Our business hence largely depends on the performance of our distributors, who may be responsible for selling our products to end users at domestic. Currently, we have distributors / stockiest / super stockiest for our Domestic and international markets. Further these distributors generally operate for a specific country. We can give no assurance that the performance of such distributors will meet our required specifications or performance parameters. Such distributors are independent third parties over which we do not have control. Additionally, we do not have any non-compete agreement with such distributors and in the event that such distributors enter into agreements with competitors, we may not be able to take any course of action. Similarly, we are restricted from directly involving ourselves in marketing services in certain countries where these distributors are located. As a result, our growth, results of operations and the integrity of our brand name in these areas is dependent on the performance of these distributors. Moreover, there can be no assurance that our distributors will be able to generate adequate revenue consistently, and we may be exposed to credit risks associated with non-payment or untimely payments from our distributors.

In particular, if operations at our manufacturing facility were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled "**Key Industry Regulations and Policies**" and "**Government and Other Statutory Approvals**" at pages 106 and 164 respectively of this Draft Prospectus.

- 11. *The availability of counterfeit drugs, such as drugs passed off by others as our products, could adversely affect our goodwill and results of operations.***

Entities in India and abroad could pass off their own products as ours, including counterfeit or pirated products. For example, certain entities could imitate our brand name, packaging materials or attempt to create look-alike products. As a result, our market share could be reduced due to replacement of demand for our products and adversely affect our goodwill. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

- 12. *Introduction of alternative pharmaceutical products caused by changes in technology or consumer needs may affect demand for our existing products which may adversely affect our financial results and business prospects.***

Our business is affected by change in technology, consumer needs, market perception of brand, convenience, health and safety norms. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect our customers businesses and, in turn, will affect the demand for our products. Any failure to forecast and / or meet the changing demands of pharmaceutical businesses and consumer needs may have an adverse effect on our business, profitability and growth prospects.

13. *There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956 / 2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.*

- MGT-7 filed for the financial year 2021-22 wrongly stated all the shareholders as promoters which was rectified by filing a revised MGT-7 on March 20, 2023 with late fees.

14. *Our Promoter Group Entity is engaged in the line of business similar to our Company. There are no non - compete agreements between our Company and such Promoter Group Entity. We cannot assure that our Promoters will not favour the interests of such entity over our interest or that the said entities will not expand, which may increase our competition and may adversely affect business operations and financial condition of our Company.*

Our Promoter Group Entity namely, Shelter Pharmacy Private Limited and M/s Gandhi Brothers are engaged in similar line of business as of our Company. We have not entered into any non-compete agreement with the said entity. We cannot assure that our Promoters who has common interest in said entity will not favour the interest of the said entity. As a result, conflicts of interests can arise on account of common suppliers / customers and in allocating business opportunities amongst our Company and our Promoter Group entity in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour other entity / entities in which our Promoters has interests. There can be no assurance that our Promoters or our Promoter Group entities or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their Shelter Pharma Limited interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

15. *If we cannot respond adequately to the increased competition we expect to face, we will lose market share and our profits will decline, which will adversely affect our business, results of operations and financial condition.*

Our products face competition from products commercialized or under development by competitors in all of our product portfolios. We compete with local companies, multi-national corporations and companies from the rest of world. If our competitors gain significant market share at our expense, our business, results of operations and financial condition could be adversely affected. Many of our competitors may have greater financial, manufacturing, research and development, marketing and other resources, more experience in obtaining regulatory approvals, greater geographic reach, broader product ranges and stronger sales forces. Our competitors may succeed in developing products that are more effective, more popular or cheaper than any we may develop, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Also, we face pressure on our margins due to pricing competition from several small and unorganized local players. Presence of more players in the unorganized sector compared to organized ones has resulted in increasingly competitive environment characterized by stiff price competition. We also operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we

may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

16. *If we inadvertently infringe on the patents of others, our business may be adversely affected.*

We operate in an industry characterized by extensive patent litigation, including frivolous litigation by competitors to delay grant of patent. Patent litigation can result in significant damages being awarded and injunctions that could prevent the sale of certain products or require us to pay significant royalties in order to continue to sell such products. While it is not possible to predict the outcome of patent litigation, we believe any adverse result of such litigation could include an injunction preventing us from selling our products or payment of significant damages or royalty, which would affect our ability to sell current or future products or prohibit us from enforcing our rights against others. The occurrence of any of these risks could adversely affect our business, financial condition and results of operations.

17. *Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.*

Since we export our products to in countries like Egypt, Kuwait, Qatar, Romania, UAE, Bangladesh, Nepal, Camero, Iraq and Yemen, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import / export controls, content requirements, trade restrictions, the environment tariffs, taxation, sanctions, government affairs, anti-corruption, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific to our clients' industries. Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and / or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees or other related individuals. We are subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, and employee health, safety, wages and benefits laws. Our failure to comply with applicable regulatory requirements could have a material adverse effect on our business, financial condition and results of operations.

18. *We are subject to risks associated with expansion into new markets.*

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in:

- i. laws, regulations and practices and their interpretation; local preferences and service requirements;
- ii. fluctuations in foreign currency exchange rates;
- iii. inability to effectively enforce contractual or legal rights and adverse tax consequences;
- iv. differing accounting standards and interpretations;
- v. stringent as well as differing labour and other regulations;
- vi. differing domestic and foreign customs, tariffs and taxes;
- vii. exposure to expropriation or other government actions; and
- viii. political, economic and social instability.

