SUMMARY OF OUR INDUSTRY

The immense potential of Drones has led to their increasing adoption in India, too. Though both the industry and the market in India are at a very nascent stage at the moment, there is immense growth potential for both. A major thrust will be given by the willingness of the present Indian government to use Drones for a variety of purposes, including crop mapping and surveillance of infrastructure projects, pushing the projected value of the domestic industry to approximately US\$421 million in 2021. According to research, the Indian Unmanned Aircraft Vehicle (UAV) market is projected to grow at a CAGR of 18% during 2017-23.

The UAV sector holds tremendous opportunities and if unleashed, has the potential to transform many of the sectors and could contribute 4-5% to India’s GDP, due to multiplier effect. Since 2001, approximately 38 companies have applied for industrial license to manufacture UAVs in India. Furthermore, more than 50 start-ups have started providing services in this new industry. The global market is witnessing a boom despite several concerns relating to its potential use as a weapon, proprietary and privacy infringement. The future holds many new avenues for the use of UAVs as they are expected to replace 80% of operations presently carried out by manned aircraft. As per NITI Aayog estimates, the Indian market for UAV will be \$50 billion over the next 15 years.

In its push to the Make-in-India drive, the government is going all out to support domestic enterprises by tweaking its policies and regulations so that more and more products are manufactured within the country.

One such sector which is getting a lot of support and thrust from the government is the manufacturing of Drones or unmanned aerial vehicles (UAV).

From its applications in agriculture, defence, law enforcement, surveillance and disaster management, delivery services, worksite efficiency, private occasions and so on, the possibilities for the use of Drones are endless. With the government showing its clear intent to make India a global hub for manufacturing of Drones by 2030, the prospects for the growth of this sector are immensely strong.

According to a Civil Aviation Ministry estimate, India’s Drone sector will achieve a turnover of Rs 12,000-15,000 crore by 2026, from about Rs 80 crore now.

As on June 30, 2022, we have 40 employees. We are dependent on significant number of our employees who are skilled engineers and due to the limited pool of available skilled personnel, we face strong difficulty in recruiting and retaining skilled and professionally qualified trainers and staffs. Our continued future success also depends upon our ability to recruit and retain a large group of experienced professional trainers and staff. The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of experienced personnel could have a material adverse effect on our operations and profitability. Our ability to retain experienced staff members as well as senior management will in part depend on our maintaining appropriate staff remuneration and incentive schemes in accordance with then prevailing private sector industry standards. We cannot assure you that the remuneration and incentive schemes we have in place will be sufficient to retain the services of our senior management and skilled employees.

- 7. Our ability to remain competitive may be adversely affected by rapid technological changes and our ability to access such technology.**

Further, advances in technologies or alternative technologies, could have a negative effect on our business. Other competitor companies may have greater financial strength to adopt new growing technological trends ahead of us. In order to remain competitive, we could be required to upgrade our technology, and any failure to do so could have a material adverse effect on our business, prospects, financial condition and results of operations.

- 8. Intensified competition may restrict our ability to access content and/or talent.**

We face intense competition from both Indian and foreign competitors, many of which are substantially larger and have greater financial resources than us. Growth in Drone industry in recent years has attracted new industry participants and competitors. The entry of such competitors may change the Drone industry in ways that may not favour us. Domestic competitors of a scale similar to or greater than our own may impact our ability to attract technical talent, which could have a material adverse effect on our business, prospects, financial condition and results of operations.

- 9. In execution of our projects, we collect information and data which are highly sensitive with regard to maintenance of secrecy of the projects and its data and information. Any failure on our part to maintain secrecy of our projects, will have an adverse effect on our results of operations and financial condition.**

We provide our services to Indian army, aerial photography and video recording, surveying and documenting public service missions. We have put in place firewall, security systems and procedures to protect the projects and its contents. Piracy of project content, its information, data including internet piracy, may decrease revenue from the exploitation of our projects. There was no incident of breach of our firewall, security systems and procedures in the past. However, there is no assurance that such breach will not occur in future also. Any failure on our part to maintain secrecy of our projects, will have an adverse effect on our results of operations and financial condition.

- 10. We depend on our relationships with our clients and other industry participants to source projects.**

We generate projects through our relationship with government bodies and private institutions and other industry participants. Our failure to maintain these relationships, or to establish and capitalise on new relationships, could harm our business or prevent our business from growing, which could have a material adverse effect on our business, prospects, financial condition

and results of operations.

11. *We have substantial working capital requirements and may require additional financing to meet working capital requirements in the future. A failure in obtaining such additional financing at all or on terms favourable to us could have an adverse effect on our results of operations and financial condition.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards employee cost. As on June 30, 2022, we have nil outstanding of unsecured loan and the amount of working capital is funded from owned fund. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high inventories and outstanding amount due from our debtors which may adversely affect our cash flows and our business operations.

For further details regarding working capital requirement, please refer to the section —Objects of the Issue beginning on page 81.

12. *We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.*

Our success heavily depends upon the continued services of our Key Managerial Personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Personnel for executing our day to day activities. The loss of any of our Promoters and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnel, please refer to chapter —Our Management beginning on page 136.

13. *If we are unable to attract new clients or our existing clients do not renew their contract, the growth of our business and cash flows will be adversely affected.*

Our top ten (10) clients contributed approximately 87.99% of our revenue from operations based on Restated Financial Statements for the period ended June 30, 2022. To increase our revenue and cash flows, we must regularly add new clients. If we are unable to generate sufficient sales leads through our marketing programs, or if our existing or new clients do not perceive our services to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. In addition, our existing clients have no obligation to repeat contracts / award new projects to us due to various factors including clients' satisfaction with our services, collection of data and information as desired by our clients, our prices and the prices of competing service providers. If we fail to achieve repetitive projects from existing clients or to add new clients, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

14. *If we are unable to attract new students for our Remote Pilot Training Organisation (RPTO), the growth of our business and cash flows will be adversely affected.*

Upto June 30, 2022, we have imparted DGCA approved training and upon completion of training issued DGCA approved license to 27 Students, 8 Organizations like Genesys International Corporations Limited, Agribook Tech Solutions and Allied Services Pvt Limited, Graceland New Media LLP, Visual Upriser Pvt Limited and it contributes ~10% of our revenue from operations based on Restated Financial Statements for the period ended June 30, 2022. To increase our revenue and cash flows from training, we must regularly add new students and organizations. If we are unable to add sufficient students and organizations through our marketing programs, or if our students do not perceive our trainings to be of sufficiently high value and quality, we may not be able to increase revenue form training, our operating results would be adversely affected. If we fail to achieve our target students and organizations, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

