2. ***Our Registered Office and Factory Offices are not owned by us. The same are occupied by us on a lease basis. Disruption of our rights as lessee or termination of the agreements with our lessor would adversely impact our operations and, consequently, our business.***

Our Registered Office from where we operate is not owned by us. Our Company has been occupying the Registered Office located at Borivali, Mumbai, on leave and license basis through a Leave and License Agreement dated March 06, 2021 entered into by our Company with our Promoter Mr. Hemal Vasantrai Mehta, for a period of four years commencing from January 01, 2021. Our Company has been various warehouses on lease basis, the details of the said agreements are mentioned under section titled Our Properties under the chapter titled ***“Our Business”*** beginning on page 117 of this Draft Red Herring Prospectus. We believe that such transaction has been conducted on an arms-length basis, and there can be no assurance that our Company could not have achieved more favourable terms if had such transactions not been entered into with related parties. We cannot assure that our Company will be able to successfully renew the said lease agreement on expiry of the lease period. Further, we cannot assure that we will not face any disruption in respect of our rights as a lessee and that such lease agreement will not be terminated prematurely by the lessee. Any such non-renewal or early termination or any disruption of our rights as lessee may require us to vacate the premises and relocate to a new premises on terms that may not be favourable to us thereby adversely affecting our business, financial conditions and results of operations. For further details, refer paragraph on ***“Our properties”*** under the chapter titled ***“Our Business”*** beginning on page 117 of this Draft Red Herring Prospectus.

3. ***We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of “Sudarshan Pharma Industries Limited” from “Sudarshan Pharma Industries Private Limited”. Also, we are yet to apply to renew for Certificate of Enrolment under Maharashtra State Tax on Profession, Trades, Callings and Employments Act, 1975 and Registration Certificate under Gujarat Shops and Establishments (Regulation of Employment and Conditions of service) Act, 2019, Loan License to manufacture for sale or for distribution of drugs under the Drugs and Cosmetics Rules, 1945 for the State of Uttarakhand. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further we require to keep already obtained valid key approvals such as Tax Registrations, Shops and Establishment Act License, for running our operations in a smooth manner. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the

time-frame anticipated by us or at all. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. Further, some of our approvals and licenses are in the previous name; we are yet to receive the same in the new name of our company. For further details, please see chapters titled “**Key Industry Regulations and Policies**” and “**Government and Other Statutory Approvals**” at pages 135 and 203 respectively of this Draft Red Herring Prospectus.

4. *There are no long-term supply agreements with our vendors / suppliers.*

Our Business may be adversely affected if there is any disruption in the trading material supply or due to non-availability of trading material. We do not have written agreements with our vendors / suppliers and we operate on a purchase order system. There are no long-term supply agreements for the trading material. In absence of any such formal contract with our vendors / suppliers, we are exposed to the risks of irregular supplies or no supplies at all or delayed supplies or price variation which would materially affect our results of operations. In the event of any disruption in the supply or the non-availability of material in the required quantity and of required quality from alternate source, the supply schedule to our clients may be adversely be affected impacting the sales and profitability of the Company.

5. *The COVID-19 pandemic has had, and is expected to have, a material adverse effect on our business, financial condition, results of operations and cash flows.*

In late 2019, a novel strain of coronavirus (“COVID-19”) emerged and by March 11, 2020, it was declared a global pandemic by the World Health Organization. The spread of COVID-19 and the recent developments surrounding the global pandemic have had, and may continue to have, repercussions across local, national and global economies and financial markets. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. While the recently commenced vaccination drive in India is a positive development, the COVID-19 pandemic has affected and is expected to continue to affect our business and operational performance in the near future. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have reacted by taking measures, such as instituting quarantines, restricting travel, prohibiting people from assembling in heavily populated areas, issuing lockdown orders and restricting the types of businesses that may continue to operate, ‘stay-at-home’ orders, and enforcing remote working regulations. These measures have led to a significant decline in economic activities, and has had and is having an unprecedented effect and a significant negative impact on the global real estate industry. The impact of Coronavirus on the Indian real estate sector was stifling to the point that it brought property transactions to a near-halt when the nation went into a complete lockdown during both waves. Since then, the market has taken several strides towards recovery, and just when it seemed the revival was not far, the country is struck by another variant of the virus, Omicron. However, it is too early to predict whether the emerging variant will have repercussions on housing demand and sales or not. The impact of a new and alarming variant of the COVID-19, Omicron, on the real estate sector will be entirely dependent on the severity of the infection, and resultant announcement of lockdown / s. Health experts opine that while the Omicron variant does not seem to have manifested serious symptoms so far, nothing could be said conclusively till we have more data. The realty industry has not seen any immediate impact on site visits, new bookings and launches so far. But with Delhi Government announcing a yellow alert and UP resorting to a state-wide night curfew, we might be heading to an economic slowdown, once again. Omicron could lead to a continuation of the real estate trends reported during the previous two waves. Meanwhile, the new COVID-19 variant has raised concerns across the country, considering the spike in the number of cases in metro cities, especially Delhi, Mumbai and Chennai. We have implemented certain measures and modified certain policies in light of the COVID-19 pandemic.

