The inherent result of which, there has been tremendous demand of modern technologies and upgradation of quality of packaging and in general, the quality of life. India has achieved huge rise in food production brought about by the Green Revolution. Food industry offers what is unquestionable, one of the largest opportunities for growth in India today. The industry will play a vital and positive role in the Indian economy. To reach such phenomenal growth, it is quite evident that the processing and preservation technology of food products has to keep pace with the growth. Hence, it is expected that the modern technology of flexible packaging like Aseptic Packaging, Barrier Packaging, Controlled Atmospheric Packaging will make big inroads in India.

The growth in the flexible packaging industry in India is mainly driven by the food and the pharmaceutical packaging sectors. The large and growing Indian middle class, along with the growth in organised retailing in the country are fueling growth in the flexible packaging industry. Another factor, which has provided substantial stimulus to the packaging industry is the rapid growth of exports, which requires superior packaging standards for the international market. The Indian packaging industry is dominated by plastic flexible packaging. The traditional rigid packaging users have also been seen to shift to flexible packaging in recent times. According to industry sources, the main reason for this is that flexible packages are found aesthetically attractive, cost-effective and sturdy. Consumer preference for the use of convenient packaging and packaged products in affordable quantities in laminates is also one of the main reasons that have contributed to the growth of flexible packaging in India. The food-processing sector is the largest user of flexible packaging, accounting for more than 50% of the total demand. The flexible packaging segment is estimated to be growing at over 35% annually.

The Indian packaging industry is currently \$18.8 billion with a growth rate of above 12.36% per annum - more than twice the global average while our GDP growth was 6-8%. Not only is the industry growing rapidly but it is also creating lucrative jobs for those who find a career in it. The packaging industry is expected to grow at 18-20% and is expected to reach \$43.7 billion by 2022. 2. *Our Company has been formed specifically for the purpose of acquisition of the business of M/s Clara Petrochemicals (Proprietorship firm of our Promoter) thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.*

Our Company was originally incorporated as a Public limited Company under the Companies Act, 2013 with Registrar of Companies, Central Registration Centre through a certificate of incorporation dated September 02, 2021. After incorporation, company has taken-over the running business of Proprietorship firm of our Promoter i.e., M/s Clara Petrochemicals for expansion of the business of Company. We have very limited operating history from which one can evaluate our business, future prospects and viability. Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile.

The business of providing flexible plastic packaging solutions was earlier carried by proprietorship firm which is recently taken over by our Company, although the proprietorship has placed the growth in past years, and will continue to place by our Company but there is no assurance that this growth will be met successfully in future. We may not be able to increase

revenue or maintain profitability on a quarterly or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected. Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls. There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects. For further details, see the section titled **“Our History and Certain Other Corporate Matters”** and **“Financial Statements as Restated”** on page 100 and 129 respectively of the Draft Prospectus.

3. *An increase in the prices of our basic raw material i.e., Plastic granules and PET Sheets could raise our manufacturing costs and could adversely affect our profitability.*

We have no control on the prices of our basic raw material i.e., Plastic granules and PET Sheets. The prices of these raw materials fluctuate daily due to availability and demand. In the recent past, there have been fluctuations in the prices of our raw material both at domestic and international levels. Such fluctuations in prices of raw material and our inability to negotiate at optimum market rates may affect our profitability. We typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

4. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. We have not entered in any agreement with our customers, we work on the basis of purchase order basis.

5. *Business Transfer Agreement executed between M/s Clara Petrochemicals and our Company contains some restrictive covenants with certain terms and conditions. Inability to effectively service / comply the terms and conditions, comply with or obtain waivers of some covenants, as the case may be, may adversely affect our business, results of operations and financial conditions.*

Ms. Parry Kukreja, promoter of our company was carrying the business of providing flexible plastic packaging solutions through its Proprietorship firm in the name of M/s Clara Petrochemicals which was taken over by our company vide Business Transfer Agreement dated October 29, 2021. Further the company does not have any specific business except for the business acquired from the proprietorship concern in case of the company is unable to develop the said business effectively or in a profitable manner then it may have an adverse effect on the operation and profitability of the company. For further details, relating to our history of our company of our company. Please refer to the chapter titled **“Our History and Certain Other Corporate Matters”**, **“Our Business”** and **“Financial Statements as Restated”** on pages 100, 83 and 129. Inability to effectively comply any clauses of BTA agreement, comply with or obtain waivers of certain terms and conditions, as the case may be, may adversely affect our business, results of operations and financial conditions. Also, our Company may face regulatory proceedings including RBI w.r.t. to the Receipt / Payment of the Debtors / Creditors taken over etc. For further details, please see the section entitled **“Statement of Financial Indebtedness”** on page 162. Further, the company has applied or in some cases will apply, for the transition or endorsement of name of the company on many of the documents, registration, bank account and other documents which are in the name of our promoter Ms. Parry Kukreja or Clara Petrochemicals. Any delay in the said transition may require the company to pay any penalty or refusal from any authority of such transition or endorsement which may affect the financial position and operation of our company.

6. *The property and some machines used by the Company for the purpose of its operations is not owned by us. Any termination of the relevant rent agreement in connection with such property or our failure to renew the same could adversely affect our operations.*

We currently operate our registered office and factory, located at 127/1 Gram Simbhalka Junardar Paragna, Tehsil and District Saharanpur- 247001, Uttar Pradesh, India, which are not owned by us. We have obtained this property on rent

from our director & promoter. Also, few machine that we use for manufacturing is been taken on lease from our promoter Mr. Nikhil Kukreja. Periodic renewals of such lease may increase our costs, since it is subject to rent escalation. Any termination of the lease and / or rental deed in connection with these properties or our failure to renew the same, and upon favourable conditions, in a timely manner or at all could adversely affect our operations. For details regarding properties taken on lease refer the Section titled — Properties – **“Our Business”** beginning on page no. 83 of this Draft Prospectus.

7. Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customer’s discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Further, we operate in highly competitive markets in relation to our products where it is difficult to predict whether and when we will receive such awards. As a result, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when such orders are awarded to us and the commencement and progress of work under the orders placed. For further details of our business, please refer chapter titled **“Our Business”** beginning on Page 83 of this Draft Prospectus.

8. Our business involves usage of manpower and any unavailability of our employees or shortage of contract labour or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations.

Our business involves usage of manpower and we are dependent on the availability of our permanent employees and the supply of a sufficient pool of labourers. Unavailability or shortage of such a pool of workmen or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations. We may not be able to secure the required number of labourers required for the timely execution of our projects for a variety of reasons including, but not limited to, possibility of disputes with sub-contractors, strikes, less competitive rates. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities, such as food or safety equipment, may adversely affect our business and results of our operations.

Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations.

9. There may be potential conflict of interests between our Company and other venture or enterprises promoted by our promoter.

Our Promoter Mr. Nikhil Kukreja runs a sole Proprietorship named Chand Plastic Corporation. The main business object / activities of firm permit it to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other companies in which our Promoter have interest.

10. Our business is capital intensive. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on our operations.

Our business requires a significant amount of working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. In many contracts, significant amounts of working capital are required to finance the purchase or manufacturing of materials, mobilization of resources and other work on projects before payment is received from clients. Our working capital requirements may increase due

to an increase in the size of our operations and the number and size of projects that are required to be executed within a similar timeframe.

Our capital expenditure requirements and growth strategy thus require continued access to significant amounts of capital on acceptable terms. We cannot assure you that market conditions and other factors will permit future project and acquisition financings, debt or equity, on terms acceptable to us. Our ability to arrange financing and the costs of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from financial institutions, the amount and terms of our existing indebtedness, investor confidence, the continued success of current projects and laws that are conducive to our raising capital in this manner.

11. Heavy dependence on our Promoters for the continued success of our business through his continuing services, strategic guidance and support

We are heavily dependent upon the continued services of our Promoters, along with support of our management team for the continuous success and growth of our organization. Our promoter Mr. Nikhil Kukreja is responsible for the execution of our day-to-day business affairs. Also prior to the incorporation and acquisition of the business he was running business under the proprietorship concern which have been acquired by our Company. The loss of our Promoters or failure to recruit suitable or comparable replacements could have an adverse effect on our business operations and growth strategies. For Details of our Promoters, please refer chapter titled ***“Our Promoters and Promoter Group”*** beginning on Page 122 of this Draft Prospectus.

12. We have not yet applied for the registration of our logo. If we fail to obtain registration our brand building efforts may be hampered which might lead to adverse effect on our business.

Our Company is currently using the logo which is not yet registered in the name of our Company neither we have made any application for the registration of the trademark with the respective authorities. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations. For further details, please refer to section titled ***“Government and Other Statutory Approvals”*** on page 169 of this Draft Prospectus.

13. Our Company has not taken any insurance which may expose our company from potential losses to which we may be subject to risk and this may have a material effect on our business and financial condition.

Our Company has not taken any insurance policy related to our registered office, factory, machines, stock, finished goods and for keyman Insurance policy of our Company. Any unforeseen situation or any liability will not compensate due to absence of Insurance policy. Further, our business involves risks which may adversely affect our profitability, including failure of systems and employee frauds. We cannot assure you that the operation of our business will not be affected by any of the incidents listed above or by other factors. In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have an effect on our business, results of operations, financial condition and cash flows.

14. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The market in which our company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

15. We have been recently incorporated as company and any non-compliance with the provisions of Companies Act, 2013 may attract penalties against our Company which could impact our financial and operational performance and reputation.

Our Company has been recently incorporated to acquire the entire business with the assets and liabilities of M/s Clara Petrochemicals, sole proprietorship concern of our Promoter Ms. Parry Kukreja vide Business Transfer Agreement dated October 29, 2021. The provisions of the Companies Act were not applicable to us earlier. However, consequent to the aforesaid incorporation, our Company is subject to compliance of various provisions of the Companies Act such as repayment of amounts falling under the definition of deposits under the Companies Act, 2013, prior approval for entering into related party transactions, filing of relevant RoC forms, rules pertaining to declaration of dividends etc. Though our Company will endeavour to take all possible steps comply with the provisions of the Companies Act, but in case of our inability to do so or in case of any delay, we may be subject to penal action from the appropriate authorities which may have an adverse effect on our financial and operational performance and reputation.

16. Our business experiences an increase in sales and profits of a particular product that we manufacture namely plastic bangle during the Festive seasons such as Diwali and Karva Chauth and also other significant seasons. Any substantial decrease in our sales during such periods and our inability cope up with our service during this time, then our revenues and profitability will be affected and have a negative effect on our image and brand.

Our business is experience significant increase in our sales and profits during the Festive seasons such as Diwali and Karva Chauth. In the year 2021 we saw a jump in sales in the above-mentioned product which has generated good profits for a particular period. We can't promise the same profit margins can be attained by the company in other products and during whole year, any significant shortfall in sales or our inability to cope up with the growing demands during this period, would affect our profitability and we would experience adverse effect on our results of operations.

17. The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.

The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted. In late calendar 2019, COVID-19, commonly known as "novel coronavirus" was first reported in Wuhan, China. Since then, the virus has progressively spread globally too many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorised the outbreak as a pandemic on March 11, 2020. In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-day lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. Whilst the lockdown required private, commercial and industrial establishments to remain closed, subsequently manufacturing units of essential commodities were permitted to be functional. The team members have been working from home during lockdown and have been able to execute their responsibilities and service clients without any disruption, difficulty or delay. A rise in number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such a prolonged instance of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contact COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the wellbeing of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India, and the impact of any actions taken by governmental bodies or health organisations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. To the extent that the COVID19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this "Risk Factors" section.

18. If we are not able to obtain, renew or maintain the statutory and regulatory permits and approvals required to operate our business it may have a material adverse effect on our business.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Our Company has been recently incorporated and started business by takeover of running proprietorship firm of our Promoter i.e., M/s Clara

Petrochemicals which deal in manufacturing and trading of flexible plastic packaging. For the same our Company has made applications to regulatory authorities for grant of the following Government / statutory approvals and licenses.

Currently all the licenses are in the name of firm and we have made application for the new license in the name of the company. We cannot assure that there is no other statutory / regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. Additionally, we believe that we will be able to renew or obtain such registrations and approvals or permissions, as and when required, there can be no assurance that the relevant authorities will renew or issue any such registrations or approvals in the time frame anticipated by us or at all. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues, profits and operations.

19. Breakdown of machinery and / or equipment used for the purpose of manufacturing process

Any breakdown or defect in the machinery and / or the equipment used for the purpose of our manufacturing process may delay the production process as a whole and result in missing deadlines in delivery of product if we are able to repair the machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company.

20. Our Company has not created charge for the secured loan which was transferred by virtue of Business Transfer Agreement between Clara Petrochemicals (Proprietary Firm) and our Company. Also, the company was unable to get any Sanction letter or any agreement from Punjab National Bank.