15. *We may not be able to sustain effective implementation of our business and growth strategy.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business plan but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

16. *Our Promoters, Directors and Key Management Personnel have interest in our Company, other than reimbursement of expenses incurred or remuneration.*

Our Promoters, Directors and Key Management Personnel can be deemed to be interested to the extent of the Equity Shares held by them, or their relatives, dividend entitlement, or loans advanced, provided by them for our Company, and benefits deriving from the directorship in our Company. Our Promoters are interested in the transactions entered into our Company and our Promoter Group. For further information, please refer to the chapters/section titled —Our Business, —Our Promoters and Promoter Group and —Financial information of the Company-Related Party Transactions”, beginning on pages 102, 148 and 152 respectively.

17. *There may be potential conflicts of interest if our Promoters or Directors get involved in any business activities that compete with or are in the same line of activity as our business operations.*

At present none of our Promoter are engaged in any other business having object similar to the line of business of our Company. However, there can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

18. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule*

The proposed fund requirement for our expansion plan, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled —Objects of the Issue beginning on page 81.

19. *Lockdown and suspension of commercial operations will affect the growth of our business and cash flows.*

We are operating in an industry which requires on field execution operations for completion of projects. Further, for execution of our projects, we require highly sophisticated Unmanned Aerial Vehicle (UAV) and trained professional. Our projects execution is not possible if work from home is allowed to our workforce. Further, the use of our UAV by the workforce working from home is not possible. Thus, lockdown and suspension of commercial operations due to any reason, including pandemic, will affect the growth of our business and results of our operations.

20. *If we are unable to maintain and enhance our brand and reputation, the sales of our products may suffer which would have a material adverse effect on our business operations.*

Our business depends significantly on the strength of our brand and reputation in marketing and selling our products. We also

believe that maintaining and enhancing the “” brand, are critical to maintaining and expanding our customer base. We believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, product defects, consumer complaints, or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding and marketing initiatives and adversely affect our business and prospects. In addition, adverse publicity about any regulatory or legal action against us could damage our reputation and brand image, undermine our consumers’ confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or immaterial to our operations.

21. *The average cost of acquisition of Equity Shares by our Promoters, is lower than the face value of Equity Share.*

At present none of our Promoter are engaged in any other business having object similar to the line of business of our Company. However, there can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

22. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Issue which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoters and Promoter Group will collectively own 28.21% of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of

influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

23. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

At present, our company has taken insurance policies as given in chapter “Our Business” beginning on page no. 102, for our assets including properties, UAV and equipment. Any risk of damage may be controlled, but not eliminated. We cannot assure you that there will not be any incidents which may result in liability claims or negative publicity. Although we have liability insurance cover for properties and Medclaim insurance for employees, we cannot assure you that this insurance coverage is adequate or that any losses will be adequately compensated by our insurers in the event of a product liability claim. As a result it may adversely affect our results of operations and financial Conditions.

24. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the issue price.*

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price of the shares proposed to be offered through this Draft Red Herring Prospectus. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer to page no. 148 of this Draft Red Herring Prospectus.

25. *We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.*

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer “Dividend Policy” on page 152 of this Draft Red Herring Prospectus.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company has entered presently and may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see “Dividend Policy” on page no 153 of this Draft Red Herring Prospectus.

26. *In case of any inability arise to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our sales channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or marketing agents will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future to use will be successful under various market conditions.

27. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “Basis for Issue Price” beginning on page 85. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

- 28. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.***

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 81 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

- 29. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 30. *The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

- 31. *We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.***

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of Operations and cash flows. For further details of our business and clients, please refer chapter titled “Our Business” and “Management Discussion & Analysis Conditions and Result of Operation” beginning on page 102 & 198 of this Draft Red Herring Prospectus.

- 32. *Our growth will depend on our ability to build our brand and failure to do so will negatively impact our ability to effectively compete in this industry.***

We believe that we need to continue to build our brand, “Droneacharya”, which will be critical for achieving widespread recognition of our services. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high quality services. The brand promotion activities that we may undertake may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we are unable to promote and maintain our brand, our business, financial condition and results of operations could be adversely affected.

33. *Our operations could be adversely affected by disputes with employees.*

We believe we maintain good relationships with our workforce, there can be no assurance that the Company will not experience future disruptions to its operations due to disputes or other problems with its work force.

34. *Interest rate fluctuations may adversely affect the Company's business.*

The Company may enter into certain borrowing arrangements to finance its capital requirements in the ordinary course of business for general working capital purposes. In the event interest rates increase, the Company's costs of borrowing will increase, and its profitability and results of operations may be adversely affected.

35. *Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics.

Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

36. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our capacity to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business there is significant importance to find, hire, train, supervise and manage efficient employees and also to establish such process of business operations which is proficient enough to effectively achieve our growth. Instead of putting keen efforts, as mentioned here, we cannot assure that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use.

37. *Our inability to manage growth could disrupt our business and reduce profitability.*

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical reach of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

38. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months shall be subject to capital gains tax in India at 10% of such capital gain exceeding Rs. 1 lakh if Securities Transaction Tax (STT) has been paid on both acquisition and transfer of such shares. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realised on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. However, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. For more details, please refer to —Statement of Tax Benefits| beginning on

39. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. [•] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur. 41. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

42. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to our Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

43. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by book building method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 85 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

The deployment of funds as stated in the Objects of the Issue beginning on page 81 of this Draft Red Herring Prospectus is entirely at our discretion and is not subject to monitoring by any independent agency. All the figures included under the Objects of the Issue are based on our own estimates. There has been no independent appraisal of the project. We have not entered into any definitive agreements to utilize a portion of the Issue.