6. *Our business is substantially dependent on our key customers from whom we derive a significant portion of our revenues. The loss of any significant clients may have a material and adverse effect on our business and results of operations.*

We derive a significant portion of our revenues from a limited number of customers which operate in the pharma industry. For the period ended on June 30, 2022 our top 5 customers cumulatively accounted for more than 40% of our total revenue from operations as per the Restated Financial Statements. In the event any one or more customers cease to continue doing business with us, our business may be adversely affected. The loss of such customers may be caused mainly because of competition and technological advancements. There may be factors other than our performance, which may not be predictable, which could cause loss of customers. Further, any significant reduction in demand for our services from our key customers, any requirement to lower the price offered by these customers, or any loss or financial difficulties caused to these customers, change in relationship with the customers could have a material adverse effect on our business, result of operations, financial condition and cash flow. While we are constantly striving to increase our customer base and

reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods, or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

7. *Our revenues are dependent upon our meeting specific customer requirements largely on a case-to-case basis. Any failure or limitation on our ability to provide services may detrimentally affect our future growth.*

Our assignments for providing services largely involve us, in providing end-to-end solutions to the pharma industry on a case to-case basis, depending upon the needs of each customer. Our inability to provide solutions could lead to erosion of our market image and brand value, which could lead to customers discontinuing their work with us and stagnation of our customer base, which in turn could harm our business and consolidated profitability. Our Company's future growth will depend on our continued evolution of specific sets of services to deal with the rapidly evolving and diverse needs of our customers in a cost competitive and effective manner.

8. *Some of our trading items are hazardous in nature. In the event of any accidents involving any such hazardous materials and substances, our Company may be held liable for subsequent damages and litigations.*

We are trading in pharmaceutical raw materials which includes chemicals which are hazardous in nature. Improper or negligent handling while trading and / or storing hazardous material and / or substances at our godown may cause personal injury or loss of life and may further lead to severe damage or destruction to property may result in to financial losses and criminal liabilities.

9. *Our inability to obtain no objections from our lenders for the Issue, in a timely manner or at all could adversely affect raising of funds.*

Our Company is required to obtain prior no objections from our consortium banks pursuant to restrictive covenants contained in the loan documents. Our Company has applied for no-objection/consents from the lead bank of the Consortium and has obtained the consent. Our inability to obtain such no objection certificate in a timely manner or at all, may adversely affect timely raising of funds.

10. *We are dependent on third party transportation providers for delivery of trading goods and materials to us from our suppliers and delivery of trading goods and materials to our clients. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.*

As trading is our main activities, our success depends on the smooth supply and transportation of the trading materials and transportation of our trading materials from our suppliers to us / or our buyers / clients, both of which are subject to various uncertainties and risks. In addition, trading materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of trading materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of trading materials to us as well as to our clients in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

11. *We operate in a highly competitive industry, which could limit our ability to grow.*

As a telecom support service provider providing a wide range of services to our clients, we compete with a range of organized and unorganized competitors, depending on the nature and location of services provided. Such competitors collectively compete with the majority of our services. The market for telecom service providers is highly competitive with few organized players and localised smaller unorganised players. Important factors affecting competition in the telecom sector include project management ability, past track record, existing relationship with the clients, reliability, technical knowledge, price, scope and quality of services offered to customers. Our competitors' companies that may have greater financial, marketing or other resources than we do and, therefore, may be better able to compete for new work and skilled professionals. Our competitors may be willing and able to develop and provide service offerings faster or at a lower price than us. Our competitors also may affect our business by entering into exclusive arrangements with existing or potential clients. Growing competition may result in a decline in our market share and force us to reduce our margins and revenues. There can be no assurance that we will be able to compete successfully against such competitors or that we will not lose our key employees or clients to such competitors. Additionally, we believe that our ability to compete also depends in part on factors outside our control, such as the availability of skilled resources, the price at which our competitors offer comparable services, and the extent of our competitors' responsiveness to their clients' needs. If we are unable to remain sufficiently competitive, or are unable to keep pace with them, our business and operating results will be adversely affected. For further details, refer paragraph on "**Competition**" under the chapter titled "**Our Business**" beginning on page 117 of this Draft Red Herring Prospectus.

12. *Significant security breaches in our computer systems and network infrastructure and fraud could adversely impact our business.*

We seek to protect all the computer systems and network infrastructure in our offices from physical break-ins as well as security breaches and other disruptive problems. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks. To address these issues and to minimise the risk of security breaches we employ security systems, including firewalls and intrusion detection systems, conduct periodic penetration testing for identification and assessment of potential vulnerabilities and, use encryption technology for transmitting and storing critical data such as passwords. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an adverse effect on our business.

13. *Our Company does not have any long-term agreements with their clients and is subject to uncertainties in demand for our services.*

We do not have any long-term agreements with our clients and such agreements are typically terminable by our clients without cause on a short notice period. As a result, our clients can terminate their relationship with us due to circumstances beyond our control, such as more competitive option offered by our competitors which could materially and adversely impact our business. We believe that we have satisfactory business relations with our clients and have received continued business from them in the past but there is no certainty that the same will continue in the future, which could materially affect our business, results of operations and financial condition.

14. *We rely on independent third-party service providers and contractors to execute various parts of our projects and any failure on their part to perform their obligations could adversely affect our business, results of operations, and cash flows.*

We utilize various independent service providers and contractors to execute our services. If a service provider or contractor fails to perform its obligations satisfactorily or within the prescribed time periods with regard to services to our clients, or terminates its arrangement with us, we may be unable to provide service with our intended quality, within the intended timeframe and at the pre-estimated cost. If this occurs, we may be required to incur additional cost or time to meet appropriate quality standards in a manner consistent with our objective, which could result in reduced profits or, in some cases, significant penalties and losses which we may not be able to recover from the relevant service provider or independent contractor. We cannot assure you that the services rendered by any of our independent contractors will always be satisfactory or match our requirements for quality. In addition, we may be subject to claims in relation to defaults and late payments to our contractors, which may adversely affect our business, results of operations, and cash flows.