A secured loan amounting to Rs. 58.65 Lakh was transferred by virtue of Business Transfer Agreement between Clara Petrochemicals and our Company, this loan was granted by Punjab National Bank and a charge was created on the property of proprietary Ms. Parry Kukreja. An application has been made to the bank on November 23, 2021 to transfer the same in the name of the company and the bank acknowledge our request, once process will be completed, the bank will provide the necessary documents required in this matter and due to this the company was not able to file CHG-1 with ROC since the company did not receive the documents from bank. 21. Some of the details mentioned in the respective KYC Documents of our promoters and Directors are not same as other KYC documents.

Details of promoters and management such as Name, Date of Birth, Address, etc shall be incorporated in the Prospectus. While going through the KYC documents such as Aadhaar Card, PAN, Passport, Driving License and Voting Id, it was found that certain details mismatch with each other. For example, the Address in some KYC document is not matching with other document.

22. Deactivation of DIN of our Promoters in Companies in which they were Directors earlier

Our Promoters and Directors Ms. Parry Kukreja and Mr. Nikhil Kukreja's DIN was deactivated due to non-filing Annual Returns in one of the company in which they were Directors. Ms. Parry Kukreja and Mr. Nikhil Kukreja had made application and reactivated the DIN after following the procedure but in future instances my come when they don't file Annual Returns of Companies and their DIN may get deactivated again.

23. If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.

Our industry is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological and regulatory changes. Our clients' needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients' demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients' increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources and the services we provide and may increase our reliance on third-party service providers. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it

could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

24. Major fraud, lapses of internal control or system failures could adversely impact the company's business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

25. We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and / or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

26. In our financials there is an outstanding loan in the name of Ms. Shanta Rani. This loan was given by the proprietor firm, upon takeover of the firm through BTA the said Loan was transferred to the company.

As per the Companies Act, 2013, a Company cannot grant a loan to Director or their Relatives. Mrs. Shanta Rani is mother of our promoter hence she is considered as relative. Our Company is in process of repaying the Loan in near future. There is a risk that company may be penalised for the said transaction and this would effect our financial position.

27. General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

28. We are dependent on third party transportation providers for delivery of material from our suppliers and delivery of our finished products to our customers. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

Our success depends on the smooth supply and transportation of material from our supplier to our warehouse & processing unit and from our warehouse & processing unit to our customers both of which are subject to various uncertainties and risks. In addition, products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of our products to our customers in an efficient and reliable

manner could have a material and adverse effect on our business, financial condition and results of operations. For further details of our business, please refer chapter titled ***“Our Business”*** beginning on Page 83 of this Draft Prospectus.

29. Any deficiency in our products could make our Company liable for customer claims, which in turn could affect our Company's results of operations.

Our Company is bound by the terms and conditions as placed before its customers. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these customers for deficiency in our products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations. For further details of our business, please refer chapter titled ***“Our Business”*** beginning on Page 83 of this Draft Prospectus.

30. Our company in some cases manufacture its product through job work from third party which is expose to risk of quality and durability of our Products.

Our company in some cases manufacture its product through job work from third party. There is possibility that our company may face rejection of product on several occasions which exposes us to risk of additional losses. We may not be able to deliver the requisite quality of products to the customers which in turn would affect the credibility, profitability and cash flows of our company.

31. Activities involving our manufacturing process can be dangerous and can cause injury to people or property in certain circumstances.

A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, revenue and ability to meet customer demand. Our business involves manufacturing processes that can be potentially dangerous to our employees. An accident may result in loss of life, destruction of property or equipment, manufacturing, or delivery delays, or may lead to suspension of our operations and / or imposition of liabilities. While we believe we may maintain adequate insurance, interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations and prospects. Any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations and prospects.

32. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory for work purpose and stocks of finished products. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the demand and requirements and also on the customer specifications. In addition, disruptions to the delivery of products to our warehouse or customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

33. We face intense competition in our businesses, which may limit our growth and prospects. Our Company faces significant competition from other companies in Packaging Industry.

We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;

- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

34. Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

35. Our Company has a negative cash flow in its operating activities and Investing activities in the year 2021, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(₹ in lakh)

Particulars	For the stub period ended November 18, 2021
Net Cash used in Operating Activities	(218.75)
Net Cash used in Investing Activities	(21.91)
Net Cash from Financing Activities	241.50
Net Increase / (Decrease) in Cash & Cash Equivalents	0.84

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

36. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

37. Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant amount of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

38. Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.

We may also face cyber threats such as: (i) Phishing and Trojans - targeting our customers, wherein fraudsters send unsolicited codes or mails to our customers seeking account sensitive information or to infect customer machines to search and attempt ex-filtration of account sensitive information; (ii) Hacking – wherein attackers seek to hack into our infrastructure with the primary intention of causing reputational damage to us by disrupting services; (iii) Data theft – This can be internal i.e. by someone who has access to data of our Company or external wherein unconnected cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and (iv) Advanced persistent threat – a network attack in which an unauthorized person gains access to our network and remains undetected for a long period of time. In the event of a significant decline in the demand for our products, our business, results of operations and financial condition may be materially and adversely affected.

Our systems are potentially vulnerable to data security breaches, whether by our employees, or our service providers or others that may expose sensitive data to unauthorized persons. We process and transfer data, including personal information, financial information and other confidential data provided to us by our clients. Although we maintain systems and procedures to prevent unauthorized access and other security breaches, it is possible that unauthorized individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of our clients' investors or our employees. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and reputation.

39. The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

40. Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

41. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.

Our Promoters’ average cost of acquisition of Equity Shares in our Company is lower than the Issue Price as decided by the Company in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “*Capital Structure*” beginning on page 52 of this Draft Prospectus.

42. We have entered into related party transactions in the past and may continue to do so in the future.

Our Company has entered into various transactions with our Promoters. While we believe that all such transactions are conducted on arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “*Related Party Transactions*” beginning on page 127 of the Draft Prospectus.

43. Underutilization of capacity of our facility may adversely affect our business, results of operations and financial conditions.

We cannot assure that we shall be able to utilize our facility to their full capacity or up to an optimum capacity, and non-utilization of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition. Even use of the proposed production capacity is subject to several variables like availability of raw material, power, water, proper working of machinery, orders on hand, supply / demand, manpower, etc.

