Summary of our Industry

Production of mobile phones in India has taken a leap after the government introduced the Phased Manufacturing Programme (PMP) and the Production Linked Incentive (PLI) scheme, reducing the country’s imports and dependency on China. After logging a 33% compound annual growth rate (CAGR) between fiscals 2016 and 2021, domestic mobile production is estimated to have grown 24-26% in fiscal 2022. Despite the ongoing chip shortage, three of the global manufacturers met PLI production targets during the fiscal. CRISIL Research expects the growth momentum in production to sustain, with a 22-26% CAGR between fiscals 2022 and 2024 to Rs 4.0-4.5 lakh crore in value terms. The growth will be led by the PLI scheme, which is in the second year for most players. As a corollary, the country’s mobile imports decreased ~33% on-year in fiscal 2022. Dependency on China reduced to 60% from 64% in fiscal 2021, and is expected to fall further in the medium term. However, with rising production, imports of electronic components essential for mobile assembling/manufacturing also increased 27% on-year.

- 3. Our operations are significantly located in the North Andhra Pradesh region, especially in Visakhapatnam. Any downturn or any failure to expand our operations or adverse developments affecting our operations in these locations may restrict our growth and may adversely impact on our market share, revenue and results of operations.**

Currently, we are carrying our business mainly in the North Andhra Pradesh region, especially in Visakhapatnam zone and hence our major revenues are generated from operations in these regions only. Our sales are majority derived from products sold to customers based in Andhra Pradesh. For details on “our property” and “our Zone wise sales”, please refer to page nos. 110 and 106 of the Draft Prospectus, respectively. In the event of political discord, economic instability or change in policies of state, natural calamities, riots in the region where our operations are significantly carried as a result our business activities will be affected or gets stopped or if there are any changes in laws applicable to our industry or if any restrictive conditions are imposed on us or our business. then our financial conditions and operating results may be materially and adversely affected. Further, the ultimate customers located in this geography may reduce or postpone their spending significantly which would adversely affect our operations and financial conditions. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues. Further, any failure in expanding our geographical presence within India will lead to loss of opportunity to expand thereby effecting our intended growth in business, financial conditions, and results of operations.

- 4. Our Company’s business highly depends on the brands recognition and reputation of the products it offers to sell and their inability to maintain or enhance brands image that we sell could have a material adverse effect on our business, financial condition and results of operations.**

Our Company is in the business of retail sales of consumer durable products of various brands like Apple, Samsung, Oppo, Vivo, Xiaomi, Nokia, Redmi, One Plus, LG, and Boat etc. We believe that the recognition and reputation of these brands among consumers has contributed significantly to the growth and success of our business. Maintaining and enhancing the recognition and reputation of these brands are, therefore, critical to our business and competitiveness.

Though we are not required to promote the products of these well-known brands, we compete on price, quality services, dedication and commitment towards customers, in our industry. Our financial performance is influenced by the success of brands that we sell, which, in turn, depends on factors such as product design & features, the distinct character and the quality of the products, after sale services, communication activities, public relations and marketing etc. The consumers that use and recommend the branded products expects a high quality of these products and any failure on the part of the brands/companies to deliver on that expectation could adversely impact our business and reputation.

- 5. Our Company is dependent on few numbers of suppliers for purchase of products. Loss of any of this large Suppliers may affect our business operations.**

The products sold by us at our stores are sourced from a wide variety of suppliers. Our Top 3 Suppliers contributes to 62.49%, 71.54%, 73.14% of our total Purchases for financial year ended March 31, 2022, 2021 and 2020, respectively.

Any delay or failure on the part of our suppliers to deliver products in a timely manner or any deterioration in the quality of products supplied by the suppliers, may materially and adversely affect our business, profitability and reputation. Certain factors affecting supplies and thereby impeding our access to products are political and economic instability in India or political instability in certain states of India in which our suppliers are located, the financial instability of the suppliers, labour problems experienced by our suppliers, the availability of raw materials to the suppliers, merchandise quality issues, transport availability and cost, transport security, inflation, and other factors. The operations of our suppliers are further subject to various operating risks, including breakdowns and failure of equipment, industrial accidents, employee unrest, severe weather conditions, natural disasters etc. For instance, the COVID-19 pandemic impacted our suppliers' business as a result of the nationwide lockdown imposed by the Government of India. These factors may not only result in delay of supply of products we sell but may also affect their quality. Further, the violation of or any suspected violation of labour laws or other applicable regulations by our suppliers, could also have an adverse effect on our business.

- 6. *We may in the future face potential liabilities from lawsuits or claims from third parties, should they perceive any deficiency in the products we sell in our stores. We may also face the risk of legal proceedings initiated against our Company which may result in loss of business and reputation.***

Our Company believes in providing quality products and due care is taken to mitigate the associated risks which may happen due to factors beyond our control. We may face the risk of tortious liability and claims being brought against us by our customers amongst others on account of sale of any defective products. Further, we could also face liabilities should our customers face any loss or damage due to any unforeseen incident such as fire, accident, etc. in our stores, which could cause financial and other damage to our customers. This may result in lawsuits and / or claims against our Company, which may materially and adversely affect the results of our operations and may also result in loss of business and reputation.

- 7. *Our business is dependent on the availability and supply and cost of products. Any significant increase in the prices including the taxes and levies or decrease in the availability of any of the products may adversely affect our results of operations.***

The timely availability, cost and quality of the products being supplied to us plays an important role in building strong foundation and long lasting markets and customers. If any disruption is there in either of the factors mentioned above which are not under our control, including general economic conditions, competition, production levels, transportation costs, government taxes and levies and if, for any reason, our regular/primary suppliers refuse or delay or discontinue the delivery of all or certain products to us in the quantities we need and at prices that are competitive, our ability to maintain the inventory levels and meet the customer requirements shall come to a temporary standstill and our delivery schedules could be disrupted. Further, we may also not be able to pass on any discounts and/ or increase in the prices of the products to our customers which could affect our results of operations and impact our financial condition.

Further, we have long term tie-ups or agreements with suppliers such as Vivo, Oppo, Xiaomi, Nokia, Redmi, One Plus, LG, and Boat etc. for supply of any of products. The long duration of our agreements/ contracts may expose us to the changes in the prices of the products. The increase in prices of the products increases our expenditure hence our profitability to the extent we are not able to pass the expenses on to our customers. Any decrease in the availability of these products for whatever reason, could adversely affect our execution capacity and profitability.

Also, some of the recent agreements that we are a party to erroneously mentions our Company as a private company. Since we have recently converted our Company to a public limited company, we are taking steps to rectify this error. This error does not make the agreements void. We do not expect any dispute to arise; however, if a dispute does arise, it will not have an adverse impact on the business of our Company.

- 8. *We may be subject to risks associated with product warranty for the brand products.***

We are subject to risks and costs associated with product warranties on account of supply of defective or inferior

quality products within the warranty periods stipulated for such products. Any defects in the products may result in invocation of such warranties. The defects in such products or any product liability claim against us could generate adverse publicity, leading to a loss of reputation, customers and/or increase our costs, thereby adversely affecting our reputation, business, results of operations, financial condition and cash flows.

9. *Some of our agreements restrain us from entering new territories and the e-commerce space.*

We have entered into various business agreements with our vendors, dealers and distributors to market and sell the products we offer, prominently in the state of Andhra Pradesh. Certain of these agreements mandate that we sell our products offline and in the territory of Andhra Pradesh. We may not be able to foray into the e-commerce space such as Amazon and Flipkart till the validity of these agreements. Likewise, we may not be able to foray into other territories beyond the state of Andhra Pradesh, unless we obtain specific consent from the other party to sell the products in territories beyond Andhra Pradesh. We may not be able to capitalize on any lucrative opportunities, if any, which may arise, by not foraying into new territories and the e-commerce space which may in the long run hamper our growth prospects.

10. *We purchase inventory in anticipation of sales, and if we fail to manage our inventory effectively during that period, our business and results of operations could be adversely affected.*

We purchase inventory from vendors and manufacturers based on our projected sales and as such, if we fail to manage our inventory effectively, our business and results of operations may be adversely affected. In situations that the inventory does not have the stock that the customer is looking for, we face the risk of our customer opting to buy the product from our competitor. Further, any damage or destruction to our merchandising at our distribution centres or retail stores may impact our operating results. We estimate our sales based on the forecast, demand and requirements for the forthcoming season. In general, the orders are placed a few months before the actual delivery of products in the stores. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively and to maintain a full range of products at our stores. Should our supply of products be disrupted, we may not be able to procure an alternate source of supply of products in time to meet the demands of our customers, or we may not be able to procure products of equal quality or on equally competitive terms, or at all. Such disruption to supply would mean that our customer does not get the product he/she wants which would allow the customer to go to our competitors and this would materially and adversely affect our business, profitability and reputation.

11. *Our business is subject to seasonal and cyclical volatility due to which there may be fluctuation in the sales of products which could lead to higher closing inventory position, which may adversely affect our business.*

We offer products at our stores that our consumers require, and our success is dependent on our ability to meet our consumers' requirements. The retail consumer spending is heavily dependent on the economy and, to a large extent, on various occasions such as festivals, seasonal changes, weddings, etc. Any year also has phases of lean sales. We have historically experienced seasonal fluctuation in our sales, with higher sales volumes associated with the festive period in the third quarter of each Financial Year. We have also seen higher sales volume of products in a certain season. These seasonal variations in consumer demand subject our sector to a considerable degree of volatility. As a result, our revenue and profits may vary during different quarters of the financial year and certain periods may not be indicative of our financial position for a full financial year or future quarters or periods and may be below market expectations. Further, any unanticipated decrease in demand for our products during our peak selling season could result into higher closing inventory position, which may lead to sale and liquidation of inventory getting delayed against the trajectory under normal course of business, which could adversely affect our financial position and business operations. Fluctuations in the electronic retail market affect the inventory owned by electronic retailers, since merchandise usually must be manufactured in advance of the season and frequently before the trends are evidenced by customer purchases. In addition, the cyclical nature of the retail electronics business requires us to carry a significant amount of inventory, especially prior to peak selling seasons when we build up our inventory levels.