EXTERNAL RISK FACTORS

45. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

46. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

47. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service Tax

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

48. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

49. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.*

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data including IBEF website that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “**Industry Overview**” beginning on page 90 of this Draft Letter of Offer. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

50. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

51. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

52. *The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.*

India’s physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

53. *Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

54. *Natural calamities could have a negative impact on the Indian economy and cause our Company’s business to suffer.*

Our Country has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

55. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

GLOBAL OUTLOOK

It is two years into the COVID-19 pandemic and the global community still confronts extreme social and economic strain as the human toll rises and millions remain unemployed. Yet, even with high uncertainty about the path of the pandemic, a way out of this health and economic crisis is increasingly visible. Thanks to the ingenuity of the scientific community hundreds of millions of people are being vaccinated and this is expected to power recoveries in many countries later this year. Economies also continue to adapt to new ways of working despite reduced mobility, leading to a stronger-than-anticipated rebound across regions. Additional fiscal support in large economies, particularly the United States, has further improved the outlook.

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China’s real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022,

assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions—especially with debt levels having increased significantly in the past two years may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic will need to prioritize health and social spending while focusing support on the worst affected. In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

Downside surprises in the second half of 2021: Supply disruptions continued into the fourth quarter, hindering global manufacturing—especially in Europe and the United States. A resurgence in COVID cases (particularly in Europe) also held back a broader recovery. In China, disruptions from COVID outbreaks, interruptions to industrial production from power outages, declining real estate investment, and a faster-than-expected withdrawal of public investment all contributed to a second-half slowdown. Although there were signs of a global turnaround in November—with a pickup in international trade and upside surprises for services activity and industrial production data—this only partially offset earlier declines.

The pandemic's continued grip: Since the start of October, COVID-19 deaths have averaged about 7,000 a day worldwide, down from about 10,000 in late August. The diffusion of vaccines—although still uneven—has played a major role, with over 55 percent of people having received at least one dose. Yet the emergence of the Omicron variant in late November threatens to set back this tentative path to recovery. As of mid-January, Omicron appeared to be more transmissible than Delta, but its symptoms are perhaps less severe. The baseline forecast is conditioned on adverse health outcomes—severe illness, hospitalizations, and deaths—coming down to low levels in most countries by the end of 2022. This assumes that most countries achieve vaccination rates consistent with the IMF's pandemic proposal by end-2022, therapies become widely accessible, and the combination proves effective in protecting against Omicron and any other variants that emerge. Some emerging market and developing economies are anticipated to fall short of the vaccination target in 2022 and achieve sufficiently broad coverage only in 2023.

Global Growth Set to Moderate and Inflation to Persist Longer

Global growth is estimated at 5.9 percent in 2021 and is expected to moderate to 4.4 percent in 2022, half a percentage point lower than in the October 2021. The baseline incorporates anticipated effects of mobility restrictions, border closures, and health impacts from the spread of the Omicron variant. These vary by country depending on susceptibility of the population, the severity of mobility restrictions, the expected impact of infections on labour supply, and the importance of contact-intensive sectors. These impediments are expected to weigh on growth in the first quarter of 2022. The negative impact is expected to fade starting in the second quarter, assuming that the global surge in Omicron infections abates and the virus does not mutate into new variants that require further mobility restrictions. Forecasts are based on information up to January 18, 2022.

The 2022 forecast downgrade also reflects revisions among a few large emerging markets. In China, disruption in the housing sector has served as a prelude to a broader slowdown. With a strict zero-COVID strategy leading to recurrent mobility restrictions and deteriorating prospects for construction sector employment, private consumption is likely to be lower than anticipated. In combination with lower investment in real estate, this means that the growth forecast for 2022 is revised down relative to October by 0.8 percentage point, at 4.8 percent, with negative implications for trading partners' prospects.

The upward revision to global growth in 2023 is mostly mechanical. Eventually, the shocks dragging 2022 growth will

dissipate and—as a result—global output in 2023 will grow a little faster. Among prominent revisions not due to the pandemic, India’s prospects for 2023 are marked up on expected improvements to credit growth—and, subsequently, investment and consumption—building on better-than-anticipated performance of the financial sector. The upward revision to 2023 global growth is, however, not enough to make up ground lost due to the downgrade to 2022. Cumulative global growth over 2022 and 2023 is projected to be 0.3 percentage point lower than previously forecast.

INDIAN ECONOMIC

The last two years have been difficult for the world economy on account of the COVID-19 pandemic. Repeated waves of infection, supply-chain disruptions and, more recently, inflation have created particularly challenging times for policy-making. Faced with these challenges, the Government of India's immediate response was a bouquet of safety-nets to cushion the impact on vulnerable sections of society and the business sector. It next pushed through a significant increase in capital expenditure on infrastructure to build back medium-term demand as well as aggressively implemented supply-side measures to prepare the economy for a sustained long-term expansion.

The Indian economy grew 8.7 per cent in 2021-22, with the gross domestic product (GDP) expanding 4.1% in the March quarter from a year ago. The GDP growth for 2021-22 takes the economy above its pre-pandemic level and is an improvement after contracting 6.6% in 2020-21. But the January-March quarter expansion was the weakest in the previous fiscal year. It is lesser than the 5.4% growth seen during the December quarter of 2021-22. Incidentally, the economic growth during the entire fiscal of 2021-22 has gradually spiralled downwards with each quarter.

In the first quarter of 2021-22, the economic growth had been a stupendous 20.1%, which however was mainly due to the low base effect. In the second quarter it was 8.4%, while it was 5.4% in third quarter. Now for the fourth quarter it has slid down to 4.1%. The GDP for 2021-22 though is lesser than the 8.9% growth estimated by the Ministry of Statistics and Programme Implementation (MoSPI), which releases the GDP data. The 8.7% growth also falls way short of the Reserve Bank of India's (RBI) estimation of 9.5% of GDP growth for 2021-22. Even the March quarter growth of 4.1% is much lesser than RBI's projection for the period, which was estimated to be at 6.1%.

The overall value of global trade reached the value of \$28.5 trillion in FY 2021, 25 per cent higher than FY 2020. India's exports of both goods and services have been good in 2021- 22. Despite rising trade costs, merchandise exports have crossed the US\$30 billion mark in eight consecutive months in FY 2021-22. The reasons for rising trade costs are global supply constraints such as fewer operational shipping vessels, exogenous events such as blockage of the Suez Canal and the Covid-19 pandemic in China's port city, Shenzhen, etc.

India has also been witnessing significant inflationary pressures similar to the global economy.