44. Our top 5 and top 10 customers contribute major portion of our revenues for the period November 18, 2021. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Our top five and top ten customers contribute to a substantial portion of our revenues for the year ended November 18, 2021. Any decline in our quality standards, growing competition and any change in the demand for our service by these customers may adversely affect our ability to retain them. We believe we have maintained good and long-term relationships with our customers. However, there can be no assurance that we will continue to have such long-term relationship with them, also any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

Due to COVID-19 pandemic, there may have been a temporary reduction in demand for our services and there may have been an overall slowdown in the industry. Further, such pandemic situations may also arise in the future and that could materially and adversely affect our business, financial condition and results of operations. Our growth has required and will continue to require increased investments in management personnel and systems, financial systems and controls, and office facilities. However, we cannot assure you that such investments will yield desired results and we may incur costs that we may not be able to recover. We may also be unable to hire additional qualified personnel to support the offering of a wider range of services. If we fail to manage our growth, we may experience operating inefficiencies, dissatisfaction among our client base, and lost revenue opportunities, which may adversely affect our business, results of operations and financial condition. The contribution of our top 5 and top 10 customers to our total revenue are as follows:

Particulars	Customers
Top 5 (%)	99.99%
Top 10 (%)	100.00%

45. Our Promoters and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.

Upon completion of the Issue, our Promoters and Promoter Group will own 71.70 % of the Post-Issue Equity Share capital of the Company. As a result, the Promoters and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders’ approval, including the election of directors and approval of significant corporate transactions. The Promoters and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoters’ shareholding, please refer chapter titled “*Capital Structure*” beginning on Page No. 52 of this Draft Prospectus.

46. We are dependent on a number of Key Managerial Personnel and our senior management, and the loss of, or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.

Our performance depends largely on the efforts, expertise and abilities of our Key Managerial Personnel, senior management, and our operational personnel who possess significant experience in the industry in which we operate. We believe that the inputs and experience of our KMP and senior management, in particular, and other key personnel are valuable for the development of our business, operations and the strategic directions taken by our Company. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. Moreover, we may be required to substantially increase the number of our qualified personnel in connection with any future growth plans, and we may face difficulty in doing so due to the intense competition in the technology industry for such personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past in order to remain competitive in retaining.

Further, the COVID -19 pandemic has dynamically altered the approach on workplace hygiene and safety and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees' contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the well-being of our employees.

47. Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

48. Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.

In the event, our client's default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

49. The shortage or non-availability of power facilities may adversely affect our business processes and have an adverse impact on our results of operations and financial condition.

Our business processes require substantial amount of power facilities. We do not have arrangements for alternative / independent sources of power supply as of now. We are mainly dependent on local electricity service provider for meeting our electricity requirements, there may be factors beyond our control affecting the supply of power. Any power failure may lead to increased costs, thereby affecting the profitability.

50. Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

51. There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled “*Objects of the Issue*” on page 61 of this Draft Prospectus.

52. Guarantees from Promoters & Director as well as others have been taken in relation to the debt facilities provided to us.

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee / s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee / s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 162 of this Draft Prospectus.

53. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 162 of this Draft Prospectus.

54. Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

55. Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

56. Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, and formulation of a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or are not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance.

For further information, see the chapter titled “*Statement of Financial Indebtedness*” on page 162 of the Draft Prospectus.

57. Some of the KMPs is associated with our company for less than one year.

Our Key Management Personnel, Company Secretary is associated with the Company for a period of less than one year therefore they may not have been accustomed to the company affairs till date. For details of Key Management Personnel and their appointment, please refer to chapter “*Our Management*” beginning on page 103 of this Draft Prospectus.

58. There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

59. Excessive reliance on our information technology systems and their failure could harm our relationship with customers, expose us to lawsuits or administrative sanctions or otherwise adversely affect our provision of service to customers and our internal operation.

As part of our business strategy, we use high quality of information technology system to deliver our services in the best possible way. 63. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources band management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. Issue Specific Risks:

64. There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

65. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the agriculture Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

66. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

67. The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.

The Issue price of our equity Shares has been determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "***Basis for Issue Price***" beginning on the page 67 of this Draft Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue.
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

68. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

69. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

70. Malpractices by some players in the industry affect overall performance of emerging Companies

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of

the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

71. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceed ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

72. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Auditor included in this Draft Prospectus under chapter "**Financial Statements as Restated**" beginning on page 129 the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBIICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

73. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant

change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

74. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

75. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in the Draft Prospectus.

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "***Our Industry***" beginning on page 72 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

76. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

77. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

78. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

79. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

80. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

GOLBAL ECONOMY AT LARGE

The global economic recovery continues amid a resurging pandemic that poses unique policy challenges (Figure 1.1).

Figure 1.1. New Confirmed COVID-19 Deaths
(Persons, seven-day moving average)

The pandemic began resurging over the summer.

Sources: Our World in Data; and IMF staff calculations.

Note: Data as of September 22, 2021. Economy group and regional classifications are those in the *World Economic Outlook*. Other advanced economies in terms of International Organization for Standardization (ISO) country codes are AUS, CAN, CHE, CZE, DNK, GBR, HKG, ISL, ISR, JPN, KOR, MAC, NOR, NZL, SGP, SMR, SWE,

Vaccinations have proven effective at mitigating the adverse health impacts of COVID-19. However, unequal access to vaccines, vaccine hesitancy, and higher infectiousness have left many people still susceptible, providing fuel to the pandemic. The marked spread of the Delta variant and the threat of new variants that could undermine vaccine effectiveness make the future path of the pandemic highly uncertain. This has implications for the resilience of a recovery already in uncharted territory—characterized by pandemic-induced supply-demand mismatches that could worsen with a more protracted health crisis. Gaps in expected recoveries across economy groups have widened since the July forecast, for instance between advanced economies and low-income developing countries. As recoveries proceed, the risks of derailments and persistent scarring in heavily impacted economies remain so long as the pandemic continues. Meanwhile, inflation has increased markedly in the United States and some emerging market economies. As restrictions are relaxed, demand has accelerated, but supply has been slower to respond. Commodity prices have also risen significantly from their low levels of last year. Although price pressures are expected to subside in most countries in 2022, inflation prospects are highly uncertain. These increases in inflation are occurring even as employment is below pre-pandemic levels in many economies, forcing difficult choices on policymakers—particularly in some emerging market and developing economies. The chapter first discusses the global outlook and risks, before turning to policies needed to address these challenges.

Near-Term Recovery Continues while the Pandemic Resurges

GDP growth in the first half of 2021 was broadly in line with expectations. Outturns for first quarter global GDP were stronger than anticipated, reflecting continued adaptation of economic activity to the pandemic, and associated restrictions as well as ongoing policy support in many countries. Momentum, however, weakened in the second quarter, weighed down by increasing infections in many emerging market and developing economies and by supply disruptions. Expenditure decompositions are consistent with input shortages contributing to weak investment in the second quarter (Figure 1.2).