15. *We face significant risk with regard to span of time needed to complete each project and there could be unscheduled delays and cost overruns in relation to our ongoing and future projects.*

As on the date of this Draft Red Herring Prospectus, our Company is recognized by our clients for quality and timely execution of the projects undertaken. There has not been any material past instances of unscheduled delays with respect to our completed projects and phases thereof that have caused any material cost overruns. However, our business is extremely dynamic in nature and there could be unscheduled delays and cost overruns in relation to our ongoing or forthcoming projects. During the time there can be changes to the national, state and local business conditions and regulatory environment, local market conditions, perception of prospective clients with respect to the convenience and attractiveness of the project and changes with respect to competition from other companies. Further, any changes to the business environment such as non-availability of raw materials or increase in cost of construction materials during such time may affect the cost and revenues associated with the project and may ultimately affect the timelines of a project. We cannot assure you that we will be able to complete our projects within the expected budgets and time schedules at all. We may be penalized from the regulatory authorities as well as our client for delay in completion of project.

16. *We have had certain inaccuracy in relation to regulatory filings to be made with the RoC and our company has made noncompliance of certain provision under applicable law.*

In the past, there have been some instances of incorrect filings or delay in filing statutory forms with ROC, which have subsequently been filed along with payment of additional fees, as specified by ROC. Although no show cause notice has been issued against our Company till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Also, with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

17. *Our business is subject to various operating risks at our sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.*

Our business operations are subject to operating risks, such as breakdown or failure of equipment's used at the project sites, weather conditions, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could result in stoppage of work along with penalty in monetary terms. Any stoppage of work may result in a delay in completing our projects leading to failure to deliver the real estate to the customers within the time frame. Further, any of the aforesaid risks may also result in our contractors compromising on the quality standards in order to finish the work within the given timelines, which may in turn affect our reputation and ability to attract new customers. If any of the above were to occur, it would significantly affect our operating results, and the slowdown of business operations may have a material adverse effect on our business operations and financial conditions.

18. *There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956 / 2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.*

Our company has not complied with certain statutory provisions in the past including but not limited to the following:

- Provisions of SS-1 and SS-2 of the Companies Act, 2013 were not fully complied by the company at the time of preparation of the documents for filing of forms.
- Some Provisions of Section 12 of the Companies Act, 2013.
- Some attachment which was to be attached in the forms filed are not attached by the Company
- Supporting documents attached in some of the Forms are not signed and stamped by the requisite authority Any penalty or action taken by any regulatory authority in future for non-compliance with provisions of corporate and other law could impact financial position of the company to that extent.

19. *Our operations and our workforce are exposed to various hazards and risks that could result in material liabilities, increased expenses and diminished revenues.*

We conduct internal assessment pertaining to a particular area of land, prior to the acquisition of the same and attempt to assess its construction and development potential to the best possible ability. However, there are certain unanticipated or unforeseen risks that may arise in the course of property development due to adverse weather and geological conditions such as storms, hurricanes, lightning, floods, landslides and earthquakes. These weather conditions may expose our contracted workforce to various illnesses, de-hydration and other health hazards. Any stoppage of work on account of health hazards of our workforce may force us to reschedule our timelines resulting in cost over-runs.

20. *Our business is manpower intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We are in services industry and our business is dependent on human resource for carrying out its operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain, flexible policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

As on the date of filing of this Draft Red Herring Prospectus, our Company is still in the process of compiling information with respect to Total Outstanding Due to MSME Creditors. Further, details pertaining to amounts due towards our creditors are not available on the website of our Company. Our inability to accurately forecast the total number of MSME Creditors and total amount due to them could adversely affect our business operations and cash flows and also affect our ability to continue to manage and expand our business.

22. *Our success depends in large part upon our qualified personnel, including our senior management, directors and key personnel and our ability to attract and retain them when necessary.*

Our operations are dependent on our ability to attract and retain qualified personnel. While we believe that we currently have adequate qualified personnel, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. The loss of the services of our qualified personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the qualified employees that our business requires. Furthermore, our senior management team is integral to the success of our business. However, we cannot assure you that we will be able to retain any or all of our management team. Any loss of our senior management or key personnel or our inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of ongoing and planned projects and our ability to develop, maintain and expand customer relationships.

23. *We will continue to be controlled by our Promoters and certain related entities after the completion of the Issue.*

Upon completion of the issue, our Promoters and certain members of the Promoter Group together will own 71.98 % of our equity share capital, which will allow them to continue to control the outcome of matters submitted to our Board or shareholders for approval. After this Issue, our Promoters will continue to exercise significant control or exert significant influence over our business and major policy decisions, including but not limited to the following:

- controlling the election of directors;
- controlling the selection of senior management;
- approving significant corporate transactions, including acquisitions and disposals of our assets or business, or change of control transactions;
- making overall strategic and investment decisions;
- approving our annual budgets; and
- amending our Memorandum and Articles of Association.

The interests of our Promoters and certain members of the Promoter Group may conflict with your interests and the interests of our other shareholders, and our Promoters and certain members of the Promoter Group could make decisions that may adversely affect our business operations, and hence the value of your investment in the Equity Shares.

24. *We are dependent on third party vendors for delivery of materials required to us from our suppliers and delivery of our products to our clients. Any failure on part of such vendors to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.*

We are engaged in the business of providing services, solutions and support to telecom players. We also required certain materials which we source from third party vendors. Our success depends on the smooth supply and transportation of the various materials required for our projects delivering to our sites which are subject to various uncertainties and risks. In addition, these materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of materials in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

25. *The shortage or non-availability of power facilities may adversely affect our business and have an adverse impact on our results of operations and financial condition.*

Our business processes require power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented / augmented by alternative / independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power.

Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

26. *Our business may be affected by severe weather conditions and other natural disasters.*

Our business activities may be materially and adversely affected by severe weather conditions, which may force us to evacuate personnel or curtail services, or suspend our operations or postpone delivery of materials to our worksites. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our operations. High temperatures during summer months and the monsoon season could limit our ability to carry on our activities or to fully utilize our resources.

27. *We face competition in our business from organized players, which may adversely affect our business operation and financial condition.*

The market in which our company is doing business is highly competitive on account of organized players. Players in this industry generally compete with each other on key attributes such as technical competence, experience, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

28. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

29. *If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.*

Our industry is characterized by increasingly complex and integrated services, new and changing business models and rapid technological and regulatory changes. Our clients' needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients' demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients' increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources and the services we provide and may increase our reliance on third-party service providers. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

30. Major fraud, lapses of internal control or system failures could adversely impact the company's business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

31. We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and / or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

32. Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

33. We are subject Foreign Exchange Rate fluctuation and strict compliance of The Foreign Exchange Regulations Act, 1973 (FERA) and the provisions of FEMA.

As a part of our trading activity, sometimes we may require to import materials from foreign countries for which we have to make payment in foreign currency. We have to face the foreign exchange fluctuation risk. We have to also comply with the strict provisions of FERA and FEMA. Any fluctuation in foreign exchange and noncompliance of the provisions will lead to financial loss and strict disciplinary and punitive action against the company which affect our liquidity, reputation and business operations and profitability of our company.

34. Our Company has a negative cash flow in its operating activities in the year 2022 & from Investing and financing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(₹ in lakh)

Particulars	June 30, 2022	For the year ended March 31,		
		2022	2021	2020
Net cash (used in) / generated from operating Activities	1,478.90	-373.72	276.69	66.76
Net cash (used in) / generated from investing Activities	-135.89	-148.72	-129.46	-252.84
Net cash (used in) / generated from financing Activities	-349.00	420.56	-148.61	-42.99
Net increase / (decrease) in cash and cash Equivalents	994.03	-101.89	-1.38	-229.06

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations. For further details please see chapter titled “**Financial Information**” on page 176.

35. We have entered into related party transactions in the past and may continue to do so in the future.

Our Company has entered into various transactions with our Promoters and associate companies. While we believe that all such transactions are conducted on arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “**Related Party Transactions**” beginning on page 174 of this Draft Red Herring Prospectus.

36. We have not applied for registration of our name and logo and do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.

We have not applied for registration of our name and logo under the provisions of the Trademarks Act, 1999 and do not own the trademark as on date. As such we do not enjoy the statutory protections accorded to a registered trademark as on date. We are in the process of filing an application with the Trade Marks Registry, for registration of our logo and corporate name under the provisions of the Trade Marks Act, 1999. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

37. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

38. The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

39. *Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.*

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

40. *Our operations may be adversely affected in case of industrial accidents at our working sites.*

Usage of heavy machinery, handling of sharp parts of machinery by labour during production processor otherwise, short circuit of power supply for machines, etc. may result in accidents and fires, which could cause indirect injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Further, our plant and machinery and personnel may not be covered under adequate insurance for occurrence of particular types of accidents which could adversely hamper our cash flows and profitability.

41. *Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.*

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

42. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client's default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

43. *Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.*

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

44. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled “*Objects of the Issue*” on page 88 of this Draft Red Herring Prospectus.

45. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and / or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and / or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

46. *Guarantees from Promoters & Director as well as others have been taken in relation to the debt facilities provided to us.*

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee / s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee / s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 177 of this Draft Red Herring Prospectus.

47. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 175 of this Draft Red Herring Prospectus.

48. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

49. *Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 50. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, and formulation of a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.***

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or are not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance.

For further information, see the chapter titled “*Statement of Financial Indebtedness*” on page 177 of this Draft Red Herring Prospectus.

- 51. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.***

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 52. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.***

Since, the Issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company’s management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

- 53. *Negative publicity could adversely affect our revenue model and profitability.***

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

- 54. *Pharma Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the

information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

55. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and / or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

Issue Specific Risks:

56. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

57. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the Pharma Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

58. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

59. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.*

The Issue price of our Equity Shares has been determined by Book Build Method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "**Basis for Issue Price**" beginning on the page 93 of this Draft Red Herring Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
 - Changes in revenue.
 - Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
 - General Market Condition
 - Domestic and International Economy.
- 60. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

61. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

62. *Malpractices by some players in the industry affect overall performance of emerging Companies*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

63. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceeds ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

65. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

66. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

67. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Draft Red Herring Prospectus.*

While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "***Our Industry***" beginning on page 104 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

68. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

69. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

70. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

71. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could

negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

72. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67%
1000	23.00	1500	50.00%
1500	22.00	3000	100.00%
2000	21.00	5000	166.67%
2500	20.00	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled **“Issue Procedure”** on page 233 of this Draft Red Herring Prospectus);

