Key Highlights

- Exhibitions and events are some of the critical enablers and triggers of the economy. With India being one of the fastest-growing economies, the government initiatives to help enterprises in different industries are expected to improve the need for events and exhibitions in the country. According to Make in India, among the chosen 190 countries, India ranked at 63rd position in comfort of doing business rank 2020, which was 142 out of 190 in 2014, a significant improvement of 79 positions.
- India has a vast consumer market, and it offers an unparalleled opportunity for enterprises to invest and expand in the country. According to the India Brand Equity Foundation and Retailers Association of India, the retail market size across India will reach USD 1,750 billion by 2026.
- Exhibitions are among some of the powerful enablers of trade and economic growth globally. Various nations in Europe and Asia used exhibitions as business platforms to propel their regions’ economic development and investments. In line with India’s economic development, the exhibitions industry has seen rapid growth. Today, India is one of the prime exhibition destinations globally.
- Event planning goes hand in hand with the marketing efforts of the organizers. In order to do so, such event organizers charge a hefty amount from participants. Inefficient marketing may lead to lower footfall which leads to lower sales for vendors that signed up for the exhibition. Such scenarios are why organizers tend to have hefty entry fees to communicate appropriately about the exhibition.
- The COVID-19 pandemic had a harsh negative impact on various industries across the country. The event and exhibition industry was no stranger to this trend. With the lockdown announcement, the sphere of outdoor entertainment came to an absolute standstill. According to the Indian Exhibitions Industry Association (IEIA), India’s exhibition sector lost an estimated INR 3,570 crore.

We may be unable to obtain additional capital in a timely manner or on acceptable terms or at all. The terms and amount of any additional capital raised through issuances of equity securities may result in significant dilution to our shareholders. Any termination of such membership could adversely affect our operations.

21. Our success depends largely upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.

Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely

affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to expand our business.

22. We face risks associated with currency exchange rate fluctuations

As we have a foreign subsidiary. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Although we generally hedge our foreign exposure, any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our company’s results of operations.

23. We have not made any alternate arrangements for meeting our regular working capital requirements. If our operations do not generate the necessary cash flow, our working capital requirements may negatively affect our operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our working capital requirements, other than the existing sanctioned limits. Our Company’s success largely depends on our brand name and brand image and our trademark is important for differentiating our Company’s products from that of our competitors. Any such litigation could be time consuming and costly and the outcome cannot guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition.

Trademark Application Details are as follows:

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that in future no deficiency will be incurred. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

26. We are subject to risks associated with expansion into new markets.

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions.

The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including: compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in

- laws, regulations and practices and their interpretation; local preferences and service requirements;
- fluctuations in foreign currency exchange rates;
- inability to effectively enforce contractual or legal rights and adverse tax consequences;
- differing accounting standards and interpretations;
- stringent as well as differing labour and other regulations;
- differing domestic and foreign customs, tariffs and taxes;
- exposure to expropriation or other government actions; and
- political, economic and social instability.

Our Company intends to expand into existing markets. For further details, please refer to section titled “Objects of the Offer” beginning on page 55 of this Draft Red Herring Prospectus. By expanding, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

27. We have in the past entered into related party transactions and may continue to do so in the future.

We have entered into transactions with our Promoter and other related parties in compliance with the Companies Act 2013, and other applicable laws. For a list of related parties, please see the chapter titled “Restated Financial Statement - Annexure XXVIII Restated Statement of Related Party Transaction” beginning on page 133 of this Prospectus. While we believe that all such transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise.

28. Our continued success is substantially dependent on the strength of our brand and our reputation.

Brand recognition is important to the success of our business. We believe that the recognition and reputation of our Exhicon brand among customers have significantly contributed to the growth of our business. To be successful in the future, we must continue to preserve, grow and leverage the value of our brands. Many factors, some of which are beyond our control, may negatively impact our brands and reputation. Reputational value is based in large part on perceptions of subjective qualities. An isolated incident or the aggregate effect of individually insignificant incidents can erode the trust and confidence of our current and potential suppliers and buyers, particularly if those incidents result in adverse publicity, governmental investigations or litigation.