19. *We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.*

Our company's 100% of the revenue is not derived from India. We export of products to in countries like Egypt, Kuwait, Qatar, Romania, UAE, Bangladesh, Nepal, Camero, Iraq and Yemen. We receive revenue in foreign currency from such clients. Any changes in value of currencies with respect to the rupee may cause fluctuations in our operating results expressed in rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our company to the extent of cost of services sold in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

20. *Our Company is dependent on third party transportation for the delivery of products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company uses third party transportation for delivery of our products. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. Further, such goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair ability to deliver goods on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

21. *Our operational results substantially rely on mass public consumers.*

We sell our products to the general public consumers through our distribution network, which inter alia includes chain retailers, individual retailers and distributors. The general acceptance by consumers of the brands and products developed and marketed by us is of vital importance to our success and it hinges on a number of factors such as brand image, product quality and customer loyalty. If we fail to generate demand for our existing or new products or fail to maintain consumer loyalty, our business, operational and financial results may be adversely affected.

22. *Some of Our products may cause unexpected or undesirable side effects unknown to us which may result in costly product returns or recalls.*

Our own-branded products contain a number of ingredients, some of which or the combination of which may cause side effects that are unknown to us although there has not been any incident in the past. In particular, all our own-branded products are produced by our own unit. Though we have measures in place to control the quality of our raw materials and the finished products, we cannot assure you that we will be able to detect defective raw materials or finished products in every circumstance. If any side effects occur or if our products are perceived to have such side effects, we may be affected financially as a result of consequential product returns or recalls, product liability claims, which in turn could lead to severe adverse publicity, and investigation by relevant government authorities and prosecution, monetary losses or even lawsuits. We cannot assure you that product returns or recalls would not happen to our own-branded products in the future. Substantial amount of product returns or recalls could materially and adversely affect our business, financial condition and results of operations.

23. *Our Company does not have any long-term contracts with our clients and suppliers, which may adversely affect our results of operations.*

We are, to a major extent, dependent on external suppliers for our goods requirements and we do not have any long-term supply agreements or commitments in relation to the same. There can be no assurance that there will not be a significant disruption in the supply of goods from current sources or, in the event of a disruption, that we would be able to locate alternative suppliers of goods of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, responsiveness and service, financial stability and labour and other ethical practices. Consequently, we are also exposed to price fluctuations in goods, and these fluctuations may adversely affect our ability to obtain orders and / or to execute them in a timely manner, which would have a material adverse effect on our business, results of operations and financial condition. In case of non-availability of goods on favourable terms, we may have to procure the same at the terms and conditions prevalent at that point. This may result in reducing our revenues by a considerable amount due to shortage of goods or due to inability to procure the same. Further, unfavourable terms of goods may also force us to reduce the scale of our operations resulting in a down-sizing of our overall business. We may have to put on hold any expansion plans and our future growth will be

severely stunted. Any delay, interruption or increased cost in the supply arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term. Also, Our Company has had long standing business relationships with certain customers and has been supplying our products to such customers for long time. However, we have not entered into any long term contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business.

24. We engage in a highly competitive business and any failure to effectively compete could have a material adverse effect on us.

The Indian Pharma industry has historically been dominated by major entities that had an aggregate market share of the market, as the industry presents significant entry barriers. These market entry barriers include the development of an extensive distribution network through long-term relationships with dealers, the ability to set up tinting machines with dealers, as well as significant marketing costs and the establishment of a distinct brand to gain product acceptance. We compete on the basis of the strength of our differentiated products, distribution network, brand recognition, and ability to populate tinting machines. As a result, to remain competitive in our markets, we must continuously strive to manufacture differentiated products, expand our distribution network, enhance our brand and improve our operating efficiencies.

Some of our competitors may have larger business operations, may be diversified with operations across India, may have greater financial resources than we do, may have access to a cheaper cost of capital and may be able to produce medicines more efficiently or invest larger amounts of capital into their businesses in terms of strengthening their brands, expanding their distribution networks and expending greater resources to populate tinting machines. Our business could be adversely affected if we are unable to compete with our competitors and sell medicines at competitive prices. For example, if any of our competitors strengthens their brand and caters to the markets, we are present in through differentiated products, our business and results of operations could be adversely impacted. Our competitors may also introduce new and more competitive products and strengthen their supply chain management, make strategic acquisitions or establish relationships among themselves or with third parties, dealers of our products, thereby increasing their ability to address the needs of our target customers. An inability to effectively compete in terms of branding, providing competitive and differentiated products or services or expand into new markets, could have a material negative effect on our business, financial condition and growth prospects.

25. Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facilities, the availability of raw materials, industry / market conditions, as well as by the product requirements of, and procurement practice followed by, our dealers. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facilities, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition. Further, we have made certain investments for the expansion of our manufacturing capacities in the past and intend to use a part of the Net Proceeds towards expansion of our manufacturing facilities, specifically at our manufacturing facility. Our proposed expansion plans are based on demand forecasts that are subject to various

26. The COVID-19 pandemic has had, and is expected to have, a material adverse effect on our business, financial condition, results of operations and cash flows.