India has been consistently emphasizing on supply-side reforms, rather than a total reliance on demand management. These reforms include deregulation of numerous sectors, simplification of processes, removal of legacy issues like 'retrospective tax', privatization and production-linked incentives, higher rural income, and the boost from pent-up household savings in addition to continued emphasis on infrastructure spending by the government. Vaccination has played an important role in minimizing loss of lives, boosting confidence in the economy towards the resumption of activity and containing the sequential decline in output due to the second wave. Government CAPEX is budgeted to grow to 2.9% of GDP in FY 2022-23 the highest in nearly two decades. Private corporate investment is also expected to pick up in the second half of the year with improvement in demand leading to increased manufacturing sector capacity utilization and rollout of the Production-Linked Incentive Scheme

The outlook stands to be impacted given sustained inflation pressures in the next few quarters including the impact of Russia – Ukraine conflict, quicker tightening of financial conditions with RBI's rate hikes, high oil prices impacting current account balance and fiscal deficit and subsequent Covid-19 outbreaks. However the Indian economy is well prepared for any challenges that it might face in FY 2022-23.

Road Ahead

Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution, on January 21, 2022 said that Indian industry to raise 75 unicorns in the 75 weeks leading up to the country's 75th anniversary next year.

Mr. Piyush Goyal said that India will achieve exports worth US\$ 650 billion in the financial year 2021-22.

India's electronic exports are expected to reach US\$ 300 billion by 2025-26 this will be nearly 40 times the FY2021-22 exports (till December 2021) of US\$ 67 billion.

As per the data published in a Department of Economic Affairs report, in the first quarter of FY22, India's output recorded a 20.1% YoY growth, recovering >90% of the pre-pandemic output in the first quarter of FY20. India's real gross value added (GVA) also recorded an 18.8% YoY increase in the first quarter of FY22, posting a recovery of >92% of its corresponding pre-pandemic level (in the first quarter of FY20). Also, in FY21, India recorded a current account surplus at 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates of July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with government's budget support to states, strengthened the overall growth of the Indian economy.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

GLOBAL INDUSTRY OVERVIEW

Global Developments in Drone usage

Over the past few years, Drones have come to be used in various industries and for varied purposes. From quick deliveries at rush hour to scanning an unreachable military base, Drones are proving to be extremely beneficial in places where humans cannot reach or are unable to perform operations in a timely and efficient manner.⁶ Other uses of Drones include aerial photography, express shipping or delivery of goods, supplying essentials to remote places, thermal sensor Drones for search and rescue operations, geographic mapping, crop monitoring, forecasting, etc. The usage of Drones in urban planning, infrastructure development, construction planning, maritime procedures, manufacturing and inventory management, etc., are also notable. The use of Drones in the following areas have been increased significantly in the recent years.

A. Agri-tech

With the use of Drones, the agricultural sector is able to gather data, automate redundant processes, and improve efficiency. Drones are being developed to aid the cultivation process, including for pollination of flowers, spraying of fertilisers and even for irrigation requirements as they also enable geographic mapping. Further, Drones can also be used for crop observation / monitoring along with analyses of the fields / soil which would aid in crop health. Thus, farmers can optimize the use of inputs (fertilizers, seed, water, etc) and react suitably which in turn would save / enhance crop yield.

B. Air Mobility / Drone Taxis

With the crowding of the streets with cars and hours of traffic jams falling in the way of hassle free commute, numerous companies around the world are exploring the idea of Drone taxis or passenger Drones that can be summoned like the Olas and Ubers of the world, where the latter is also in the process of enabling such air mobility through tie-ups with aircraft manufacturers. Some reports suggest that within 20 years, electric vertical take-off and landing (eVTOL) aircraft manufacturers, operators and infrastructure providers will have a market value of \$318 billion. Airbus, the multinational European aerospace company, is developing two electric Urban Air Mobility ("UAM") vehicles with the goal to offer short-time and distance flights across congested big cities. These innovations come coupled with competitive pricing to that of on road taxis in order to act as alternatives.⁸ There are numerous other companies testing and developing their autonomous vehicles for the purposes of easing mobility and transport worldwide.

C. Outer Space

Drones are also being developed to test interplanetary environments. While NASA in 2019 announced the launch of its rotorcraft called Dragonfly meant for life-hunting on Saturn's moon by 2026. A tiny helicopter scout has already accompanied the NASA's Mars 2020 Perseverance Rover mission which landed on the planet in February 2021. Perseverance also carried a tiny hitchhiker to Mars—a helicopter named Ingenuity, which will attempt to make the first-ever rotorcraft flight on Mars. On the success of such rotorcraft flights, there lies immense potential for Drones to be utilised in outer space to study various aspects of the planets and their environments.

D. Safety Inspections

Various companies are required to carry out inspections on a regular basis in order to ensure the safety of work environment and the foolproofness of the infrastructure. Drone usage has enabled these companies to eliminate human factor in such inspections and has made the process more time efficient and safe. Drones enabled with imagery technology enables companies to get a detailed output of such inspections in order to undertake improvements in the infrastructure

or safety requirements.

E. Military and Defence services

Given the strategic size of Drones, their use in military operations surfaced decades ago. Numerous countries (with the US, UK, China and Israel being some of the first countries) have already adopted Drone technology for military activities. While Drones have been in use by the defense forces of these countries for a few years, Drones are being designed exclusively for surveillance and defence, as well as for offensive operations and bomb detection.

F. Shipping and delivery

The commercial usage of Drones for shipping and delivery of goods has gained momentum in the recent years as it aids the logistics chain and provides faster and efficient means of transport. The deliveries may range from that of medicines to posts, packages and even pizzas. While India struggled with the supply-chain disruptions during the pandemic, Drones emerged as a new ray of hope in enabling such deliveries to the doorstep and to remote areas. This will not only solve logistical issues but would enable time sensitive and faster deliveries to take place around the world.

G. Emergency Response

Drones have not only come to be utilized for commercial operations but also play a major role in weather forecasting and emergency response. Innovations in camera technology in Drones enabled with thermal imaging cameras have provided emergency response teams with an ideal solution for identifying victims who are difficult to spot with the naked eye. Da-Jing Innovations (“DJI”) had partnered with fire departments in US in 2019 for such rescue operations.