Figure 1.2. Drivers of Global Growth
(Quarter-over-quarter growth contributions, percentage points)

Supply disruptions are weighing on private investment.

Sources: Haver Analytics; and IMF staff calculations.
Note: The estimate of world real GDP at the quarterly frequency is based on a sample of economies covering 79.4 percent of global economic activity in 2020. "Other" includes the sum of contributions from public consumption and a residual component, which mixes contributions from the sample's net exports to economies not covered and a statistical discrepancy.

Recent high-frequency data are mixed. They suggest that the recovery continues, but with some softening in the third quarter, even while broadening across sectors. Services production is expanding, albeit prone to setbacks (Figure 1.3).

Figure 1.3. Global Activity Indicators
(Three-month moving average, annualized percent change for industrial production; deviations from 50 for PMIs)

Higher-frequency indicators point to softening momentum.

Note: PMI above 50 indicates expansion while below 50 indicates contraction. PMIs = purchasing managers' indexes.

Vaccine access remains the principal driver of fault lines in the global recovery, reinforced by the resurgence of the pandemic. Many advanced economies have seen remarkable progress in vaccinations since the April 2021 WEO. By contrast, most emerging market and developing economies have had a much slower rollout, hampered by lack of supply and export restrictions. • Advanced economies have achieved broad availability of vaccines, with hesitancy (rather than inadequate supply) being the main constraint on further gains. About 58 percent of the population in advanced economies has been fully vaccinated (Figure 1.4).

Figure 1.4. The Great Vaccination Divide
(Percent of population)

Progress in vaccinations against COVID-19 remains highly unequal across the world.

Sources: Our World in Data; and IMF staff calculations.

Note: Data as of September 22, 2021. “Fully vaccinated” are people who received all the doses prescribed for a full vaccination cycle (typically two, but one for Johnson&Johnson and CanSino). In a few cases, the recorded one-dose numbers are smaller than “fully vaccinated” numbers because of reporting lags. For these cases, we make a minimal consistency adjustment, setting one-dose numbers equal to “fully vaccinated” numbers.

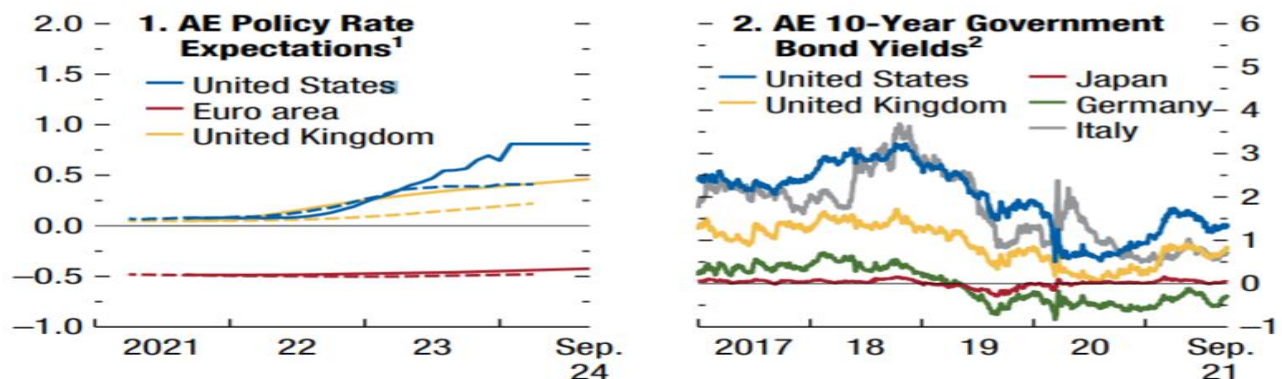

By contrast, the rest of the world has starkly lower shares of population that are fully vaccinated against COVID-19, at about 36 percent in emerging market economies and less than 5 percent in low-income developing countries. In these economies, vaccine supply and distribution remain the primary constraints. The forecast assumes that some emerging market economies will join advanced economies in gaining broad vaccine access in 2021. Most countries are assumed to acquire broad access by the end of 2022 and some only in 2023. However, it seems likely that vaccinations alone will not be able to completely stamp out SARS-CoV-2 transmission, even though they remain effective against the most adverse health effects of the pandemic (severe illness and death). As a result, hospitalizations and deaths are expected to be brought to low levels everywhere by the end of 2022 through a combination of improved access to vaccines and therapies, combined with more highly targeted and effective precautions. Some countries may be able to reduce adverse public health outcomes sooner than others, depending on country-specific circumstances. The projections are tempered by the possibility of renewed outbreaks, particularly before vaccines become widely available. So long as the enormous differences in vaccine access persist, the inequalities in health and economic outcomes will increase, driving further divergences across two blocs of countries: those that can look forward to further normalization later this year (almost all advanced economies); and those that will struggle with the adverse health and economic impacts from resurgent infections. The pressure for booster shots in countries with already-high rates of vaccination could further delay access in others still at early stages of getting first jabs into arms. The continuing wide circulation of the virus, particularly within countries and populations where vaccination rates are low, poses threats to health and economic recoveries everywhere. The World Health Organization is warning that more transmissible and deadly variants—which could escape protection from existing vaccines—are likely to evolve so long as a substantial share of the world population remains unprotected.

The forecast is predicated on financial conditions remaining supportive.

Financial market sentiment has largely stayed attuned to the policy outlook as the recovery has proceeded (see the October 2021 Global Financial Stability Report and Figure 1.6).

Figure 1.6. Monetary and Financial Conditions
(Percent, unless noted otherwise)

Financial conditions are supportive and attuned to the recovery.

However, the high uncertainty around the conjuncture has also led to heightened sensitivity to any news, in particular about inflation prospects in advanced economies. The first quarter of 2021 and a brief period in June saw a bout of financial market volatility, with investors repositioning portfolio holdings as they reassessed the outlook for US inflation and monetary policy. Concerns about the spread of the Delta variant and associated implications for the recovery have also sparked episodes of volatility. Even so, the overall picture is still one of broadly supportive financial conditions. Equity markets are buoyant, credit spreads remain tight, and net flows to emerging market economies have hitherto been broadly stable (particularly into hard currency bond funds). The global growth forecast is predicated on this support continuing. Growth revisions: Vaccine rollout, policy support, and continued supportive financial conditions constitute the key considerations for the forecasts summarized in Table 1.1. • Advanced economies: Growth prospects for 2021 are revised down compared to the July forecast, largely reflecting downgrades to the United States (due to large inventory drawdowns in the second quarter, in part reflecting supply disruptions, and softening consumption in the third quarter); Germany (in part because of shortages of key inputs weighing on manufacturing output); and Japan (reflecting the effect of the fourth State of Emergency from July to September as infections hit a record level in the current wave). The US outlook incorporates the infrastructure bill recently passed by the Senate and anticipated legislation to strengthen the social safety net, equivalent to about \$4 trillion in spending over the next 10 years. The baseline also includes expected Next Generation European Union (EU) grants and loans for EU economies. Across advanced economies, an anticipated stronger rebound in the first half of next year, as vaccination proceeds, yields an upward revision to the growth forecast for 2022. • Emerging market and developing economies: The forecast for the group is marked up slightly compared to the July 2021. In May 2021, the Government of India has allocated Rs. 2,250 crore (US\$ 306.80 million) for development of the horticulture sector in 2021-22. In November 2020, the Government of India announced Rs. 2.65 lakh crore (US\$ 36 billion) stimulus package to generate job opportunities and provide liquidity support to various sectors such as tourism,