Maintaining and enhancing the recognition and reputation of our brand is critical to our business and competitiveness. This may require us to make substantial investments, including major television and digital marketing campaigns. Such investments may not be successful or generate sufficient revenue to cover their significant upfront costs. As a result, our financial condition may be adversely impacted.

29. Our inability to receive or renew the necessary licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company’s operations.

Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

We are yet to apply for registration under the Employees' State Insurance Act, 1948. Further, we need to apply for change in name in all our registrations and statutory approvals which are in previous name of our Company. For further details, please refer to chapter titled “Government and Other Approvals” on page 172 of this Draft Red Herring Prospectus. Any delay or failure to do so could have an adverse effect on our business and results of operations.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

30. Third party industry and statistical data in this Draft Red Herring Prospectus may be incomplete, incorrect or unreliable.

We have not independently verified data from industry and other publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

31. Any adverse change in regulations governing our business and business of our clients, may adversely impact our business prospects and results of operations.

Government regulations and policies of India can affect the demand for, expenses related to and availability of our services. We have incurred and expect to continue incurring costs for compliance with such laws and regulations. Any changes in government regulations and policies, such as the withdrawal of or changes in tax benefits or incentives and subsidies, could adversely affect our business and results of operations. Further, regulatory requirements with respect to our services and those governing our clients are subject to change. An adverse change in the regulations, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Accordingly, our Company may be required to alter processes and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our client.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

32. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “Objects of the Issue” on page 55 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

33. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public-listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which requires us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies.

In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

34. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports

by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

35. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. [●] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the Section at titled "General Information" on page 38 of this Draft red Herring Prospectus.

36. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

37. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares.

In accordance the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchange, we are required to refund all the monies collected to investors.

38. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of sale of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

39. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange will be subject to capital gains tax in India and also would also be subject to Securities Transaction Tax ("STT"). STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

For more details, please refer to "Statement of Special Possible Tax Benefits" on page 64 of this Prospectus.

40. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

- 41. Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements.**

Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

EXTERNAL RISK FACTORS

- 42. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.**

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

- 43. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.**

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, the Companies Act 2013, several provisions of which (including rules issued thereunder) contain significant changes to Indian company law, including in relation to the issue of capital by companies, related party transactions, corporate governance, audit matters, shareholder class actions, restrictions on the number of layers of subsidiaries and corporate social responsibility. Compliance with such requirements may require significant financial and administrative resources, and any failure to comply may adversely affect our business and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. If a determination is made that we were in violation of such laws, rules or regulations, including conditions in the permits required for our operations, we may have to pay fines, modify or discontinue our operations, incur additional operating costs or make capital expenditures and our business, financial positions, results of operations or cash flows could be adversely affected. For details on the laws currently applicable to the Company kindly refer the chapter titled "Key Industry Regulations and Policies" beginning on page 77 of this Prospectus.

- 44. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.**

Taxes and other levies imposed by the Central or State Governments in India affect the cost and prices of the products we trade in and therefore demand for such product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

- 45. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and exhibitions, conferences and events industry contained in this Prospectus.**

While facts and other statistics in this Prospectus relating to India, the Indian economy and the exhibitions, conferences and events industry has been based on various government publications and reports from government agencies that we believe

are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “Our Industry” beginning on page 66 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

46. The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.

India’s physical infrastructure is in a developing phase, as compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

47. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

48. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

49. Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

50. A slowdown in economic growth in India and globally could cause our business to suffer.

We are highly dependent on prevailing economic conditions in India and globally and our results of operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;
- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- variations in exchange rates;
- changes in India’s tax, trade, fiscal or monetary policies;

- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

51. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

52. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

53. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

INDIA'S ECONOMY HAS DEMONSTRATED RESILIENCE DESPITE A CHALLENGING EXTERNAL ENVIRONMENT,

Says the World Bank in its latest India Development Update, a World Bank flagship publication. The report titled “Navigating the Storm”, finds that while the deteriorating external environment will weigh on India’s growth prospects, the economy is relatively well positioned to weather global spillovers compared to most other emerging markets.