In late 2019, a novel strain of coronavirus (“COVID-19”) emerged and by March 11, 2020, it was declared a global pandemic by the World Health Organization. The spread of COVID-19 and the recent developments surrounding the global pandemic have had, and may continue to have, repercussions across local, national and global economies and financial markets. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. While the recently commenced vaccination drive in India is a positive development, the COVID-19 pandemic has affected and is expected to continue to affect our business and operational performance in the near future. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have reacted by taking measures, such as instituting quarantines, restricting travel, prohibiting people from assembling in heavily populated areas, issuing lockdown orders and restricting the types of businesses that may continue to operate, ‘stay-at-home’ orders, and enforcing remote working regulations. These measures have led to a significant decline in economic activities, and has had and is having an unprecedented effect and a significant negative impact on the global industry.

27. *Our business is substantially dependent on our key customers from whom we derive a significant portion of our revenues. The loss of any significant clients may have a material and adverse effect on our business and results of operations.*

We derive a significant portion of our revenues from a limited number of customers which operate in the pharma industry. In the event any one or more customers cease to continue doing business with us, our business may be adversely affected. The loss of such customers may be caused mainly because of competition and technological advancements. There may be factors other than our performance, which may not be predictable, which could cause loss of customers. Further, any significant reduction in demand for our services from our key customers, any requirement to lower the price offered by these customers, or any loss or financial difficulties caused to these customers, change in relationship with the customers could have a material adverse effect on our business, result of operations, financial condition and cash flow. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods, or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

28. *Our revenues are dependent upon our meeting specific customer requirements largely on a case-to-case basis. Any failure or limitation on our ability to provide services may detrimentally affect our future growth.*

Our assignments for providing services largely involve us, in providing end-to-end solutions to the pharma industry on a case to-case basis, depending upon the needs of each customer. Our inability to provide solutions could lead to erosion of our market image and brand value, which could lead to customers discontinuing their work with us and stagnation of our customer base, which in turn could harm our business and consolidated profitability. Our Company's future growth will depend on our continued evolution of specific sets of services to deal with the rapidly evolving and diverse needs of our customers in a cost competitive and effective manner.

29. *Stringent environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to environmental, health and safety and other regulatory and / or statutory requirements in the jurisdictions in which we operate. Our operations may generate significant amounts of pollutants and waste, some of which may be hazardous. We are accordingly subject to various national, state, municipal and local laws and regulations concerning environmental protection in India, including laws addressing the discharge of pollutants into the air and water, the management and disposal of any hazardous substances, and wastes and the clean-up of contaminated sites. Non-compliance with these laws and regulations, which among other things, limit or prohibit emissions or spills of toxic substances produced in connection with our operations, could expose us to civil penalties, criminal sanctions and revocation of key business licences. Environmental laws and regulations in India are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations, financial condition, or cash flows. In addition, we could incur substantial costs, our products could be restricted from entering certain markets, and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict.

30. *Significant security breaches in our computer systems and network infrastructure and fraud could adversely impact our business.*

We seek to protect all the computer systems and network infrastructure in our offices from physical break-ins as well as security breaches and other disruptive problems. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks. To address these issues and to minimise the risk of security breaches we employ security systems, including firewalls and intrusion detection systems, conduct periodic penetration testing for identification and assessment of potential vulnerabilities and, use encryption technology for transmitting and storing critical data such as passwords. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an adverse effect on our business.

31. *Some of the details mentioned in the respective KYC Documents of our Promoters and Directors are not same in all KYC documents.*

While going through the KYC documents such as Aadhaar Card, PAN, Passport, Driving License and Voting Id, it was found that certain details mismatch with each other. For example, the Name of the Promoter / Director in some KYC document is not matching with other KYC document. There is mismatch in Name and Address details in the KYCs of some Directors and Promoters.

32. *An inability to protect, strengthen and enhance our existing brand could adversely affect our business prospects and financial performance.*

Our business reputation and our brand under which we sell products are critical to the success of our business. While we have been making consistent efforts to strengthen our brand, various factors, some of which are beyond our control, are critical for maintaining and enhancing our brand, and if not managed properly, may negatively affect our brand and reputation. These include our ability to effectively manage the quality of our products; increase brand awareness among existing and potential dealers and end-customers; adapt our advertising and promotion efforts to emerging industry standards; and protect the intellectual property related to our brand.

Our brand could also be negatively impacted if we fail to maintain our established standards of service, or if our products fail to meet the expectation of our distributors and Customers that distribute and use our products. Any allegations of deterioration in product quality even when false or unfounded, could tarnish the image of our brand and may cause our dealers and end-customers to choose other competing products. Any negative publicity regarding us, our brand, our products generally could adversely affect our reputation and our results of operations. In addition, counterfeit products, product defects, and ineffective promotional activities are all potential threats to the image and potency of our brand. Our failure to develop, maintain and enhance our brand may result in decreased revenue and loss of customers, and in turn adversely affect our reputation, business, financial condition, results of operations, and cash flows.

33. *Our business is subject to various operating risks at our sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.*

Our business operations are subject to operating risks, such as breakdown or failure of equipment's used at the project sites, weather conditions, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could result in stoppage of work along with penalty in monetary terms. Any stoppage of work may result in a delay in completing our projects leading to failure to deliver product to the customers within the time frame. Further, any of the aforesaid risks may also result in our contractors compromising on the quality standards in order to finish the work within the given timelines, which may in turn affect our reputation and ability to attract new customers. If any of the above were to occur, it would significantly affect our operating results, and the slowdown of business operations may have a material adverse effect on our business operations and financial conditions.