GLOBAL ECONOMY AT LARGE

Inflation and Uncertainty

The world is in a volatile period: economic, geopolitical, and ecological changes all impact the global outlook. Inflation has soared to multidecade highs, prompting rapid monetary policy tightening and squeezing household budgets, just as COVID-19-pandemic-related fiscal support is waning. Many low-income countries are facing deep fiscal difficulties. At the same time, Russia's ongoing war in Ukraine and tensions elsewhere have raised the possibility of significant geopolitical disruption. Although the pandemic's impact has moderated in most countries, its lingering waves continue to disrupt economic activity, especially in China. And intense heat waves and droughts across Europe and central and south Asia have provided a taste of a more inhospitable future blighted by global climate change. Amid these volatile conditions, recent data releases confirm that the global economy is in a broad-based slowdown as downside risks—including risks highlighted in the July 2022 World Economic Outlook (WEO) Update—materialize, although with some conflicting signals. The second quarter of 2022 saw global real GDP modestly contract (growth of -0.1 percentage point at a quarterly annualized rate), with negative growth in China, Russia, and the US, as well as sharp slowdowns in eastern European countries most directly affected by the war in Ukraine and international sanctions aimed at pressuring Russia to end hostilities. At the same time, some major economies did not contract—euro area growth surprised on the upside in the second quarter, led by growth in tourism-dependent southern European economies. Forward-looking indicators, including new manufacturing orders and sentiment gauges, suggest a slowdown among major economies (Figure 1.1). In some cases, however, signals conflict—with some indicators showing output weakness amid labor market strength. An important factor underpinning the slowdown in the first half of this year is the rapid removal of monetary accommodation as many central banks seek to moderate persistently high inflation (Figure 1.2). Higher interest rates and the associated rise in borrowing costs, including mortgage rates, are having their desired effect in taking the heat out of domestic demand, with the housing market showing the earliest and most evident signs of slowdown in such economies as the US. Monetary policy tightening has been generally—although not everywhere—accompanied by a scaling back of fiscal support, which had previously propped up households' disposable incomes. Broadly speaking, nominal policy rates are now above pre-pandemic levels in both advanced and emerging market and developing economies. With elevated inflation, real interest rates have generally not yet reverted to pre-pandemic levels. Tightening financial conditions in most regions, with the notable exception of China (October 2022 Global Financial Stability Report), reflected in a strong real appreciation of the US dollar

This has also driven up yield spreads—the difference between countries' US dollar- or euro-denominated government bond yield and US or German government bond yields—for debt-distressed lower- and middle-income economies (Figure 1.3). In sub-Saharan Africa, yield spreads for more than two-thirds of sovereign bonds breached the 700 basis point level in August 2022—significantly more than a year ago. In eastern and central Europe, the effects of the war in Ukraine have exacerbated the shifting global risk appetite. Beyond monetary policy alone, China's COVID-19 outbreaks and mobility restrictions as part of the authorities' zero-COVID strategy and Russia's invasion of Ukraine have also pulled down economic activity. China's lockdowns have imposed sizable constraints domestically and gummed up already strained global supply chains. The war in Ukraine and deepening cuts to supplies of gas to Europe have amplified preexisting stresses in global commodity markets, driving natural gas prices higher once more (Figure 1.4). European economies—including the largest, Germany—are exposed to the impact of the gas supply cuts. Continued uncertainty over energy supplies has contributed to slower real economic activity in Europe, particularly in manufacturing, dampening consumer and, to a lesser extent, business confidence (Figure 1.1). However, a strong recovery in the tourism-dependent southern economies helped deliver better-than-anticipated overall growth in the first half of 2022.

Food prices—a prime driver of global inflation so far this year—have provided a rare slice of good news, with futures prices falling (Figure 1.4) and the Black Sea grain deal giving some hope of improved supply in coming months. More generally, some signs show that commodity prices might be starting to ease off as global demand slows, helping to moderate inflation. However, recent extreme heat waves and droughts are a stark reminder of the near-term threat from climate change and its likely impact on agricultural productivity (Figure 1.5). Although a slight rebound is forecast for the second half of the year, full-year growth in 2022 will likely fall far short of average pre-pandemic performance and

the strong growth rebound in 2021. In 2022, the world economy is predicted to be 3.2 percent larger than in 2021, with advanced economies growing 2.4 percent and emerging market and developing economies growing 3.7 percent. The world economy will expand even more slowly in 2023, at 2.7 percent, with advanced economies growing 1.1 percent and emerging market and developing economies 3.7 percent. Three key factors critically shape this economic outlook: monetary policy's stance in response to elevated inflation, the impact of the war in Ukraine, and the ongoing impact of pandemic-related lockdowns and supply chain disruptions. The following sections discuss each of these forces in turn before presenting the outlook in detail.

Figure 1.1. Leading Indicators Show Signs of Slowdown (Indices)

Figure 1.2. Change in Monetary Policy Cycle among G20 Economies (Number of increases and cuts in policy rates)

Central Banks Tackle Stubbornly High Inflation

demand toward services such as travel (*Figure 1.8*) have driven up inflation. Although futures prices have fallen, the delayed pass-through of past increases in food and energy prices from global commodity markets to consumer prices may continue to drive inflation yet higher in the short term.

In Europe, a significant impact from war-related energy shocks compounds these effects, whereas in Asia, a more moderate impact on food prices is helping to keep inflation from rising as much as elsewhere (*Figure 1.9*).

An important recent development is that although volatile headline shocks to items such as energy and food prices still account for much of inflation, they are no longer the overwhelmingly dominant drivers. Instead, underlying inflation has also increased—as measured by different gauges of core inflation—and is likely to remain elevated well into the second half of 2022. Global core inflation, measured by excluding food and energy prices, is expected to be 6.6 percent on a fourth-quarter-over-fourth-quarter basis, reflecting the pass-through of energy prices, supply chain cost pressure, and tight labor markets, especially in advanced economies. In contrast, the cooling of economic activity in China has also eased core inflation. On average, nominal wages take time to increase in response to inflation, leading real wages to decline and acting as a dampener on demand (see Chapter 2). Yet despite some pockets of uncertainty, long-term inflation

