with certain lenders. The total amounts outstanding and payable by us as secured loans and unsecured loans were ₹ 1,043.66 Lakhs, ₹ 935.59 Lakhs and ₹ 947.57 Lakhs as on March 31, 2023, 2022 and 2021 as per the restated financial statements. The credit facilities availed by our Company are secured by way of mortgage of fixed assets, hypothecation of assets. There may have been instances of delay in payment of our dues in time to the banks, in case we are not able to pay our dues in time, the same may amount to a default under the loan documentation and all the penal and termination provisions therein would get triggered and the loans granted to the Company may be recalled with penal interest. This could severely affect our operations and financial condition. In addition to the above, our loan documentation includes certain conditions and covenants that require us to obtain consents from the aforesaid banks prior to carrying out certain activities like entering into any amalgamation, demerger, merger and corporate reconstruction, changing our management and operating structure, making any fresh borrowings or creating fresh charges on assets, etc. Any failure to comply with any condition or covenant under our financing agreements that is not waived by the lending banks or is not otherwise cured by us, may lead to a termination of our credit facilities, acceleration of all amounts due under the said credit facility, which may adversely affect our ability to conduct our business and operations or implement our business plans. Further, the said credit facilities can be renewed/enhanced/cancelled/suspended/reduced and the terms and conditions of the same can be altered by the lending banks, at their discretion. In the event, the lending banks refuse to renew / enhance the credit facilities and/or cancels / suspends / reduces the said credit facilities and/or alters the terms and conditions to the derogation of our Company, our existing operations as well as our future business prospects and financial condition may be severely affected. As on the date of the Draft Prospectus, we have not received NOC for the Issue from some of our lenders.

44. *Unsecured loans taken by our Company can be recalled by the lenders at any time.*

Our Company has unsecured loans amounting to ₹ 440.32 Lakhs, ₹ 314.13 Lakhs and ₹ 332.96 lakhs for the financial year ending March 31, 2023, 2022 and 2021 as per the restated financial statements from banks that are repayable on demand to the relevant lender. These loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. In such cases, our Company may be required to repay the entirety of the unsecured loans together with accrued interest. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer the chapter titled “*Restated Financial Statements*” beginning on page 181 of this Draft Prospectus.

45. *We have taken guarantees from our directors in relation to debt facilities provided to us.*

We have taken guarantees from our directors in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under

such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Financial Indebtedness*” beginning on page 184 of this Draft Prospectus.

46. *We may not be fully insured for all losses we may incur.*

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, limitations of liability set forth in our contracts may not be enforceable in all instances or may not otherwise protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. We have taken various insurance policies, details of which is mentioned in the section titled, “*Insurance*” under the chapter titled, “*Our Business*” on page 98 of the Draft Prospectus. Although we believe we have adequate insurance coverage but that coverage may not continue to be available on reasonable terms or to be available in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claim. Insurance coverage may be an inadequate remedy where the loss suffered is not easily quantifiable, for example, in the event of severe damage to our reputation. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

47. *We face significant competition in our business which could adversely affect our operations and our profitability.*

The apparel manufacturing and retail industry is highly competitive and fragmented. Our competitors include numerous apparel designers, manufacturers, and other established companies. Some of our competitors are larger and therefore better placed to take advantage of efficiencies created by size, and have better financial resources or greater access to capital at lower costs, and may be better known nationally. Moreover, as the industry is highly fragmented, we also face competition from local stores, who may, for a variety of reasons such as easier access and personal relationships with the customers, be able to cater to local demands better than us. We believe that the principal competitive factors in the apparel industry are brand name, brand identity, timeliness, reliability and quality of products, price and our ability to anticipate consumer demands and maintain appeal of products to customers. If we do not maintain our brand names and identities and fail to provide high quality and reliable products on a timely basis at competitive prices, or if our competitors are able to compete more effectively, we may not be able to maintain our competitive edge. If we are unable to compete successfully, we could lose our customers, which would negatively impact our sales and financial performance. Further, the competitive nature of the apparel industry may result in lower prices for our products and decreased gross profit margins, either of which may materially adversely affect our sales and profitability.

48. *Our business may expose us to potential product liability claims, which could adversely affect our results operation, goodwill and the marketability of our products.*

While we are not directly exposed to potential product liability claims given the nature of our business, we may be exposed to certain risks associated with the purchase orders issued by us, and the severity and timing of such claims are unpredictable. We face the risk of loss resulting from, and the adverse publicity associated with, lawsuits, whether or not such claims are valid. We may also be subject to claims resulting from manufacturing defects or negligence in storage or handling which may lead to the deterioration of our products. Such claims, regardless of their merits or the ultimate success of the defence against them, are expensive. Even unsuccessful claims would likely require us to incur substantial amounts on litigation and require our management’s time and focus. Any loss of our reputation or brand image may lead to a loss of existing business contracts and affect our ability to enter into additional business contracts in the future, which may have an adverse effect on our business, results of operations, financial condition and cash flows. Accordingly, such claims, may adversely affect our results of operation, goodwill and the marketability of our products.

49. *We depend on certain third-party service providers including online distribution portals and payment gateways and an inability to ensure availability of such services at competitive cost may have an adverse effect on our business in e-commerce distribution channel.*

We rely on various third-party service providers in our business operations including online distribution portals and payment gateways for e-commerce transaction which shall be done on our website and on our various e-retails websites. Such portals and gateways are often susceptible to security concerns and require technological up gradations. Further any significant changes in the commission charged by such online portals for distributing our products or any increase in fee charged by such payment gateways may adversely affect our business and results of operations.

50. *Certain premises including our registered office and branch offices are not owned by us and we have only lease rights over such premises. In the event we lose such rights or are required to negotiate it, our cash flows, business, financial conditions and results of operations could be adversely affected.*

Our Company has entered into certain lease agreements and leave and license agreements in relation to our registered office and branch office. To meet our PAN India presence and also to meet timely supply of our products through online sales, we have one manufacturing facility situated at Meerut, two warehouses situated at Vasai, Maharashtra and Tiruppur, Tamil Nadu, respectively, one branch office situated at Tiruppur, Tamil Nadu, and one virtual office situated at Bengaluru. We also follow the online sales model and sell our products through Amazon and to ensure timely delivery of our products to customers across the country, we have received No objection from Amazon for using the additional place of business situated at different locations, respectively at Bengaluru (Two), Thane (Three), Pune, Coimbatore and Thiruvallur, Tamil Nadu. For further details, please see chapter titled “*Our Business*” beginning on page 113. Any of these lease or license agreements can be terminated, and any such termination could result in any of these offices being shifted. There can be no assurance that we will, in the future, be able to retain, renew or extend the leases for the existing locations on same or similar terms, or will be able to find alternate locations for these offices on similar terms favourable to us, in time or at all. Accordingly, we may experience business disruption, and this may materially and adversely affect our business, financial condition and result of operations.

