In late 2019, a novel strain of coronavirus ("COVID-19") emerged and by March 11, 2020, it was declared a global pandemic by the World Health Organization. The spread of COVID-19 and the recent developments surrounding the global pandemic have had, and may continue to have, repercussions across local, national and global economies and financial markets. On March 14, 2020, India declared COVID-19 as a 'notified disaster' and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. While the recently commenced vaccination drive in India is a positive development, the COVID-19 pandemic has affected and is expected to continue to affect our business and operational performance in the near future. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have reacted by taking measures, such as instituting quarantines, restricting travel, prohibiting people from assembling in heavily populated areas, issuing lockdown orders and restricting the types of businesses that may continue to operate, 'stay-at-home' orders, and enforcing remote working regulations. Since then, the market has taken several strides towards recovery, and just when it seemed the revival was not far, the country is struck by another variant of the virus, Omicron. In addition, trading materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of trading materials which may also affect our business and our results of operation negatively. The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely

impact the results by causing either a shortage of supply or an accumulation of excess inventory. The excess stocks will need storage space and block our liquidity resulting in to loss.

Any fluctuation in foreign exchange and non-compliance of the provisions will lead to financial loss and strict disciplinary and punitive action against the company which affect our liquidity, reputation and business operations and profitability of our company.

19. We operate in a highly competitive industry. Any inability to compete effectively may lead to a lower market share or reduced operating margins.

As a pharma industry provider providing a wide range of services to our clients, we compete with a range of organized and unorganized competitors, depending on the nature and location of services provided. Such competitors collectively compete with the majority of our services. The market for pharma industry is highly competitive with few organized players and localised smaller unorganised players. Important factors affecting competition in the pharma sector include project management ability, past track record, existing relationship with the clients, reliability, technical knowledge, chemical components, price, scope and quality of services offered to customers. Our competitors' companies that may have greater financial, marketing or other resources than we do and, therefore, may be better able to compete for new work and skilled professionals. Our competitors may be willing and able to develop and provide service offerings faster or at a lower price than us. Our competitors also may affect our business by entering into exclusive arrangements with existing or potential clients. Growing competition may result in a decline in our market share and force us to reduce our margins and revenues. There can be no assurance that we will be able to compete successfully against such competitors or that we will not lose our key employees or clients to such competitors. Additionally, we believe that our ability to compete also depends in part on factors outside our control, such as the availability of skilled resources, the price at which our competitors offer comparable services, and the extent of our competitors' responsiveness to their clients' needs. If we are unable to remain sufficiently competitive, or are unable to keep pace with them, our business and operating results will be adversely affected. For further details, refer the chapter titled "BUSINESS OVERVIEW" beginning on page 84 of this Draft Prospectus.

Our lenders require us to obtain their prior approval for certain actions, which, amongst other things, restrict our ability to undertake various actions including incur additional debt, declare dividends, amend our constitutional documents, changes the ownership or control and management of our business. We cannot assure you that we will be able to obtain approvals to undertake any of these activities as and when required or comply with such covenants or other covenants in the future.

Further, these debt obligations are typically secured by a combination of security interests over our assets and hypothecation of movables and future receivables. The security allows our lenders to inter alia sell the relevant assets in the event of our default.

Further, if we incur more debt or if there is an increase in the applicable interest rates for our existing debt, our interest payment obligations will increase, and we may become subject to additional conditions from our lenders, including additional restrictions on the operation of our business. The financing agreements that we are party to, or which we may enter into in the future, may be unilaterally terminated by our lenders or our lenders could decline to lend to us under such agreements. Further, we cannot assure you that we will be able to raise additional financing on favourable terms, or at all.

If such claims are raised, those claims could result in costly litigation, divert management's attention and 27 resources, subject us to significant liabilities and require us to enter into potentially expensive royalty or licensing agreements or to cease certain product offerings. Any of the foregoing could adversely affect our business, results of operations, cash flows and financial condition

21. Excessive dependence on any key managerial personnel for the project for which the issue is being made.

In our organization, key managerial personnel play crucial roles in strategic decision-making, project execution, and overall management. However, an excessive reliance on some individuals can create vulnerabilities and hinder the smooth functioning of the project. By solely depending on key managerial personnel, several concerns may arise, relying heavily on some specific persons makes the project highly susceptible to disruptions or setbacks if that individuals become unavailable due to unforeseen circumstances such as illness, resignation, or other emergencies. Also making key decisions may result in a limited perspective and potentially overlook alternative approaches or innovative solutions that a diverse team could provide.

In the event of the key managerial personnel's departure due to any reason, may be significant challenges in identifying a suitable replacement and ensuring a smooth transition, which can impact project continuity and stakeholder confidence.

22. Our Promoters, Directors and Key Managerial Personnel may have interest in our Company, other than reimbursement of expenses incurred or remuneration.

23. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

24. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves.

For details of transactions already executed by our Company with our Promoters, Directors during last three years, please refer to the Chapter titled "RESTATED FINANCIAL STATEMENTS" beginning on Page No. 131 this Draft Prospectus.

25. Our Company has in the past entered into related party transactions and may continue to do so in the future and we cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. And will not have an adverse effect on our financial conditions and result of operations

Our Company has entered into various transactions with related parties. While our Company believes that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms and in compliance with applicable provisions of Companies Act, 2013 and all other applicable laws, there can be no assurance that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties.

It is likely that our Company may enter into related party transactions in the future. Such related party transactions may potentially involve conflicts of interest. Further, the Net Proceeds are intended to be utilized by the Company only and none of the members of our Promoter Group or Group Companies will receive any portion of the Net Proceeds. The planned use of the Net Proceeds is based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or business strategies. Any variation in the planned use of the Net Proceeds would require Shareholders' approval and may involve considerable time or cost overrun and in such an eventuality it may adversely affect our operations or business. We have estimated fund raising to the extent of Rs. 911.23 Lakh to finance the 'OBJECTS OF THE ISSUE' (including Issue Expenses). The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. If one or more members of our Board or key managerial personnel are unable or unwilling to continue in his/her present position, it could be difficult to find a replacement. Our business could thereby be adversely affected. Opportunities for key managerial personnel in our industry are intense and it is possible that we may not be able to retain our existing key managerial personnel or may fail to attract/retain new employees at equivalent positions in the future. As such, any loss of key managerial personnel could adversely affect our business, operations and financial condition. INDUSTRY OVERVIEW

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and industry sources. Neither we nor any other person connected with the Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly, investment decisions should not be based on such information. GLOBAL ECONOMIC OUTLOOK

The global economy is so far weathering headwinds better than expected. Incoming activity data for the fourth quarter of 2022 beat expectations, even though they do point to continued slowing momentum. Global real GDP is forecasted to grow by 2.3 percent in 2023, down from 3.3 percent in 2022. Most of the weakness will be concentrated in Europe, Latin America and the US, though it is weighing on the industrial sector globally. Asian economies are expected to drive most of global growth in 2023, as they benefit from ongoing reopening dynamics and less intense inflationary pressures compared to other regions.

After rising sharply over 2021 and much of 2022, inflation in most of the world is slowing, mostly driven by falling energy and food prices and fading supply chain pressures. This is paving the way for a reduction in the pace and intensity of interest rate hikes by the world’s major central banks, suggested at their recent meetings. However, the inflation outlook remains uncertain. Core inflation, which excludes volatile items, is proving more resilient. Therefore, monetary policy is likely to remain restrictive throughout most of 2023. This will act as a break on economic activity and will likely lead to increases in unemployment rates in various economies, particularly in Europe and the US.

Global real GDP growth should pick up steam in 2024 to 2.7 percent and be more evenly distributed among regions. Tailwinds to growth in 2024 will largely come from fading shocks related to the pandemic, elevated inflation, and monetary tightening. However, growth rates in 2024 and beyond are likely to be below the pre-pandemic trend, given ongoing supply-side weakness (e.g., ageing demographics worldwide and slow productivity growth).

The 10-year economic outlook signals a prolonged period of disruptions and uncertainties for businesses, but there are also opportunities. Global growth will return to its slowing trajectory once the 2022-2023 regional recessions end, with mature markets making smaller contributions to global GDP over the next decade. Nonetheless, there are still opportunities for firms to invest in both mature markets—given their wealth and need for innovation to compensate for shrinking labor forces—and emerging markets—given their need for both physical and digital infrastructure to support their sizable and young labor forces. Keys to ensuring growth over the longer term include developing new lines of business; strengthening corporate culture; embracing digital transformation and automation; recruiting for talent with new skills not currently represented in the company; and maximizing the hybrid work model where it makes sense.

INDIAN ECONOMY OUTLOOK

India’s recovery from the pandemic was relatively quick, and growth in the upcoming year will be supported by solid domestic demand and a pickup in capital investment. The current growth trajectory will be supported by multiple structural changes that have been implemented over the past few years. The private sector – financial and non-financial – was repairing balance sheets, which led to a slowdown in capital formation in the previous decade. The financial system stress experienced in the second decade of the millennium, evidenced by rising nonperforming assets, low credit growth and declining growth rates of capital formation, caused by excessive lending witnessed in the first decade-plus, is now behind us. Aided by healthy financials, incipient signs of a new private sector capital formation cycle are visible. More importantly, compensating for the private sector’s caution in capital expenditure, the government raised capital expenditure substantially. Budgeted capital expenditure rose 2.7X in the last seven years, from FY16 to FY23, re-invigorating the Capex cycle. Structural reforms such as the introduction of the Goods and Services Tax and the

Insolvency and Bankruptcy Code enhanced the efficiency and transparency of the economy and ensured financial discipline and better compliance.