12. *Our inability to promptly identify and respond to changing customer preferences or evolving trends may decrease the demand for our merchandise among our customers, which may adversely affect our business.*

Our Company is primarily engaged in multi-brand retail selling as well as distribution of branded smart phones, IT hardware, software and allied accessories and services. Our success depends upon our ability to forecast,

anticipate and respond to the changing customer preferences and trends in a timely manner. Though we do not design or manufacture the products that we sell in our store and only procure the same through vendors and third-party manufacturers, any failure by us to understand prevailing trends or to forecast changes could result in merchandise obsolescence, thereby increasing the dead stock and loss of our brand image amongst our customers, which could have a material adverse effect on our business and results of operations. Any inability to respond to changes in consumer demands and market trends in a timely manner could have material adverse effect on our business, financial conditions, and results of operations.

13. *We operate in a competitive industry and our market share may be adversely impacted in case we do not keep ourselves apprised of the latest consumer trends and technology and if we fail to compete effectively in the markets in which we operate.*

We operate in a competitive industry which is characterized by rapid shifts in consumer trends and technology and our market share may be adversely impacted at any time by the significant number of competitors in our industry that may compete more effectively than us. These frequent changes and their impact on consumer demand may result into both price and demand volatility, leading to change in the competitive scenario. Due to the expansive nature of our business, we face competition from both the organized and unorganized players. Players in this industry generally compete on key attributes such as timely delivery, pricing, the quality etc. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

Further, we are witnessing a growth in the competition from online retailers who have been able to offer products at competitive prices. Due to various factors, including efficient logistics management and strategic tie-ups, online retailers are not only able to offer more discounts, but also a wider range of consumer durables. Due to the said reasons, online retailing has been witnessing noticeable growth in the recent years and increased competition from them could reduce footfalls and sales in our stores. There is no assurance that we would be able to effectively offset the advantages that our competitors in the online business may have and grow our business in a similar fashion like our online competitors, or that the competition we face would not drain our financial or other resources. If we are unable to adequately address such competitive pressures, our business, financial condition, results of operations and cash flows may be adversely affected.

14. *Our Company being in the retail segment requires significant amount of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.*

The retail industry is working capital intensive and has lot of fixed expenditures for operation of stores and maintenance of inventory levels. We intend to continue growing by setting up additional stores. All these factors may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details of working capital requirements, please refer to the chapter titled "*Objects of the Offer*" on page 63 of the Draft Prospectus.

As on September 30, 2022, we had Contingent Liability of Rs. 227.27 Lakhs for which no provision had been made. In the event that any of these contingent liabilities materialize, our results of operation and financial condition may be adversely affected. Details of Contingent Liabilities and commitments are as follows:

For details of the contingent liabilities of our Company, please refer to “Para 5 of “Notes on Accounts and Restatements made in the Restated Financials” beginning on Page no. 156 under section “Financial Statements” beginning on page no. 145 and chapter titled “*Outstanding Litigations and Material Developments*” beginning on page no. 190 of this Draft Prospectus.

19. *Our financing agreements contain covenants that limit our flexibility in operating our business. Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business, results of operations and financial condition.*

As on September 30, 2022, we have availed credit facilities from various banks aggregating to Rs. 5341.02 Lakhs which includes secured and unsecured borrowings. For details on our borrowings, please refer to chapter titles "Financial Indebtedness" beginning from page no. 187 of the Draft Prospectus. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our businesses. Further, our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions, any of which could adversely affect our business and financial condition. We are required to obtain prior approval from our lenders for, among other things, but not limited to effecting any change in the management/Board of the Company, declaration of dividend, capital structure of the Company; undertake any new project, implement any scheme of expansion or acquire fixed assets, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/Company or otherwise, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc.

Additionally, our financing agreements are secured by our movable, immovable or intangible assets (whether existing or future), goods and work-in-progress (whether existing or future) and by personal guarantees of our Promoter. Such financing agreements enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, ownership interest of the existing shareholders in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost. If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

20. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into related party transactions with our Promoters, Group Companies, Promoter group members. For details on related party transactions, please refer to the "**Annexure V-Related Party Transaction**" under chapter titled "**Restated Financial Information**" on page 174 of this Draft Prospectus.

We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favourable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm's-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

21. *Our Company has unsecured loans that may be recalled by the lenders at any time.*

Our Company has currently availed unsecured loans from certain lenders in the form of trade finance. These loans are payable as per the terms and conditions as mentioned in the sanction letters. However, in the future our company may also avail for unsecured loans which may be recalled by the lenders at any time. In the event that, any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. If we are unable to procure such financing, we may not have adequate working capital to maintain the desired inventory level. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, see "**Financial Indebtedness**" on page 187 of this Draft Prospectus.

22. *Our Promoters have provided personal guarantees for a portion of borrowings taken by Company to secure*

such loans.

Our Individual Promoters have provided personal guarantees as collateral for a portion of borrowings made by our Company. For details on the financial Indebtedness of the Our Company, please refer to page no. 187 of this Draft Prospectus. If our Company default in their repayment obligations, the guarantees extended by our Individual Promoters may be invoked and such lenders may require our Individual Promoters to discharge the balance liability of our Company, if any, and the lenders may recover the dues from personal assets of our Individual Promoters, including shares held by such Individual Promoters in our Company. In the eventuality of a default in the repayment of loans by our Company, it may divert the attention of our management and Individual Promoters towards any legal proceedings or recovery proceedings initiated in respect of such defaults by our Company. Under such circumstances, there could be an adverse impact on our business, financial conditions, and results of operations of our Company.

23. *Our registered office and most of our retail stores are on leased/ rented premises and leave & license agreement have been executed for the same. Any termination or dispute in relation to these lease/ rental agreement may have an adverse effect on our business operations and results thereof.*

As per the lease agreement, if there are any non-compliance by us in relation to any term of lease, lease fee and any other terms and conditions, the lease may result in the termination of the lease agreement and consequently we have to vacate the said premises. We also cannot assure you that lessor will not terminate the lease agreement, which would require us to locate to another premise and may have an adverse effect on our conducting our business operations.

Further, our 73 retail stores situated at various locations within Andhra Pradesh are leased premises. For details, please refer to "***Our Business Overview- Our properties***" page no. 106 of this Draft Prospectus. Our retail business operations are also conducted from the said premises. As per the lease agreements, if there are any non-compliance by us in relation to any term of lease, lease fee and any other terms and conditions; it may result in the termination of the lease agreement and consequently we may have to vacate the said premises. We also cannot assure you that lessor will not terminate the lease agreement, which would require us to locate to another premise and may have an adverse effect on our conducting our business operations. In case, we may have to re-locate to another premise and/or agree to pay the extra amount for using the same premises. Increase in lease structure will lead to increase of our expenditure which in turn may affect our revenue and increase of operational cost. Also, searching for the suitable location, setting the branch from the scratch and relocating the inventory from location to another, may lead to loss of clients, reduction in sales thereby affecting our profitability.

Further, one of the lease agreement for our store located at Narsipatnam, Andhra Pradesh is expired and cannot be renewed as the said premise is a disputed property among the legal heirs of the previous owner. For details on the same, please refer to "***Pending Litigation Relating to the Promoters of our Company - Civil Cases filed by the Promoters - Mohan Prasad Pandey vs Kalla Subba Rao and 4 others- OS 296 of 201***" in the chapter "***Outstanding Litigation and Material Developments***" page no. 196 of this Draft Prospectus. Similarly, our Company has entered into a lease agreement with the one of our Promoters, viz, Mr. Mohan Prasad Panday for wood land showroom, Dabagardens, Visakhapatnam premises. However, Mr. Mohan Prasad Panday does not have the complete right, title and interest in the property as said premise is under litigation. For details on the same, please refer to "***Pending Litigation Relating to the Promoters of our Company - Civil Cases filed by the Promoters - Mohan Prasad vs G.V.S. Rama Murthy - OS 153 of 201***" in the chapter "***Outstanding Litigation and Material Developments***" page no. 196 of this Draft Prospectus. The Company cannot assure free and peaceful possession of such disputed properties till such litigations are disposed.

Further, some leased property are owned by our Promoters- Mr. Mohan Prasad Panday and Mr. Bala Balaji Pandey. Our Company has obtained the NOC from them to use the said premises and to conduct our business operation on the same. However, if any of our Promoters decide to withdrawn their NOC, we may have to vacate the premises and re-locate to another premise. In such a case, searching for the suitable location, setting the showroom from the scratch and relocating the inventory from location to another, may lead to loss of clients, reduction in sales thereby affecting our profitability.

24. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations may be subject to risks such as fire, accidents and natural disasters. We maintain customary insurance policies for our Company. Whilst we believe that we maintain adequate insurance coverage amounts for our business and operations, our insurance policies are subject to exclusions and deductibles, and may not provide adequate coverage or cover all risks. If any or all of our equipment is damaged in whole or in part, or if there is a loss of life of our employees, our operations may get interrupted, totally or partially, for a temporary period. We do not maintain key-man insurance for any of our key personnel and loss of the services of such key personnel may have an adverse effect on our business, financial condition and results of operations.