52. There may be potential conflict of interests between Our Company and other venture or enterprises promoted by our promoter or directors.

The main business object/activities of our group companies, CP&S Orthotics Private Limited and Dayal Hoseiry Private Limited permit it to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company and our Group Companies in circumstances where our respective interests diverge. Further, our Group Companies are allowed to carry on activities as per its MOA, which are similar to the activities carried by our Company. Further, our Promoters, are also directors on the board of our Group Companies. This may be a potential source of conflict of interest in addressing business opportunities, strategies, implementing new plans and affixing priorities. In cases of conflict, our Promoters may favour other companies in which our Promoters have interest.

53. Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.

Our Company is involved in various business transactions with international clients and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Due to non-receipt of such payments in a timely manner, our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it may adversely affect our business, results of operations, financial conditions and cash flows.

54. Failure or disruption of our IT, manufacturing automation systems may adversely affect our business, financial condition and results of operations.

We have implemented various information technology (“IT”) systems to cover key areas of our operations, procurement, dispatch and accounting. We also have various automation systems and software that automate our manufacturing and production. These systems are potentially vulnerable to damage or interruption from a variety of sources, which could

result from (among other causes) cyber-attacks on or failures of such infrastructure or compromises to its physical security, as well as from damaging weather or other acts of nature. A significant or large-scale malfunction or interruption of one or more of our IT systems or manufacturing automation systems could adversely affect our ability to keep our operations running efficiently and affect product availability, particularly in the country, region or functional area in which the malfunction occurs, and wider or sustained disruption to our business cannot be excluded. In addition, it is possible that a malfunction of our data system security measures could enable unauthorized persons to access sensitive business data, including information relating to our intellectual property or business strategy or those of our customers. While we have not faced significant disruptions in past, any such malfunction or disruptions in future could cause economic losses for which we could be held liable or cause damage to our reputation. Any of these developments, alone or in combination, could have a material adverse effect on our business, financial condition and results of operations. Further, unavailability of, or failure to retain, well trained employees capable of constantly servicing our IT, manufacturing automation systems may lead to inefficiency or disruption of our operations and thereby adversely affecting our business, financial condition and results of operations.

55. *Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders' investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 180 of this Draft Prospectus.

56. *Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval*

After completion of the Issue, Our Promoter and Promoter Group will collectively own [●]% of the Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AOA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

57. *We might infringe upon the intellectual property rights of others and any misappropriation of our intellectual property could harm our competitive position*

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty as to whether we are infringing on any existing third-party intellectual property rights, which may require us to alter our technologies, obtain licenses or cease some of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. If such claims are raised, those claims could: (a) adversely affect our relationships with current or future customers; (b) result in costly litigation; (c) cause product shipment delays or stoppages; (d) divert management's attention and resources; (e) subject us to significant liabilities; (f) require us to enter into potentially expensive royalty or licensing agreements and (g) require us to cease certain activities. While in the last three financial year we have not been involved in litigation or incurred litigation expenses in connection with our trademarks or intellectual property rights, in the case of an infringement claim made by a third party, we may be required to defend such claims at our own cost and liability and may need to indemnify and hold harmless our customers. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. In addition, we may decide to settle a claim or action against us, which settlement could be costly. We may also be liable for any past infringement that we are not aware of. Any of the foregoing could adversely affect our business, financial condition and results of operations.

58. *Employee misconduct including misuse of confidential data and failure to maintain confidentiality of information could harm us and is difficult to detect and deter.*

We could be harmed by employee misconduct if our customers' confidential information is misappropriated by us or our employees, our customers may consider us liable for that act and seek damages and compensation from us, in addition, to seeking termination of the contract. While there have been no instances during the last three financial year of information technology breach or instances of cyber-attack, assertions of misappropriation of confidential information or the intellectual property of our customers against us, if successful, could have a material adverse effect on our business, financial condition and results of operations. Even if such assertions against us are unsuccessful, they may cause us to incur reputational harm and substantial cost.

Although we closely monitor our employees, misconduct, including acts of bribery, corruption or fraud by employees or executives, such acts could include binding us to transactions that exceed authorized limits or present unacceptable risks, or they may hide unauthorized or unlawful activities from us, which may result in substantial financial losses and damage to our reputation and loss of business from our customers. Employee or executive misconduct could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputational or financial harm, including harm to our brand. While we have not experienced any such employee misconduct in the past, it is not always possible to deter employee or executive misconduct and the precautions taken and systems put in place to prevent and detect such activities may not be effective in all cases. Any instances of such misconduct could adversely affect our business and our reputation.

59. *Industry information included in this Draft Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although, we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

60. *Information relating to the installed manufacturing capacity of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates and future production and capacity may vary.*

Information relating to the historical installed capacity and estimated capacity utilization of our manufacturing facility included in this Draft Prospectus is based on various assumptions and estimates of our management and the Chartered Engineer, please refer to "Our Business" on page 98 of this Draft Prospectus for further details. Actual production volumes and capacity utilization rates, however, may differ significantly from the estimated production capacities and historical capacity utilization of our manufacturing facilities. Investors should therefore not place undue reliance on our historical installed capacity information for our existing manufacturing facilities included in this Draft Prospectus.

61. *If we are unable to establish and maintain an effective internal controls and compliance system, our business and reputation could be adversely affected.*

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances.

We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. While our code of conduct requires our employees and intermediaries to comply with all applicable laws, and we continue to enhance our policies and procedures in an effort to ensure compliance with applicable laws and regulations. If we are not in compliance with applicable laws,

we may be subject to criminal and civil penalties, disgorgement and other sanctions and remedial measures, and legal expenses, which could have an adverse impact on our business, financial condition and results of operations. Likewise, any investigation of any potential violations of laws by the relevant authorities could also have an adverse impact on our business and reputation.

62. *Our Directors, Key Managerial Personnel and Senior Management may have interests other than reimbursement of expenses incurred and normal remuneration or benefits in our Company.*

Our Directors, Key Managerial Personnel and Senior Management may be interested in our Company, in addition to regular remuneration, sitting fees or benefits and reimbursement of expenses, to the extent of the Equity Shares held by them in our Company, and bonuses, dividend payable or other distributions on such Equity Shares. Our directors may be regarded as interested to the extent of the transactions entered into in the ordinary course of business with the companies in which our directors hold directorship and also in the Equity Shares held by them or by their relatives, if any, or that may be subscribed by or allotted to them or the companies, firms and trusts, in which they are interested as directors, members, partners, trustees and promoter, pursuant to this Offer. Further, our Promoter, are interested in promotion and formation of the Company. Further, our Executive Directors are also directors on the boards, or are shareholders, and trustees of entities with which our Company has had related party transactions and may be deemed to be interested to the extent of the payments made by our Company, if any, to these entities.

63. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Proceeds from Issue is less than Rs.10,000 lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, as per the Section 177 of the Companies Act, 2013 and applicable laws, the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

ISSUE RELATED RISKS

64. *An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.*

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

65. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by fixed price method. The price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 88 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue.

The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- i. quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- ii. changes in revenue or earnings estimates or publication of research reports by analysts;
- iii. results of operations that vary from those of our competitors;
- iv. speculation in the press or investment community;
- v. new laws and governmental regulations applicable to our industry;

- vi. future sales of the Equity Shares by our shareholders;
- vii. general market conditions; and
- viii. domestic and international economic, legal and regulatory factors unrelated to our performance.

66. *Our Equity Shares have never been publicly traded, and may experience price and volume fluctuations following the completion of the Issue. Further, our Equity Shares may not result in an active or liquid market and the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.*

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for our Equity Shares will develop or, if developed, does not guarantee the liquidity of such market for the Equity Shares. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares. The Issue Price of the Equity Shares has been determined by our Company in consultation with the LM through the Fixed Price Process. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

67. *We have issued Equity Shares during the last one year at a price below the Issue Price.*

Our Company had issued Bonus shares of 10,00,000 equity shares on June 30, 2023 in the ratio 2:1 in the last 12 months which may be at lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time. For further details, see “*Capital Structure*” on page 65 of this Draft Prospectus.

68. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the NSE Emerge in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the NSE Emerge. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

69. *Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoter or other shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

70. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

71. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding Rs.1,00,000, realized

on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long gains tax in India.

Term capital The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a nondelivered basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among o others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distribute d or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Comp any may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian ta x treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2023 and the Finance Act, 2023 received assent from the President of India on March 31, 2023. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations or in the industry we operate in.

72. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our restated financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "Presentation of Financial Industry and Market Data" beginning on Page 13 of this Draft Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited. India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

73. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

EXTERNAL RISKS

74. *A slowdown in economic growth in India could cause our business to suffer.*

Our performance and the growth of our business are necessarily dependent on the health of the overall Indian economy. Any slowdown or perceived slowdown in the Indian economy or future volatility in global commodity prices could adversely affect our business. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. In particular, the COVID-19 pandemic caused an economic downturn in India and globally. Any downturn in the macroeconomic environment in India could also adversely affect our business, financial condition, results of operations and prospects.

India's economy could be adversely affected by a general rise in interest rates or inflation, adverse weather conditions affecting agriculture, commodity and energy prices as well as various other factors. A slowdown in the Indian economy could adversely affect the policy of the GOI towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy.

The Indian economy is also influenced by economic and market conditions in other countries, particularly emerging market conditions in Asia. A decline in India's foreign exchange reserves and exchange rate fluctuations may also affect liquidity and interest rates in the Indian economy, which could adversely impact our financial condition. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect the Indian economy, which could materially and adversely affect our business, financial condition, results of operations and prospects.

Further, other factors which may adversely affect the Indian economy are scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our expansions; volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges; changes in India's tax, trade, fiscal or monetary policies, like application of GST; political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries; occurrence of natural or man-made disasters; infectious disease outbreaks or other serious public health concerns; prevailing regional or global economic conditions, including in India's principal export markets; and other significant regulatory or economic developments in or affecting India or its financial services sectors.

75. *Our business is affected by global economic conditions, especially in the geographies we cater to, which may have an adverse effect on our business, financial condition, results of operations and prospects.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Financial turmoil in Asia, U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Financial disruptions may occur again and could harm our business, financial condition and results of operations.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Financial markets and the supply of credit could continue to be negatively impacted by ongoing concerns surrounding the sovereign debts and/or fiscal deficits of several countries in Europe, the possibility of

further downgrades of, or defaults on, sovereign debt, concerns about a slowdown in growth in certain economies and uncertainties regarding the stability and overall standing of the European Monetary Union.

A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian financial markets and indirectly in the Indian economy in general. Any worldwide financial instability could influence the Indian economy. In response to such developments, legislators and financial regulators in the United States, Europe and other jurisdictions, including India, have implemented several policy measures designed to add stability to the financial markets. In addition, any increase in interest rates by the United States Federal Reserve will lead to an increase in the borrowing costs in the United States which may in turn impact global borrowing as well. Furthermore, in several parts of the world, there are signs of increasing retreat from globalization of goods, services and people, as pressure for the introduction of a protectionist regime is building and such developments could adversely affect Indian exports. However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current adverse conditions in the global credit markets continue or if there is any significant financial disruption, this could have an adverse effect on our business, financial condition and results of operations.

In February 2022, hostilities between Russia and the Ukraine commenced, which has led stock, commodities and foreign exchange markets worldwide to fluctuate. In addition, the market price of oil has risen sharply since the commencement of hostilities in the Ukraine, which may have an inflationary effect in India and other countries. A prolonged war or a protracted period of hostilities in the Ukraine may lead to global economic disturbances.

If we are unable to successfully anticipate and respond to changing economic and market conditions, our business, financial condition, results of operations and prospects may be adversely affected.

76. *Changing regulations in India could lead to new compliance requirements that are uncertain.*

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements.

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, financial condition, results of operations and prospects.

77. *A slowdown in our exports due to tariffs and trade barriers and international sanctions could adversely affect our business, financial condition and results of operations.*

A significant portion of our revenue is derived from exports. From time to time, tariffs, quotas and other tariff and non-tariff trade barriers may be imposed on our products in jurisdictions in which we operate or seek to sell our products. There can be no assurance that the European Community and the United States, among others, where we seek to sell our products will not impose trade restrictions on us in future. We may also be prohibited from exporting to certain restricted countries that may be added to a sanctions list maintained by the Government of India or other foreign governments, such as the Specially Designated Nationals and Blocked Persons list maintained by the Office of Foreign Assets Control of the US Department of Treasury in the United States. In February 2022, hostilities between Russia and the Ukraine commenced, which has led to the imposition of sanctions of various Russian interests (and in some cases Belarus) by the European Union, Australia, Canada, Japan, New Zealand, Switzerland, South Korea, the United Kingdom and the United States. Any such imposition of trade barriers or international sanctions may have an adverse effect on our business, financial condition and results of operations.

78. *Natural calamities, climate change and health epidemics could adversely affect the Indian economy and our business, financial condition, and results of operations. In addition, hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect our business, financial condition and results of operations.*

Our operations including our manufacturing facilities and research and development activities may be damaged or disrupted as a result of natural calamities. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our Senior Management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our facilities. Any of the above factors may adversely affect our business, financial condition and results of operations.

India has from time-to-time experienced instances of social, religious and civil unrest and hostilities between neighbouring countries. Present relations between India and Pakistan continue to be fragile on the issues of terrorism, armaments and Kashmir. In April 2019, skirmishes along India's border with Pakistan and the downing of an Indian military jet fighter plane significantly escalated tensions between the two countries. India has also experienced terrorist attacks in some parts of the country. Military activity or terrorist attacks in the future could influence the Indian economy by disrupting communications and making travel more difficult and such political tensions could create a greater perception that investments in Indian companies involve higher degrees of risk. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies.

79. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

In recent months, consumer and wholesale prices in India have exhibited increased inflationary trends, as the result of an increase in crude oil prices, higher international commodity prices, and higher domestic consumer and supplier prices. The Consumer Price Index increased from 3.4% (average) in Fiscal 2019 to 4.8% (average) in Fiscal 2020 to an estimated 6.2% (average) in Fiscal 2021 although the RBI has enacted certain policy measures designed to curb inflation, these policies may not be successful. In February 2022, hostilities between Russia and the Ukraine commenced. The market price of oil has risen sharply since the commencement of these hostilities which could have an inflationary effect in India. Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, raw materials and other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our business, financial condition and results of operations.

80. *The extent and reliability of Indian infrastructure, to the extent insufficient, could adversely impact our business, financial condition and results of operations.*

India's physical infrastructure is less developed than that of many developed nations. Any congestion or disruption with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies including our chemical products, and add costs to doing business in India. These problems could interrupt our business operations, which could have adverse effect on our business, financial condition and results of operations.

81. *Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, see "Restrictions on Foreign Ownership of Indian Securities" on page 261. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

82. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 (“Finance Bill”), has introduced various amendments. The Finance Bill has received assent from the President of India on March 31, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

83. *A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian Law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI SAST Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders

are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of SEBI SAST Regulations.

84. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have in the past experienced substantial dislocations, liquidity disruptions and market corrections.

GLOBAL ECONOMIC OVERVIEW

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia’s war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

Forces Shaping Outlook

The global fight against inflation, Russia’s war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023. Despite these headwinds, real GDP was surprisingly strong in the third quarter of 2022 in numerous economies, including the United States, the euro area, and major emerging market and developing economies. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labour markets and greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia’s invasion of Ukraine.

Growth Bottoming Out

Global growth, estimated at 3.4 percent in 2022, is projected to fall to 2.9 percent in 2023 before rising to 3.1 percent in 2024 (Table 1). Compared with the October forecast, the estimate for 2022 and the forecast for 2023 are both higher by about 0.2 percentage point, reflecting positive surprises and greater-than-expected resilience in numerous economies. Negative growth in global GDP or global GDP per capita—which often happens when there is a global recession—is not expected. Nevertheless, global growth projected for 2023 and 2024 is below the historical (2000–19) annual average of 3.8 percent.

Inflation Peaking

In advanced economies, annual average inflation is projected to decline from 7.3 percent in 2022 to 4.6 percent in 2023 and 2.6 percent in 2024—above target in several cases. In emerging market and developing economies, projected annual inflation declines from 9.9 percent in 2022 to 8.1 percent in 2023 and 5.5 percent in 2024, above the 4.9 percent pre-pandemic (2017–19) average. In low-income developing countries, inflation is projected to moderate from 14.2 percent in 2022 to 8.6 percent in 2024—still high, but close to the pre-pandemic average.

Ensuring financial stability: Depending on country circumstances, macroprudential tools can be used to tackle pockets of elevated financial sector vulnerabilities. Monitoring housing sector developments and conducting stress tests in economies where house prices have increased significantly over the past few years are warranted. In China, central government action to resolve the property crisis and reduce the risk of spillovers to financial stability and growth is a priority, including by strengthening temporary mechanisms to protect presale homebuyers from the risk of non-delivery and by restructuring troubled developers. Globally, financial sector regulations introduced after the global financial crisis have contributed to the resilience of banking sectors throughout the pandemic, but there is a need to address data and supervisory gaps in the less-regulated nonbank financial sector, where risks may have built up inconspicuously. Recent turmoil in the crypto space also highlights the urgent need to introduce common standards and reinforce oversight of crypto assets.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India’s recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Market Size

India’s nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India’s current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also launching growth-oriented policies to boost the economy. In view of this, the country witnessed many developments in the recent past, some of which are mentioned below.

1. As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
2. The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
3. Merchandise exports in September 2022 stood at US\$ 32.62 billion.
4. PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022.
5. In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).
6. Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
7. In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- In August 2022, a Special Food Processing Fund of Rs. 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of Rs. 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL MANUFACTURING INDUSTRY

Introduction

Manufacturing is the use of labor, goods and machines to produce goods for use or for sale. Manufacturing sector covers work performed in electronics industry, mechanical industry, energy industries, food and beverage industries, plastic industry, metalworking industries, transport and telecommunications industries, chemical or physical transformation of materials, substances, or components into new products. The process of assembling of components or parts of manufactured products also falls into the bracket of manufacturing unless the activity is appropriately put into construction. Construction on the other hand primarily covers works encompassing construction of buildings or assembling of infrastructure (for e.g., highways and utility systems). All those companies performing work in the preparation of sites for new construction and those involved in subdividing land for sale as building sites also are included in construction.

Manufacturing uses raw materials that are products of agriculture, bakery, fishing, forestry, mining and other products of manufacturing operations. Plants, factories or mills that use power-driven machines and materials-handling equipment, transform the raw materials into new finished products and components requiring further manufacturing.

The world manufacturing industries in a capitalist economy indulge in mass production and make them available as earning profits. Manufacturing in collectivist economy is guided by a state-run agency for making available the manufactured goods depending on the requirement. Manufacturing industry in a modern economy operates under regulations framed by the Government.

INDIAN MANUFACTURING INDUSTRY

Introduction

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

GLOBAL TEXTILE INDUSTRY

The global **textile market size** was valued at **USD 1,695.13 billion in 2022** and is anticipated to grow at a compound annual growth rate (CAGR) of 7.6% in terms of revenue from 2023 to 2030. The ever-increasing apparel demand from the fashion industry, coupled with the meteoric growth of e-commerce platforms, is expected to drive market growth over the forecast period. The textile industry works on three major principles, namely the design, production, and distribution of different flexible materials such as yarn and clothing. A wide array of processes such as knitting, crocheting, weaving, and others are largely used to manufacture a wide range of finished and semi-finished goods in bedding, clothing, apparel, medical, and other accessories.

The U.S. is anticipated to be the largest market in the North American region for textiles. It is one of the largest producers, raw cotton exporters, and top raw textile importers. Fashion is the largest application segment in the region, owing to the fast-changing fashionable trends and ease of adoption of the same due to the rapidly-emerging online fast fashion companies.

There has been an increasing trend in the use of smart textiles in the market that use optical fibers, metals, and various conductive polymers to interact with the environment. These help in detecting and reacting to various physical stimuli such as mechanical, thermal, or chemical & electric sources. This is expected to propel the growth of the technical application segment in the market for textiles during the forecast period.