Even as India's outlook remains bright, global economic prospects for the next year have been weighed down by the combination of a unique set of challenges expected to impart a few downside risks. Multi-decadal high inflation numbers have compelled central banks across the globe to tighten financial conditions. The impact of monetary tightening is beginning to show in slowing economic activity, especially in Advanced Economies. Besides this, adverse spillovers from the prolonged strains in supply chains and heightened uncertainty due to geo-political conflict have further deteriorated the global outlook. Hence, global growth is forecasted to slow from 3.2 per cent in 2022 to 2.7 per cent in 2023 as per IMF's World Economic Outlook, October 2022. A slower growth in economic output coupled with increased uncertainty will dampen trade growth. This is seen in the lower forecast for growth in global trade by the World Trade Organisation, from 3.5 per cent in 2022 to 1.0 per cent in 2023. On the external front, risks to the current account balance stem from multiple sources. While commodity prices have retreated from record highs, they are still above pre-conflict levels. Strong domestic demand amidst high commodity prices will raise India's total import bill and contribute to unfavourable developments in the current account balance. These may be exacerbated by plateauing export growth on account of slackening global demand. Should the current account deficit widen further, the currency may come under depreciation pressure. Another risk to the outlook originates from the ongoing monetary tightening exercise. While the pace of rate hikes has slowed, major central banks have reaffirmed their hawkish stance on inflation. Entrenched inflation may prolong the tightening cycle, and therefore, borrowing costs may stay 'higher for longer'. In such a scenario, global economy may be characterised by low growth in FY24. However, the scenario of subdued global growth presents two silver linings – oil prices will stay low, and India's CAD will be better than currently projected. The overall external situation will remain manageable. The upside to India's growth outlook arises from (i) limited health and economic fallout for the rest of the world from the current surge in Covid-19 infections in China and, therefore, continued normalisation of supply chains; (ii) inflationary impulses from the reopening of China's economy turning out to be neither significant nor persistent; (iii) recessionary tendencies in major AEs triggering a cessation of monetary tightening and a return of capital flows to India amidst a stable domestic inflation rate below 6 per cent; and (iv) this leading to an improvement in animal spirits and providing further impetus to private sector investment. Against this backdrop, the survey projects a baseline GDP growth of 6.5 per cent in real terms in FY24. The projection is broadly comparable to the estimates provided by multilateral agencies such as the World Bank, the IMF, and the ADB and by RBI, domestically. The actual outcome for real GDP growth will probably lie in the range of 6.0 per cent to 6.8 per cent, depending on the trajectory of economic and political developments globally.

The global pharmaceutical manufacturing market size was valued at USD 405.52 billion in 2020 and is expected to grow at a compound annual growth rate (CAGR) of 11.34% from 2021 to 2028. The pharmaceutical landscape has undergone a massive transformation with the emergence of new technologies, cost-effective, and more efficient manufacturing approaches. In addition, increasing investment flow in this space has impacted the market growth positively. Manufacturing floor downtime and the production of product waste are reduced by the implementation of robotic technology and Artificial Intelligence (AI). In addition, single-use disposable solutions have gained momentum in this industry and have replaced conventional open transfer manufacturing techniques. Furthermore, the paradigm shift towards integrated, smart, and data-rich paperless operations has resulted in error-free and precise production. Such ongoing developments have propelled drug manufacturing.

Constant progress in the field of personalized medicines has opened up numerous possibilities to target different health maladies and allowed the development of patient-centric models. This progress results in a shift from large batches to smaller batches for the development of complex medicines and autologous patient-centric treatments. This has also encouraged the manufacturers to redesign their supply chain to better align with the patient-centric health care system.

A rise in drug approvals by the regulatory bodies is expected to fuel the drug manufacturing procedures. For instance, the FDA approved 59 drugs in 2018, 49 drugs in 2019, and 15 drugs up to April 2020. Furthermore, a large number of ongoing clinical trials have created numerous growth opportunities for market growth.

Mergers & acquisitions in the pharmaceutical industry have increased in the past few years. Most of the well-established companies are consolidating to enhance their market position in the highly competitive environment. Whereas small- to mid-sized pharma companies are being acquired for their innovative capabilities. Moreover, stringent regulations to curb pharmaceutical prices have resulted in a large number of mergers & acquisitions.