There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that our insurance policies will be adequate to cover the losses incurred. Notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks such as the occurrence of an event that causes losses in excess of limits specified under the relevant policy or losses arising from events not covered by the insurance policies and insurance policies that we procure may not be adequate to cover all the risks associated with our business. Additionally, there may be various other risks and losses for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms.

Our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at an acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

25. *We require certain approvals and licenses in the ordinary course of business, some of the approvals may have been expired or have not been obtained or are required to be updated with the new name of the Company i.e. Cell Point (India) Limited post conversion of the Company from private limited company to public limited company. Any failure to successfully obtain/renew/update such registrations may adversely affect our operations, results of operations and financial condition.*

We require statutory and regulatory permits, licenses and approvals to operate our business. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain certain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to conversion of company from private to public Company i.e. 'Cell Point (India) Private Limited' to 'Cell Point (India) Limited'.

At present we have applied for name change but are yet to receive the registrations EPF registration and ESIC registration. Further, our Company is yet to obtain trade license for our Registered Office and some of our shops. We are also unable to trace our professional tax registration certificate. Except as stated above, we believe that we have obtained all the requisite permits and licenses which are required to run our business. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Also, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied by us. Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

26. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.

We have registered “” and “” as copyrights and trademarks of our Company. We have also registered the word mark “Cell Point” as a trademark of our Company. For further details, please see “Government and Other Statutory Approvals” beginning on page 196 of this Draft Prospectus.

While we endeavour to ensure that we comply with the intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company which carry the prefix "Cell Point", pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses.

27. There are certain discrepancies and non-compliances noticed in some of the corporate records of our Company. Such non-compliances may attract penalties.

There have been certain instances of incorrect filings or delayed filings or clerical/typographic errors or incomplete filings for corporate records, statutory forms and certain documents as filed with Registrar of Companies (RoC), Andhra Pradesh and as required to be maintained under the Companies Act, 1956 /or Companies Act, 2013. Our Company has erroneously filed certain statutory forms and certain documents such as form DIR 12 filing for appointment of Kiranmai Panday. Also, we are also unable to trace certain challans generated against the forms filed by our Company and we are unable to determine if such form were filed in time by our Company. Also, certain discrepancies such as changes in capital structure of company, changes in the management of the company etc. have been noticed in the corporate registers maintained by us. Although, till date in respect of above, we have not received any communication or no show-cause notice have been issued against our Company or its Promoter or its Directors or KMPs; in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company, its Promoter, its Directors and its KMPs, in which event the financials of our Company and our directors may be affected.

Further, to improve our secretarial compliances we have appointed Mr. Chandra Sekhar Raghavapudi as Company Secretary and Compliance Officer. There may also be instances where there are inadvertent errors in secretarial records and filings which have not been rectified by us. We cannot assure you that these filings and errors will not be subject to any penalties imposed by the relevant authority in this respect.

Also, with the intended expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

28. We have relied on declarations, affidavit and provisional documentary evidence for certain details in relation to our Promoters, Directors and Key Managerial Personnel as mentioned in “Our Management” chapter in this Draft Prospectus.

We have relied on declarations, affidavits and provisional documentary evidence in relation to certain documents pertaining to educational qualifications and experience of our Promoters, Directors and KMP as they are unable to trace copies of the documents. Accordingly, reliance has been placed on the details provided by them to disclose such details in this Draft Prospectus and neither we, nor the Lead Manager have been able to independently verify these details in the absence of primary documentary evidence. 29. *Our inability to manage losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on our profitability and our reputation.*

Our business and the industry we operate in are vulnerable to the problem of product shrinkage. Shrinkage at our stores or our distribution centre may occur through a combination of shoplifting by customer, pilferage by employees, damages, obsolescence and expiry and error in documents and transactions that go un-noticed. The retail industry also typically encounters some inventory loss on account of employee theft, shoplifting, vendor fraud, credit card fraud and general administrative error. An increase in product shrinkage levels at our existing and future stores or our warehouses may force us to install additional security and surveillance equipment, which will increase our operational costs and may have an adverse impact on our profitability.

30. *We are dependent on a number of Key Management Personnel, including our Promoters, Directors, senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

We are dependent upon the collective services of all the members of our Company's senior management team, including, among others, our Promoters and Directors, who oversee our day-to-day operations, strategy and growth of our business, managers and onboard officers. The loss of or inability to attract or retain, the services of any of these persons or several of these persons could have an adverse effect on our business. In particular, the expertise, experience and services of our Promoter and other members of our senior management team, including our Key Management Personnel helps us to execute our growth strategy and have been integral to our business. For further details, see "Our Management" on page no. 124 of this Draft Prospectus. If one or more of these Key Management Personnel are unwilling or unable to continue in their present positions, we may not be able to replace them with persons of comparable skill and expertise promptly or at all, which could have a material adverse effect on our business, financial results and prospects. We may take a long time to hire and train replacement personnel when skilled personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. We do not maintain a key man insurance policy to cover us for the loss we would incur if we are unable to retain any of our Key Management Personnel. Moreover, we may be required to substantially increase the number of our senior management team in connection with any future growth plans, and we may face difficulties in doing so due to the competition and paucity in the industry for such personnel. Our failure to hire or retain qualified personnel could materially impair our ability to implement any plan for growth and expansion.

31. *Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.*

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

32. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Promoters and/ or Directors and/ or Key Managerial Personnel's are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company.*

Our Promoters and/ or Directors and/ or Key Managerial Personnel's are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal of remuneration paid to them for services rendered and reimbursement of expenses payable to them. For further information, see "Capital Structure" and "Our Management" on page nos. 53 and 124, respectively, of this Draft Prospectus.

33. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer.*

Further we have not identified any alternate source of financing the 'Objects of the Offer'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance. As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds,

internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "*Objects of the Offer*" beginning on page no. 63 of the Draft Prospectus.

34. *The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled "Objects of the Issue". Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.*

We propose to utilize the Net Proceeds for purposes identified in the section titled "*Objects of the Issue*" beginning on page no. 63 of this Draft Prospectus. Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management's estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time on account of various factors such as our financial and market condition, business and strategy, competition, negotiation with suppliers, variation in cost estimates on account of factors, including changes in design or configuration of the equipment and other external factors including changes in the price of the equipment due to variation in commodity prices which may not be within the control of our management. Our estimates may exceed the value and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the Objects of the Issue is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the SEBI ICDR and Companies Act. However, the Board and Audit Committee will monitor the utilization of the Net Proceeds and ensure the same is disclosed under separate head in our balance sheet along with relevant details for all sum amounts that have not been utilized. Our Company will issue a disclosure to the Stock Exchanges, on a quarterly basis, deviations, if any, in the Use of Proceeds of the Issue from the Objects stated in the Draft Prospectus or by way of an explanatory statement to the notice for a general meeting.

35. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be mainly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun, or cost overrun may adversely affect our growth plans and profitability.

36. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakhs. Since this Issue Size is less than Rs. 10,000 Lakhs, our Company has not appointed any monitoring agency for this Issue. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

37. *The Company has not appointed any independent agency for the appraisal of the proposed Project.*

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project.

38. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to*

certain compliance requirements, including prior Shareholders' approval.

Our Company intends to deploy and utilize Net Proceeds raised pursuant to the Initial Public Offer in the manner set out in the section titled “*Objects of the Issue*” on page no. 63 in the Draft Prospectus. In accordance with SEBI LODR Regulations and other applicable provisions, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations and it may also lead to delay in deployment of funds as per the schedule of implementation as disclosed in objects section titled “*Objects of the Issue*” on page no. 63 in the Draft Prospectus. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by redeploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

39. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet.*

Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

40. *Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.*

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 73.06% of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company’s or your best interests. For further details, please refer to the chapters titled “*Capital Structure*” and “*Our Promoter, Promoter Group and Group Companies*”, beginning on page no. 53 and 137 respectively, of this Draft Prospectus.

41. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

42. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

43. Our Company has not paid any dividends in the past and we may not be able to pay dividends in the future.

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

44. Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "Statement of Tax Benefits" on page no. 79 of this Draft Prospectus.

45. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. [●] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market

subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled “**General Information – Details of the Market Making Arrangement for this Issue**” on page no. 50 of this Draft Prospectus.

46. Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.

There has been no public market for our Equity Shares prior to the Offer. The price may not necessarily be indicative of the market price of our Equity Shares after the Offer is completed. You may not be able to re-sell your Equity Shares at or above the Offer price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on Emerge Platform of NSE after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Offer will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;
- An assessment of our management, our past and present operations, and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

EXTERNAL RISK FACTORS

47. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

The company is subject to various regulations and policies. For details see section titled “**Key Industry Regulations**” beginning on page no. 115 of this Draft Prospectus. The company’s current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

48. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors’ assessments of our Company’s financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than

under Indian GAAP.

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see “***Presentation of Financial, Industry and Market Data***” on page no. 13 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

49. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

50. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

51. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

52. Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations, cash flows and financial condition.

India is our key market. For Fiscal 2022, entire of our Company's revenue from operations was from India. In addition, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations, cash flows and financial condition.

53. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

Economic Overview

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Introduction to Indian Retail Industry

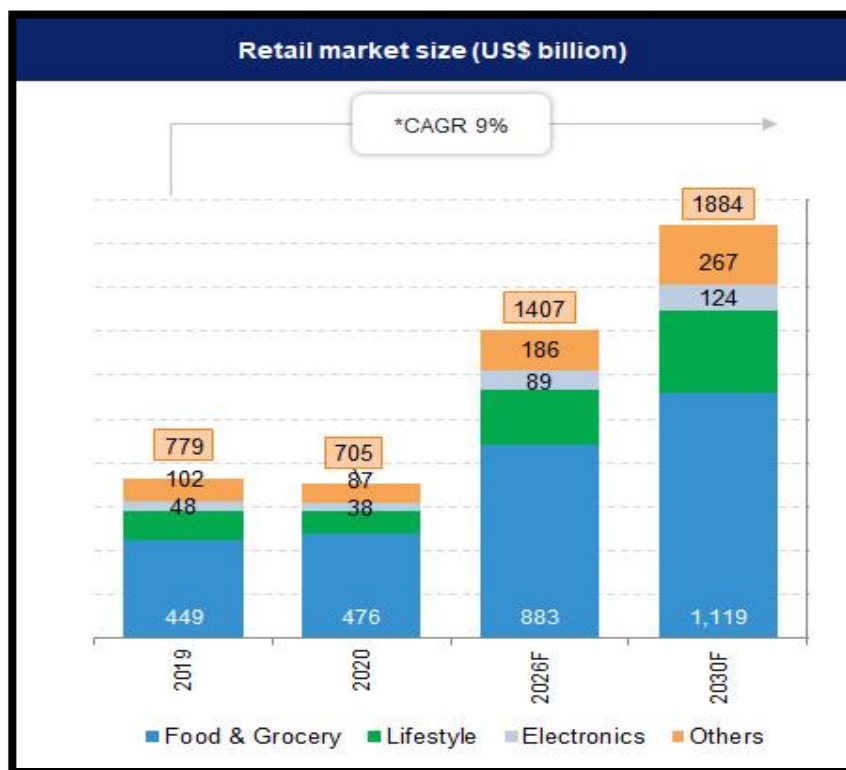

Indian retail industry has emerged as one of the most dynamic and fast-paced industries due to the entry of several new players. It accounts for over 10% of the country's gross domestic product (GDP) and around 8% of the employment. India is the world's fifth-largest global destination in the retail space. India ranked 73 in the United Nations Conference on Trade and Development's Business-to-Consumer (B2C) E-commerce Index 2019. India is the world's fifth-largest global destination in the retail space and ranked 63 in World Bank's Doing Business 2020.

The sizeable middle class and nearly unexplored retail market in India are the main enticing factors for international retail behemoths seeking to move into newer markets, which will help the Indian retail business grow more quickly. The urban Indian consumer's purchasing power is increasing, and branded goods in categories like apparel, cosmetics, footwear, watches, beverages, food, and even jewellery are gradually evolving into business and leisure that are well-liked by the urban Indian consumer. The retail sector in India is expected to reach a whopping US\$ 2 trillion in value by 2032, according to a recent analysis by the Boston Consulting Group (BCG).

India is the world's fifth-largest global destination in the retail space. In FDI Confidence Index, India ranked 16 (after US, Canada, Germany, United Kingdom, China, Japan, France, Australia, Switzerland, and Italy).

Market Size

As per Kearney Research, India's retail industry is projected to grow at 9% over 2019-2030, from US\$ 779 billion in 2019 to US\$ 1,407 billion by 2026 and more than US\$ 1.8 trillion by 2030. Revenue of India's offline retailers, also known as brick and mortar (B&M) retailers, is expected to increase by Rs. 10,000-12,000 crore (US\$ 1.39-2.77 billion) in FY20. India's direct selling industry is expected to be valued at US\$ 2.14 billion by the end of 2021. E-Retail has been a boon during the pandemic and according to a report by Bain & Company in association with Flipkart 'How India Shops Online 2021' the e-retail market is expected to grow to US\$ 120-140 billion by FY26, increasing at approximately 25-30% p.a. over the next 5 years. Despite unprecedented challenges, the India consumption story is still robust. Driven by affluence, accessibility, awareness and attitude, household consumption stood at Rs. 130-140 trillion (US\$ 1.63-1.75 trillion) in 2021.

India has the third-highest number of e-retail shoppers (only behind China, the US). The new-age logistics players are expected to deliver 2.5 billion Direct-to-Consumer (D2C) shipments

by 2030. India is the fifth-largest and preferred retail destination globally. The country is among the highest in the world in terms of per capita retail store availability. India's retail sector is experiencing exponential growth with retail development taking place not just in major cities and metros, but also in tier II and III cities. Online penetration of retail is expected to reach 10.7% by 2024 versus 4.7% in 2019. According to India Ratings and Research (Ind-Ra), domestic organised food and grocery retailers are expected to increase by 10% YoY in FY22. By 2024, India's e-commerce industry is expected to increase by 84% to US\$ 111 billion, driven by mobile shopping, which is projected to grow at 21% annually over the next four years.

Economic & Consumer Outlook

Effective vaccines and greater general knowledge of COVID-19 increased consumer confidence, which resulted in an uptick in consumer spending, especially in food services, transportation, and recreation services. The labor market also played a key role, with the unemployment rate dropping significantly while consumers also benefited from strong earnings growth. As the economic recovery gathers steam, consumers are also spending more and saving less than what they did in 2020.

All of this is a good sign for retailers in the near term. In 2022, we expect the economic recovery to continue at a strong pace with GDP rising by 3.5% in 2022. Given this scenario of high growth and reduced health concerns, we forecast real personal consumerspending (PCE) to expand through 2022. We expect services to lead the recovery in 2022, while durable goods should decline, given the strong growth in the category in 2020-2021.

With consumers muddling through the pandemic since early 2020, time and experience have yielded some clarity for retailers about what to expect moving forward. Despite increasing bifurcation, executives are confident that consumer behavior is moving in their favor, especially around the willingness to spend and a return to in-person experiences. However, recent consumer data suggests that consumers are rethinking priorities, with one-third of consumers saying they are spending more on experiences than possessions compared to a year ago.

Executives appear optimistic about revenue growth and margins for 2022 (figure 1). Some are even taking perceived headwinds and turning them into opportunities. For example, 58% saw inflation as an opportunity to take price and improve margins. Others are rethinking their old buying and discounting cadences. With fewer products to sell, some stores even stopped offering promotions, thereby boosting profits. Others built on strategies already in the works, such as closing unprofitable locations and strengthening their positions to emerge from the pandemic.

Priorities in Retail Industry

Looking ahead, many retail executives see labor shortages as a leading concern, especially because it may be difficult to compete with the flexibility of the gig economy for hourly wage employees. The figures are daunting: 70% of executives say labor shortages—especially in hourly wage jobs—will hamper retail growth in 2022.

Currently, the biggest pain point for retailers is at the store level, and 74% expect shortages in customer-facing positions in 2022. Given the pervasiveness of the situation, retailers have little choice but to address the problem or adapt the business model. Warehouse positions are also expected to be problematic, and 56% expect shortfalls in hourly supply chain, distribution, and logistics positions. Turnover has always been an issue with these jobs, but it has accelerated even further because of the additional pressures put on workers by the pandemic.

Workforce - Also concerning is that nearly half of executives expect a shortage in skilled workers for IT and analytics positions—needed roles that require greater investment and will likely be the foundation of digitally enabled retail. The shortage is compounded by the fact that retail is competing against virtually every other industry for talent; retailers need to solidify why they are more attractive than big tech for high-demand workers. Hiring for technology-driven roles will likely require retail to move at a much faster pace in adopting the latest and greatest technology to compete with far more tech-savvy industries.

As retailers look to address the war for talent, they should understand how the pandemic has reshaped priorities. Recent data shows the collective experience of the pandemic has induced a period of self-reflection for wage earners.

In particular, there is a greater focus on introspection and well-being, and a divide between money and purpose. There is also a strong desire to work from home more frequently. Current retail workforce structures seem destined to clash with evolving employment expectations.

In addition, evolving priorities will likely require retailers to address how they represent themselves in the marketplace, from diversity of suppliers to career advancement for historically marginalized groups. The way a company presents its brand can be a vital part of the retail reset and gaining competitive advantage. Adapting to changing marketplace conditions and evolving the narrative around the brand can help make customers, vendors, and employees feel included and, more importantly, connected with the brand.

Supply Chain Resiliency - Failures up and down the supply chain during the pandemic have laid bare persistent issues with the manufacture and movement of goods around the world. Though it shouldn't have come as a real surprise, the sudden and simultaneous shutdowns demonstrated in real time that the status quo would no longer suffice.

As retailers look to take action, it's important to understand that just as shifting priorities from the pandemic have changed employee expectations, they have also altered the way consumers shop. Where and when customers make their purchases are far less predictable these days. Consumers have become merchants in their own right, buying from a broad range of retail channels, curating and promoting their own array of products via their social media accounts, reselling used goods through digital platforms, and setting the terms for how purchases arrive on their doorsteps.

Retailers, therefore, should pivot toward transparency, sharing information more openly, completely, and with lead time, to help their partners upstream plan accordingly. In a nutshell, as one subject-matter specialist put it, "There can be no secrets anymore. Not sharing information is just detrimental to everyone."

Digital Revolution - In 2022, we expect the fusion of digital and physical experiences to accelerate further. Retailers should make significant investments that not only meet the e-commerce needs of the present, but also those of the future.