The rapidly growing consumer preference towards sustainable products is forcing major textile companies to focus on restructuring their business and investing in manufacturing practices that target sustainable products. For instance, DuPont's plant-based faux fur for performance fashion apparel and Eastman's usage of discarded carpets in new materials is expected to open several major industry avenues over the forecast period.

Raw materials Insights

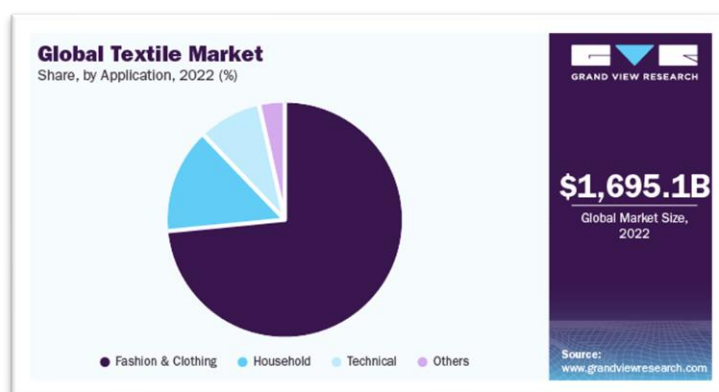

The cotton segment led the market and accounted for 38.9% of the overall revenue share in 2022. Cotton is the world's most important natural fiber, which can be attributed to its superior properties such as high strength, absorption, and color retention. China, India, and the U.S. are the major producers of cotton and cotton-based products in the world.

Product Insights

Polyester is expected to witness a growth rate of 7.4% in terms of revenue from 2023 to 2030, which can be attributed to its beneficial properties such as high strength, chemical & wrinkle resistance, and quick drying. It is used in households as cushioning & insulating material in pillows, as well as in industries for making carpets, air filters, coated fabrics, and other products.

Application Insights

The fashion segment dominated the market with more than 72.4% of the global revenue share in 2022, owing to the increasing consumer spending on clothing and apparel. In addition, high consumer requirements for crease-free suiting & shirting fabrics, as well as quality dyed & printed fabrics across the globe, are likely to drive the global market demand for textiles over the forecast period.

An increase in demand for formal & casual wear and other fashionable clothing among all age groups in the global population is a major driver for the textiles market growth. Moreover, increasing population and urbanization in emerging economies such as India, Bangladesh, Vietnam, Brazil, and others are likely to propel the demand for clothing and apparel, thereby positively contributing to market advancement.

Regional Insights

The Asia Pacific region dominated the market with a revenue share of 53.41% in 2022, owing to the increasing sales volume of clothing and apparel goods. The increasing population is expected to result in further strong growth of the region, with the highest CAGR of 9.7% from 2023 to 2030. In addition, the presence of a high number of customers on e-commerce platforms buying clothing and related accessories in developing economies is further driving the growth of the overall textiles market.

Increased penetration of organized retail, favorable demographics, rising income level, and favorable government policies are expected to drive the demand for textiles, especially in countries such as India, Bangladesh, Pakistan, and others. For instance, in India, 100 percent foreign direct investment (FDI) is allowed in textiles, which is expected to propel regional market growth over the forecast period.

Key Companies & Market Share Insights

The market is fragmented due to the presence of several small- and medium-sized manufacturers, especially in countries such as China and India. Moreover, the easy availability of low-cost labor, coupled with strengthening government support to establish the business units of various major players in these countries, is expected to bring healthy growth to the market. Some of the prominent players in the global textile market include:

- BSL Limited
- INVISTA S.R.L.
- Lu Thai Textile Co., Ltd.
- Paramount Textile Limited
- Changshan Textile Co., Ltd

GLOBAL TEXTILE INDUSTRY

INTRODUCTION

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

MARKET SIZE

The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. India has a 4% share of the global trade in textiles and apparel.

India is the world's largest producer of cotton. Estimated production stood at 362.18 lakh bales during cotton season 2021-22. Domestic consumption for the 2021-22 cotton season is estimated to be at 338 lakh bales. Cotton production in India is projected to reach 7.2 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers. In FY23, exports of readymade garments (RMG) cotton including accessories stood at US\$ 7.68 billion till January 2023. It is expected to surpass US\$ 30 billion by 2027, with an estimated 4.6-4.9% share globally.

Production of fibre in India reached 2.40 MT in FY21 (till January 2021), while for yarn, the production stood at 4,762 million kgs during the same period. Natural fibres are regarded as the backbone of the Indian textile industry, which is expected to grow from US\$138 billion to US\$195 billion by 2025.

India's textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. During April-October in FY23, the total exports of textiles stood at US\$ 21.15 billion. India's textile and apparel exports to the US, its single largest market, stood at 27% of the total export value in FY22. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22.

India's textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

INVESTMENT AND KEY DEVELOPMENT

The industry (including dyed and printed) attracted foreign direct investment (FDI) worth US\$ 4.067 billion from April 2000-December 2022. The textiles sector has witnessed a spurt in investment during the last five years.

- In April 2022, Indo Count Industries bagged the home textile business of GHCL for US\$ 74.14 million.
- In March 2022, Reliance Retail Ventures Limited (RRVL) acquired a controlling share of Purple Panda Fashions for US\$ 115.8 million.

- Sutlej Textiles plans to set up a green field project for 89,184 spindles comprising of cotton mélange yarn and PC grey yarn along with dye house in Jammu & Kashmir with an estimated cost of US\$ 111.41 million (Rs. 914 crore).
- Vardhman has established Vardhman ReNova, a cotton recycling facility with a six TPD production capacity. By establishing two new facilities in Madhya Pradesh, the company has also increased its capacity to produce yarn. With top-notch technology, the expansion includes over 100,000 spindles in total. This will result in a 75 TPD increase in yarn production capacity.
- The textile ministry has selected 61 companies, including Arvind Limited to enjoy benefits under its US\$ 1.3 billion (Rs. 10,683 crore) production-linked incentive (PLI) scheme for the labour-intensive textiles and garment sector. The companies have pledged to invest US\$ 2.32 billion (Rs 19,077) crore over five years under the scheme, which will lead to an incremental turnover of US\$ 22.55 billion (Rs 1.85 trillion) and direct employment generation for 240,000 people.
- Arvind Limited, the largest textile to technology conglomerate in India, and PurFi Global LLC, a sustainable technology firm that specialises in rejuvenating textile waste into virgin grade products, have formed a joint venture to reduce the quantity of textile waste dumped in landfills.

GOVERNMENT INITIATIVES

The Indian government has come up with several export promotion policies for the textiles sector. It has also allowed 100% FDI in the sector under the automatic route.

Other initiatives taken by the Government of India are:

- In February 2023, the union government approved 1,000 acres for setting up a textile park in Lucknow.
- In February 2023, according to the Union Budget 2023-24, the total allocation for the textile sector was Rs. 4,389.24 crore (US\$ 536.4 million). Out of this, Rs. 900 crore (US\$ 109.99 million) is for Amended Technology Upgradation Fund Scheme (ATUFS), Rs. 450 crore (US\$ 54.99 million) for National Technical Textiles Mission, and Rs. 60 crore (US\$ 7.33 million) for Integrated Processing Development Scheme.