34. *Inability to meet the quality standard norms prescribed by the central and state governments could result in the sales of our products being banned or suspended or becoming subject to significant compliance costs, which could have a material adverse effect on our business growth and prospects, results of operations, financial condition, and cash flows.*

The quality of the products being manufactured by us is open to independent verification by agencies of the central and state governments, or various other regulatory authorities. Regulatory authorities may carry out inspection of our premises, plant, equipment, machinery, manufacturing or other processes and sample checks on any material or substance in relation to our product at short notice or without notice. The government authorities could impose fines or issue us show cause notices if the samples are not in conformity with the prescribed quality norms. Failure on our part to adhere to the quality norms prescribed by the government agencies could lead to recall of those batches and / or the products in the relevant state, or we may be liable to pay a penalty. Any such order passed by the governmental authorities could generate adverse publicity about our Company and our products, which could have a material adverse effect on our business growth and prospects, financial condition, results of operations, and cash flows.

35. *Improper storage, processing and handling of raw materials and finished products may cause damage to our inventory leading to an adverse effect on our business, results of operations and cash flows.*

Our inventory primarily consists of raw materials and finished products. Our raw materials, manufacturing processes and finished products are susceptible to fungal and bacterial contamination if not appropriately stored, handled and processed, which may affect the quality of the finished product. In the event such a contamination is detected at the facility during

quality checks, we may be required to disinfect the entire plant and equipment, resulting in a suspension of manufacturing activities, and lower capacity utilizations, which could materially and adversely affect our business, financial condition, results of operations, or cash flows. Improper storage may also result in higher than usual spoilage of inventory due to adverse weather conditions or longer than usual storage periods, which may also require us to incur additional expenses in replacing that portion of the inventory and / or incur additional expenses in maintenance and improvement of our storage infrastructure, which may adversely affect our profit margins.

36. *Information relating to the installed manufacturing capacity and capacity utilization of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates and future production and capacity may vary.*

Information relating to the installed manufacturing capacity and capacity utilization of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates of our management that have been taken into account by an independent chartered engineer in the calculation of the installed manufacturing capacity of, and actual productions volumes at, our manufacturing facilities. These assumptions and estimates include the standard capacity calculation practice of the pharma industry after examining the period during which the manufacturing facilities operate in a year, expected operations, availability of raw materials, downtime resulting from scheduled maintenance activities, unscheduled breakdowns, as well as expected operational efficiencies, and taking into account the number of working days in a year, number of days in a month, number of shifts in a day, and average downtime efficiency. Actual manufacturing capacity, production levels and utilization rates may therefore vary from the information of our manufacturing facilities included in this Draft Prospectus or from the historical installed manufacturing capacity information of our manufacturing facilities depending on the product type. Accordingly, undue reliance should not be placed on our historical installed capacity information for our existing facilities included in this Draft Prospectus

37. *Our business is manpower intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We are in services industry and our business is dependent on human resource for carrying out its operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain, flexible policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

38. *Inability to meet the quality standard norms prescribed by the central and state governments could result in the sales of our products being banned or suspended or becoming subject to significant compliance costs, which could have a material adverse effect on our business growth and prospects, results of operations, financial condition, and cash flows.*

The quality of the products being manufactured by us is open to independent verification by agencies of the central and state governments, or various other regulatory authorities. Regulatory authorities including authorities under the Legal Metrology Act, 2009, may carry out inspection of our premises, plant, equipment, machinery, manufacturing or other processes and sample checks on any material or substance in relation to our product at short notice or without notice. The government authorities could impose fines or issue us show cause notices if the samples are not in conformity with the prescribed quality norms. For instance, we have in the past been penalized by the Legal Metrology department for alleged contravention of certain provisions of the Legal Metrology Act, 2009 and the rules notified thereunder and there can be no assurance that we will not be similarly penalised in the future. Failure on our part to adhere to the quality norms prescribed by the government agencies could lead to recall of those batches and / or the products in the relevant state, or we may be liable to pay a penalty. Any such order passed by the governmental authorities could generate adverse publicity about our Company and our products, which could have a material adverse effect on our business growth and prospects, financial condition, results of operations, and cash flows.

39. *Our company is still in the process of compiling information with respect to Total Outstanding Due to MSME Creditors.*

As on the date of filing of this Draft Prospectus, our Company is still in the process of compiling information with respect to Total Outstanding Due to MSME Creditors. Further, details pertaining to amounts due towards our creditors are not available on the website of our Company. Our inability to accurately forecast the total number of MSME Creditors and total amount due to them could adversely affect our business operations and cash flows and also affect our ability to continue to manage and expand our business.

40. *Our success depends in large part upon our qualified personnel, including our senior management, directors and key personnel and our ability to attract and retain them when necessary.*

Our operations are dependent on our ability to attract and retain qualified personnel. While we believe that we currently have adequate qualified personnel, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. The loss of the services of our qualified personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the qualified employees that our business requires. Furthermore, our senior management team is integral to the success of our business. However, we cannot assure you that we will be able to retain any or all of our management team. Any loss of our senior management or key personnel or our inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of ongoing and planned projects and our ability to develop, maintain and expand customer relationships.

