2. *Substantial portion of our revenues has been dependent upon limited number of customers and we do not have firm commitment supply agreements with our customers. If our customers choose not to source their requirements from us, our business and results of operations may be adversely affected.*

We derive and may continue to derive a significant portion of our revenue from a relatively limited number of clients. During the three months period ended June 2021 and fiscal year ended 2021, we derived 57.19 % and 54.06 % of our total revenue respectively from our top five clients. Significant dependence on certain clients may increase the potential volatility of our results of operations, if we are unable to expand the volumes of our business with our existing clients, maintain our relationship with our key clients or diversify our client base. Further, any significant reduction in demand for our products from our key clients, any requirement to lower the price offered by these clients, or any loss or financial difficulties caused to these clients, or bad debts of the dues from these clients, or change in relationship with the clients could have a material adverse effect on our business, result of operations, financial conditions and cash flow.

We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we strive to add new customers in the normal course of business. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods, or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

3. *Our reliance on third parties for certain aspects of our business like transportation and logistics exposes us to certain risks.*

We rely on third parties for manpower required for the manufacture of our products, as well as for performance of certain functions and services carried out at our manufacturing and office premises. We also rely on third party transporters for logistics support. Our reliance on third parties may affect our timelines for making delivery to our customers.

As we rely on transport and logistics service providers for transporting a portion of our product supplies, any failure on their part to perform their services in the expected manner could result in us breaching our committed delivery timelines. Factors such as the financial instability of suppliers, vendors' non-compliance with applicable laws, labour disputes, currency fluctuations, changes in tariff or import policies, severe weather, political uncertainty, terrorist attacks and transport capacity and cost may disrupt our supply chains, which may result in increased costs or delivery delays. Therefore, there is no assurance that third party will be able to meet their contractual commitments to us, or that we will not be required to incur additional costs to remedy any deficiencies in their services. A significant disruption in the availability of third-party services may, in turn, disrupt our operations and adversely affect our inventory management, business and financial condition, at least until alternative sources are arranged.

4. *Our operations have significant raw material requirements, and we may not be able to ensure the availability of the raw materials at competitive prices, which may adversely affect results of our operations.*

The success of our operations depends on our ability to source raw materials at competitive prices. We procure various raw materials required for the manufacturing of our Protein Powder and Malt Powder. Principal raw materials that we use in our manufacturing process are Soya Flour, Soya Protein, Skimmed Milk Protein, Sugar, among others. We also purchase products which we use directly as input materials, including materials which do not require any processing. We procure these raw materials from various suppliers in the industry.

Increase in the competition and / or our competitors having established operations and long-term relationships with suppliers may see us facing challenges to secure adequate supply of raw materials or may increase our overall cost of raw materials. Presently, we have not entered into any firm arrangement for purchase of our raw material. Historically, we have not encountered any problems in sourcing our raw materials. However, there is no assurance that third party suppliers will be able to meet their commitments to us, or that we will not be required to incur

additional costs to remedy any deficiencies in their services or to obtain alternative sources of supply in the event that our suppliers should default or be delayed in their performance.

Further, our raw material suppliers may fail to consistently deliver products of acceptable quality and within stipulated schedules, which may adversely affect our operations. We may be required to replace a vendor if its products do not meet our quality or performance standards or if a vendor should unexpectedly discontinue operations due to reasons beyond its or our control (including financing constraints caused by credit market conditions).

There can be no assurance that there will not be a significant disruption in supply of raw material which may, in turn, disrupt our operations and adversely affect our inventory management, business and financial condition, at least until alternative sources of supply of goods and services are arranged. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices. Change in cost and availability of such raw materials for any reason, including change in the approved suppliers would adversely affect our business, financial condition, results of operations and prospects.

5. *Our Company has taken unsecured loans that may be recalled by the Directors cum Promoter or relative of directors at any time.*

Our Company have currently availed unsecured loans which may be called by such lenders at any time. As at June 30, 2021, the unsecured loan amounting Rs 35.77 Lakhs were due to our Directors cum Promoter, relatives of Directors. In the event that such lenders seeks further repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Also there is no formal agreement with lenders. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, please refer chapter titled “Restated Financial Information” on Page no.127 of Draft Prospectus.