GLOBAL SHAPEWEAR INDUSTRY

Shapewear Market Overview

The shapewear market is expected to gain a market value of USD 6.95 billion by 2030 at a CAGR of 7.7% from 2022-2030.

Shapewear is an undergarment made of elastic material that is both flexible and rigid, designed to provide support and smooth any bulges. Shapewear fabric is created in a comfortable and unobtrusive way while looking seamless under clothing. Shapewear is perfect for occasional use as it can pull in the stomach and improve posture. Shapewear is commonly used by women to make them slimmer and was originally worn as an undergarment. The primary factor influencing the market growth is increasing commercial advertisements, movies, and entertainment channels, due to which branded products are considered higher quality. Companies are getting better at connecting with customers by investing in various strategies like marketing campaigns and celebrity endorsements. In addition, Research and development teams from various companies have successfully created 'celebrity-inspired' clothing and other products. The factors affecting the demand for waist trainers are increasing, leading to increased sales worldwide. Moreover, the desire to be attractive and the common habit of taking and sharing selfies is increasing the demand for products that reduce tummy flatter, contributing to a growth in the shapewear market worldwide. However, with the shapewear market taking off, cheap quality fabrics are a major restraining factor hindering its growth. One of the biggest concerns among women is that shapewear will become too tight, which can be uncomfortable and cumbersome. According to an INVISTA survey, 93% of women want shaping and contouring body shapers. Most women gain weight during menopause or pregnancy, which means that a product like a body shaper would be highly desired at this stage. 46% of the women in a survey said they bought body shapers to improve their waistline and around 20% used them to enhance their entire appearance.

COVID-19 Analysis

The COVID-19 pandemic has reversed the shapewear market trends due to the closure of shopping malls and stores. Many events and gatherings were either delayed or canceled for fear of the spread of the pandemic, decreasing the demand for shapewear during the pandemic.

As a result of the novel coronavirus pandemic, we saw a new trend in fashion. People were embracing minimalism and dressing for themselves. But now that the world is returning to normalcy after the pandemic, the demand for shapewear, intimates, and loungewear is likely to increase by the end of the forecast period.

Shapewear Market Dynamics

Drivers

As per research presented at the United Conference on Trade and Development (UNCTAD), online shopping of fashion accessories has experienced an increase of 2% since the initial cases of the pandemic have been reported. Also, social media and society are setting unrealistic beauty standards which the consumers are blindly following. With the need to maintain a certain and trending body type, the shapewear market is expected to grow during the forecast period.

Restraints

Increasing awareness campaigns and body positivity and acceptance are presenting major restraints for the Shapewear Market on the path of its growth. Also, due to the pandemic, people are preferring staying at home and hence, the demand is declining during the forecast period.

Technology Analysis

Shapewear has been enjoying the good limelight by now. The past decade saw the emergence of shapewear but due to wide-scale innovations in the current decade, the Shapewear Market and products have a promising future. For instance, the new moms tend to demand this on a large scale as the journey of weight loss is a slow process. It is a known fact that shapewear can help in covering approximately 4 inches and can offer ultimate support and comfort. So much so that people can wear shapewear for their normal activities like visiting the gym. An increased shapewear demand is pushing the fashion companies to increase their investment to develop shapewear assortments and also, the new companies are also targeting the production of branded products. Also, shapewear is doing transformation to target the concerns of people wanting these products for body parts like under the breast, thighs, stomach, and lower back amongst others for the target audience across the globe during the forecast period.

The Shapewear Market analysis predicts good growth for the market during the forecast period that ends in 2023. The market segmentation are as follows:

Product Type

Based on the vibrant consumer demands, the Shapewear Market deals in various product types like body briefs, corsets, body shapers, control camisoles, long legs, and seamless products amongst others.

Distribution Channel

The market players opt for a wider variety of customers and to cater to their demand and maintain their comfort and convenience, they make these products available and accessible through both store and non-store means. The ones who do not have satisfaction without trying the products can opt for the store purchase. However, the customers who have a thing for comfort and wish to do easy and convenient online shopping, can opt for a similar mode of purchase, and help the market grow by the end of the forecast period.

Global Regions

Due to the growing demand for a variety of shapewear products, the market aims to expand its operations across various global locations. Currently, the Shapewear Market is functional in major regions namely North America, the APAC region, Europe, alongside the rest of the world.

Regional Analysis

Based on the regional bifurcation of the global Shapewear Market and the trends prevailing, North American is likely to emerge as the largest market for shapewear products. The main reason behind this is the demand for the products is rising many folds and also, the market players are investing largely in product diversification. North America is home to companies like Wacoal, SKIMS, and SPANX, which are investing in conducting awareness programs that will help in spreading correct information related to these shapewear items. INDIAN SHAPEWEAR INDUSTRY

During the early times, the fashion industry in India began to evolve rapidly with the introduction of Western fashion and clothing styles. This period saw the introduction of new materials such as Lycra, which enabled the creation of new styles of shapewear and stockings. In the 1990s, shapewear began to gain popularity in India as more women began to experiment with different types of clothing styles. At the time, shapewear was mostly used to provide support and smooth out any lumps or bumps under tight-fitting clothing. In the early 2000s, with the rise of Bollywood and the influence of Indian celebrities, shapewear and stockings began to gain mainstream popularity. Many Bollywood actresses were seen wearing shapewear under their outfits, and this helped to promote the use of shapewear among the general public. Shapewear and stockings are widely accepted as essential items in many women's wardrobes in India. They are available in a wide range of styles and sizes to suit different body types and clothing styles, and are widely available in both physical stores and online retailers.

According to the research report “India Shapewear and Stocking Market Overview, 2028,” published by Bonafide Research, the India Shapewear and Stocking market is expected to grow at more than 9% CAGR from 2023 to 2028. The India market is segmented based on the base of the shapewear and stockings. Presently, stockings have the highest market share in the country. One of the main reasons is that they are versatile and can be worn with a wide variety of outfits. Stockings can be paired with traditional Indian attire such as sarees, lehengas, and salwar kameez, as well as with western-style dresses and skirts. In the colder months, stockings give another layer of warmth, which is useful in some parts of India where the temperature can drop dramatically. Also, they provide some modesty and coverage, which are significant in conventional Indian culture. Shapewear and stockings have grown in popularity in India as fashion trends continue to change, especially among the younger generations who are more fashion-conscious. More people have disposable income to spend on fashion and lifestyle items like shapewear and stockings as the Indian economy expands. Shapewear and stockings are very common in India due to the impact of Western fashion. There is a rising need for goods like shapewear and stockings that can aid in achieving a slim and attractive physique as more people adopt Western dress trends.