A key take away from the pandemic has been that consumers have reset their level of reliance on technology and digital platforms. Virtual work, school, and entertainment now fill homes with more gadgets and accessories. In addition, consumers tried and adopted new and innovative ways to shop. Even in our recent back-to-school and holiday studies, consumers indicated that though they feel more comfortable returning to stores, their preference for online channels remains higher than before the pandemic.

Leaders and laggards are mostly aligned on how they plan to invest in 2022 around e-commerce, digital marketing, and automated checkout, but differ in their views and investments further out.

Over the next five years, leaders are buying into the prospects of digitization of the physical world, such as voice commerce, staff-free cashier-less stores, and selling of digital goods. It's interesting to note that more laggards aren't expecting these trends to be adopted, given that the technologies have been discussed for years.

Opportunities in Retail Industry

For nearly two years, predictions about the future of retail have seemed dire, and retail headlines for 2022 don't look much better: empty store shelves, over one million retail jobs unfilled, and surging inflation. But these headwinds have also yielded some positive results—retailers have been forced to reexamine their legacy systems and strategies that have shaped the industry for years.

For 2022, retailers should continue down the remediation path they began at the onset of the pandemic to realize long-term and lasting benefits. In fact, the next 12 months offer opportunities to restructure outmoded supply chains, right size inventory management, review pricing, recalibrate promotional cadences, and reinvent the physical store for the digital age. This will likely require entirely new ways of thinking and long-term commitments from retailers, but these efforts could forever shift the way retailers conduct business. That future begins today, by addressing near-term retail challenges with an eye to the future.

To realize long-term and lasting benefits, however, retailers should continue down the remediation path they began at the onset of the pandemic. In fact, 2022 offers opportunities to restructure outmoded supply chains, right size inventory management, review pricing, recalibrate promotional cadences, and reinvent the physical store. This will likely require major transformational thinking and long-term commitments from retailers, but these efforts could forever shift the way retailers conduct business.

That future begins today by addressing near-term retail challenges with an eye to the future. Now is an ideal time to take stock of the market to better understand what traits separate those who embrace the reset—the leaders—from the rest of the pack. We asked 50 retail executives to share their views on where they see the industry in the next 12 months. The resulting data, combined with insights derived from client work and prior research, offers a snapshot of strategies and investment plans that help inform the future of the industry. For 2022, several priorities emerged that we discuss in more detail below—namely workforce retention, supply chain resiliency, and digital investments.

Government Initiatives

The Government of India has taken various initiatives to improve the retail industry in India. Some of them are listed below:

- In April 2022, the government approved PLI scheme for textiles products for enhancing India's manufacturing capabilities and enhancing exports with an approved financial outlay of Rs. 10,683 crore (US\$ 1.37 billion) over a five-year period.

- The Minister of MSME announced inclusion of retail and wholesale trades as MSMEs. Retail and wholesale trade will now get the benefit of priority sector lending under the RBI guidelines.

Road Ahead

Retailers face significant challenges that will likely last beyond the pandemic, but there are also unexpected opportunities that can help them prepare for future disruptions. Retailers must figure out how to reset—as employers, at meeting consumer needs, and by being better corporate citizens—to compete in the next era of retail. Retailers should embrace the current disruption and commit to pivot toward the future.

The COVID-19 pandemic has caused changes in consumer preferences, habits, and attitudes over the past two years. This has a significant impact on how people buy and consume goods and services. Global retailers are now using cutting-edge business strategies to take advantage of new retail opportunities. Consumers no longer distinguish between offline and online consumption channels. Due to this, major companies are experimenting with different ways to design seamless retail experiences that are integrated across all channels. By utilising both established e-commerce platforms and traditional techniques, retailers are also experimenting with revenue models to improve their customer value offer.

E-commerce is expanding steadily in the country. Customers have the ever-increasing choice of products at the lowest rates. E-commerce is probably creating the biggest revolution in retail industry, and this trend is likely to continue in the years to come. Retailers should leverage digital retail channels (E-commerce), which would enable them to spend less money on real estate while reaching out to more customers in tier II and tier III cities. Online retail market in

India is projected to reach US\$ 350 billion by 2030 from an estimated US\$ 55 billion in 2021, due to rising online shoppers in the country. Online penetration of retail is expected to reach 10.7% by 2024 versus 4.7% in 2019. Nevertheless, long-term outlook for the industry looks positive, supported by rising income, favourable demographics, entry of foreign players, and increasing urbanisation.

Smartphone Market Trends

Production of mobile phones in India has taken a leap after the government introduced the Phased Manufacturing Programme (PMP) and the Production Linked Incentive (PLI) scheme, reducing the country’s imports and dependency on China. After logging a 33% compound annual growth rate (CAGR) between fiscals 2016 and 2021, domestic mobile production is estimated to have grown 24-26% in fiscal 2022. Despite the ongoing chip shortage, three of the global manufacturers met PLI production targets during the fiscal. CRISIL Research expects the growth momentum in production to sustain, with a 22-26% CAGR between fiscals 2022 and 2024 to Rs 4.0-4.5 lakh crore in value terms. The growth will be led by the PLI scheme, which is in the second year for most players. As a corollary, the country’s mobile imports decreased ~33% on-year in fiscal 2022. Dependency on China reduced to 60% from 64% in fiscal 2021, and is expected to fall further in the medium term. However, with rising production, imports of electronic components essential for mobile assembling/manufacturing also increased 27% on-year.

Increasing sales through online Channels: With COVID-19-induced lockdowns, sale of smartphones through online channels increased in 2020. According to IDC, online channels grew 12% YoY and contributed 48% to the total sales in 2020. However, during the festive season (Diwali), footfalls in physical stores picked up and offline channels clocked a 5% YoY growth in the fourth quarter of 2020.

The trend of increasing online sale is expected to continue every year from 2022, driven by improved digital infrastructure, surging internet usage and rising acceptance of e-commerce.

Increased usage of smartphones: Following the government curbs on social distancing and lockdown, there was a 39% rise in the average time spent by an Indian user on a smartphone. As per a report by App Annie, India stood third (4.6 hours a day) on the list of average time spent by an average user on smartphones, with Indonesia (5.2 hours a day) and Brazil (4.8 hours a day) taking the top two spots worldwide.

The top apps accessed in India were Zerodha (financial services), WhatsApp (communication) and Instagram (social media). Demand for 5G phones to grow multi-fold: 5G smartphones accounted for <3% of the overall market in 2020. Even without the 5G network roll-out, India has already become one of the top markets for shipment of 5G smartphones. As 5G continues to be one of the top desired features in a smartphone, total shipments of 5G smartphones in India is estimated between 32 million and 40 million units in 2021. The cheapest 5G smartphone available in the Indian market is priced at Rs. 15,000–16,000 (US\$ 200–220). Cheaper chipsets and competition among device manufacturers are expected to further drive down the prices.

India's growing role in mobile phone manufacturing and exports

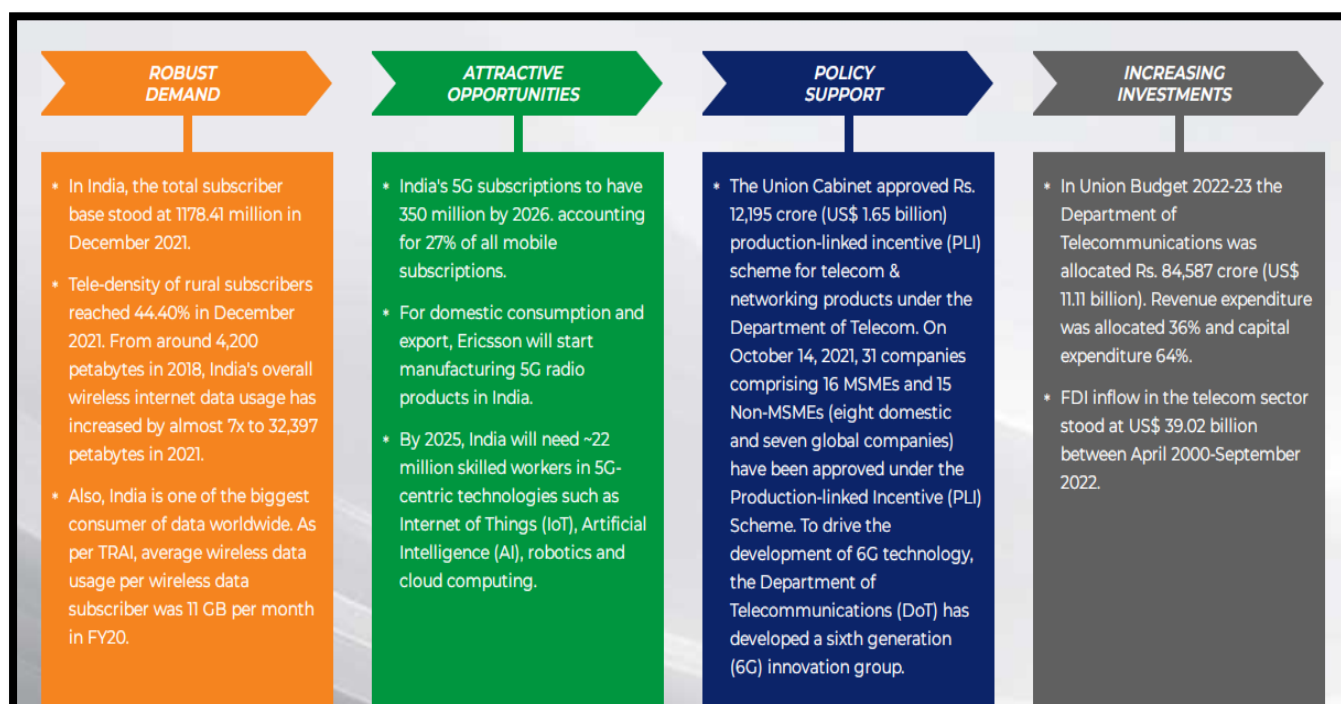

Mobile Phones is the largest consumer device category globally, both in terms of unit shipment and value. It is the most ubiquitous devices in our lives with highest per capita penetration of any device. Not surprisingly, mobile phones are also the highest imported electronic goods in the world.