Impact of a tightening global monetary policy cycle, slowing global growth and elevated commodity prices will mean that the Indian economy will experience lower growth in 2022-23 financial year compared to 2021-22. Despite these challenges, the update expects India to register a strong GDP growth and remain one of the fastest growing major economies in the world, due to robust domestic demand.

The World Bank has revised its 2022-23 GDP forecast upward to 6.9 percent from 6.5 percent (in October 2022), considering a strong outturn in India in the second quarter (July-September) of the 2022-23 financial year.

India’s external position has also improved considerably over the past decade. The current-account deficit is adequately financed by improving foreign direct investment inflows and a solid cushion of foreign exchange reserves (India has one of the largest holdings of international reserves in the world).

Policy reforms and prudent regulatory measures have also played a key role in developing resilience in the economy. Increased reliance on market borrowings has improved the transparency and credibility of fiscal policy and the government has diversified the investor base for government securities. The introduction of a formal inflation targeting framework during the past decade was an important step in lending credibility to monetary policy decisions. While there are still some challenges in the financial sector, the adoption of several regulatory and policy measures—including the introduction of a new Insolvency and Bankruptcy Code and the creation of the new National Reconstruction Company Limited—facilitated an improvement in

financial sector metrics over the past five years; these policy interventions are also expected to help alleviate pressures related to non-performing loans.

“A well-crafted and prudent policy response to global spillovers is helping India navigate global and domestic challenges,” said Dhruv Sharma, Senior Economist, World Bank, and lead author of the report.

The report notes that both levers of macroeconomic policy – fiscal and monetary – have played a role in managing the challenges that have emerged over the past year. The report notes that the RBI withdrew accommodative monetary policy settings in a measured approach as it balanced the need to rein in inflation while continuing to support economic growth. Fiscal policy supported the central bank’s rate actions by cutting excise duty and other taxes on fuel to moderate the impact of higher global oil prices on inflation. However, the report also cautions that there is a trade-off between trying to limit the adverse impact of global spillovers on India’s growth and available policy space.

India Event and Exhibition Market - Growth, Trends, COVID-19 Impact, and Forecasts (2022 - 2027)

The India event & exhibition market (hereafter referred to as the market studied) was valued at USD 3,674.95 Million in 2022, and it is expected to reach USD 7,550.05 Million by 2027, registering a CAGR of 12.43% during the forecast period of 2022-2027.

Key Highlights

- Exhibitions and events are some of the critical enablers and triggers of the economy. With India being one of the fastest-growing economies, the government initiatives to help enterprises in different industries are expected to improve the need for events and exhibitions in the country. According to Make in India, among the chosen 190 countries, India ranked at 63rd position in comfort of doing business rank 2020, which was 142 out of 190 in 2014, a significant improvement of 79 positions.
- India has a vast consumer market, and it offers an unparalleled opportunity for enterprises to invest and expand in the country. According to the India Brand Equity Foundation and Retailers Association of India, the retail market size across India will reach USD 1,750 billion by 2026.
- Exhibitions are among some of the powerful enablers of trade and economic growth globally. Various nations in Europe and Asia used exhibitions as business platforms to propel their regions’ economic development and investments. In line with India’s economic development, the exhibitions industry has seen rapid growth. Today, India is one of the prime exhibition destinations globally.
- Event planning goes hand in hand with the marketing efforts of the organizers. In order to do so, such event organizers charge a hefty amount from participants. Inefficient marketing may lead to lower footfall which leads to lower sales for vendors that signed up for the exhibition. Such scenarios are why organizers tend to have hefty entry fees to communicate appropriately about the exhibition.
- The COVID-19 pandemic had a harsh negative impact on various industries across the country. The event and exhibition industry was no stranger to this trend. With the lockdown announcement, the sphere of outdoor entertainment came to an absolute standstill. According to the Indian Exhibitions Industry Association (IEIA), India’s exhibition sector lost an estimated INR 3,570 crore.