In India, certain government rules and regulations are for the shapewear and stocking market, like the Bureau of Indian Standards (BIS), the national standards body responsible for developing and maintaining standards for various products, including textiles. Shapewear and stockings must adhere to BIS standards to ensure quality and safety. The Consumer Protection Act aims to protect consumers from unfair trade practises and unsafe products. Manufacturers and sellers of shapewear and stockings must comply with the provisions of this act to ensure that their products are safe and of high quality. The import and export of shapewear and stockings are regulated by customs regulations in India. Manufacturers and importers must comply with customs regulations to ensure that their products are legally imported into the country. The sale of shapewear and stockings in India is subject to various taxes, including GST and customs duty. Manufacturers and sellers must comply with taxation regulations to avoid penalties.

In India, there are many start-ups for shapewear and stockings like Clovia, Zivame, Snazzyway, Shyaway, and Airwear. Based on the distribution channel, there are specialty stores, hypermarkets, supermarkets, and online retailers. Currently, specialty stores dominate the market, including Triumph, La Senza, Jockey, Marks & Spencer, Pretty Secrets, and Hunkemoller. There are many local manufacturers that manufacture the stockings and the shapewear, including Lux Industries, Dollar Industry, Rupa & Company, Bodycare Creations, and Oswal Wollen Mills. In India, based on the material, there are polyester, nylon, cotton, and others. People prefer the polyester material more in the shapewear and the stockings. Since it is a lightweight, stretchy, and long-lasting fabric, polyester another benefit of polyester is that it wicks sweat from the body, keeping the wearer dry and comfortable. Also, it is practical for daily usage because it is simple to wash and dries rapidly. In India, women wear stockings and shapewear more than men. To look more attractive and toned below their clothing is one of the key motivations. Shapewear has the purpose of eliminating lumps and bumps and

bringing about a more streamlined appearance. When wearing form-fitting apparel, such as sarees, lehengas, and salwar kameez, this is especially crucial.

Goods and Service Tax Act, 2017

The Central Goods and Services Tax Act, 2017 is an Act to make a provision for levy and collection of tax on intra-State supply of goods or services or both by the Central Government and for matters connected therewith or incidental thereto. In line with CGST Act, each state Governments has enacted State Goods and Service Tax Act for respective states.

Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the central and state governments. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which has not been subsumed in the GST.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made there under are applicable at the time of import of goods i.e., bringing into India from a place outside India or at the time of export of goods i.e., taken out of India to a place outside India. Any Company requiring to import or export any goods is first required to get it registered and obtain an IEC (Importer Exporter Code). Imported goods in India attract basic customs duty, additional customs duty and education cess. The rates of basic customs duty are specified under the Customs Tariff Act 1975. Customs duty is calculated on the transaction value of the goods. Customs duties are administered by Central Board of Excise and Customs under the Ministry of Finance

BUSINESS/TRADE RELATED LAWS/REGULATIONS

Telemarketing Laws

The Department of Telecommunications ("**DoT**") has framed telemarketing guidelines which regulate commercial messages transmitted through telecommunication services and are applicable to the telemarketing activities by our Company in relation to our business. These guidelines require any person or entity engaged in telemarketing to obtain registration from the DoT. Telemarketing guidelines were issued by the Telecom Regulatory Authority of India ("**TRAI**") as the Telecom Unsolicited Commercial Communications Regulations, 2007 (the "**Unsolicited Communications Regulations**"). The Unsolicited Communications Regulations required telemarketers to, inter alia, obtain registration and discontinue the transmission of unsolicited commercial messages to telephone subscribers registered with a national database established under the regulations. The Unsolicited Communications Regulations have now been replaced with the Telecom Commercial Communications Customer Preference Regulations, 2010 (the "**Customer Preference Regulations**"), issued by the TRAI on December 1, 2010. The Customer Preference Regulations prohibit the transmission of unsolicited commercial communication via calls or SMS, except commercial communication relating to certain categories specifically chosen by the subscribers, certain exempted transactional messages and any message transmitted on the directions of the Government or their authorized agencies, impose penalties on access providers for any violations, require setting-up customer complaint registration facilities by access providers and provide for blacklisting of telemarketers in specified cases. Further, the Customer Preference Regulations prohibit the transmission of commercial messages other than between 9 a.m. to 9 p.m. Under the Customer Preference Regulations, no person, or legal entity who subscribes to a telecom service provided by an access provider, may make any commercial communication without obtaining a registration as a telemarketer from the TRAI.

Consumer Protection (E-Commerce) Rules, 2020 (the "E-commerce Rules")

The E-Commerce Rules regulate the marketing, sale and purchase of goods and services over a digital or electronic network. Further, the E-Commerce Rules required all e-commerce entities to appoint a nodal person of contact or an alternate senior designated functionary to ensure compliance with its provisions. Contravention of the E-Commerce Rules will attract penal action in accordance with the Consumer Protection Act, 2019.

Consumer Protection Act, 2019 (the "Consumer Protection Act") and the rules made thereunder

The Consumer Protection Act, which repeals the Consumer Protection Act, 1986, was designed and enacted to provide simpler and quicker access to redress consumer grievances. It seeks, inter alia to promote and protect the interests of consumers against deficiencies and defects in goods or services and secure the rights of a consumer against unfair trade practices, which may be practiced by manufacturers, service providers and traders. The definition of "consumer" under the Consumer Protection Act also includes persons engaged in offline or online transactions through electronic means or by tele-shopping or direct-selling or multi-level marketing. It provides for the establishment of consumer disputes redressal forums and commissions for the purposes of redressal of consumer grievances. In addition to awarding compensation and/or passing corrective orders, the forums and commissions under the Consumer Protection Act, in cases of misleading and false advertisements, are empowered to impose imprisonment for a term which may extend to two years and fine which may extend to ten lakhs.

Section 94 of the Consumer Protection Act, 2019 deals with measures to prevent unfair trade practices in e-commerce, direct selling, etc. it states that for the purposes of preventing unfair trade practices in e-commerce, direct selling and also to protect the interest and rights of consumers, the Central Government may take such measures in the prescribed manner.

The Digital Personal Data Protection Bill, 2022 (“DPDP Bill”)

The DPDP Bill, 2022 is intended to outline the rights and obligations of 'digital nagriks' or citizens, as well as to lay out the methods and standard for data collecting when it comes to entities. The proposed DPDP Bill, 2022 establishes severe penalties for violations of any of the legislation's provisions, which will be determined by the Data Protection Board of India. It provides financial penalties with a cap of ₹500 crores, which proves to be of much higher quantity as compared to the PDP Bill, 2019. The bill does not allow data principals to seek compensation from data fiduciaries for damages incurred because of unlawful processing. In addition, the legislation imposes obligations on data principals, and if they fail to comply with the regulations, fines of up to ₹10,000 can be levied. Some of these obligations include exercising rights in accordance with "the provisions of all applicable laws" and not filing "false or frivolous" complaints with the data fiduciary or the DPB.