aviation, construction and housing. Also, India's cabinet approved the production-linked incentives (PLI) scheme to provide ~Rs. 2 trillion (US\$ 27 billion) over five years to create jobs and boost production in the country.

Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Some of the recent initiatives and developments undertaken by the Government are listed below:

- By November 1, 2021, India and the United Kingdom hope to begin negotiations on a free trade agreement. The proposed FTA between these two countries is likely to unlock business opportunities and generate jobs. Both sides have renewed their commitment to boost trade in a manner that benefits all.
- In August 2021, NITI Aayog and Cisco collaborated to encourage women's entrepreneurship in India.

Road Ahead

As per the data published in a Department of Economic Affairs report, in the first quarter of FY22, India's output recorded a 20.1% YoY growth, recovering >90% of the pre-pandemic output in the first quarter of FY20. India's real gross value added (GVA) also recorded an 18.8% YoY increase in the first quarter of FY22, posting a recovery of >92% of its corresponding pre-pandemic level (in the first quarter of FY20). Also, in FY21, India recorded a current account surplus at 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates of July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with government's budget support to states, strengthened the overall growth of the Indian economy. India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from to 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030. India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

(Note: Conversion rate used for September 2021 is Rs. 1 = US\$ 0.014)

INDIAN PACKAGING INDUSTRY

Over the past 8 to 10 years, India has achieved tremendous growth in terms of industrialization and globalization. The inherent result of which, there has been tremendous demand of modern technologies and upgradation of quality of packaging and in general, the quality of life. India has achieved huge rise in food production brought about by the Green Revolution. Food industry offers what is unquestionable, one of the largest opportunities for growth in India today. The industry will play a vital and positive role in the Indian economy. To reach such phenomenal growth, it is quite evident that the processing and preservation technology of food products has to keep pace with the growth. Hence, it is expected that the modern technology of flexible packaging like Aseptic Packaging, Barrier Packaging, Controlled Atmospheric Packaging will make big inroads in India.

Before we look into the present scenario of market, it would like to focus on the growth of packaging business and also would like to spend a few minutes to explain what is view of the definition of packaging and the philosophy believe we should adopt in order to successfully establish packaging technology in India. From ancient times, the practice of, which is today called 'PACKAGING', has been a vital technology of mankind. It is unquestionable that packaging has greatly contributed to culture and to society and that it continues to do so today in the age when the distribution of product has become an extremely important subject. Packaging can be said even to be "A face, which expresses the culture of a particular country". By this statement what mean is that the packaging invented by a certain people illustrates the special characteristics of that culture. It is therefore, necessary for those engaged in packaging, package development and distribution, especially for food packaging, to make themselves aware of people's thought regarding life as well as that people's behaviour patterns and to have deep understanding of the culture on which the behaviour is based. Food packaging is directly connected with the dietary habits of each culture and dietary habits are a key part of each culture. Understanding these habits is crucial for success in food packaging business. During pre-historic era, people hunted for food and soon they realized that they could keep their food longer if they protected it. Therefore, they made pockets out of large leaves and animal skin and kept water in containers made out of coconut shells and dried skins of vegetables, and eventually in bags and jars made out of leather. Plastics began to be used in one way or the other since around 1946 when Earl Silas Tupper began to produce and sell Tupperware - an airtight plastic container to homes. Inventions of Plasticising PVC in 1926, PVDC in 1933, LDPE in 1935, PET in 1941, HDPE and PP in 1951 were the events leading to rapid and wide spread of plastics packaging. Film Extrusion began in the late 1940s - 1950s and that opened up a huge opportunity for packaging sector by creating a whole new industry when packaging was largely done with paper, glass, metal and occasionally wood and leather. Gradually, plastic packaging came into existence and began to increase market share to take care of consumer goods, medicine and food. F&J Heinz brought packaging into Ketchup in 1876, Heinz introduced 57 food products in the market and packaging took off. Today, virtually everything we use needs packaging.

Potential

The growth in the flexible packaging industry in India is mainly driven by the food and the pharmaceutical packaging sectors. The large and growing Indian middle class, along with the growth in organised retailing in the country are fuelling growth in the flexible packaging industry. Another factor, which has provided substantial stimulus to the packaging industry is the rapid growth of exports, which requires superior packaging standards for the international market. The

Indian packaging industry is dominated by plastic flexible packaging. The traditional rigid packaging users have also been seen to shift to flexible packaging in recent times. According to industry sources, the main reason for this is that flexible packages are found aesthetically attractive, cost-effective and sturdy. Consumer preference for the use of convenient packaging and packaged products in affordable quantities in laminates is also one of the main reasons that have contributed to the growth of flexible packaging in India. The food-processing sector is the largest user of flexible packaging, accounting for more than 50% of the total demand. The flexible packaging segment is estimated to be growing at over 35% annually.

The Indian packaging industry is currently \$18.8 billion with a growth rate of above 12.36% per annum - more than twice the global average while our GDP growth was 6-8%. Not only is the industry growing rapidly but it is also creating lucrative jobs for those who find a career in it. The packaging industry is expected to grow at 18-20% and is expected to reach \$43.7 billion by 2022. India's per capita consumption of packaging is only 4.3 kg per person per annum, as against Germany's 42 kg and China's 20 kg, which is very low compared to global standards. The packaging industry was growing at 12% per annum in India as against the global growth rate of 5%. There are roughly 22,000 packaging companies in the country covering from raw material manufacturers to machinery suppliers to ancillary material and nearly 85% of them are MSMEs. Flexible packaging demand in 2017 is estimated at \$5.6 billion (~ Rs. 35,000 Crore). This represents about 30% of the total packaging in the country. At an estimated growth rate for this segment in the region of about 18% (estimates vary from 12 to 24%) the turnover achieved in 2022 should be in the region of \$ 11-12 billion.