SUMMARY ON INDIAN PHARMACEUTICAL MARKET

Indian pharmaceutical industry is known for its generic medicines and low-cost vaccines globally. Transformed over the years as a vibrant sector, presently Indian Pharma ranks third in pharmaceutical production by volume. In the last nine years, Indian Pharma sector has grown steadily by CAGR of 9.43%. Pharma sector has been consistently earning trade surplus. During 2020-21, total pharma export was ₹180555 crore (USD 24.35 Bn) against the total pharma import of ₹49436 crore (USD 6.66 Bn), thereby generating trade surplus of USD 17.68 Bn. Till end September 2021, total pharma export has been ₹ 87864 crore (USD 11.88 Bn) as against total import of ₹ 33636 crore (USD 4.66 Bn), thereby generating a trade surplus of ₹ 54228 crore (USD 7.22 Bn). Major segments of Indian Pharmaceutical Industry include generic drugs, OTC medicines, bulk drugs, vaccines, contract research & manufacturing, biosimilars and biologics. Indian pharmaceutical industry also plays significant role globally. India has the highest number of United States Food and Drug Administration (USFDA) compliant Pharma plants outside of USA. There are 500 API manufacturers contributing about 8% in the global API Industry. India is the largest supplier of generic medicines with 20% share in the global supply by manufacturing 60000 different generic brands across 60 therapeutic categories. Access to affordable HIV treatment from India is one of the greatest success stories in medicine. India is one of the biggest suppliers of lowcost vaccines in the world. Because of the low price and high quality, Indian medicines are preferred worldwide, thereby rightly making the country the “pharmacy of the world”. The Indian pharma industry has also played an important role in meeting the challenges for mitigation of the infection in COVID pandemic. The industry worked in close collaboration with the government and academic institutes etc., to quickly develop and refine manufacturing processes which helped to ensure a consistent supply of medicines needed for the management of COVID-19 (e.g. Remdesivir, Ivermectin, Hydroxychloroquine, Dexamethasone, Tocilizumab, Favipiravir etc.). Indian drug supplies throughout the COVID-19 pandemic period have provided relief to over 120 countries for Hydroxychloroquine (HCQ), 20 countries for paracetamol and about 96 countries for vaccines across the world.

OVERVIEW ON INDIAN PHARMACEUTICAL OUTLOOK

The performance of pharma exports has been robust, sustaining positive growth despite the global trade disruptions and drop in demand for Covid-19-related treatments. The cumulative FDI in the pharma sector crossed the US\$ 20 billion mark by September 2022.

The nation is the largest provider of generic medicines globally, occupying a 20 per cent share in global supply by volume, and is the leading vaccine manufacturer globally with a market share of 60 per cent.

Figure IX.19: Strong growth in pharmaceutical exports

Figure IX.20: High inflow of FDI in the Pharma Sector

Indian pharmaceutical exports achieved a healthy growth of 24 per cent in FY21, driven by Covid-19-induced demand for critical drugs and other supplies made to over 150 countries. The performance of pharma exports in FY22 has been robust, sustaining growth despite the global trade disruptions and drop in demand for Covid-19-related treatments. Carrying forward this growth momentum, drug and pharmaceutical exports during April-October 2022 was 22 per cent higher than the corresponding pre-pandemic period of FY20. Cumulative FDI in the pharma sector crossed the US\$ 20 billion mark in September 2022. Further, FDI inflows have increased four-fold over five years until September 2022, to US\$ 699 million, supported by investor-friendly policies and a positive outlook for the industry.

The government has undertaken various measures to improve the infrastructural facilities of the pharma sector. The concerned scheme, strengthening the Pharmaceutical Industry (SPI), was launched on 11th March 2022 with a total financial outlay of ₹500 crore for five years from FY22 to FY26 with multiple objectives. First, it aims to strengthen the existing infrastructure facilities by providing financial assistance to pharma clusters to create common facilities. Second, it upgrades the production facilities of MSMEs to meet national and international regulatory standards by providing interest subvention or capital subsidy on their capital loans. Third, it also promotes knowledge and awareness about the pharmaceutical and medical devices industry by undertaking studies, building databases and bringing industry leaders, academia and policymakers together to share their knowledge and experience.

GLOBAL ACTIVE PHARMACEUTICAL INGREDIENT (API) MARKET

The global active pharmaceutical ingredients market size is expected to reach USD 363.68 billion by 2032 from at USD 204.04 billion in 2022, expanding growth at a CAGR of 6% over the forecast period 2023 to 2032.

The active elements in a pharmaceutical medicine that have the desired impact on the body to treat a condition are known as active pharmaceutical ingredients (APIs). Chemical substances are processed to create APIs. The active component of a biologic medication is referred to as a bulk process intermediate. Due to the rising incidence of chronic diseases including diabetes, asthma, and cancer, the API market has seen some appealing potential despite high manufacturing costs, rigorous regulatory laws, and policies in many countries restricting medicine prices.