expectations have generally remained stable in most major economies. High inflation in 2021 and 2022 has surprised many macroeconomic forecasters, including IMF staff. Upside inflation surprises have occurred for most economies but have been especially widespread among advanced economies. The simple question is, Why? While our understanding is still evolving, forecasters likely underestimated the impact of the strong economic recovery in 2021—supported by fiscal intervention in advanced economies—coinciding with strained supply chains and tight labor markets (Box 1.1). Across advanced economies, forecast errors are related to the size of COVID-19–related fiscal stimulus packages. The correlation of output and inflation forecast errors is positive in both 2021 and 2022, but the relationship was stronger in 2021 than it has been so far in 2022. That errors were in the same direction suggests that excess demand has been a dominant factor, particularly in 2021, as some large economies may have been at the steeper end of the aggregate supply curve. The declining cross-country correlation in 2022 hints at an increased role for supply shocks, related to clogged supply chains and, more recently, the war in Ukraine. Headline inflation forecast errors have been larger for eastern European economies in 2022, consistent with the war in Ukraine driving up headline inflation. More generally, forecast errors for the noncore part of inflation (mainly reflecting food and energy prices), which can reflect supply shocks, have contributed more to unexpected increases in inflation in 2022 than in 2021. Core inflation forecast errors in China and developing Asia have been negative and relatively small so far this year, consistent with the slowdown in real activity. Public debate has also included discussion of the role of business markups—the price-to-marginal-cost ratio—during the pandemic as a potential driver of inflation. Markups have risen steadily over several years, prompting intense debate. Yet their recent dynamics do not suggest that markups are contributing in any sizable way to the current inflationary environment (Box 1.2). Elevated markups in fact make persistent wage-price spirals less likely, since they provide flexible buffers between general wage and general price increases (see Chapter 2 and in particular, Box 2.1). And despite historically tight labor markets in advanced economies, incipient wage-price spirals are not yet on the horizon.

The rise in US inflation has attracted especially intense attention, as it came earlier than in other advanced economies and surprised many economists. One factor explaining the surprise was unexpected adverse shocks from the disruption of supply chains and the rise in energy prices. The effects of those shocks appear to have passed through to underlying inflation. Another reason that economists' expectations missed the high-inflation episode was that economists typically measured labor market tightness using the unemployment rate, which has historically had a relatively flat relationship with inflation and did not decline below pre-pandemic levels. Meanwhile, other measures of labor market tightness,

including the ratio of vacancies to unemployed workers and the intensity of on-the-job search, unexpectedly rose to historic highs and better explain the rise in inflation (Ball, Leigh, and Mishra, forthcoming). To prevent inflation from becoming entrenched, central banks have rapidly lifted nominal policy rates. The Federal Reserve has increased the federal funds target rate by 3 percentage points since early 2022 and has communicated that further rises are likely. The Bank of England has raised its policy rate by 2 percentage points since the start of the year despite projecting weak growth. The European Central Bank has raised its policy rate by 1.25 percentage points this year. But because inflation has outstripped these increases, with a few exceptions, real policy rates remain below pre-pandemic levels (Figure 1.10).

Differences in the paths of monetary policy normalization are due in part to core inflation rising rapidly in some advanced economies, most notably in the US, before it did in others. Real activity and financial markets have responded to the removal of monetary accommodation, with tentative signs of cooling housing markets, especially in the US, and of slowing momentum in labor markets. Interest rates and spreads have also risen in many countries and across the yield curve, inducing volatility in financial markets. The Federal Reserve has raised interest rates more aggressively than the European Central Bank in part because of differences in underlying inflation dynamics and economic conditions to date. Core inflation rose sooner and has run higher in

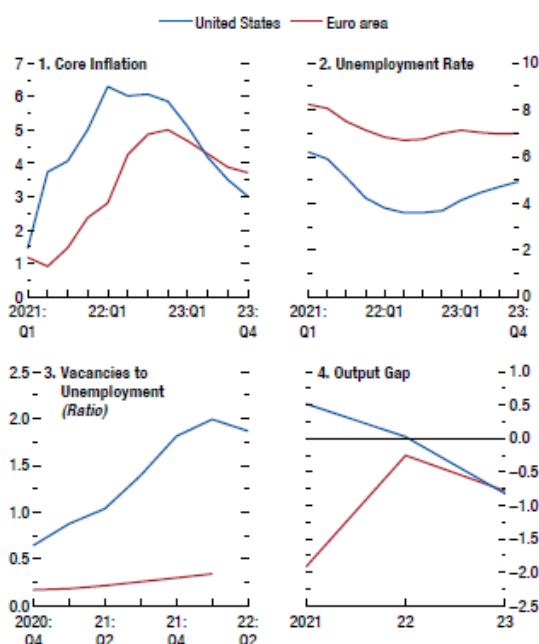

the US than in the euro area, with tighter labor markets and a higher estimated output gap (Figure 1.11). These differences partly reflect transatlantic differences in the level of direct fiscal stimulus earlier in the pandemic, as well as differences in the impacts of commodity price shocks and changes in private saving (see Figure 2.6). The gap between real and nominal wage growth has also closed more rapidly in the US than in the euro area, which has added further to underlying US inflation momentum. But inflationary pressures are building in the euro area: the war in Ukraine continues to have a very clear impact, with energy and food prices accounting for about two-thirds of the rise in headline inflation and energy price increases passing through into broader inflation measures.

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

- India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.

- According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at

1.2% of GDP in 2021-22.

- Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also launching growth-oriented policies to boost the economy. In view of this, the country witnessed many developments in the recent past, some of which are mentioned below.

- As of July 15, 2022, India's foreign exchange reserves reached US\$ 572.71 billion.
- Private equity-venture capital (PE-VC) sector investments stood at US\$ 34.1 billion, up 28% YoY, across 711 deals through January-June 2022.
- India's merchandise exports stood at US\$ 676.2 billion in FY22. In June 2022, India's merchandise exports stood at US\$ 37.9 billion, recording the highest ever exports in June 2022.
- PMI Services was at 58.9 in May 2022 compared to 57.9 in April 2022.