41. *We will continue to be controlled by our Promoters and certain related entities after the completion of the Issue.*

As of the date of this Draft Prospectus, our Promoters and Promoter Group hold 41.53 % of the issued, subscribed and paid-up equity share capital of our Company. Upon completion of the issue, our Promoters and certain members of the Promoter Group together will own 56.88 % of our equity share capital, which will allow them to continue to control the outcome of matters submitted to our Board or shareholders for approval. After this Issue, our Promoters will continue to exercise significant control or exert significant influence over our business and major policy decisions, including but not limited to the following:

- controlling the election of directors;
- controlling the selection of senior management;
- approving significant corporate transactions, including acquisitions and disposals of our assets or business, or change of control transactions;
- making overall strategic and investment decisions;
- approving our annual budgets; and
- amending our Memorandum and Articles of Association.

The interests of our Promoters and certain members of the Promoter Group may conflict with your interests and the interests of our other shareholders, and our Promoters and certain members of the Promoter Group could make decisions that may adversely affect our business operations, and hence the value of your investment in the Equity Shares.

42. *The shortage or non-availability of power facilities may adversely affect our business and have an adverse impact on our results of operations and financial condition.*

Our business processes require power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented / augmented by alternative / independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power.

Any disruption / non-availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

43. *Our inability to accurately forecast demand or price for our products and manage our inventory may adversely affect our business, results of operations, financial condition, and cash flows. Our business depends on our estimate of the demand for our products from dealers.*

We estimate demand for our products based on market projections. If we overestimate demand, we may purchase more raw materials and manufacture more products than required. If we underestimate demand, we may manufacture fewer quantities of products than required, which could result in delayed or non-fulfilment of purchase orders resulting in loss of dealers, goodwill and business. If we under stock one or more of our products, we may not be able to obtain additional units in a timely manner, which could also adversely affect our goodwill and results of operations. In addition, if our products do not achieve widespread acceptance, or our dealers change their procurement preferences, we may be required to incur significant inventory markdowns, or may not be able to sell the products at all, which would affect our business, results of operations and financial condition.

44. *We face competition in our business from organized players, which may adversely affect our business operation and financial condition.*

The market in which our company is doing business is highly competitive on account of organized players. Players in this industry generally compete with each other on key attributes such as technical competence, experience, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

45. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

46. *If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.*

Our industry is characterized by increasingly complex and integrated services, new and changing business models and rapid technological and regulatory changes. Our clients' needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients' demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients' increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources and the services we provide and may increase our reliance on third-party service providers. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

47. *Major fraud, lapses of internal control or system failures could adversely impact the company's business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

48. *We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.*

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and / or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

49. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

50. *We are subject to Foreign Exchange Rate fluctuation and strict compliance of The Foreign Exchange Regulations Act, 1973 (FERA) and the provisions of FEMA.*

As a part of our activity, sometimes we may require to import materials from foreign countries for which we have to make payment in foreign currency. We have to face the foreign exchange fluctuation risk. We have to also comply with the strict provisions of FERA and FEMA. Any fluctuation in foreign exchange and noncompliance of the provisions will lead to financial loss and strict disciplinary and punitive action against the company which affect our liquidity, reputation and business operations and profitability of our company.

51. *Our Company has a negative cash flow in its Operating Activities in the year 2021 and 2020, from Investing and Investing Activities in stub period and in the year 2022 & from Financing Activities in the stub period, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(₹ in lakh)

Particulars	For the period ended December 31, 2022	For the year ended March 31,		
		2022	2021	2020
Net cash (used in) / generated from operating Activities	43.44	51.71	(28.24)	(27.07)
Net cash (used in) / generated from investing Activities	(17.34)	(85.22)	3.41	28.83
Net cash (used in) / generated from financing Activities	(5.03)	6.48	48.00	0.00
Net increase / (decrease) in cash and cash Equivalents	21.07	(27.03)	23.17	1.76

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations. For further details please see chapter titled “*Financial Information*” on page 145.

52. We have entered into related party transactions in the past and may continue to do so in the future.

Our Company has entered into various transactions with our Promoters and associate companies. While we believe that all such transactions are conducted on arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “*Related Party Transactions*” beginning on page 143 of this Draft Prospectus.

53. We have applied for registration of names of our Products and do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.

We have applied for registration of our names of our Products under the provisions of the Trademarks Act, 1999 and do not own the trademark as on date. As such we do not enjoy the statutory protections accorded to a registered trademark as on date. We have made an application with the Trade Marks Registry, for registration of our logo and corporate name under the provisions of the Trade Marks Act, 1999. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

54. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

55. The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and

potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

56. *Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.*

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance companies, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

57. *Our operations may be adversely affected in case of industrial accidents at our working sites.*

Usage of heavy machinery, handling of sharp parts of machinery by labour during production processor otherwise, short circuit of power supply for machines, etc. may result in accidents and fires, which could cause indirect injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Further, our plant and machinery and personnel may not be covered under adequate insurance for occurrence of particular types of accidents which could adversely hamper our cash flows and profitability.

58. *Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.*

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

59. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client's default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

60. *Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.*

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

61. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working

capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled “*Objects of the Issue*” on page 72 of this Draft Prospectus.

62. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and / or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and / or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

63. *Guarantees from Promoters & Director as well as others have been taken in relation to the debt facilities provided to us.*

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee / s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee / s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 158 of this Draft Prospectus.

64. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 144 of this Draft Prospectus.

65. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

66. *Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

67. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

68. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.*

Since, the Issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

69. *Negative publicity could adversely affect our revenue model and profitability.*

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

70. *Pharma Industry information included in this Draft Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

71. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and / or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

Issue Specific Risks:

- 72. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 73. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the Pharma Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

- 74. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.***

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

- 75. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.***

The Issue price of our Equity Shares has been determined by Fixed Price Method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "**Basis for Issue Price**" beginning on the page 77 of this Draft Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.

- Changes in revenue.
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

76. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

77. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

78. *Malpractices by some players in the industry affect overall performance of emerging Companies*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

79. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceed ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/-

pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

80. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.*

As stated in the reports of the Auditor included in this Draft Prospectus under chapter "*Financial Statements as Restated*" beginning on page 145 the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

81. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

82. *Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

83. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Draft Prospectus.*

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "*Our Industry*" beginning on page 83 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

84. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

85. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

86. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

87. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

88. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

GLOBAL ECONOMY AT LARGE

Inflation Peaking amid Low Growth

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia's war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

The balance of risks remains tilted to the downside, but adverse risks have moderated since the October 2022 WEO. On the upside, a stronger boost from pent-up demand in numerous economies or a faster fall in inflation are plausible. On the downside, severe health outcomes in China could hold back the recovery, Russia's war in Ukraine could escalate, and tighter global financing conditions could worsen debt distress. Financial markets could also suddenly reprice in response to adverse inflation news, while further geopolitical fragmentation could hamper economic progress.

In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spillovers. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

The Forces Shaping the Outlook

The global fight against inflation, Russia's war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023. Despite these headwinds, real GDP was surprisingly strong in the third quarter of 2022 in numerous economies, including the United States, the euro area, and major emerging market and developing economies. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labor markets and greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia's invasion of Ukraine. In the fourth quarter of 2022, however, this uptick is estimated to have faded in most though not all major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

Monetary policy starts to bite. Signs are apparent that monetary policy tightening is starting to cool demand and inflation, but the full impact is unlikely to be realized before 2024. Global headline inflation appears to have peaked in the third quarter of 2022. Prices of fuel and nonfuel commodities have declined, lowering headline inflation, notably in the United States, the euro area, and Latin America. But underlying (core) inflation has not yet peaked in most economies and remains well above pre-pandemic levels. It has persisted amid second-round effects from earlier cost shocks and tight labor markets with robust wage growth as consumer demand has remained resilient. Medium-term

inflation expectations generally remain anchored, but some gauges are up. These developments have caused central banks to raise rates faster than expected, especially in the United States and the euro area, and to signal that rates will stay elevated for longer. Core inflation is declining in some economies that have completed their tightening cycle such as Brazil. Financial markets are displaying high sensitivity to inflation news, with equity markets rising following recent releases of lower inflation data in anticipation of interest rate cuts (Box 1), despite central banks' communicating their resolve to tighten policy further. With the peak in US headline inflation and an acceleration in rate hikes by several non-US central banks, the dollar has weakened since September but remains significantly stronger than a year ago.

Winter comes to Europe. European economic growth in 2022 was more resilient than expected in the face of the large negative terms-of-trade shock from the war in Ukraine. This resilience which is visible in consumption and investment data for the third quarter partly reflects government support of about 1.2 percent of European Union GDP (net budgetary cost) to households and firms hit by the energy crisis, as well as dynamism from economies reopening. Gas prices have declined by more than expected amid higher non-Russian pipeline and liquefied natural gas flows, compression of demand for gas, and a warmer-than-usual winter. However, the boost from reopening appears to be fading. High-frequency indicators for the fourth quarter suggest that the manufacturing and services sectors are contracting. Consumer confidence and business sentiment have worsened. With inflation at about 10 percent or above in several euro area countries and the United Kingdom, household budgets remain stretched. The accelerated pace of rate increases by the Bank of England and the European Central Bank is tightening financial conditions and cooling demand in the housing sector and beyond.

The Forecast

Growth Bottoming Out

- Global growth, estimated at 3.4 percent in 2022, is projected to fall to 2.9 percent in 2023 before rising to 3.1 percent in 2024. Compared with the October forecast, the estimate for 2022 and the forecast for 2023 are both higher by about 0.2 percentage point, reflecting positive surprises and greater-than-expected resilience in numerous economies. Negative growth in global GDP or global GDP per capita—which often happens when there is a global recession is not expected. Nevertheless, global growth projected for 2023 and 2024 is below the historical (2000–19) annual average of 3.8 percent.
- The forecast of low growth in 2023 reflects the rise in central bank rates to fight inflation especially in advanced economies as well as the war in Ukraine. The decline in growth in 2023 from 2022 is driven by advanced economies; in emerging market and developing economies, growth is estimated to have bottomed out in 2022. Growth is expected to pick up in China with the full reopening in 2023. The expected pickup in 2024 in both groups of economies reflects gradual recovery from the effects of the war in Ukraine and subsiding inflation. Following the path of global demand, world trade growth is expected to decline in 2023 to 2.4 percent, despite an easing of supply bottlenecks, before rising to 3.4 percent in 2024. These forecasts are based on a number of assumptions, including on fuel and nonfuel commodity prices, which have generally been revised down since October, and on interest rates, which have been revised up. In 2023, oil prices are projected to fall by about 16 percent, while nonfuel commodity prices are expected to fall by, on average, 6.3 percent. Global interest rate assumptions are revised up, reflecting intensified actual and signaled policy tightening by major central banks since October.
- For advanced economies, growth is projected to decline sharply from 2.7 percent in 2022 to 1.2 percent in 2023 before rising to 1.4 percent in 2024, with a downward revision of 0.2 percentage point for 2024. About 90 percent of advanced economies are projected to see a decline in growth in 2023.
- In the United States, growth is projected to fall from 2.0 percent in 2022 to 1.4 percent in 2023 and 1.0 percent in 2024. With growth rebounding in the second half of 2024, growth in 2024 will be faster than in 2023 on a fourth-quarter-over-fourth-quarter basis, as in most advanced economies. There is a 0.4 percentage point upward revision for annual growth in 2023, reflecting carryover effects from domestic demand resilience in 2022, but a 0.2 percentage point downward revision of growth in 2024 due to the steeper path of Federal Reserve rate hikes, to a peak of about 5.1 percent in 2023.
- Growth in the euro area is projected to bottom out at 0.7 percent in 2023 before rising to 1.6 percent in 2024. The 0.2 percentage point upward revision to the forecast for 2023 reflects the effects of faster rate hikes by the European Central Bank and eroding real incomes, offset by the carryover from the 2022 outturn, lower wholesale energy prices, and additional announcements of fiscal purchasing power support in the form of energy price controls and cash transfers.