In 2017, Land Rover partnered with the Austrian Red Cross to design a special operations vehicle with a roof-mounted, thermal imaging Drone. The vehicle includes an integrated landing system, which allows the Drone to securely land atop the vehicle while in motion. This custom Land Rover Discovery, dubbed “Project Hero” model included rescue Drones which were aimed at speeding up response times.

The use of Drones for delivering emergency response defibrillators on demand are also being reported, and such ambulance Drones are being developed and tested around the world and have the potential to increase survival rates substantially given the reduced time in response.

H. Conservation of Wildlife

While Drones enable the monitoring of agriculture related activities, they have also come to assist in monitoring the fauna of various regions. Wildlife monitoring is essential as it can assist in the prevention of poaching and the footage from such Drones would assist in studying animal behaviour and patterns. In such a way, Drones are being utilized for geo-mapping and tracking of such animals in their natural habitats without human interference. Drones have also enabled research on ecosystems and the Ocean Alliance is an example of an organization that has used Drones (such as the marine SnotBot) to collect samples — specifically, mucus from whales.

I. Building / infrastructure inspection

Given the ease of accessibility that Drones provide, they are also being used for inspecting remote / hazardous areas of various infrastructure such as chimneys, boilers, etc. The visual capability of Drones is a great substitute for actual human inspection, and Drones can even be equipped with thermal or multispectral sensors for specialised inspection. Drones are also being developed for monitoring of highways and inaccessible terrains for accidents, traffic control, etc. they are coupled with an alerting system to bring attention of the officials to incidents that may not be reported otherwise. Global Drones Market Outlook (2022-2032)

The global Drones market is anticipated to reach US\$ 30 Billion by the end of 2022, anticipated to experience an impressive 25% CAGR from 2022-2032 to reach US\$ 279 Billion by the end of the aforementioned forecast period.

Report Attributes	Values

Key Companies Profiled	<ul style="list-style-type: none"> • SZ DJI Technology Co. Ltd (DJI) • The Boeing Company (Insitu) • Terra Drone Corporation • Intel Corporation • BirdsEyeView Aerobotics • Parrot Drones SAS • Yuneec • Delair SAS

According to Fact.MR- a market research and competitive intelligence provider- demand for Drones flourished at a CAGR of 23.5% from 2017 to 2021. Large-scale expansion of industries has rendered it necessary to beef up surveillance and security measures, especially across areas such as defence and border security, leading to increased Drone deployment.

During the COVID-19 pandemic, the market for Drones experienced multiple fluctuations. In certain industries such as manufacturing and hospitality, prospects significantly narrowed throughout 2020, attributed to cessation of all activity in these domains due to the imposition of lockdowns. However, Drones became necessary for general surveillance purpose, especially to ensure that social distancing protocols were maintained.

Use of autonomous Drones as weapons of devastation is fast changing the industry. Unmanned Aerial Combat Vehicles (UACVs) are another name for some of these Drones (UACV). In affluent countries, UACVs with precision guided bombs and missiles are on the rise. From 2022 to 2032, the industry is forecast to expand 9.3x.

Driving forces behind the Worldwide Drones Market

Rising Demand for Photographic Surveillance to Bolster Market Growth. The increasing acceptance of Drone deployment in military operations has prompted suppliers to produce Drones that may be utilized in a variety of commercial applications.

Drones are also being used for various purposes, such as providing internet access in rural areas, aerial photography and video recording, surveying and documenting animals, and public service missions. Several firms primarily provide tiny Drones for agricultural, aerial photography, and data collecting purposes.

Drone-assisted home deliveries have become a reality as a result of the efforts of logistics and retail organizations such as Amazon and UPS to implement the technology. Because commercial Drones can travel at speeds of up to 100 miles per hour and transport products weighing less than 5 pounds, the delivery mechanism is projected to reduce delivery time and related expenses. Increased investments in Drone technology are also expected to drive long-term industry growth.

Expanded Commercial Use Will Be a Major Opportunity in the Commercial Drone Market

Drones for future structures are becoming increasingly popular in the construction sector. Building managers will be able to meet project objectives more efficiently and quickly if sophisticated photography is used to scan construction sites and Drones are used to follow activities throughout the construction lifecycle.

Many industrial conglomerates and corporate houses are using Drones outfitted with thermal imaging cameras during emergency response to make contact with and identify casualties who are not apparent to the human eye. Similarly, hospitals are employing ambulance Drones outfitted with defibrillators to provide prompt resuscitation to a patient in need. With climate change wreaking havoc on wildlife, conservationists are employing cutting-edge Drone technology to monitor, track, and gather samples from endangered animals.

Rising popularity of commercial and business models leveraging Drone technology will give the Drone industry with precisely the necessary push, allowing stakeholders to lift their game in operational efficiency.

Agricultural Yield Improvements and Weather Forecasting to be a Key Trend

Farmers are using Drones to increase agricultural productivity and minimize farming expenditures. Agricultural employees may eliminate duplicate operations and simplify them to make them more operationally feasible and efficient with the help of Drones.

Agricultural Drones that use robotics can make the monotonous, repetitive, and time-consuming operation of harvesting

more efficient, as well as offer methods for scooping up product or pollinating crops using aerial drones. Drones' sophisticated imaging capabilities can aid in the real-time monitoring of weather changes.

As a result, weather patterns may be tracked as they evolve. For example, autonomous sail boats that operate as drones may collect oceanic and atmospheric data from the ocean's surface and utilize it to forecast weather trends and patterns. With worldwide emphasis focused on climate change, stakeholders are leveraging emerging kinds of software and technology (Drone Motors, Drone Batteries, etc.) to be employed in drones, causing a substantial shift in the drone business.

Indian Industry Outlook

The immense potential of drones has led to their increasing adoption in India, too. Though both the industry and the market in India are at a very nascent stage at the moment, there is immense growth potential for both. A major thrust will be given by the willingness of the present Indian government to use drones for a variety of purposes, including crop mapping and surveillance of infrastructure projects, pushing the projected value of the domestic industry to approximately US\$421 million in 2021. According to research, the Indian Unmanned Aircraft Vehicle market is projected to grow at a CAGR of 18% during 2017-23.