Post Covid-19 Analysis

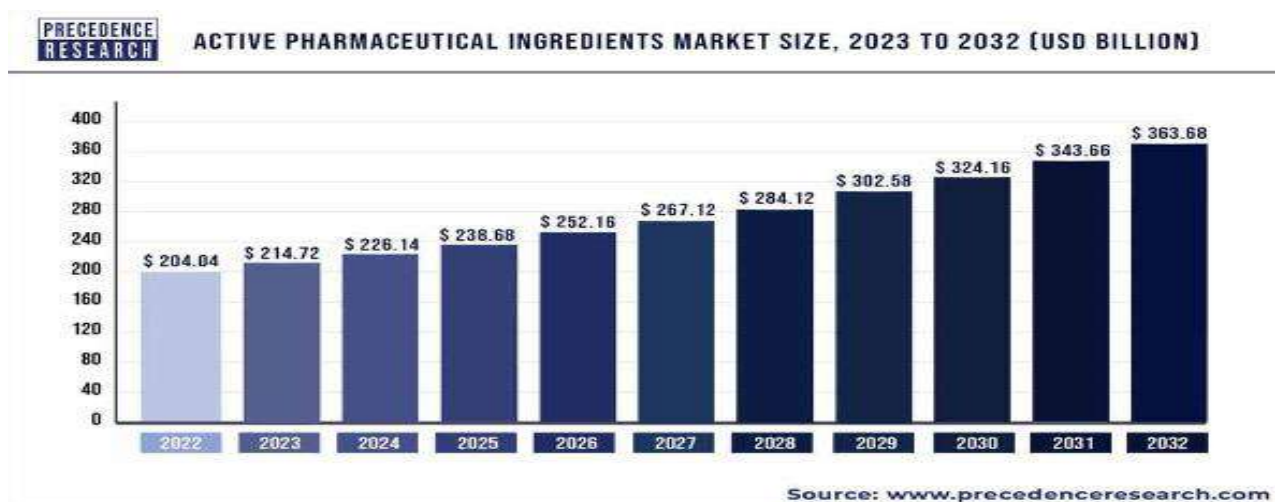

The pandemic of COVID-19 impacted the global APIs market positively. The pharmaceutical sector proved to be an epicenter for treatment of symptoms related to COVID-19, including cough, high fever, and cold. Active pharmaceutical ingredients (API) prices of certain basic pain and fever relief drugs almost doubled as high as to 130% and major life-saving drugs have witnessed a rise of around 120% recently. As per Gaurav Kaushik, Managing Director, Meteoric Biopharmaceuticals Pvt Ltd., expressed that the price hike has resulted in total dependency on imports from China. As of July 2021, raw material prices for essential drugs such as APIs saw a drastic rise of 140%.

In India in May 2021, the production capacity of Remdesivir was increased from 3,800,000 vials per month to nearly 11,900,000 crore vials per month, as per the Ministry of Chemicals and Fertilizers. According to the Ministry of Health and Family Welfare, Government of India, around 2,19,97,17,471 COVID-19 vaccine doses were administered in India. As of December 7, 2022, around 392 million doses of the Pfizer-BioNTech COVID-19 vaccine were administered in the United States of America. Owing to the increased popularity of the pharmaceutical sector during the pandemic, overall, the active pharmaceutical ingredients (API) market experienced growth during the period.

Growth Factors

Global active pharmaceutical ingredients market is estimated to be influenced by a great number of ground-breaking drugs going off patent during coming years. There is forthcoming need for technological inventions to preserve the viability in high volume and a small value environment. In the event of outsourcing, APIs are facing rigorous guidelines and oversight from the nation they are shipped to. For instance, API manufacturing plants abroad still go over scrutiny by the U.S. Food & Drug Administration.

Rising acceptance of quality standards in API manufacturing including Good Manufacturing Practices (GMP), and the worldwide implementation of International Conference on Harmonisation (ICH) guidelines have aided recover the safety criterions. Conversely, the API industry is coming across the issues including plunging the cost of development, curbing the development time, refining the process design and addressing the quality standard deprived of compromising on the cost-effectiveness.

INDIAN ACTIVE PHARMACEUTICAL INGREDIENT MARKET

Active Pharmaceutical Ingredient (or API) is a crucial segment of the pharma industry, contributing to around 35 per cent of the market. API is the biologically active component of a drug that causes an intended medical effect. According to World Health Organization, API is any substance or combination of substances used in a finished pharmaceutical product (or FPP) intended to furnish pharmacological activity or to otherwise have direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease, or to have an immediate impact in restoring, correcting, or modifying physiological functions in human beings.

India is the 3rd largest producer of API accounting for an 8 per cent share of the Global API Industry. 500+ different APIs are manufactured in India, and it contributes 57 per cent of APIs to prequalified list of the WHO. The Indian API market is anticipated to increase at a CAGR of 13.7 per cent during the first four years – about 8 per cent higher than the generic API industry. The Indian API space has become lucrative for several investors and venture capitalists. India's robust domestic market, advanced chemical industry, skilled workforce, stringent quality and manufacturing standards, and low costs (about 40 per cent less than that in the West) for setting up and operating a modern plant give an added advantage.