- Growth in the United Kingdom is projected to be –0.6 percent in 2023, a 0.9 percentage point downward revision from October, reflecting tighter fiscal and monetary policies and financial conditions and still-high energy retail prices weighing on household budgets.
- Growth in Japan is projected to rise to 1.8 percent in 2023, with continued monetary and fiscal policy support. High corporate profits from a depreciated yen and earlier delays in implementing previous projects will support business investment. In 2024, growth is expected to decline to 0.9 percent as the effects of past stimulus dissipate.
- For emerging market and developing economies, growth is projected to rise modestly, from 3.9 percent in 2022 to 4.0 percent in 2023 and 4.2 percent in 2024, with an upward revision of 0.3 percentage point for 2023 and a downward revision of 0.1 percentage point for 2024. About half of emerging market and developing economies have lower growth in 2023 than in 2022.
- Growth in emerging and developing Asia is expected to rise in 2023 and 2024 to 5.3 percent and 5.2 percent, respectively, after the deeper-than-expected slowdown in 2022 to 4.3 percent attributable to China’s economy. China’s real GDP slowdown in the fourth quarter of 2022 implies a 0.2 percentage point downgrade for 2022 growth to 3.0 percent—the first time in more than 40 years with China’s growth below the global average. Growth in China is projected to rise to 5.2 percent in 2023, reflecting rapidly improving mobility, and to fall to 4.5 percent in 2024 before settling at below 4 percent over the medium term amid declining business dynamism and slow progress on structural reforms. Growth in India is set to decline from 6.8 percent in 2022 to 6.1 percent in 2023 before picking up to 6.8 percent in 2024, with resilient domestic demand despite external headwinds. Growth in the ASEAN-5 countries (Indonesia, Malaysia, Philippines, Singapore, Thailand) is similarly projected to slow to 4.3 percent in 2023 and then pick up to 4.7 percent in 2024.
- Growth in emerging and developing Europe is projected to have bottomed out in 2022 at 0.7 percent and, since the October forecast, has been revised up for 2023 by 0.9 percentage point to 1.5 percent. This reflects a smaller economic contraction in Russia in 2022 (estimated at –2.2 percent compared with a predicted –3.4 percent) followed by modestly positive growth in 2023. At the current oil price cap level of the Group of Seven, Russian crude oil export volumes are not expected to be significantly affected, with Russian trade continuing to be redirected from sanctioning to non-sanctioning countries.
- In Latin America and the Caribbean, growth is projected to decline from 3.9 percent in 2022 to 1.8 percent in 2023, with an upward revision for 2023 of 0.1 percentage point since October. The forecast revision reflects upgrades of 0.2 percentage point for Brazil and 0.5 percentage point for Mexico due to unexpected domestic demand resilience, higher-than-expected growth in major trading partner economies, and in Brazil, greater-than-expected fiscal support. Growth in the region is projected to rise to 2.1 percent in 2024, although with a downward revision of 0.3 percentage point, reflecting tighter financial conditions, lower prices of exported commodities, and downward revisions to trading partner growth.
- Growth in the Middle East and Central Asia is projected to decline from 5.3 percent in 2022 to 3.2 percent in 2023, with a downward revision of 0.4 percentage point since October, mainly attributable to a steeper-than-expected growth slowdown in Saudi Arabia, from 8.7 percent in 2022 (which was stronger than expected by 1.1 percentage points) to 2.6 percent in 2023, with a negative revision of 1.1 percentage points. The downgrade for 2023 reflects mainly lower oil production in line with an agreement through OPEC+ (Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters), while non-oil growth is expected to remain robust.
- In sub-Saharan Africa, growth is projected to remain moderate at 3.8 percent in 2023 amid prolonged fallout from the COVID-19 pandemic, although with a modest upward revision since October, before picking up to 4.1 percent in 2024. The small upward revision for 2023 (0.1 percentage point) reflects Nigeria’s rising growth in 2023 due to measures to address insecurity issues in the oil sector. In South Africa, by contrast, after a COVID-19 reopening rebound in 2022, projected growth more than halves in 2023, to 1.2 percent, reflecting weaker external demand, power shortages, and structural constraints.