India has the potential to become one of the largest exporter of mobile phones in the world. Export value of mobile phones in India are likely to rise leading to a surge in demand. Moreover, the demand for smartphones is estimated to surge manifold by 2025 resulting in an increase in domestic production due to the PLI scheme and favourable government initiatives, which are likely to brand India as a competitive land for electronics manufacturing. Creating domestic winners in the electronics manufacturing segment will flare the “Vocal for Local” movement while scaling global operations. Under the Digital India and Make in India initiatives, India witnessed an unprecedented rise in electronics manufacturing in the past few years. The COVID-19 pandemic fuelled the intensity of digitisation in the world. The NEP will position India as a global hub by focusing on scale and size and marketing exports and boosting domestic value addition by building and supporting an environment for the industry to compete globally.

Globally recognised companies such as Foxconn, Samsung, Hon Hai, Rising Star, Pegatron and Wistron view India as a potential market to expand their smartphone manufacturing capabilities. Foxconn, Wistron, Pegatron and Samsung have inked the PLI scheme with the government to make India a global electronics hub. Furthermore, Foxconn, Wistron and Pegatron submitted applications for a US\$ 6.65 billion scheme to enhance local smartphone production. According to the proposal, Lava, Samsung, iPhone's contract manufacturers and Dixon target to manufacture components and mobile devices worth more than Rs. 11 trillion (US\$ 137.9 billion) in the next five years. Apple and Samsung cover approximately 60% of the global handset market in high- to medium-price segments. Such companies will support India's mobile phone export growth with their robust presence and impeccable market share. The PLI scheme is believed to have the potential to add US\$ 520 billion in the next five years, thereby making the electronics manufacturing sector a game changer for the Indian economy. The government has constantly been working with the industry to enhance the value of marketing India's exports to improve India's global position as a reliable supplier. Active measures have been taken to align with the global value chain.

Growth Opportunities

India's smartphone market is all set to bounce back after the COVID-19 pandemic, which is expected to be under control with rising vaccinations. With just a minor dip in 2020, market resilience during the pandemic is testimony to the potential of the Indian smartphones industry. As per the NPE 2019, domestic smartphones market is estimated to reach US\$ 80 billion by 2025-26, from US\$ 25.1 billion in 2018-19.

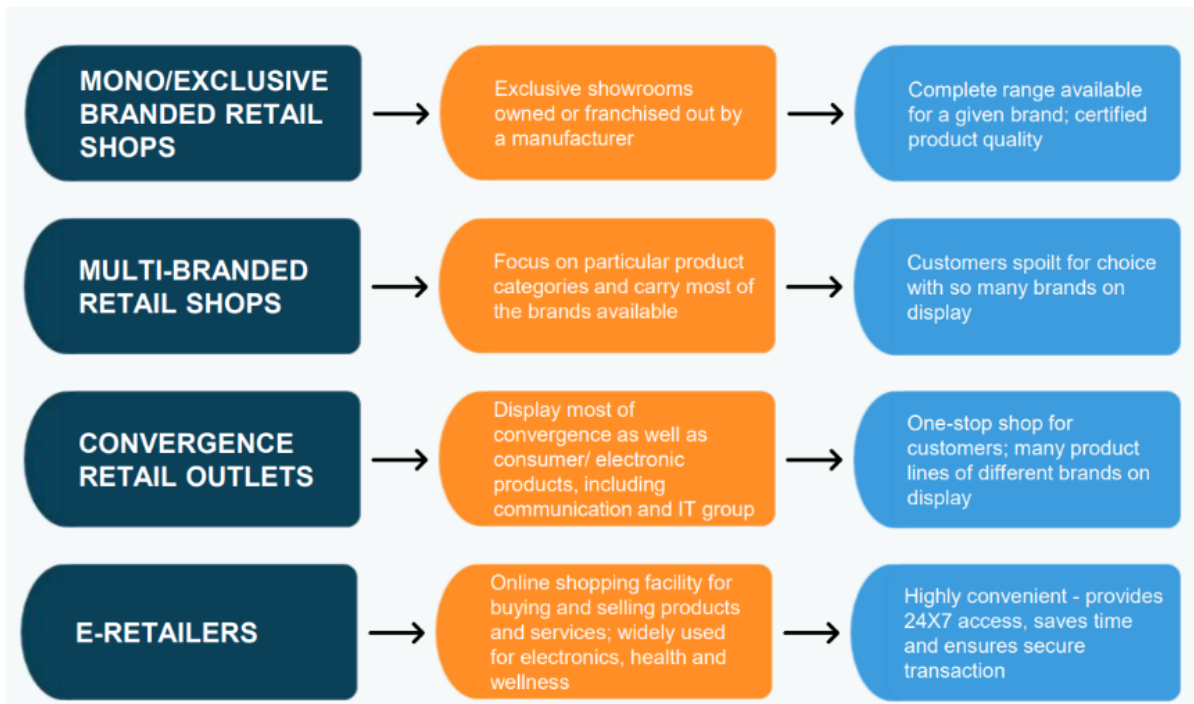

With ~320 million feature phone users, the market presents a huge opportunity. With Reliance Jio set to launch a low-cost smartphone, migration of more and more feature phones to entry-level smartphones is inevitable. If the low-cost phone is a success, the Indian smartphone market will enter a hyper growth phase.

The other growth trigger could be 5G, which is touted as the next battleground for phone manufacturers as well as telecom service providers in India. With flat sales for the past couple years, the Indian market, with a large untapped millennial population, presents an attractive opportunity for industry players.

With smartphone penetration levels in India being lower than that in China and the US, the market is hot for more investments with supporting government policies.

Sales Growth

The Indian smartphone industry is estimated to ship 190-200 million units by 2022, with more 5G gadgets competing for consumers' attention.

According to Counterpoint Research Analyst Shilpi Jain, the Indian smartphone market has been on a steady upward trajectory for the past five years, reaching 158 million units in 2019. Anand Priya Singh, CyberMedia Research (CMR) Analyst - Industry Intelligence Group, smartphone shipments increased by 11% year on year, from 150 million in 2020 to 167-168 million in 2021 predicted that smartphone shipments will hover around 187-190 million in 2022, with 5G device shipments increasing by 129% year-on-year from 28 million in 2021 to about 64 million in 2022.

While 5G networks are not yet accessible, industry observers say 5G devices are in high demand, with consumers ranking 5G as one of their top three priorities when shopping for a smartphone. Madhav Sheth, the CEO of Realme India, claimed that 5G technology and gadgets have been a hot topic since 2019, with smartphone makers releasing 5G smartphones in early 2020. "Given that 5G trials are scheduled for 2022, and spectrum auctions are likely to happen in H2 2022, we expect a higher demand for 5G devices in the upcoming year," he added.

The government authorised a Rs 76,000 crore (US\$ 10.2 billion) initiative in December to expand semiconductor and display manufacturing in India, in an effort to establish the country as a worldwide hub for hi-tech production and attract large chip companies. The action will help India achieve its goal of being self-sufficient in electronics manufacturing by attracting significant investments and creating 35,000 specialised jobs, in addition to one lakh indirect jobs.

Other areas, such as smart TVs and TWS (earbuds), have seen significant growth as a result of the devices' rising affordability. Smart TVs account for about 85% of the overall TV market, according to the research organisation, and this percentage is expected to grow.

Factors Driving Smartphone Sales

The constant need to stay connected has made smartphones the most popular device not just in India, but worldwide. Communication on-the-go has become a norm for people, especially for people in urban areas with busy lifestyles.

With rising disposable income levels and easy financing options (such as EMI), owning a smartphone is no longer a luxury. This is a reality for a young country, such as India, with a large working population. In addition, fierce competition among handset manufacturers and technological innovations keeps driving down the prices of smartphones, boosting affordability and sales growth.

With faster internet speed, consumption of online entertainment has skyrocketed. YouTube, Netflix, Amazon Prime, and many others offer a host of entertainment options, which can be easily accessed through smartphones. Not just entertainment, in a post COVID-19 era, smartphones are being extensively used for online education and online shopping. Also, the 'Digital India' initiatives by the Indian government are paving the way for various mobile apps and services. This will further spur usage and popularity of smartphones among Indians

Organised retail in nascent stage

1. In FY19, traditional retail, organised retail and E-commerce segments accounted for 88%, 9% and 3% of the market, respectively.
2. The organised retail market in India is growing at a CAGR of 20-25% per year.
3. The unorganised retail sector in India has a huge untapped potential for adopting digital mode of payments as 63% of the retailers are interested in using digital payments like mobile and card payments.
4. Many fintech companies are competing for their presence in local stores. In May 2020, Paytm announced a US\$ 1 billion loyalty programme and launched online ledger services for kirana stores in India. Other fintech companies such as PayNearby, Phonepe, BharatPe and Mswipe introduced different services for small shop owners, enabling better digital payments and delivery options at these stores.
5. For example, Amazon partnered with local stores to provide a platform for many small shops and merchants on its Amazon marketplace. While, Walmart has its own network of 28 'best-priced' stores serving local stores across the country.
6. In October 2021, Flipkart announced plan to connect 5,000+ offline brand stores from >300 cities across the country on its platform to accelerate digital adoption for small retailers.