India Event and Exhibition market is segmented By Type (B2B, B2C, Mixed/Hybrid), By Revenue Stream (Exhibitor Fee, Sponsorship Fee, Entrance Fee, Services), By End-User (Consumer Goods and Retail, Automotive and Transportation, Industrial, Entertainment, Real Estate and Property, Hospitality, Healthcare, and Pharmaceutical).

Key Market Trends

Growing Adoption of Geo-cloning for Exhibition Organizers is expected to drive the Market

- The geo-cloning concept is not something new, but it has been tried and tested for decades now. It is gaining traction in recent times due to the increase in connectivity and globalization. The Indian market is not new to the concept as various international events and exhibitions have been expanded to cover India as well in recent times. Geo-cloning is taking an event that works in one city or country and including it in another.

- For instance, Fastener Fair USA, which is from the United States, was replicated in India and took place in Bombay Exhibition Center (NESCO), Mumbai. In 2019, the event had 5,192 visitors and 199 exhibitors, and 58% of the visitors were company owners or directors. Such successful geo-cloning events are taking the country's industry by storm with the growing economic and active government policies.
- Geo-cloning has also become a go-to strategy for various major exhibition organizers looking to expand globally. It involves less of the risk of a brand-new launch and an existing brand reputation to use as a launch pad. Statement of intent geo-cloning has proven to be a valuable tactic.
- With the growing construction, industrial manufacturing, textiles & apparel, and consumer durables market in India, various international events and exhibitions are keen on entering the country to offer their products and services, and such exhibitions are the means of networking and expansion opportunities to tie up with local vendors and distributors.
- In addition to this, the technological advancements in various industries, which different Indian industries lack as they still use conventional processes, are offering a prime opportunity for international vendors, as such events offer significant opportunities to attend and gain knowledge and adopt advanced solutions as part of their operations.
- Further, the government support to Indian event organizers involved in geo-cloning and large international conventions in the country are positively impacting the growth. This involves guaranteed footfall from customers owing to the brand reputation and involvement of international solutions and service providers.

The Consumer Goods and Retail Segment is Expected to Hold a Major Market Share

- Horizontal marketplaces are consumer exhibits. They usually feature a variety of products from a variety of industries that are on show for the general public. Consumer exhibitions are an excellent method to bring together like-minded merchants and customers in one place for an extended length of time. Many visitors like to remain and visit as many vendors as possible.
- Therefore, they are generally considered day-long events. Consumer exhibitions provide businesses with an once-in-a-lifetime opportunity to contact directly with buyers who already fall into their target demographics. This sales strategy frequently yields a greater conversion rate than traditional sales methods. India as a country realizes the value and reach of such exhibitions and events and, therefore, has prominent fairs, events, and exhibitions held annually.
- Since the outbreak of the epidemic, Trade India, India's premier B2B online marketplace, has successfully hosted a number of virtual expos for various industries. In the month of October 2021, it hosted a Grand Consumer Goods Expo. The country's faltering export business and consumer goods industry will get a new lease on life due to the high-profile digital trade show.
- Agriculture, Apparel & Fashion, Automobiles, Chemicals, Consumer Electronics, Electronics & Electrical Supplies, Food & Beverages, Furniture & Handicrafts, and other Industrial Segments all have intriguing prospects at Consumer Goods Expo 2022.
- IITF or INDIA INTERNATIONAL TRADE FAIR 2022 is organized by India Trade Promotion Organization (ITPO). India International Trade Fair. IITF displays a wide range of products and services, including automobiles, textiles, garments, household and kitchen appliances, food, beverages, pharmaceuticals, chemicals, cosmetics, body care, and health care products, toys, etc.

Competitive Landscape

The market is riddled with various small and large-scale vendors operating in a highly fragmented market. With the unorganized event and organization sector in the country being of the same size as the organized market studied in this report, the competitive rivalry among the organizers is moderately high. With the growing economic condition of the country and consumer markets, the need for globalization is pushing the demand for a significant number of B2-B and B2C events/exhibitions in the country.