The provisions of this Act upon notification, shall apply to the processing of digital personal data within the territory of India where: (a) such personal data is collected from Data Principals online; and (b) such personal data collected offline, is digitized. (2) The provisions of this Act shall also apply to processing of digital personal data outside the territory of India, if such processing is in connection with any profiling of, or activity of offering goods or services to Data Principals within the territory of India.

Information Technology Act, 2000 and Information Technology (Reasonable security practices and procedures and sensitive personal data or information) Rules, 2011.

Since our Company is involved in the business of online marketing and selling of its products through e-commerce platform, during the course of sale of their products, it gets access to the personal data including banking details / online payment utilities of the consumers purchasing our products and hence our working is governed by Information Technology Act, 2000. This act governs and provides legal recognition for transactions carried out by means of electronic data interchange and other means of electronic communication, commonly referred to as —electronic commerce. It highlights the grievous penalties and sanctions that have been enacted by the Parliament of India as a means to protect the e-governance, e-banking, and e-commerce sectors. It is important to note that the IT Act’s scope has now been broadened to include all the latest communication devices. It also gives legal recognition to Digital Signatures and facilitates storage of data. The Act is applicable to any offence or contravention committed outside India as well. If the conduct of person constituting the offence involves a computer or a computerized system or network located in India, then irrespective of his/her nationality, the person is punishable under the Act.

The Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011: According to these rules, entities holding individuals’ sensitive personal information must maintain certain security standards that are specified.

ENVIRONMENT LAWS

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy: -

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance

The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the an updated circular is issued.

The reporting requirements for any investment in India by a person resident in India under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 are specified by the RBI. All the reporting is required to be done through the Single Master Form (SMF) available on the Foreign Investment Reporting and Management System (FIRMS) platform at <https://firms.rbi.org.in>.

Under the current FDI Policy of 2020, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates.

Foreign Exchange Management Act, 1999 (“FEMA”) and Regulations framed thereunder.

Foreign investment in India is governed primarily by the provisions of the FEMA which relates to regulation primarily by the RBI and the rules, regulations and notifications there under, and the policy prescribed by the Department of Industrial Policy and Promotion, Ministry of Commerce & Industry, Government of India. As laid down by the FEMA Regulations no prior consents and approvals are required from the Reserve Bank of India, for Foreign Direct Investment under the ‘automatic route’ within the specified sectoral caps. Duty Drawback Scheme

The duty drawback scheme is an option available to exporters. Under this scheme, exporter of goods is allowed to take back refund of money to compensate him for excise duty paid on the inputs used in the products exported by him. It neutralizes the duty impact in the goods exported. Relief of customs and central excise duties suffered on the inputs used in the manufacture of export product is allowed to exporters. The admissible duty drawback amount is paid to exporters by depositing it into their nominated bank account. Section 75 of the Customs Act, 1962 and Section 37 of the Central Excise Act, 1944, empower the Central Government to grant such duty drawback. Customs, Central Excise Duties and Service Tax Drawback Rules, 1995 (the “Drawback Rules”) have been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme.

The all-industry rate of duty drawback scheme essentially attempts to compensate exporters of various export commodities for average incidence of customs and central excise duties suffered on the inputs used in their manufacture. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all-industry rate or duty drawback rate, or where the all-industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. For goods having an all-industry rate, the brand rate facility to particular exporters is available only if it is established that the compensation by all industry rate is less than 80% of the actual duties suffered in the manufacture of the export goods.

Ownership restrictions of FIIs

Under the portfolio investment scheme, the total holding of all FIIs together with their sub-accounts in an Indian company is subject to a cap of 24% of the paid-up capital of a company, which may be increased up to the percentage of sectoral cap on FDI in respect of the said company pursuant to a resolution of the board of directors of the company and the approval of the shareholders of the company by a special resolution in a general meeting. The total holding by each FII, or in case an FII is investing on behalf of its sub-account, each sub-account should not exceed 10% of the total paid-up capital of a company.

f) **Inventories**

Inventories are valued at the lower of cost and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost is generally determined on weighted average basis except for inventory segregated for a specific order / project, in which case it is valued at their specific costs of purchase. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

g) **Foreign currency transactions**

Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the Statement of Profit and Loss.

h) **Employee benefits**

Short-term employee benefits

Defined contribution plans

The Company's contribution to provident fund is considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined benefit plans

For defined benefit plans in the form of gratuity (unfunded), the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost.

i) Taxation

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

j) Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

k) Borrowing costs

Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan.

l) Earnings per Share

Basic earnings per share is computed by dividing the profit/(loss) after tax (including the post tax effect of extra ordinary items, if any) by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares, if any.

m) Impairment of assets

The carrying values of assets/ cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

n) Operating Cycle:

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current. Although these estimates are based upon management's knowledge of current events and actions, actual results could differ from those estimates and revisions, if any, are recognised in the current and future periods.

c) Revenue Recognition

The Company follows the accrual method of accounting and all claims, receivable and liabilities are provided on that basis. All revenue is recognised on accrual basis except non-recruiting income is accounted otherwise.

Sale of goods

Sales are recognised, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer. Sales excludes Goods & Service Tax

Revenue from sale of services is recognized net of goods and service tax and as and when the services are rendered. Interest incomes/expenses are recognised using the time proportion method based on the rates implicit in the transaction.

The cost of Property, Plant and Equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses.

e) Depreciation

- i. Property, Plant & Equipment

- (a) it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise; and
- (b) the cost of the asset can be measured reliably.

f) Inventories

Inventories are valued at the lower of cost and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost is generally determined on weighted average basis except for inventory segregated for a specific order / project, in which case it is valued at their specific costs of purchase. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

g) Foreign currency transactions

Initial recognition:

h) Employee benefits

Short-term employee benefits

All employee benefits payable within twelve months of rendering the service are classified as short term benefits. Such benefits include salaries, wages, leave encashment, incentives etc. and the same are recognised in the period in which the employee renders the related service.

Defined contribution plans

For defined benefit plans in the form of gratuity (unfunded), the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost.

i) Taxation

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

j) Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

k) Borrowing costs

Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan.

l) Earnings per Share

Basic earnings per share is computed by dividing the profit/(loss) after tax (including the post tax effect of extra ordinary items, if any) by the weighted average number of equities shares outstanding during the year.

Diluted earnings per share is computed using the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares, if any.

m) Impairment of assets

The carrying values of assets/ cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

n) Operating Cycle:

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current. As a result, current assets comprise elements that are expected to be realised within 12 months after the reporting date and current liabilities comprise elements that are due for settlement within 12 months after the reporting date.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public offers, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – issue LM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Issue Opening Date. All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after an application is made by the SCSBs to the LM with a copy to the Registrar, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in accordance with April 20, 2022 Circular.