Laminated products including form-fill-seal pouches, laminated tubes and Tetra packs are growing at around 30% p.a. This also represents a corresponding additional requirement of capacity in the manufacturing sector. This means that the production will need to increase nearly 100% from the current levels. Considering that there is a major capacity addition witnessed in 2017 and slated in 2018, over and above what is on the blue prints, at least 80% additional capacity will need to be generated. This is a huge challenge before the nation and a great opportunity for the players in the Flexible Packaging arena. This also opens possibilities for new entrants in the field provided they meet the changing scenario of customer needs and new challenges.

Initiatives are needed to convert the large unpacked commodities into processed, packed and well-presented commodities. India's imports at 20-25% with a value of \$125 million of its total packaging machinery indicate further opportunities not only for Indian companies to increase their share in domestic market but also for international companies to explore new business opportunities in India. The food & beverage and pharmaceutical segments occupy the largest share in the packaging industry, accounting for 85% and 10%, respectively. The plastic packaging market is expanding rapidly registering a growth of 20-25% per annum and is valued at 6.8 million tonnes while the paper packaging industry stands at 7.6 million tonnes. The packaging industry is poised to grow rapidly led by the increasing use of innovative packaging equipment and the rising volumes in flexible packaging market. So, it can easily be concluded that the future is bright for flexible packaging in India for this decade.

Flexible packaging market size to exceed USD 325.6 billion by 2030

The food and beverages aisle in the supermarkets is filled with a variety of packaging structures including cartons of milk, square boxes of cereal, glass jars of peanut butter, and bags of chips. These packaging techniques have been popular for years, but things are slowly changing in the packaging industry all thanks to the advent of flexible packaging.

According to Allied Market Research, the global flexible packaging market is expected to reach USD325.6 billion by 2030 growing at a CAGR of 6.2% from 2021 to 2030. A flexible packaging overviews. The ease of use, resealable structure, and convenient shape of flexible packaging are what lured customers in the beginning. However, its low impact on the environment and introduction of greener, sustainable flexible packaging gained traction compared to conventional cartons and boxes. How did flexible packaging gain importance? Although square cartons of milk have satisfied consumers for many years, flexible packaging has offered several benefits to disrupt the packaging industry, especially in the food department. The advent of new materials and the introduction of a wide range of new design concepts to reduce waste gained a huge consumer base. In addition, flexible packaging proved to maintain the freshness of products within.

According to Allied Market Research, the global flexible packaging market is expected to reach USD325.6 billion by 2030, growing at a CAGR of 6.2% from 2021 to 2030. Cost-effectiveness and rise in product shelf-life and an increase in demand from the food & beverage end-use industries coupled with a surge in e-commerce sales are the prime factors that drive the market growth.

Extending the shelf life of food and keeping the product fresh, especially meat appealed to a lot of customers in the food retail industry. Several major companies in the flexible packaging industry launched new materials and packaging designs that can support product freshness. This changed the customer's perception of flexible packaging.

WHY CHOOSE FLEXIBLE PACKAGING?

Convenience and portability

Today's fast-paced lifestyle demands food packages that offer portability and convenience. Easy to the user and easy to eat products increase the overall sale of the product, which is the major driver of the flexible packaging industry. Studies show that customers are more inclined toward using easy to open, store packages. In addition, some food companies add reseals and child-resistance flexible packaging for supplements and cosmetics.

On the other hand, the lightweight nature of flexible packaging makes it more convenient to handle and a perfect fit for on-the-go consumption compared to traditional packaging methods.

Storage and transportation

The lightweight nature of flexible packaging makes them ideal for long-distance transportation and helps in reducing the storage spaces while shipping. The transport companies often prefer shipping such packaging as it demands less gas consumption. On the other hand, in grocery stores, storage spaces impact the sale of the product and stand-up pouches demand less space, which encourages brands to switch to flexible packaging.

Additional shelf life

It is undeniable that plastic consumption and waste is one chronic problem for the environment. However, while looking at plastic consumption, the issue of food wastage is overlooked. On the other hand, plastic flexible packaging helps the environment as it leaves a lesser carbon footprint than other conventional alternatives. Moreover, flexible packaging extends the life of perishable products due to its high-barrier films and airtight seals. This method prevents moisture accumulation and prolongs the shelf life of the good, which ultimately keeps the food away from ending up in a landfill. Customers can re-seal their remaining content and maintain the integrity and freshness for a longer duration.

Flexibility in design

One of the most important aspects of the food retail industry is attractive packaging design. Flexible packaging offers the use of bright, eye-catching colours and graphics, which encourages 360-degree branding. This helps the brands to stand out in the supermarkets or grocery stores. Moreover, it helps in redefining the image of the brand.

Appeal for green, eco-friendly flexible packaging

Flexible packaging gained popularity due to several environmental advantages compared to other packaging types. With flexible packaging, brands can save packaging costs and reduce the overall use of material waste. Moreover, with the advancements in technologies, flexible packaging is more concerned about environmental impact. Recently, UFlex, India's largest multinational flexible packaging material and solution company, and other companies including Hoffer Plastic and Mespack collaborated to develop a recyclable solution for flexible hot pouches. The collaboration was aimed to address the issues with the full recyclability of hot-fill pouches for ready-to-eat foods. The companies launched new Recycle Ready Single Material PP-based flexible packaging that integrated OPP and CPP layered structures that offer improved barrier properties, longer shelf life, and heat seal-ability for unrefrigerated food storage. Similarly, ProAmpac, the leading company in the flexible packaging industry announced the launch of R-2000D, a new addition to polyethylene-based structures. The R-2000D offers a high barrier to extend the shelf-life of dry products and it has been tested for polyethylene store-drop-off recycling. Apart from this, several recent product launches in the flexible packaging industry have showcased eco-friendly options. Bobst, a leading company in the packaging industry, has launched Generation 2.0 samples for high barrier flexible packaging solutions that are specially developed for recyclability. Bobst and its partners have been working on packaging structures to replace non-recyclable high barrier multi-material structures with mono-material alternatives. The environmental benefits of flexible packaging are linked to financial advantages due to less use of plastic materials, lower weight in the supply chain. These financial benefits have promoted recyclability and eco-friendliness of flexible packaging.