- In June 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 1.44 trillion (US\$ 18.1 billion).
- According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDI equity inflow in India stood at US\$ 588.53 billion between April 2000-March 2022.
- In May 2022, the Index of Industrial Production (IIP) stood at 137.7 driven by mining, manufacturing and electricity sectors.
- Consumer Price Index (CPI) inflation stood at 7.01% in June 2022 compared to 7.04% in May 2022.
- In July 2022 (until 21 July 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 228,862 crore (US\$ 28.65 billion)
- Wheat procurement in Rabi 2021-22 and anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over the recent decade, India's rapid economic growth has led to a substantial increase in demand for exports. Moreover, many of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- In July 2022, the Union Cabinet chaired by the Prime Minister, Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India and Maldives. This MoU will provide a platform to tap the benefits of IT for court digitisation, and can be a potential growth area for IT companies and start-ups in both the countries.
- India and Namibia entered into an MoU on wildlife conservation and sustainable biodiversity utilisation on July 20, 2022, for establishing the cheetah's habitat in the historical forest range in India.
- In July 2022, the Reserve Bank of India (RBI) approved international trade settlements in Indian rupees (INR) in order to promote the growth of global trade with emphasis on exports from India and to support the increasing interest of the global trading community.
- Mr. Rajnath Singh, Minister of Defence, launched 75 newly-developed artificial intelligence (AI) products and technologies during the first-ever "AI in Defence" (AIDef) symposium and exhibition, organised by the Ministry of Defence in New Delhi on July 11, 2022.
- In June 2022:
 - Prime Minister Mr. Narendra Modi laid the foundation stone of 1,406 projects worth more than Rs. 80,000 crore (US\$ 10.01 billion) at the ground-breaking ceremony of the UP Investors Summit in Lucknow.
 - The projects encompass diverse sectors such as Agriculture and Allied industries, IT and Electronics, MSME, Manufacturing, Renewable Energy, Pharma, Tourism, Defence & Aerospace and Handloom & Textiles.
- The Indian Institute of Spices Research (IISR) under the Indian Council for Agricultural Research (ICAR) inked an MoU with Lysterra, LLC, a Russia-based company, for the commercialisation of biocapsule, an encapsulation technology for bio-fertilisation on June 30, 2022.
- As of April 2022, India signed 13 Free Trade Agreements (FTAs) with its trading partners, including major trade agreements such as the India-UAE Comprehensive Partnership Agreement (CEPA) and the India-Australia Economic Cooperation and Trade Agreement (IndAus ECTA).
- The Union Budget of 2022-23 was presented on February 1, 2022, by the Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman. The budget had four priorities PM GatiShakti, Inclusive Development, Productivity

Enhancement and Investment, and Financing of Investments. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at Rs. 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).

- Under PM GatiShakti Master Plan, the National Highway Network will develop 25,000 km of new highways network, which will be worth Rs. 20,000 crore (US\$ 2.67 billion). In 2022-23. Increased government expenditure is expected to attract private investments, with a production-linked incentive scheme providing excellent opportunities. Consistently proactive, graded, and measured policy support is anticipated to boost the Indian economy.
- In February 2022, Minister for Finance and Corporate Affairs Ms. Nirmala Sitharaman said that productivity linked incentive (PLI) schemes would be extended to 14 sectors to achieve the mission of AtmaNirbhar Bharat and create 60 lakh jobs with an additional production capacity of Rs. 30 lakh crore (US\$ 401.49 billion) in the next five years.
- In the Union Budget of 2022-23, the government announced funding for the production linked incentive (PLI) scheme for domestic solar cells and module manufacturing of Rs. 24,000 crore (US\$ 3.21 billion).

- In May 2021, the government approved the production linked incentive (PLI) scheme for manufacturing advanced chemistry cell (ACC) batteries at an estimated outlay of Rs. 18,100 crore (US\$ 2.44 billion); this move is expected to attract domestic and foreign investments worth Rs. 45,000 crore (US\$ 6.07 billion).
- Minister for Finance & Corporate Affairs Ms Nirmala Sitharaman announced in the Union Budget of 2022-23 that the Reserve Bank of India (RBI) would issue Digital Rupee using blockchain and other technologies.

- Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the government has also come up with the

Digital India initiative, which focuses on three core components: the creation of digital infrastructure, delivering services digitally, and increasing digital literacy.

- On January 29, 2022, the National Asset Reconstruction Company Ltd (NARCL) will acquire bad loans worth up to Rs. 50,000 crore (US\$ 6.69 billion) about 15 accounts by March 31, 2022. ROAD AHEAD

Despite continuing geopolitical concerns, rising interest rates in the US and India and high prices of crude oil and few other commodities, economic activity in India is holding up better than anticipated. Electricity consumption, manufacturing PMI, exports, power supply and other high-frequency indicators indicate that the pace of economic activity has fully recovered from the COVID-19 pandemic shock. Economic growth is anticipated to be fueled by the effective implementation of PLI schemes, development of renewable energy sources while diversifying import dependence on crude oil and bolstering of the banking sector. Recent government initiatives to boost revenue will aid in containing the rise in the current account deficit and ensure that any potential fiscal slippage is adequately contained. Overall, the first ten days of July and June were better than the first two months of FY 2022–23, which is a cause for comfort and even cautious optimism in these testing times. According to a Boston Consulting Group (BCG) analysis, India is expected to be the third-largest consumer economy as its consumption may quadruple to US\$ 4 trillion by 2025 due to changes in consumer behaviour and spending patterns. By 2040, India is anticipated to overtake the US to become the second-largest economy in terms of purchasing power parity (PPP), according to a report by PricewaterhouseCoopers.