INFLATION PEAKING

About 84 percent of countries are expected to have lower headline (consumer price index) inflation in 2023 than in 2022. Global inflation is set to fall from 8.8 percent in 2022 (annual average) to 6.6 percent in 2023 and 4.3 percent in 2024—above pre-pandemic (2017–19) levels of about 3.5 percent. The projected disinflation partly reflects declining international fuel and nonfuel commodity prices due to weaker global demand. It also reflects the cooling effects of monetary policy tightening on underlying (core) inflation, which globally is expected to decline from 6.9 percent in the fourth quarter of 2022 (year over year) to 4.5 percent by the fourth quarter of 2023. Still, disinflation will take time: by

2024, projected annual average headline and core inflation will, respectively, still be above pre-pandemic levels in 82 percent and 86 percent of economies.

In advanced economies, annual average inflation is projected to decline from 7.3 percent in 2022 to 4.6 percent in 2023 and 2.6 percent in 2024—above target in several cases. In emerging market and developing economies, projected annual inflation declines from 9.9 percent in 2022 to 8.1 percent in 2023 and 5.5 percent in 2024, above the 4.9 percent pre-pandemic (2017–19) average. In low-income developing countries, inflation is projected to moderate from 14.2 percent in 2022 to 8.6 percent in 2024—still high, but close to the pre-pandemic average.

GLOBAL FINANCIAL STABILITY UPDATE

Overall, financial stability risks remain elevated as investors reassess their inflation and monetary policy outlook. Global financial conditions have eased somewhat since the October 2022 Global Financial Stability Report, driven largely by changing market expectations regarding the interest rate cycle (Figure 1.1). As a result, global bond yields have recently declined, corporate spreads have tightened, and equity markets have rebounded. That said, central banks are likely to continue to tighten monetary policy to fight inflation, and concerns that this restrictive stance could tip the economy into a recession have increased in major advanced economies. Slowing aggregate demand and weaker-than-expected inflation prints in some major advanced economies have prompted investors' anticipation of a further reduction in the pace of future policy rate hikes. Corporate earnings forecasts have been cut due to headwinds from slowing demand, and margins have contracted across most regions. In addition, survey-based probabilities of recession have been increasing, particularly in the United States and Europe.

However, upside risks to the inflation outlook remain. Despite the recent moderation in headline inflation, core inflation remains stubbornly high across most regions, labor markets are still tight, energy prices remain pressured by Russia's ongoing war in Ukraine, and supply chain disruptions may reappear. To keep these risks in check, financial conditions will likely need to tighten further. If not, central banks may need to increase policy rates even more in order to achieve their inflation objectives. Given the tension between rising recession risks and monetary policy uncertainty, markets have seen significant volatility. While many central banks in advanced economies have stepped down the size of hikes, they have also explicitly stated they will need to keep rates higher, for a longer period of time, to tamp down inflation. Risk assets could face significant declines if earnings retrench further or if investors reassess their outlook for monetary policy given central bank communications. Globally, the partial reversal of the dollar rally has contributed to recent easing due to improved risk appetite, and some emerging market central banks have paused tightening amid tentative signs that inflation may have peaked. Financial market volatility is expected to remain elevated and could be exacerbated by poor market liquidity. For some asset classes (such as US Treasuries), liquidity has deteriorated to the March 2020 lows of the COVID-19 pandemic. With the process of central bank balance sheet reduction (quantitative tightening) underway, market liquidity is expected to remain challenging.

INDIAN ECONOMY

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months. Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback. India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030. According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5%

GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

GOVERNMENT INITIATIVES

- Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. FACTORS THAT MAY AFFECT THE RESULTS OF THE OPERATIONS**Unusual or infrequent events or transactions**

There are no transactions or events, which in our best judgment, would be considered unusual or infrequent that have significantly affected operations of the Company.

Significant economic changes that materially affected or are likely to affect income from continuing operations

There are no significant economic changes that materially affected Company’s operations or are likely to affect income from continuing operations. Any slowdown in the growth of Indian economy or future volatility in global commodity prices, could affect the business including the future financial performance, shareholders’ funds and ability to implement strategy and the price of the Equity Shares.

Other than as disclosed in the chapter titled “*Risk Factors*” beginning on page 25 of this Draft Prospectus to our knowledge, there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on revenues or income of our Company from continuing operations.

Future changes in relationship between costs and revenues in case of events such as future increase in labour or material cost or prices that will cause material change

According to our knowledge, there are no future relationship between cost and income that would be expected to have a material adverse impact on our operations and revenues. However, increase in the cost of the goods in which the Company deals, will affect the profitability of the Company. Further, the Company may not be able to pass on the increase in prices of the services to the customers in full and this can be offset through cost reduction.

The extent to which material increases in net sales or revenue are due to increased sales volume, introduction of new products or services or increased prices

The increase in revenue is by and large linked to increase in volume of all the activities carried out by the Company.

We expect competition to intensify due to possible new entrants in the market, existing competitors further expanding their operations and our entry into new markets where we may compete with well-established unorganized companies/entities. This we believe may impact our financial condition and operations. For details, please refer to the chapter titled “**Risk Factors**” beginning on page 25 of this Draft Prospectus.

Phased implementation of Unified Payments Interface

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effective from October 15, 2020 (the “FDI Policy”), which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors / activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions. For details, see “**Key Regulations and Policies**” on page no. 106 of this Draft Prospectus.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur; and (ii) to “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act), pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus.