- April 2022 - Percept ICE was credited with the development and management of the IP, Parcos Beauty Influencer Awards. The company conceptualized and executed the debut edition of the Parcos Beauty Influencer Awards in 2022, an annual intellectual property rewarding Influencers pan-India with a coveted place on the Parcos Panel, a shoot with ELLE magazine, among others.
- August 2021 - Percept Live announced the launch of “Freshers Fest,” an exclusively curated back-to-college freshers festival with an aim to welcome students to the new academic year. Over 150,000 fans from 150 colleges across 40 cities were expected to attend the launch event.

Market Challenges

LOSS DUE TO RESTRICTIONS OF SMALLER PLAYERS TO PARTICIPATE, OWING TO POTENTIAL LOW TURNOUTS

Event planning goes hand in hand with the marketing efforts of the organizers. In order to do so, such event organizers charge a hefty amount from participants. Inefficient marketing may lead to lower footfall which leads to lower sales for vendors that signed up for the exhibition. Such scenarios are why organizers tend to have hefty entry fees to make proper communication about the exhibition.

Prestigious and popular exhibitions and venues tend to have higher entry fees. They have to spend significantly on a number of events, amenities, guests, and various other things by increasing the fee and limiting the number of MSMEs entering such exhibitions with their offerings.

This is where the unorganized sector of the exhibitions industry in the country is thriving, where lower entry fees entice the vendors to be part of the exhibition. However, major vendors are expecting to lose on such businesses as these are significantly popular in B2C markets.

In addition to the entry fee, other regulations such as prior membership, associations, alliances, etc., tend to discourage new entrants from entering the market. Certain events tend to offer invitations only to specific association members, limiting the entry of various other vendors operating in specific industries, thus limiting the footfall.

KEY INDUSTRY REGULATIONS AND POLICIES

The following is an overview of the certain sector specific Indian laws and regulations which are relevant to our business. The tax related statutes and applicable shops and establishment statutes, labour laws and other miscellaneous regulations and statutes apply to us as they do to any other Indian company.

The information detailed in this section has been obtained from various statutes, regulations and/or local legislations and the bye laws of relevant authorities that are available in the public domain. The description of laws and regulations set out below is not exhaustive and is only intended to provide general information and is neither designed nor intended to be a substitute for professional legal advice. For details of government approvals obtained by us in compliance with these regulations, see “Government and Other Approvals” beginning on page 172. The statements below are based on the current provisions of Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

Industry Specific Laws

The Transfer of Property Act, 1882 (the “TP Act”)

The TP Act establishes the general principles relating to transfer of property in India. It deals with the various methods in which transfer of immovable property including transfer of any interest in relation to that property takes place. The TP Act stipulates the general principles relating to the transfer of property including, among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. The TP Act also provides for the rights and liabilities of the vendor and purchaser, and the lessor and lessee in a transaction of sale or lease of land, as the case may be. The TP Act also covers provisions with respect to mortgage of property.

The Registration Act, 1908 (the “Registration Act”)

The Registration Act has been enacted with an objective, amongst other things, to provide a method of public registration of documents so as to give information to people regarding legal rights and obligations arising or affecting a particular property, and to perpetuate documents which may afterwards be of legal importance, and also to prevent fraud. The Registration Act details the formalities for registering an instrument. Further, the Registration Act identifies documents for which registration is compulsory and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in any immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. A document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the Transfer of Property Act, 1882 or as collateral), unless it has been registered. So an event planner has to seek license from the owner of the property to use the venue for hosting the event. Here it is worth mentioning that it is the duty of the event manager to ensure that the venue which s/he has hired for hosting the event is as per the needs and demand of the event.

Indian Easements Act, 1882 (the “Easements Act”)

An easement is a right which the owner or occupier of land possesses for the beneficial enjoyment of that land and which permits him to do or to prevent something from being done, in or upon, land not his own. Under the Easements Act, a license is defined as a right to use property, which use in the absence of such right would be unlawful. The period and incident upon which a license may be revoked may be provided in the license agreement entered into between the licensee and the licensor.