Sustainability in flexible packaging

Over the last few years, more and more brands are moving toward sustainable packaging to meet consumer demand and stay ahead of the governmental regulations to be more environmentally conscious and reduce single-use plastic in packaging. Stand-up pouches are the most popular and fast-growing format in the flexible packaging market. They are not just convenient for customers but they require less energy to produce and leave a lower carbon footprint. Having PET facestocks on labels, these stand-up pouches enable fewer packaging components than the conventional methods and involve less labour to package a product. This is extremely beneficial for brands to tap into sustainability marketing as

these packages involve no plastic bottles, lids, or seals. Stand-up pouches are easy to print intriguing lines and designs to attract customers and offer a fine-finished look on the shelf at a relatively lower cost.

The advent of digital printing

This is the era of digital printing and conventional packaging methods struggle to adapt to this trend. Shorter runs, customisation, and greater sustainability are the major benefits of digital printing that help packages to stand out from other brands. Digital printing offers consumer goods brands the edge to execute high-impact graphics for shelf appeal and maximum branding. As customers are constantly looking for something new and better experiences, digital printing offers customisation on a whole new level. Whether the package is small or large, digital printing offers unique and personalised packaging which is what the packaging industry has been lacking. The advancements in printing methods, the evolution of material science, and developments in machinery open new opportunities in digital printing to satisfy customer demands. As flexible packaging is truly about functionality, digital printing is the next big thing in the industry.

Major trends in the flexible packaging industry

The packaging industry is one of the major consumers of single-use plastic. Thus, the pressure for pushing for less single-use plastic drives the flexible packaging industry. Both packaging value chain players and customers aim to reduce plastic waste. Before the Covid-19 pandemic, plastic de-selection was implemented at several retailers across the world, especially in Europe. The market growth of e-commerce since the Covid-19 outbreak is baffling. With the growth of e-commerce, the need for convenience has shaped new expectations in B2B and B2C industries. These e-commerce packages demand better impact and puncture resistance as they are handled by more people. Especially in the fresh meat packaging, a small leak could hamper the quality of e-grocery deliveries. Careless handling and poor packaging material could hamper the brand and create dissatisfaction among consumers. All these issues can be solved with the use of innovative materials in flexible packaging. The pressure to develop eco-friendly and sustainable packaging will continue to drive innovation in the flexible packaging industry. Several companies have already collaborated to harness the power of eco-friendly and puncture-resistant materials that offer increased shelf life and sustainability to meet customer expectations regarding packaging. The barrier properties of flexible packaging are under inspection over the last few years. As these barriers offer better contamination protection while using fewer materials, their applications and investment in R&D have increased. On the other hand, adhesives are other aspects that became popular in flexible packaging. From general-purpose sealing to dual oven-friendly lidding, adhesives offer improvements in containing liquid products and help brands meet customer demands. In the future, the flexible packaging industry would be driven by convenience, functionality, and sustainability. The variations and new technological innovations in these trends gain traction and help customers to access fresh, untampered products.

“In coming years, the Indian packaging industry will see substantial growth. The increasing awareness regarding clean water, safe food, and pharmaceuticals along with adoption of next gen digital technologies will aggressively penetrate and drive the Indian packaging industry” - Thomas Schneider, President of the World Packaging Organisation (WPO). Globally, the packaging industry sector has positioned itself as one of the fastest growing industry across all countries. The industry is worth over \$ 917 billion (in 2019), growing at CAGR 2.8% to reach to \$ 1.05 trillion by 2024. Packaging is an emerging science, an emerging engineering discipline, and a successful contributor to major industries such as pharmaceutical, FMCG and electronics. Packaging is the world’s third largest industry following the food industry (1st) and energy (2nd) and the only industry that has to do with every single product produced in an economy.

In India’s case, packaging is the fifth largest sector in its economy and is one of the highest growth sectors in the country. According to the Packaging Industry Association of India (PIAI), the sector is growing at CAGR 22% to 25%. Over the last few years, packaging industry has been an important sector driving technology and innovation growth in the country and adding value to the various manufacturing sectors including agriculture and FMCG segments. According to the Indian Institute of Packaging (IIP), the packaging consumption in India has increased 200% in the past decade, rising from 4.3 kg per person per annum (pppa) to 8.6 kg pppa as on FY20. Even with this steep rise in the last decade, there is significant headroom for growth in this sector when compared to other developed regions across the globe as seen in the following graph.

This rise in consumption is driven by key aspects of the rising Indian economy namely, strong favourable demographics, increasing disposable income levels, rising consumer awareness and demand for processed food. The growth of individual end user segments of food, beverages, FMCG and pharmaceuticals will trickle down into rising demand of packaging solutions. The current consumption of packaging materials by end user industries is as follows:

A bright future awaits Indian packaging industry

In the coming decade, India will focus on transitioning this industry towards sustainability and smart solutions. The implementation of single use plastic ban policy along with a focus on recycling and biodegradability will bring about a major transformation in this sector. Currently, Indian packaging industry consumes more polymers compared to the global average. This indicates a major dependence of the industry on upstream feedstock production (ethylene, propylene, styrene, etc). In fact, India currently imports nearly 1.7 MTPA of polyethylene (PE) in addition to utilizing around 73% of its domestic ethylene production towards PE. A major portion of this demand for PE is generated by the Indian packaging sector.

This creates a unique opportunity for India to drive this industry towards sustainability, bio-based / paper-based packaging and in effect reduce the import bill and divert the valuable domestic ethylene production towards import substitution of other crucial chemicals / polymers like methyl ethyl ketone, PVC and ethylene oxide. The packaging sector has a much wider exposure to other sectors of our economy. The growth of these sectors in the coming decade will have a combined effect to take this sector to new heights. Government of India recognised the potential of this sector and released a slew of policies like the single use plastic ban policy, profit linked tax incentive for food packaging, adoption of National Packaging Initiative, to further incentivise innovation in this sector. As a result, there are numerous champions which have come up to the task and have posted significant profits in the last 5 years. There has also been a rise in material technology research-based Startups to create new sustainable packaging materials.

With this growing awareness and governmental push, the research on eco-friendly and sustainable packaging is steadily on the rise in the country. Sustainability has become a key focus area of many of the packaging solutions manufacturers. Globally, Storopack has a new material called rEPS, made from 100% recycled EPS (Expanded Poly Styrene) providing an attractive solution for companies who wish to use environment friendly packages. In India, the corrugated boxes are becoming popular across industries over polymer-based alternatives such as (EPS) foams. Also, the rise of startups like Greendiamz Biotech and Envigreen are tackling different problems across the supply chain of packaging materials to ensure a sustainable and environment friendly growth of this industry in the coming years.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Up to 100% foreign investment under the automatic route is currently permitted in the sector of “Manufacturing”, which includes manufacture of cement and concrete products.