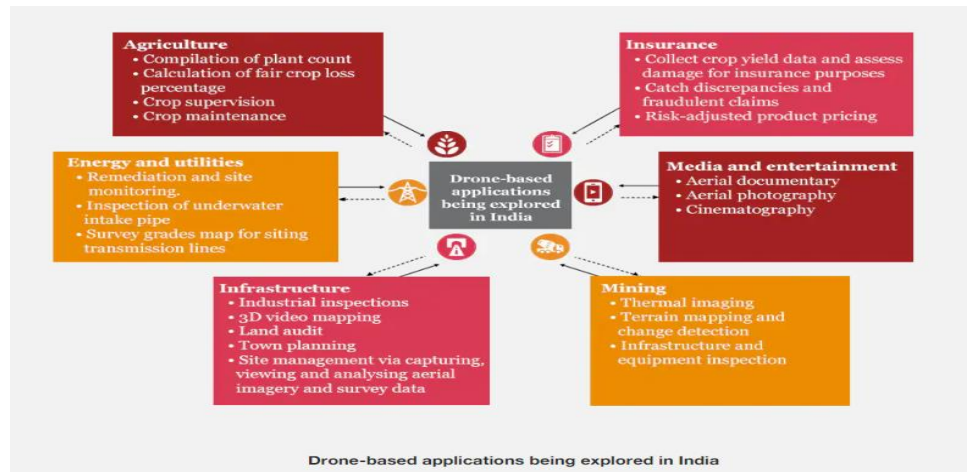

In the recent Interview (September 2021) of Chief of the Drone Federation of India, Mr. Smit Shah stated that on the back of the new policy, India's drone market is expected to reach Rs. 50,000 crore (US\$ 6.69 billion) in five years and Rs. 30,000 crore (US\$ 4.01 billion) in the next three years.

The UAV sector holds tremendous opportunities and if unleashed, has the potential to transform many of the sectors and could contribute 4-5% to India's GDP, due to multiplier effect. Since 2001, approximately 38 companies have applied for industrial license to manufacture UAVs in India. Furthermore, more than 50 start-ups have started providing services in this new industry. The global market is witnessing a boom despite several concerns relating to its potential use as a weapon, proprietary and privacy infringement. The future holds many new avenues for the use of UAVs as they are expected to replace 80% of operations presently carried out by manned aircraft. As per NITI Aayog estimates, the Indian market for UAV will be \$50 billion over the next 15 years.

Indigenous Industry Drivers

Aatmanirbhar Bharat

Aatmanirbhar Bharat Abhiyan, which translates to “self-reliant India”, is the Indian government’s drive to stimulate local production and manufacturing in the wake of COVID-19’s anticipated economic impacts. Reforms and easing of policy were announced for different sectors including Drone Industry.

The Central Government under the leadership of Hon’ble Prime Minister Shri Narendra Modi, has approved the Production-Linked Incentive (PLI) scheme for drones and drone components.

Given its traditional strengths in innovation, information technology, frugal engineering and its huge domestic demand, India has the potential of becoming a global drone hub by 2030.

The PLI scheme comes as a follow-through of the liberalised Drone Rules, 2021 released by the Central Government on 25 August 2021. The PLI scheme and new drone rules are intended to catalyse super-normal growth in the upcoming drone sector.

The major features to strengthen self-reliance and indigenous drone industry promotion are as follows:

1. The total amount allocated for the PLI scheme for drones and drone components is INR 120 crore spread over three financial years. This amount is nearly double the combined turnover of all domestic drone manufacturers in FY 2020-21.
2. The incentive for a manufacturer of drones and drone components shall be as high as 20% of the value addition made by her.
3. The value addition shall be calculated as the annual sales revenue from drones and drone components (net of GST) minus the purchase cost (net of GST) of drone and drone components.

4. The Government, has agreed to keep the PLI rate constant at 20% for all three years, an exceptional treatment given only to the drone industry. In PLI schemes for other sectors, the PLI rate reduces every year.
5. The proposed tenure of the PLI scheme is three years starting in FY 2021-22. The PLI scheme will be extended or redrafted after studying its impact in consultation with the industry.
6. The Government has agreed to fix the minimum value addition norm at 40% of net sales_for drones and drone components instead of 50%, another exceptional treatment given to the drone industry. This will allow widening the number of beneficiaries.
7. The PLI scheme covers a wide variety of drone components:
 - Airframe, propulsion systems (engine and electric), power systems, batteries and associated components, launch and recovery systems;
 - Inertial Measurement Unit, Inertial Navigation System, flight control module, ground control station and associated components;
 - Communications systems (radio frequency, transponders, satellite-based etc.)
 - Cameras, sensors, spraying systems and related payload etc.;
 - 'Detect and Avoid' system, emergency recovery system, trackers etc. and other components critical for safety and security.
8. The list of eligible components may be expanded by the Government from time to time, as the drone technology evolves.
9. The Government has agreed to widen the coverage of the incentive scheme to include developers of drone-related IT products also.
10. The incentive payable to a manufacturer of drones and drone components shall be simply one-fifth of her value addition as illustrated below for a sample year (say, FY 2021-22)

Estimated payout schedule of PLI for drones and drone components

Claim year	Sales-Net of GST (INR cr)	Purchase - Net of GST (INR cr)	Eligible value addition (INR cr)	PLI rate for value addition (%)	Applicable PLI (INR cr)	Disbursement year
FY 21-22	200	120	80	20%	16	FY 22-23
FY 22-23	400	240	160	20%	32	FY 23-24
FY 23-24	900	540	360	20%	72	FY 24-25
TOTAL	1500	900	600	20%	120	

Drone Categories in India

The unmanned aircraft system shall be categorized into the following three categories, namely: —

1. Aeroplane;
2. Rotorcraft; and
3. Hybrid unmanned aircraft system.

The airplane, rotorcraft, and hybrid unmanned aircraft system shall be further sub-categorized as follows:

1. Remotely piloted aircraft system;
2. Model remotely piloted aircraft system; and
3. Autonomous unmanned aircraft system.