Rising prominence of online retail

1. E-retail has been a boon during the pandemic and according to a report by Bain & Company, in association with Flipkart, 'How India Shops Online 2021', the e-retail market is expected to reach US\$ 120-140 billion by FY26, increasing at ~25-30% annually over the next five years.
- 2.
3. India has the third-highest number of e-retail shoppers (only behind China, the US). As per the RedSeer report, India is set to become the thirdlargest online retail market by 2030 after the US and China with an annual Gross Merchandise value (GMV) of ~US\$ 350 billion. The new-age logistics players are expected to deliver 2.5 billion Direct-to-Consumer (D2C) shipments by 2030. Online used car transaction penetration is expected to grow by 9x in the next 10 years.
4. The Government plans to allow 100% FDI in E-commerce under the arrangement that the products sold must be manufactured in India to gain from the liberalised regime.
5. Online retailers now deliver to 15,000-20,000 pin codes out of nearly 100,000 pin codes in the country. ▪ During the festival period in 2020, Amazon, Flipkart and various vertical players sold goods worth US\$ 9 billion despite the pandemic onslaught.
6. In April 2020, Amazon India announced to invest Rs.10 crore (US\$ 1.3 billion) to strengthen its pilot 'Local Shop on Amazon' programme, which added >5,000 local shops and retailers on the platform from >100 cities.

Shipments of Smartphone among Companies

Xiaomi continued to lead but was the only vendor amongst the top ten with declining shipments (-28%) YoY in 2Q22. It faced supply constraints through 1H22, especially in the sub-US\$200 segment. But 2Q22 was the launch quarter of its Redmi 10 series, which together with Redmi 9A Sport and Redmi Note 11, accounted for 35% of its shipments. Xiaomi dropped to the third slot within the 5G segment, which contributed 25% of its overall shipments.

Realme climbed to the second slot for a second time, with a strong YoY growth of 24% (highest among top five vendors) in 2Q22. It cemented its second position in the online channel with 23% share with affordable model offerings in the C-series. With two-thirds of its portfolio on UNISOC chipsets, realme ensured strong supplies in the entry-level price segment.

Company	2Q22 Shipment Volumes	2Q22 Market Share	2Q21 Shipment Volumes	2Q21 Market Share	Year-Over-Year Unit Change (2Q22 over 2Q21)

Vivo climbed to the third slot, growing by 17% YoY. It continued to lead the offline channel with 24% share. vivo was the second largest 5G smartphone player in the Indian market with 33% of its smartphones as 5G. Expansion in the online channel through its T-series and new launches in the sub-brand iQOO led to a surge in its online share. Samsung dropped to the fourth slot, registering a weak 2Q22 with a growth of 3% YoY. Despite a refreshed portfolio, demand remained low, while ASPs climbed to US\$250 (highest amongst the top five vendors). It continued to lead in the 5G segment with 46% of its shipments as 5G smartphones.

OPPO, in the fifth slot, witnessed a meagre growth of 2%. It focused on the mid-premium segment with launch of the F21 Pro and expanded in the online channel with the K-series. However, the supply constraints persisted in the affordable segment

Government Initiatives

The central government has taken various steps to increase the domestic production and export of electronic devices, positioning India as a global market for mobile phones. Frameworks under the Department of Commerce are being examined to eliminate outdated provisions and redundancies. The government is pursuing multiple bilateral trade agreements, and it is committed to branding each district in India as an export hub through programmes such as One District One Product. In addition, the government has cushioned exporters through numerous export-oriented

schemes. Decriminalisation and rationalisation would reduce the compliance burden and expand the ease of doing business. Some of the crucial government initiatives are listed below:

- **National Policy for Electronics (NEP):** The NEP was launched by the Ministry of Electronics and Information Technology. NEP envisions positioning India as a global electronics hub for electronics design and manufacturing by driving and enhancing domestic capabilities in the country for manufacturing goods and facilitating an environment for the industry to prevail worldwide.
- **Production Linked Incentive (PLI) Scheme for Large Scale Electronics Manufacturing:** PLI was launched in 2020, aiming to provide incentives ranging from 4% to 6% to qualified companies on incremental sales of mobile phones and other electronic devices for a period of five years. Companies under the PLI scheme are expected to export 60% of the total production in the next five years. Furthermore, the scheme is likely to generate direct employment opportunities for 0.2 million people, while indirect employment is also expected to surge phenomenally. The scheme will substantially enhance India's manufacturing capabilities and help develop robust economies of scale.
- **Phased Manufacturing Programme (PMP):** The scheme will enhance the value of India's mobile phone production and sub-assemblies. As a result, the country is luring investments in this sector. Also, substantial manufacturing capabilities have been established in the country. The production of mobile phones has been swiftly moving to a completely knocked down level from a semi-knocked down level, thereby gradually boosting the domestic value addition.
- **Rationalising the tariff structure:** For marketing the domestic production of electronic goods, including cellular mobile phones, televisions, and set-top boxes, rationalising the tariff structure will help in boosting domestic capabilities by reducing imports.
- **Foreign Direct Investment (FDI):** The government permitted 100% FDI under the automatic route for manufacturing electronic devices (excluding countries sharing land borders with India) according to the applicable laws, rules and regulations.

Some Initiatives taken by Private companies -

Vivo: Apart from committing to invest ~Rs. 7,500 crores (~US\$ 1 billion) for manufacturing mobile phones in India in 2019, the company further aligned with the 'Make in India' initiative by revamping its logo and adding a new 'Make in India' design to be printed on the boxes of phones for sale in India.

Tata Group: Plans to invest ~Rs. 11,000 crores (~US\$ 1.5 billion) for a new mobile phone and component manufacturing plant in Tamil Nadu to take advantage of the govt.'s PLI scheme.

Samsung: The company announced plans to invest ~Rs. 3.7 lakh crore (~US\$ 50 billion) in India over the next five years to manufacture phones. It plans to produce phones worth Rs. 2.2 lakh crore (~US\$ 30 billion), priced above Rs. 15,000 (~US\$ 200), under the PLI scheme.

Future Outlook of Retail Smartphone Market

Smartphones have been taking the world by storm. Look at the mobile phone advertisements and you will know what we are talking about. While earlier mobile phone advertisements talked only about the product, these days they paint a picture of society. Younger people taunting technologically-challenged older people for not using smartphones, People finding directions on Google Maps instead of asking people...that is how powerful smartphones are today. They have changed the face of society and given a new definition to social status.

This situation is even more widespread in India, which is the fastest-growing smartphone market in the world. India reportedly accounts for nearly 30 million smartphone purchases every quarter, and this percentage keeps increasing several times a year. According to IDC and the Ericsson Mobility Report, mobile subscriptions in India are expected to rise to 1.4 billion by 2021.

That isn't all. India is also the second-largest telecommunications market in the world (after China), with over 1.05 billion subscribers. The mobile phone market in India has grown exponentially in the past decade, and with the

emergence of smartphones, the growth has increased substantially. The Indian economy is also affected by smartphone sales, with the smartphone market accounting for a significant portion of the GDP. India is also the fourth largest economy in terms of usage of mobile applications.

The strong and rapid growth of the smartphone market has been made possible by several liberal policies of the Indian government, along with huge consumer demand. The telecom industry today is among the top five employment opportunity generators in India, creating over four million direct and indirect jobs over the next few years, according to data released by Randstad India. Increase in smartphone sales and internet usage along with the government's efforts to increase the penetration of technology in rural regions have made this possible. The IDC also predicts India to overtake the US smartphone market in a few years time.

The growth of the online market has also strongly affected the smartphone industry. The greatest example is Chinese handset maker Xiaomi, an online brand whose shipments to India grew by 290 per cent in the third quarter of 2017. While Samsung shipped 9.4 million units, Xiaomi shipped 9.2 million, reducing the gap between the market shares of the two brands. The primary reason for the success of Xiaomi is the low-end phones packed with incredible features. Indian customers always look for a good bargain, so the same features that Samsung offers at the 20,000 – 30,000 range are offered by Xiaomi at the sub-15,000 segment.

Where online brands are concerned, customers are always in for huge discounts and deals. There are festive offers, inaugural offers, end-of-season sale, and low-cost EMIs that enable even the lower middle class to own a smartphone. Services necessary services have rolled out smartphone apps, driving people to learn more about the technology in order to be able to use certain services. The convenience offered by app cabs and food delivery apps are also major drivers among the educated middle class for getting smartphones.

While there are more takers for the budget smartphones, big brands like Apple isn't too far behind either. Apple has witnessed a slowdown in global sales of the iPhone since the past year, and this has led CEO Tim Cook to focus on India, where it has less than 1 per cent of market share. Even though it's a tough market for Apple, with local and Chinese brands galore, India certainly forms an important market for the brand. Apple has begun local production in India in early 2017, and saw 900,000 iPhone shipments in the third quarter.

With 4G services entering the Indian market, smartphone sales are expected to be at an all-time high. By 2025, India will have 700 million internet users, with the telecom market touching Rs. 10 trillion. The India government has been playing a vital role in making the country tech-savvy. Some of the policies planned by the government include providing WiFi to 550,000 villages by March 2019 and setting up a 5G India 2020 Forum for the early deployment of 5G in India.