The pharmaceutical industry in India is a significant part of the nation's foreign trade and offers lucrative potential for investors. Millions of people around the world receive affordable and inexpensive generic medications from India, which also runs a sizable number of plants that adhere to Good Manufacturing Practices (GMP) standards set by the World Health Organization (WHO) and the United States Food and Drug Administration (USFDA). Among nations that produce pharmaceuticals, India has long held the top spot. Medicine spending in India is projected to grow 9-12% over the next five years, leading India to become one of the top 10 countries in terms of medicine spending. Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers, which are on the rise. The Indian Government has taken many steps to reduce costs and bring down healthcare expenses. The National Health Protection Scheme, which aims to offer universal healthcare, the ageing population, the rise in chronic diseases, and other government programmes, including the opening of pharmacies that offer inexpensive generic medications, should all contribute to boost the Indian pharmaceutical industry. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

We believe that our widespread domestic presence not only mitigates the risk of dependence on a few regions but also helps us to leverage our brand value. We have dedicated sales and marketing team under the VIMAC Healthcare Division and an extensive domestic distribution network for Pharma business. This division focuses on generating significant demand for our products in India. This division also works on maintaining the existing clients and acquiring new clients for our products.

OUR BUSINESS STRATEGY

We intend to strengthen our position in India and further expand our operations internationally in regulated and semi-regulated markets to achieve long-term sustainable growth, increase brand value, achieve operational excellence, strengthen existing services, customer satisfaction, innovation, and marketing etc. Our principal strategies and initiatives to achieve these objectives are set out below:

Venturing into API manufacturing

The company is setting up a dedicated State-of-the-Art Manufacturing (Oral Solid Dosage) duly certified by FDA, WHO, GMP & GLP to manufacture 40+ APIs including specialty chemicals like N- Heptane, Acetonitrile, Meta Xylene Special Purity Grade, under PLI scheme Vitamin B6.

Focus on increasing our global sales

Our company has focused on the direct export of our Specialty Chemicals and Pharma Products.

To develop our export operations, we are in the process of applying for formulation registrations of our pharmaceutical products in MINA and African market. We had already exported lot of specialty chemicals to international market. Our aim will be to expand our business by continuing to file product registrations in international markets for business growth. With our long-standing operations and quality products, we have built a strong relationship with our customers for Specialty Chemicals, APIs and FDFs. However, our growth strategy will vary from country to country depending on applicable regulatory norms.

Increasing Operational efficiency

We will continue to invest in increasing our operational efficiency throughout the organization. Higher operational effectiveness results in greater production volumes and higher sales, and therefore allows us to spread fixed costs over a higher number of units sold, thereby increasing profit margins. We further intend to continue and invest in our in-house technical capabilities to develop customized systems and processes and ensure effective management control over our critical resources for optimal utilization.

Broaden and Deepen presence in the existing product portfolio

For specialty chemicals & intermediate business and also for pharmaceutical healthcare sector we intend to continue consolidating our position in our key therapeutic areas for the domestic markets such as Anti- Infective, Gastrointestinal, Anti-Allergic, Anti-Histamines, Iron Deficiency –Anemia (IDA), Treatment of Infertility and Respiratory Diseases. For exports, we aim to pursue therapeutic areas such as Anti-Cancer, Gastrointestinal, Antibiotics, Anti-allergic, Nutraceuticals & Ayurvedic formulations.

Our overall Market share will be increased through the following initiatives:

- Identifying gaps in our product portfolio to introduce new products;
- Enhancing the productivity and efficiency of our sales and marketing personnel through training & development.
- Launching new innovation-driven products to add value to our product / Sales mix;
- Strengthening our position with the focus on marketing value-based products through our Vimax Division with a target to penetrate those states / countries where we are not represented.

Increase by targeting unexplored markets

As part of our growth strategy, we intend to target regulated markets as well as enhance our presence in existing geographies. We want to obtain approvals for launching our newer products in the Africa, South-East Asia & MENA region. Our growth strategy will vary from country to country depending on applicable regulatory norms. The commercialization of products under registration will add to the growth. We will continue to evaluate additional markets

and product opportunities, including potential acquisitions and relationships which we believe will be beneficial to increase our presence in Domestic Markets as well as Export markets.

Expand our scope by adding more products

We currently manufacture, market and sell different therapeutic segments like Analgesics, Antipyretic, Neurotronic, Antibiotics (Cephalosporins, Carbapenems and Beta Lactum range) Anti Diabetics, Antifungal, Multivitamins and Steroids and SCs products like Dyes & Pigments, Polymers & additives, Water Chemicals, Textile Chemicals & Surfactants. With our current and proposed products, we plan to increase our product range further and thus cater to more specific segments while enhancing our reach to diversified customers. Our Company believes that expanding and launching our product range will enable us to utilize our capacities, manpower and other resources better. The marketing of the new products will be aided by our existing customer base, long-standing trade relations and overall goodwill in the pharmaceutical industry.

COMPETITION

Our Company operates in the Chemical and pharmaceutical sector which faces competition from domestic as well as international players. Many of the companies against which we are competing, or against which we may compete in the future, have significantly greater financial resources and expertise in research and development, manufacturing, obtaining regulatory approvals and marketing approved products than we do. Moreover, as we seek to diversify into new geographical areas globally, we may face competition from local companies, multinational corporations and companies from other emerging markets operating in such markets. We compete with our competitors on the basis of product quality, brand image, price and reliability. We continuously strive to increase our distribution channel to increase our domestic presence and increase our global reach. We intend to continue competing vigorously to capture more market share and manage our growth in an optimal way by improving our brand image, increasing our product offerings, satisfying customer demands, achieving operating efficiencies, and more.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2) / 2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that

- (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations;
- (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and
- (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company.