Classification of unmanned aircraft systems. The unmanned aircraft system shall, based on the maximum all-up weight including payload, be classified as follows: –

	<p>1. Domestic Opportunity for the Drone Manufacturing Industry

Drone technology has played a crucial role during the COVID-19 pandemic in a wide range of areas, including healthcare product delivery, law enforcement and e-commerce delivery. Following the emergence of multiple use cases across the globe, the government has identified drone technology and its applications as a sunrise sector and started putting in considerable efforts to promote indigenisation of drone technology in India. The liberalised regulatory framework and manufacturing incentives announced by the government aim to develop the country's drone manufacturing ecosystem. This strategy will create a wide range of upstream and downstream business opportunities such as the design and manufacture of drone components; assembly of drone products; and development of software applications, enterprise solutions and counter-drone technologies. According to NITI Aayog, India's UAV market will expand to US\$ 50 billion over the next 15 years as drones are projected to substitute 80% of operations presently carried out by manned aircraft.

Government's Role in Supporting the Drone Manufacturing Industry

The government believes that drones can benefit and drive multiple sectors of the economy, such as mining, agriculture, surveillance, and [infrastructure](#). Due to their reach, adaptability, and usability, drones can significantly contribute to job creation and [economic growth](#), particularly in India's rural and inaccessible regions. Besides the PLI scheme, the Government of India has executed a series of reforms to make India a globally renowned drone hub by 2030. Some of the key initiatives are mentioned below:

- The government published the Drone Airspace Map 2021, opening approximately 90% of the Indian airspace as a green zone (up to 400 feet), UAS Traffic Management (UTM) policy structure 2021.
- The government implemented the Drone Certification Scheme 2022 to help drone makers secure a type certificate and the Drone Import Policy 2022, banning the import of foreign-made drones.
- The government introduced the Drone (Amendment) Rules 2022, which would prevent the need to obtain a drone pilot license for drone companies.
- In May 2022, the Minister of Agriculture & Farmers Welfare, Mr. Narendra Singh Tomar, inaugurated the 'Promoting Kisan Drones: Issues, Challenges and the Way Ahead' conference. He stated that the government is promoting the use of drones for the convenience and benefit of farmers. A subsidy of 50% or a maximum of Rs. 5 lakh (US\$ 6,311) would be provided to SC-ST farmers, women farmers, and farmers of north-eastern states, and up to 40% or a maximum of Rs. 4 lakh (US\$ 5,049) for other farmers.
- In January 2022, the Ministry of Civil Aviation introduced a drone certification scheme to maintain minimum safety and quality standards to promote domestic manufacturing.
- The Directorate General of Foreign Trade, under the Ministry of Commerce, has banned the import of drones to promote indigenous manufacturing of drones. Drones shall be strictly imported for three reasons- R&D, defence and security purpose.
- The Ministry of Civil Aviation has scrapped the need for a pilot license to fly drones in India. To operate a drone in India, one needs only a Remote Pilot Certificate (RPC), issued by DGCA-approved drone schools; the certificate can be obtained through the single-window DigitalSky Platform.

Road Ahead

The drone manufacturing industry is still at a nascent stage and is mostly run by drone start-ups in India and various drone manufacturing companies. The government will play a crucial role in growing the domestic drone industry faster than its global counterparts. Therefore, the rapid adoption of drones is critical to realising the potential of this technology which can be achieved by reducing manufacturing costs, making it globally competitive. The indigenisation efforts initiated by the government through a series of policy reforms and financial assistance are set in the right direction. This should help the industry servicing domestic and export markets as demand is expected to grow exponentially, driven by the realisation of multiple use cases across various sectors.

Drones are expected to create considerable employment opportunities and drive [economic growth](#) as they provide various advantages (versatility, high reach and ease of use, particularly in India's remote and isolated areas). The government and various enterprises are recognising the economic and social prospects offered by the drone manufacturing industry. Therefore, India's drone industry has great potential to increase its scale exponentially from the current level. However, the industry will require skilled experts to understand the intention of making the country an international drone hub by 2030 and opening up drone business opportunities in India.

The popularity of drone technology across the mining industry has grown significantly in recent years. There are several examples where drones are currently being deployed across mine sites, making on-site activities a lot safer and more productive.

Listed below are the key trends on how drones are being utilised in our company in the mining industry are-

- Volume Estimation
- Longitudinal / Cross Section Profile Periodic Change Detection

Energy and Renewables

The energy industry is seeing a great deal of change thanks to drone technology. Inspections are necessary for energy sectors such as solar, wind, oil, and gas, but these inspections can be time-consuming and expensive. Having drones fly over the utility sites allows damage to be identified faster and problems to be stopped before they get worse. By using drone programs, businesses can make better decisions. In the energy industry, drones provide practical solutions for everyday problems and support business efforts to avoid hazardous man-hours, reduce maintenance, inspections, and repairs costs, and increase efficiencies.

Agriculture & Irrigation

Drones recognize areas that are too dry or need improvement by the farmer. Drone survey helps improve water efficiency and disclose potential pooling/leaks in irrigation by providing Irrigation monitoring yields calculations of the vegetation index to help realize the health of crops and emitted heat/energy. It is crucial to track the health of the vegetation and spot bacterial/ in the early stages. Agriculture drones can see which plants reflect different amounts of green light and Near-infrared spectroscopy (NIRS) light. Quick monitoring and discoveries of any defects can help save crops. In circumstances of crop failure, the farmer can also document the damages for accurate insurance claims. Agricultural drones fitted along with multispectral sensors and RGB sensors also detect field areas inflicted by weeds, infections, and pests. According to this data, the exact amounts of chemicals needed to fight these infestations are known, and this helps diminish the costs inflicted by the farmer. Through drone crop spraying, human contact with such harmful chemicals is limited. Agri-drones can carry out this task much quicker than vehicles/airplanes.

Our company provides agriculture and irrigation services to improve crop productivity by following ways-

- Crop Health Analysis
- Tree Count & Species Detection
- Periodic Change Detection

Underwater Inspection

Underwater drones, have been so popular. Rather than sending a team of divers to conduct underwater bridge inspections, commercial diving companies and municipalities send the drone below the surface first. Deep Trekker's DTX2 Remotely Operated Vehicle versatility allows for acoustic imaging integration; giving the opportunity to survey the area for any obstructions or potential threats to the repair team and to give an overall picture of the integrity of the structure.