Shops and Establishments Act

Under the provisions of local shops and establishments legislations applicable in the states in which such establishments are set up, establishments are required to be registered. Such legislations regulate the working and employment conditions of the

workers employed in shops and establishments including commercial establishments and provide for fixation of working hours, rest intervals, overtime, holidays, leave, termination of service, maintenance of shops and establishments and other rights and obligations of the employers and employees. Our convention and exhibition centres have to be registered under the shops and establishments legislations of the states where they are located.

Consumer Protection Act, 2019 (the “Consumer Protection Act”) and the rules made thereunder

The Consumer Protection Act was enacted to provide a simpler and quicker access to redress consumer grievances, including in course of both online and offline transactions. It seeks to promote and protects the interest of consumers against deficiencies and defects in goods or services and secure the rights of a consumer against unfair trade practices, which may be practiced by manufacturers, service providers and traders. It establishes consumer disputes redressal forums and commissions at the district, state and national levels for the purpose of redressal of consumer grievances and a central consumer protection authority (“**Central Authority**”), with wide powers of enforcement, to regulate matters relating to violation of consumer rights, unfair trade practices and misleading advertisements. The Central Authority has the ability to inquire into violations of consumer rights, investigate and launch prosecution at the appropriate forum, pass orders to recall goods, impose penalties and issue safety notices to consumers against unsafe goods. It also introduces product liability, which can hold the product seller liable for compensation claims.

Fire Precautions Regulation Act

The act deals with safety from fire. It specifies the demarcation of fire zones, restrictions on construction of buildings in each fire zone, classification of buildings based on occupancy, and types of building construction according to fire resistance of the structural and non-structural components. The act also deals with other restrictions and requirements necessary to minimize danger to life from fire, smoke, fumes or panic before the buildings can be evacuated. The event organizers must keep all these specifications in mind while constructing the event premise. Also, the fire protection techniques have to be based on the fire behavior characteristics of different materials and structural elements used in venue designing.

Goods and Services Tax (GST)

The Goods and Service Tax (GST) in India was introduced on 1st July 2017. After the introduction of GST, the entire tax legislation has undergone a paradigm shift. Former taxes levied by central and state government including - value added tax (VAT), service tax, excise duty, additional custom duty tax, state level entertainment tax, entry tax and surcharges have now got subsumed (included) into the GST legislation. However customs duty collected by the Central Government on import of goods into India and entertainment tax levied by local bodies (such as panchayats and municipalities) continue to remain outside the ambit of GST legislation and shall be applicable as separate levies, over and above GST. The GST bill has a four-tier structure, namely 5 per cent, 12 per cent, 18 per cent and 28 per cent. This means that tax will be levied at rate baskets ranging from 5 to 28 per cent. Events come under GST legislation as they are classified as a supply service under GST.

The GST has the following implications on the event industry:

- Sponsorships which form a significant chunk of revenue generation for any event is subject to GST under the reverse charge mechanism.
- The event organizer has to specifically obtain GST registration to incur location-specific expenses in the state where the event will happen and such expenses will take place.
- For mega event companies, overall, GST has a positive impact because the entertainment tax on events has got subsumed in GST. For example, earlier when one was watching an IPL match, s/he was paying 25 per cent entertainment tax and 15 per cent service tax; this was almost 40 per cent on the ticket price. However, with GST, it will go down to 28 per cent.
- Most of the third party services have been capped at 28 per cent tax which will free the MICE Industry of India from the burden of multiple taxation systems.
- Credit of GST levied on supplies of food and beverages and outdoor catering, beauty treatment services and rent a cab is specifically disallowed under the GST legislation, eventually resulting in cost inflation for event organizers.

Intellectual Property Laws

Certain laws relating to intellectual property rights applicable to us are as follows:

The Copyright Act, 1957 (the “**Copyright Act**”) governs copyright protection in India. Even while copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration under the Copyright Act acts as a prima facie evidence of the particulars entered therein and helps expedite infringement proceedings and reduce delay caused due to evidentiary considerations.

The Trade Marks Act, 1999 (the “**Trade Marks Act**”) provides for the process for making an application and obtaining registration of trade marks in India. The purpose of the Trade Marks Act is to grant exclusive rights to marks such as a brand, label, heading, etc. and to obtain relief in case of infringement of such marks for commercial purposes. The Trade Marks Act prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely for applying trademarks.