Smartphone Accessories Market Overview

India mobile phone accessories market is estimated to garner robust revenue by the end of 2031 by growing at a CAGR of ~10% over the forecast period, i.e., 2022 – 2031. Further, the market generated remarkable revenue in the year 2021. The growth of the market can primarily be attributed to the exponential increase in the number of mobile phone users. For instance, in 2020, the number of mobile phone users in India was projected to be approximately 745 million.

Mobile accessories are any sort of hardware that is not installed in the body of a mobile phone referred to as mobile phone accessories. These accessories are generally purchased for the safety and to consume full advantages of mobile phones. Mobile phone accessories are capable of increasing the convenience, effectiveness, and beauty of mobile phones. India mobile phone accessories market trends such as, increasing urban population and higher adoption of e-commerce are anticipated to influence the growth of the market positively during the forecast period. For instance, the number estimated for the Indian urban population was nearly 4000 million in 2021. In urban areas, people are more inclined to buy such accessories since they are easily available.

Conclusion

Demographic settings (backed by technology rollouts and supportive govt. policies) make sure that the demand from domestic market is a huge opportunity for global players. However, the domestic market is expected to saturate by 2025—going much beyond the estimated 173 million shipments of 2021 and expanding 3x more than the 2018 level. Hence, growth needs to be driven by export-oriented production.

After the US-China tariff war and COVID-19 pandemic, companies such as Foxconn, Wistron and Pegatron are looking to rejig their global supply chains and reduce dependence on China. Vietnam, Cambodia, Thailand and even Bangladesh offer potential alternatives for such companies. However, the razor-sharp focus of the Indian government to build digital infrastructure, outline policies and transform India into a global manufacturing hub is only proof that the country is getting ready to welcome some of these manufacturing giants.

Competition

The retail markets for smart phones, smart watches, smart TVs and allied accessories in which we operate are highly competitive particularly in India as many new competitors have entered the market in the last several years. As the market continues to move towards multimedia devices, this trend may result in even more competition. The said retail market participants compete with each other on the basis of their product, services and solutions portfolio, user experience, design, price, operational efficiency and technical, performance, distribution strategy, quality, customer support, brand and marketing. The critical factors that determine the success of a product or service vary by geographical market and product and services segment. In general, mobile device markets are becoming more segmented and diversified, and we face competition from other retailers who have also started making mobile devices as a result we are facing competition from such unorganized players. Due to the intensity, complexity and diversity of the competition overall, the competitive landscape in our industry or in specific industry segments can change very rapidly. As the parameters of competition are less firmly established than in other industries where the competitive landscape does not change greatly from year to year, it is difficult to predict how the competitive landscape of the mobile device industry will develop in the future. Consumer Protection Act, 2019 (the "Consumer Protection Act") and rules made thereunder

The Consumer Protection Act was designed and enacted to provide simpler and quicker access to redress consumer grievances. It seeks, amongst other things, to promote and protect the interests of consumers against deficiencies and defects in goods or services and secure the rights of a consumer against unfair trade practices, which may be practiced by manufacturers, service providers and traders. The definition of "consumer" under the Consumer Protection Act includes persons engaged in offline or online transactions through electronic means or by tele-shopping or direct-selling or multi-level marketing. It provides for the establishment of consumer disputes redressal forums and commissions for the purposes of redressal of consumer grievances. In addition to awarding compensation and/or passing corrective orders, the forums and commissions under the Consumer Protection Act, in cases of misleading and false advertisements, are empowered to impose imprisonment for a term which may extend to two years and fine which may extend to ten lakhs.

In line with the Consumer Protection Act, the Ministry of Consumer Affairs, Food and Public Distribution, Government of India ("Ministry of Consumer Affairs") has also notified the Consumer Protection (E-Commerce) Rules, 2020 ("E-Commerce Rules") on July 23, 2020, which provide a framework to regulate the marketing, sale and purchase of goods and services online. The Information Technology Act seeks to (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information; (ii) facilitate electronic filing of documents; and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The Information Technology Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third-party information liability and creates liability for failure to protect sensitive personal data. The Information Technology Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. In exercise of this power, the Department of Information Technology, Ministry of Electronics and Information Technology, Government of India ("DoIT"), on April 11, 2011, notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011

("IT Security Rules") which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected and any third-party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law.

The DoIT also notified the Information Technology (Intermediaries Guidelines and Digital Media Ethics Code) Rules, 2021 ("IT Intermediaries Rules") requiring intermediaries receiving, storing, transmitting, or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the IT Intermediaries Rules, to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it, as well as specifying the due diligence to be observed by intermediaries.

Legal Metrology Act, 2009 ("LM Act") and the Legal Metrology (Packaged Commodities) Rules, 2011 ("Packaged Commodity Rules")

The LM Act seeks to establish and enforce standards of weights and measures, regulate trade and commerce in weights, measures and other goods which are sold or distributed by weight, measure or number. The LM Act and rules framed thereunder regulate, inter alia, the labelling and packaging of commodities, appointment of government-

approved test centres for verification of weights and measures used, and lists penalties for offences and compounding of offences under it. Any non-compliance or violation under the LM Act may result in, inter alia, a monetary penalty on the manufacturer or seizure of goods or imprisonment in certain cases. The Packaged Commodity Rules define "pre-packaged commodity" as a commodity which without the purchaser being present is placed in a package of a pre-determined quantity. The Packaged Commodity Rules prescribes the regulations for imports, pre-packing and the sale of commodities in a packaged form intended for retail sale, wholesale and for export and import, certain rules to be adhered to by importers, wholesale and retail dealers, the declarations to be made on every package, the size of label and/or importers and the manner in which the declarations shall be made, etc. These declarations that are required to be made include, inter alia, the name and address of the manufacturer, the dimensions of the commodity, the maximum retail price, generic name of the product, the country of origin and the weight and measure of the commodity in the manner as set forth in the Packaged Commodity Rules. Laws relating to Country of Origin

Currently, Legal Metrology (Packaged Commodities) Rules, 2011 ("Packaged Commodity Rules") require a declaration of 'country of origin' or 'country of manufacture' or 'country of assembly' on the imported products. This is aimed to curb false and misleading claims by brands to deceive the customers, as also to give complete information of the product to a potential buyer. Demands for specifying the Country of Origin ("COO") of products sold online has gained ground in view of Prime Minister's vision "Make in India". The Government had asked e-commerce entities to adhere to the Packaged Commodity Rules and display Country of Origin of products listed on their platform(s) by August 01, 2020. In the draft of proposed amendment to the Consumer Protection (E-Commerce) Rules, 2020, inter alia, requires an e-commerce entity that offers imported goods or services for sale, to identify goods based on their country of origin, provide a filter mechanism on their e-commerce website and display notification regarding the origin of goods at the pre-purchase stage, at the time of goods being viewed for purchase, suggestions of alternatives to ensure a fair opportunity for domestic goods and further to provide ranking for goods and ensure that the ranking parameters do not discriminate against domestic goods and seller.

COVID 19 Pandemic:

An outbreak of COVID-19 was recognised as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Due to a government mandated lockdown in India, we had to temporarily shut down our operations from mid-March 2020 to June 2020. We saw a decline in our business during first half of Fiscal 2021. We have resumed operations fully in July 2020. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

In view of the fluidity of the situation and lack of visibility on the timeline for containment of the global pandemic, the recovery trajectory remains uncertain. It is difficult for us to predict the impact that COVID-19 will have on us, our customers or suppliers in the future. We continue to closely monitor the effect that COVID-19 may have on our business and results of operations. To the extent, the COVID-19 pandemic adversely affects us, it may also significantly increase the effect of the aforementioned factors affecting our results of operations.

Key factors affecting the results of operation:

The business is subjected to various risks and uncertainties, including those discussed in the section titled “**Risk Factor**” beginning on page no. 21 of this Draft Prospectus. Our results of operations and financial conditions are affected by numerous factors including the following:

- Competition from existing players;
- Our dependence on limited number of customers/suppliers/brands for a significant portion of our revenues;
- Any failure to comply with the financial and restrictive covenants under our financing arrangements;
- General economic and demographic conditions;
- Fluctuations in foreign and Indian currency;
- Significant developments in mobile sector;
- Our ability to expand its existing retail network; and
- Changes in Segment Contribution to Revenue.

Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to

₹ 500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers. BASIS OF ALLOTMENT

Allotment will be made in consultation with the Emerge Platform of NSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth hereunder:

- 1) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription

ratio (number of Applicants in the category x number of Shares applied for).

- 2) The number of Shares to be allocated to the successful Applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- 3) For applications where the proportionate allotment works out to less than 1200 equity shares the allotment will be made as follows:
 - i. Each successful Applicant shall be allotted 1200 equity shares; and
 - ii. The successful Applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- 4) If the proportionate allotment to an Applicant works out to a number that is not a multiple of 1200 equity shares, the Applicant would be allotted Shares by rounding off to the nearest multiple of 1200 equity shares subject to a minimum allotment of 1200 equity shares.
- 5) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Applicants in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 1200 Equity shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Draft Prospectus.
- 6) Since present issue is a fixed price issue, the allocation in the net offer to the public category in terms of Regulation 253(2) of the SEBI (ICDR) Regulations, 2018 shall be made as follows:
 - a) Minimum fifty percent (50%) To Retail Individual Investors; and
 - b) Remaining to:
 - Other investors including corporate bodies or institutions, irrespective of the number of specified securities applied for
 - c) The unsubscribed portion in either of the categories specified in (a) or (b) above may be allocated to the applicants in the other category.

Explanation: If the retail individual investor category is entitled to more than fifty per cent on proportionate basis, accordingly the retail individual investors shall be allocated that higher percentage.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effect from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non- Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non- Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