The growing antagonism between the West and China has also pushed the global pharma majors to source more from countries other than China. India's emergence as the alternate source of bulk drugs has been quite remarkable.

GOVERNMENT OF INDIA'S SCHEMES AND INITIATIVES

To capitalize on its API potential, India is building a holistic and conducive ecosystem. In 2020, the government approved INR 6,940 crore for a production-linked incentive (PLI) scheme for the promotion of domestic manufacturing of Key Starting Materials (KSMs)/Drug Intermediaries (DIs), and APIs. Manufacturing of 35 active pharmaceutical ingredients – representing about 67 per cent of APIs for which India has 90 per cent import dependence – has already started in India under the PLI scheme. The Department of Pharmaceuticals has also given "in-principle" approval to proposals from the states of Himachal Pradesh, Gujarat, and Andhra Pradesh under the "Promotion of Bulk Drug Parks" scheme. This is a crucial initiative to support bulk drug manufacturing in India. The scheme, with a budget of INR 3000 crores, provides financial aid to these three states for the creation of bulk drug parks with the objective of reducing the cost of manufacturing bulk drugs by establishing world-class common infrastructure facilities and increasing the competitiveness of the domestic bulk drug industry. The Government of Assam has also proposed a Pharmaceutical Park in Chaygaon, Kamrup Rural on a land area of 100 acres with an estimated project cost of INR 153.64 crores. Furthermore, to promote innovation within the industry, various measures have been proposed such as raising the limit for foreign direct investment (up to 100 per cent, FDI has been allowed through automatic route for Greenfield pharmaceuticals projects) and implementing a new strategy for protecting intellectual property rights.

In line with CGST Act, each state Government has enacted State Goods and Service Tax Act for respective states.

Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the Central and State Governments. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. BUSINESS/TRADE RELATED LAWS/REGULATIONS:

Drugs and Cosmetics Act, 1940 (the “DCA”) (the “Drugs Act”), the Drugs and Cosmetics Rules, 1945 (the “Drugs Rules”)

The DCA acts as a regulator for import, manufacture, distribution and sale of drugs in India as well as aspects relating to labeling, packing, testing and licensing. Matters pertaining to drug formulations, biological and APIs are also governed by the DCA. Under the DCA, while regulation of manufacture, sale and distribution of drugs is primarily the responsibility of the state authorities, the central authorities are responsible for approval of new drugs, clinical trials, laying down standards, control over imported drugs and coordination of activities of state drug control organizations. These procedures involve obtaining a series of approvals for different stages at which drugs are tested, before the Drug Controller General of India (the - DCGI), an authority constituted under the DCA, which is empowered to grant the final license to allow drugs to be Manufactured and marketed. The Central Drugs Standard Control Organization (the CDSCO) is responsible for testing and approving APIs and formulations in consultation with the DCGI.

The DCA also regulates the import of drugs into India, and prohibits the import of certain categories of drugs into India, for instance (i) any drug which is not of standard quality, (ii) any misbranded drug, (iii) any adulterated or spurious drug, (iv) any drug for the import of which a license is prescribed, otherwise than under, and in accordance with, such license, (v) any patent or proprietary medicine, unless there is displayed in the prescribed manner on the label or container thereof the true formula or list of APIs contained in it together with the quantities thereof, (vi) any drug which by means of any statement, design or device accompanying it or by any other means, purports or claims to cure or mitigate any such disease or ailment, or to have any such other effect, as may be prescribed, and (vii) any drug the import of which is prohibited under the DCA or the Drugs Rules. This restriction shall not apply, subject to prescribed conditions, to the import of small quantities of any drug for examination, testing, analysis or personal use. The Government of India may, after consultation with the Drugs Technical Advisory Board, by notification in the official gazette, permit, subject to any conditions specified in the notification, the import of any drug or class of drugs not being of standard quality. Further, if the GoI is satisfied that the use of any drug involves any risk to human beings or animals or that any drug does not have the therapeutic value claimed for it or contains ingredients and in such quantity for which there is no therapeutic justification and that in the public interest it is necessary or expedient so to do, it may, by notification in the official gazette, prohibit the import of such drug or cosmetic.

The Drugs (Control) Act, 1950 (“DC Act”)

The DC Act was enacted to provide for the control of sale, supply and distribution of drugs. The DC Act empowers the Central Government to inter alia declare any drug to be a drug to which this act shall apply and to fix maximum prices and maximum quantities thereof, which may be held or sold, by a dealer or producer. The DC Act also provides for penalties arising due to contraventions of any of the provisions of this Act or of any direction made under authority conferred by this Act, which shall be punishable with imprisonment for a term which may extend to three years, or with fine, or with both.