Underwater Bathymetry

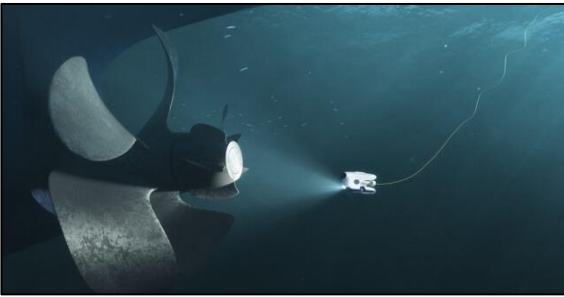

“Bathymetry is the study of underwater depth of ocean floors or lake floors.” It is used to precisely ascertain the underwater topography of a body of water. This implies that for an in-depth understanding of soil water content, and underwater topography, Bathymetry in the form of a Bathymetric survey is required. A Bathymetric survey – also known as Hydrographic survey – involves mapping out the shape and how deep a terrain underwater is to describe the land that lies below.

Drones use for the bathymetric survey has been of great benefit owing to an ability to drastically mitigate the risks of direct human interference. Drone

	<p>technology also enables one to see the exact and current hydrographic information and monitor the change or evolution of terrain Bathymetric drones also operate very well in harsh environments due to a built-in resistance to strong wind from storms and saltwater. Due to advancements in technology, the drones can also fly for a longer period, which means wider coverage over a short period. The drone makes bathymetric surveys 10 times faster and 2 times more cost-efficient compared with a standard approach using a ship, a boat or an unmanned surface vehicle.</p>

2. BASIS OF MEASUREMENT

The Restated Standalone Financial Statements have been prepared under the historical cost convention.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of Restated Standalone financial statements in conformity with Ind AS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the Restated Standalone financial statements, and the reported amount of revenue and expenses during the reporting period. The estimates and assumptions used in the accompanying restated Standalone financial statements are based upon management’s evaluation of the relevant facts and circumstances as of the date of the Restated Standalone financial statements which in management’s opinion are prudent and reasonable. Actual results may differ from the estimates used in preparing the accompanying Restated Standalone financial statements. Any revision to accounting estimates is recognized prospectively in current and future periods.

4. FAIR VALUE MEASUREMENT

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to / by the Company.

All assets and liabilities for which fair value is measured or disclosed in the restated Standalone financial statements are categorized within fair value hierarchy, described as follows, based on the lowest level of input that is significant to the fair value measurement as a whole.

Level 1 — Quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

Fair value of financial instruments measured at fair value through profit and loss and amortised cost.

B.2: OTHER SIGNIFICANT ACCOUNTING POLICIES

1. PROPERTY, PLANT & EQUIPMENT

Items of property, plant and equipment are measured at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment comprises: (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; (b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other cost directly attributable to bringing the item to working condition for its intended use.

The cost of improvements to leasehold premises, if recognition criteria are met, are capitalized and disclosed separately under leasehold improvement.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal and retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset is recognized in Statement of profit and loss.

Subsequent cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Company and the cost of the item can be measured reliably. All other subsequent cost are charged to Statement of profit and loss at the time of incurrence.

Depreciation

Depreciation on PPE is provided on the Written Down Value method computed on the basis of useful life prescribed in Schedule II to the Companies Act, 2013 ('Schedule II') on a pro-rata basis from the date the asset is ready to put to use. Considering the applicability of Schedule II as mentioned above, the details of estimated life for each category of assets are as under:

Category of assets	Estimated Life (Years)
Motor Car	8 years
Drone (plant and Machinery)	7 years
Office Equipment's	3 Years
Furniture & Fixtures	10 years
Computer & Mobile	3 years

The residual values, useful lives and methods of depreciation of property plant and equipment are reviewed by management at each reporting date and adjusted prospectively, as appropriate.

2. INVENTORIES

Inventories of finished goods are valued at cost or net realizable value ('NRV'), whichever is lower. Costs of inventories has been determined using weighted average cost method and comprise all costs of purchase after deducting non-refundable rebates and discounts and all other costs incurred in bringing the inventories to their present location and condition. Provision is made for items which are not likely to be consumed and other anticipated losses wherever considered necessary. The comparison of cost and NRV for traded goods is made on at item Company level basis at each reporting date. However, there is no inventory of Drones and other products.

3. LEASES

Lease payments in respect of assets taken on operating lease are charged to the Statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with the expected general inflation to compensate the lessor's expected inflationary cost increases, if any. However, there is no lease payments during the period under consideration.

4. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred. There is no borrowing cost involved.

5. IMPAIRMENT OF ASSETS

At each reporting date, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication of impairment exists, then the asset's recoverable amount is estimated. For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash generating units ('CGU').

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognized in the Statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU and then to reduce the carrying amounts of the other assets in the CGU on a pro-rata basis.

For other assets, an impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized

6. PROVISIONS AND CONTINGENT LIABILITIES AND ASSETS

Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. When discounting is used, the increase

in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities

Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

7. EMPLOYEE BENEFITS

Employee benefit liabilities such as salaries, wages and bonus, etc. that are expected to be settled wholly within twelve months after the end of the reporting period in which the employees render the related service are recognized in respect of employee's services up to the end of the reporting period and are measured at an undiscounted amount expected to be paid when the liabilities are settled.

Footnotes:

- The Company has not disclosed the fair value of financial instruments such as trade receivables, trade payables, advances, security deposits, other current assets and liabilities etc. because their carrying amounts are a reasonable approximation of fair value.
- c) **Fair value hierarchy:**
The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:
- i) **Level 1:** Level 1 hierarchy includes financial instruments measured using quoted prices in an active market. This included listed equity instruments, traded debentures and mutual funds that have quoted price. The fair value of all equity instruments (including debentures) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.
- ii) **Level 2:** Level 2 hierarchy includes financial instruments that are not traded in an active market (for example, traded bonds/ debentures, over the counter derivatives). The fair value in this hierarchy is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level
- ii) **Level 3:** If one or more of the significant Inputs is not based on observable market data, the instrument is included in level 3. Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. Financial instruments such as unlisted equity shares, loans are included in this hierarchy.
- d) **Valuation technique used to determine fair value**
Specific valuation techniques used to value financial instruments include:
- a) the use of quoted market prices for the equity instruments
- b) the fair value of the unlisted shares are determined based on the income approach or the comparable mark approach. For these unquoted investments categorised under Level 3, their respective cost has been considered as an appropriate estimate of fair value because of a wide range of possible fair value measurements and cost represents the best estimate of fair value within that range.
- c) the fair value of the remaining financial instruments is determined using the discounted cash flow analysis

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