Foreign Trade (Development and Regulation) Act, 1992 (“FTA”) and the Foreign Trade (Regulation) Rules, 1993 and the Foreign Trade Policy, 2015-20

The FTA seeks to increase foreign trade by regulating imports and exports to and from India. It authorizes the government to formulate as well as announce the export and import policy and to keep amending the same on a timely basis. The government has also been given a wide power to prohibit, restrict and regulate the exports and imports in general as well as in specified cases of foreign trade. The FTA read with the Indian Foreign Trade Policy, 2015-20 (extended till March 31, 2022) provides that no person or company can make exports or imports without having obtained an importer exporter code (“**IEC**”) number unless such person or company is specifically exempted. An application for an importer exporter code number has to be made to the Office of the Director General of Foreign Trade, Ministry of Commerce (“**DGFT**”). An importer-exporter code number allotted to an applicant is valid for all its branches, divisions, units and factories. Failure to obtain the IEC number shall attract penalty under the FTA.

Foreign Investment Laws

Foreign investment in India is governed by the provisions of the FEMA along with the rules, regulations and notifications made by the Reserve Bank of India, including the FEMA Rules, as amended thereunder, and the consolidated FDI Policy (“**FDI Policy**”) issued by the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“**DPIIT**”, *earlier known as Department of Industrial Policy and Promotion*). The FDI Policy consolidates all the press notes, press releases, and clarifications on FDI issued by DPIIT. Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the approval route.

Environmental laws

The Environment (Protection) Act, 1986 (“EPA”), Environment Protection Rules, 1986 (the “EP Rules”) and the Environmental Impact Assessment Notification, 2006 (“EIA Notification”)

The EP Act has been enacted for the protection and improvement of the environment. EP Act empowers the government to take all measures to protect and improve the quality of environment, such as by laying down standards for emission and discharge of pollutants, providing for restrictions regarding areas where industries may operate and laying down safeguards for handling hazardous substances, amongst others. It is in the form of an umbrella legislation designed to provide a framework for Central Government to coordinate the activities of various central and state authorities established under previous laws. It is also in the form of an enabling law, which delegates wide powers to the executive to enable bureaucrats to frame necessary rules and regulations.

The Water (Prevention and Control of Pollution) Act, 1974 (“Water Act”)

The Water Act aims to prevent and control water pollution and to maintain or restore wholesomeness of water. The Water Act provides for one Central Pollution Control Board, as well as state pollution control boards, to be formed to implement its provisions, including enforcement of standards for factories discharging pollutants into water bodies. Any person intending to

establish any industry, operation or process or any treatment and disposal system likely to discharge sewage or other pollution into a water body, is required to obtain the consent of the relevant state pollution control board by making an application.

The Air (Prevention and Control of Pollution) Act, 1981 (“Air Act”)

The Air Act aims to prevent, control and abate air pollution, and stipulates that no person shall, without prior consent of the relevant state pollution control board, establish or operate any industrial plant which emits air pollutants in an air pollution control area. They also cannot discharge or cause or permit to be discharged the emission of any air pollutant in excess of the standards laid down by the State Boards. The Central Pollution Control Board and the state pollution control boards constituted under the Water Act perform similar functions under the Air Act as well. Pursuant to the provisions of the Air Act, any person establishing or operating any industrial plant within an air pollution control area, must obtain the consent of the relevant state pollution control board prior to establishing or operating such industrial plant.

IV. Depreciation & Amortization:

Property, Plant & Equipment:

Depreciable amount of assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. An impairment loss is charged to the Statement of Profit and Loss in the period/year in which an asset is identified as impaired. The impairment loss recognised in prior accounting periods is reversed if there has been a change in the estimate of the recoverable value.

X. Other Income:

XII. Earning Per Share

Basic earning per share is computed by dividing the profit/ (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity share outstanding during the period. Diluted earning per share is computed by dividing the profit/ (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

XIII. Taxation & Deferred Tax

Income taxes are accounted for in accordance with Accounting Standard (AS-22) – “Accounting for taxes on income”, notified under Companies (Accounting Standard) Rules, 2014. Income tax comprises of both current and deferred tax.