Essential Commodities Act, 1955 (the “ECA”)

The ECA gives powers to the Government of India to, among other things, regulate production, distribution and quality of essential commodities including drugs, for maintaining or increasing supplies and for securing their equitable distribution and availability at fair prices. Using the powers under it, various ministries/departments of the Government have issued control orders for regulating production, distribution, quality aspects, movement and prices pertaining to the commodities which are essential and administered by them. The state governments have issued various control orders to regulate various aspects of trading in essential commodities.

Drugs (Prices Control) Order, 1995 (the “DPCO”)

The first drug price control orders in India were issued under the Defence of India Act, 1963. Thereafter, from 1970 onwards and until the promulgation of the DPCO, drug price control orders were issued under the ECA. The DPCO was promulgated under the ECA and is to be read with the DCA. The DPCO fixes the price for certain APIs and formulations, which are called scheduled drugs and scheduled formulations, respectively. The National Pharmaceutical Pricing Authority (the "NPPA"), established under the DPCO on August 29, 1997, is an independent body of experts responsible for the collection of data and study of the pricing structure of APIs and formulations and to enforce prices and availability of medicines in the country, under the DPCO. The NPPA monitors the prices of medicines as per monthly audit reports. Upon recommendation of the NPPA, the Ministry of Chemicals and Fertilizers, Government of India, fixes the ceiling prices of the APIs and formulations and issues notifications on drugs which are scheduled drugs and formulations. The NPPA arrives at the recommended prices for the scheduled drugs and formulations after collection and analysis of data on costing which includes data on raw material composition, packing materials, process losses, overhead allocation and appointment, capacity utilization, technical data on manufacturing work orders and packing work orders.

Drug Policy, 2002

The main objectives of the Drug Policy 2002 are several and include ensuring abundant availability at reasonable prices within the country of good quality essential pharmaceuticals of mass consumption. It also concentrates on strengthening the indigenous capability for cost effective quality production and exports of pharmaceuticals by reducing barriers to trade in the pharmaceutical sector and strengthening the system of quality control over drug and pharmaceutical production and distribution to make quality an essential attribute of the Indian pharmaceutical industry and promoting rational use of pharmaceuticals. The Policy further encourages the R&D in the pharmaceutical sector in a manner compatible with the country's needs and with particular focus on diseases endemic or relevant to India by creating an environment conducive to channelizing a higher level of investment into R&D in pharmaceuticals in India. Creating an incentive framework for the pharmaceutical industry which promotes new investment into pharmaceutical industry and encourages the introduction of new technologies and new drugs is another important aspect which has been examined by this Policy.

The Drugs and Cosmetics Rules, 1945 (“DC Rules”)

The Drugs and Cosmetics Rules, 1945 enacted to give effect to the provisions of the DCA to regulate the manufacture, distribution and sale of drugs and cosmetics in India. The DC Rules prescribe the procedure for submission of report to the Central Drugs Laboratory, of samples of drugs for analysis or test, the forms of Central Drugs Laboratory's reports thereon and the fees payable in respect of such reports. The DC Rules also prescribe the drugs or classes of drugs or cosmetics or classes of cosmetics for the import of which a licence is required, and prescribe the form and conditions of such licences, the authority empowered to issue the same and the fees payable therefore. The DC Rules provide for the cancellation or suspension of such licence in any case where any provisions or rule applicable to the import of drugs and cosmetic is contravened or any of the conditions subject to which the licence is issued is not complied with. The DC Rules further prescribe the manner of labeling and packaging of drugs. The DC Rules lay down the process mechanics and guidelines for clinical trial, including procedure for approval for clinical trials. Clinical trials require obtaining of free, informed and written consent from each study subject. The DC Rules also provide for compensation in case of injury or death caused during clinical trials. The Central Drugs Standard Control Organization has issued the guidance for industry for submission of clinical trial application for evaluating safety and efficacy, for the purpose of submission of clinical trial application as required under the DC Rules. The Indian Council of Medical Research has issued the Ethical Guidelines for Biomedical Research on Human Participants, 2006 which envisages that medical and related research using human beings as research participants must, necessarily, inter alia, ensure that the research is conducted in a manner conducive to, and consistent with, their dignity, well-being and under conditions of professional fair treatment and transparency. Further such research is subjected to evaluation at all stages of the same.

The Drugs (Price Control) Order, 2013 (“DPCO 2013”)

The DPCO was issued by the Central Government under section 3 of the ECA and in supersession of the Drugs (Prices Control) Order, 1995, thereby giving effect to the 2012 Policy. The DPCO 2013, inter alia, provides that the Central Government may issue 94 directions to the manufacturers of active pharmaceutical ingredients or bulk drugs and formulations to increase production or sell such active pharmaceutical ingredient or bulk drug to such manufacturer of formulations and direct the formulators to sell the formulations to institutions, hospitals or any

agency, procedures for fixing the ceiling price of scheduled formulations of specified strengths or dosages, retail price of new drug for existing manufacturers of scheduled formulations, method of implementation of prices fixed by Government and penalties for contravention of its provisions. The Government has the power under the DPCO 2013 to recover amounts charged in excess of the notified price from the manufacturer, importer or distributor and the said amounts are to be deposited in the Drugs Prices Equalization Account. The DPCO 2013 prescribes certain instances in which case the provision of the DPCO 2013 will not be applicable. These provisions are applicable to all scheduled formulations irrespective of whether they are imported or patented, unless they are exempted. However, the prices of other drugs can be regulated, if warranted in public interest.

National Pharmaceuticals Pricing Policy, 2012 (the “2012 Policy”)

The 2012 Policy replaces the drug policy of 1994 and presently seeks to lay down the principles for pricing of essential drugs specified in the National List of Essential Medicines - 2011 (“NLEM”) declared by the Ministry of Health and Family Welfare, Government of India and modified from time to time, so as to ensure the availability of such medicines at reasonable price, while providing sufficient opportunity for innovation and competition to support the growth of the Industry. The prices would be regulated based on the essential nature of the drugs rather than the economic criteria/market share principle adopted in the drug policy of 1994. Further, the 2012 Policy will regulate the price of formulations only, through market based pricing which is different from the earlier principle of cost based pricing. Accordingly, the formulations will be priced by fixing a ceiling price and the manufacturers of such drugs will be free to fix any price equal to or below the ceiling price.

The Narcotic Drugs and Psychotropic Substances Act, 1985 (“NDPS Act”)

The NDPS Act is a legal framework which seeks to control and regulate operations relating to narcotic drugs and psychotropic substances. It prohibits, inter alia, the cultivation, production, manufacture, possession, sale, purchase, transportation, warehousing, consumption, inter-state movement, import into India and transshipment of narcotic drugs and psychotropic substances, except for medical or scientific purposes. It also controls and regulates controlled substances which can be used in the manufacturing of narcotic drugs and psychotropic substances. Offences under the NDPS Act are essentially related to violations of the various prohibitions imposed under the NDPS Act, punishable by either imprisonment or monetary fines or both.

OTHER INSTRUCTIONS

JOINT APPLICATIONS IN THE CASE OF INDIVIDUALS

Applications may be made in single or joint names (not more than three). In the case of joint Applications, all payments will be made out in favour of the Applicant whose name appears first in the Application Form or Revision Form. All communications will be addressed to the First Applicant and will be dispatched to his or her address as per the Demographic Details received from the Depository.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications.
- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered

with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

An investor making application using any of channels under UPI Payments Mechanism, shall use only his / her own bank account or only his / her own bank account linked UPI ID to make an application in public issues. Applications made using third party bank account or using third party linked bank account UPI ID are liable for rejection. Sponsor Bank shall provide the investors UPI linked bank account details to RTA for purpose of reconciliation. RTA shall undertake technical rejection of all applications to reject applications made using third party bank account.

Duplicate copies of Application Forms downloaded and printed from the website of the Stock Exchange bearing the same application number shall be treated as multiple applications and are liable to be rejected. The Company, in consultation with the Lead Manager reserves the right to reject, in its absolute discretion, all or any multiple applications in any or all categories. In this regard, the procedure which would be followed by the Registrar to the Issue to detect multiple applications is given below:

1. All Applications will be checked for common PAN. For Applicants other than Mutual Funds and FII sub-accounts, Applications bearing the same PAN will be treated as multiple Applications and will be rejected.
2. For Applications from Mutual Funds and FII sub-accounts, submitted under the same PAN, as well as Applications on behalf of the Applicants for whom submission of PAN is not mandatory such as the Central or State Government, an official liquidator or receiver appointed by a court and residents of Sikkim, the Application Forms will be checked for common DP ID and Client ID.

July 2, 2007. Each of the Applicants should mention his/her PAN allotted under the Income Tax Act, 1961. Applications without the PAN will be considered incomplete and are liable to be rejected. It is to be specifically noted that Applicants should not submit the General Index Registration (“GIR”) number instead of the PAN, as the Application is liable to be rejected on this ground.

Our Company/ Registrar to the Issue/ Lead Manager can, however, accept the Application(s) in which PAN is wrongly entered into by ASBA SCSB’s in the ASBA system, without any fault on the part of Applicant.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “ISSUE PROCEDURE” beginning on page 168 of this Draft Prospectus.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “ISSUE PROCEDURE” beginning on page 168 of this Draft Prospectus.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar

amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