Current tax is measured on the basis of estimated taxable income and tax credits computed in accordance with the provisions of the Income Tax Act, 1961.

The tax effect of the timing differences that result between taxable income and accounting income and are capable of reversal in one or more subsequent periods are recorded as a deferred tax asset or deferred tax liability. They are measured using substantially enacted tax rates and tax regulations as of the Balance Sheet date.

Deferred tax assets arising mainly on account of brought forward losses and unabsorbed depreciation under tax laws, are recognized, only if there is virtual certainty of its realization, supported by convincing evidence. Deferred tax assets on account of other timing differences are recognized only to the extent there is a reasonable certainty of its realization.

XIV. Foreign Exchange Transaction:

XV. Segment Reporting:

The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments on the basis of their relationship to the operating activities of the segment. Inter-segment revenue is accounted on the basis of transactions which are primarily determined based on market / fair value factors. Revenue and expenses have been identified to segments on the basis of their relationship to the operating activities of the segment.

Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under “unallocated revenue / expenses / assets / liabilities”

XVI. Lease:

Lease is classified as a finance lease if it transfers substantially all the risks and rewards incident to ownership. Title may or may not eventually be transferred. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incident to ownership. The Company has leasehold land under the arrangement of finance lease as the ownership will be transferred at the end of lease term.

At the inception of a finance lease, the lessee should recognize the lease as an asset and a liability. Such recognition should be at an amount equal to the fair value of the leased asset at the inception of the lease. However, if the fair value of the leased asset exceeds the present value of the minimum lease payments from the standpoint of the lessee, the amount recorded as an asset and a liability should be the present value of the minimum lease payments from the standpoint of the lessee. In calculating the present value of the minimum lease payments, the discount rate is the interest rate implicit in the lease, if this is practicable to determine; if not, the lessee’s incremental borrowing rate should be used.

Lease payments should be apportioned between the finance charge and the reduction of the outstanding liability. The finance charge should be allocated to periods during the lease term to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Diluted earning per share is computed by dividing the profit/ (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

XII. Taxation & Deferred Tax

Income taxes are accounted for in accordance with Accounting Standard (AS-22) – “Accounting for taxes on income”, notified under Companies (Accounting Standard) Rules, 2014. Income tax comprises of both current and deferred tax.

Current tax is measured on the basis of estimated taxable income and tax credits computed in accordance with the provisions of the Income Tax Act, 1961.

The tax effect of the timing differences that result between taxable income and accounting income and are capable of reversal in one or more subsequent periods are recorded as a deferred tax asset or deferred tax liability. They are measured using substantially enacted tax rates and tax regulations as of the Balance Sheet date.

Deferred tax assets arising mainly on account of brought forward losses and unabsorbed depreciation under tax laws, are recognized, only if there is virtual certainty of its realization, supported by convincing evidence. Deferred tax assets on account of other timing differences are recognized only to the extent there is a reasonable certainty of its realization.

Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under “unallocated revenue / expenses / assets / liabilities”

XV. Lease:

Lease is classified as a finance lease if it transfers substantially all the risks and rewards incident to ownership. Title may or may not eventually be transferred. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incident to ownership. The Company has leasehold land under the arrangement of finance lease as the ownership will be transferred at the end of lease term.

At the inception of a finance lease, the lessee should recognize the lease as an asset and a liability. Such recognition should be at an amount equal to the fair value of the leased asset at the inception of the lease. However, if the fair value of the leased asset exceeds the present value of the minimum lease payments from the standpoint of the lessee, the amount recorded as an asset and a liability should be the present value of the minimum lease payments from the standpoint of the lessee. In calculating the present value of the minimum lease payments, the discount rate is the interest rate implicit in the lease, if this is practicable to determine; if not, the lessee's incremental borrowing rate should be used.

Lease payments should be apportioned between the finance charge and the reduction of the outstanding liability. The finance charge should be allocated to periods during the lease term to produce a constant periodic rate of interest on the remaining balance of the liability for each period.