6. *Our business largely depends on the performance of our distributors.*

Any nonperformance by these distributors may adversely affect our business operations, profitability and cash flows. We mainly sell our products directly to distributors/stockiest/super stockiest who in turn take forward the supply chain. Our business hence largely depends on the performance of our distributors, who may be responsible for selling our products to end users at domestic. Currently, we have distributors/stockiest/super stockiest for our Domestic and international markets. We can give no assurance that the performance of such distributors will meet our required specifications or performance parameters. Such distributors are independent third parties over which we do not have control. Additionally, we do not have any non-compete agreement with such distributors and in the event that such distributors enter into agreements with competitors, we may not be able to take any course of action. Similarly, we are restricted from directly involving ourselves in marketing services in certain countries where these distributors are located. As a result, our growth, results of operations and the integrity of our brand name in these areas is dependent on the performance of these distributors. Moreover, there can be no assurance that our distributors will be able to generate adequate revenue consistently, and we may be exposed to credit risks associated with non-payment or untimely payments from our distributors.

7. *We do not own our Registered office, Corporate Office or Manufacturing unit facility from which we carry out our business activities.*

Any termination or dispute in relation to these rental agreements may have an adverse effect on our business operations and results thereof. We do not own the Registered Office, Manufacturing Unit Facility, Corporate Office from which we operate. The said offices are taken by us on lease basis from the Promoter and Promoter group of the Company. As per the leave & license agreements, non-payment or default in payment of rentals or violation of any term of rent agreement may require us to vacate the said premises which may cause disruption in our corporate affairs and business and impede our effective operations and thus adversely affect our profit ability. We also cannot assure that lessor will not terminate the rental agreement prior to expiry or at the time of expiry of the agreement, which would require us to locate to another premise and may have an adverse effect on conducting our business operations. For further details regarding the premises, please refer to chapter “Our Business” on page 74 of this Draft Prospectus.

8. *The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.*

An outbreak of a novel strain of coronavirus (COVID-19) was recognized by the World Health Organization as a public health emergency of international concern on January 30, 2020, and as a pandemic on March 11, 2020. The outbreak of COVID-19 has significantly and adversely impacted and will likely continue to impact economic activity and has contributed to significant volatility in global financial markets and led to operational challenges. It is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, stagnation, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. In particular, a number of governments and organizations have revised GDP growth forecasts for 2020 downwards in response to the economic slowdown caused by the spread of COVID-19, and it is possible that the COVID-19 pandemic will cause a prolonged global economic crisis or recession.

In response to the COVID-19 outbreak, the governments of many countries, including India have taken preventive or protective actions, such as issuing advisories and imposing country or state wide lockdowns, including restrictions on travel and temporary closure of business operations and increased remote working protocols, which have significantly slowed down economic activity. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown announced on March 24, 2020. While there have been progressive relaxations and calibrated easing of lockdown measures by the Government, we cannot predict if stricter lockdowns will not be re-introduced or extended in the future. On account of the government imposed lockdown in India, operations at our R&D unit were temporarily shut down with effect from March 24, 2020 and resumed operations in accordance with permissions from the local authorities. The COVID-19 pandemic and resulting government actions may affect our business, results of operations and financial condition, in the future, in a number of ways such as requiring a complete or partial closure of our operations.

After the first wave, we engaged in the marketing of sanitizers and trading of Disposable Masks, PPE kits etc, our products were identified as essential goods and our operations were not shut down. However our other operations came to a standstill. The demand for PPE kits and Sanitizers increased manifolds during the pandemic which had a positive impact on our business. However, due to limited availability of logistics and supply chain constraints, we were impacted during the initial period of the lockdown. We continued our operations after making arrangements to meet the government’s requirements on sanitization, people movement and social distancing.

There is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we will not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, financial condition and results of operations. The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will depend on future developments, including the timeliness and effectiveness of actions taken or not taken to contain and mitigate the effects of COVID-19 both in India and internationally by governments, central banks, healthcare providers, health system participants, other businesses and individuals, which are highly uncertain and cannot be predicted. This could lead to, among others, suspension / slowdown of our operations, shortage of manpower, delay in inspection of work done and corresponding certification being provide, etc, which could adversely impact our revenue and profitability. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and are likely to be severe. To the extent that the COVID19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this “Risk Factors” section.

9. *We intend to repay certain loan facilities availed from our Director from the IPO Proceeds.*

One of the objects of the Issue is the prepayment / repayment of certain loan facilities, in full or in part, availed by our Company. We intend to use the proceeds from the Issue to repay part of the loans availed from our Director. As of June 30 2021, we have availed an aggregate of 43.32 lakhs of unsecured loans from them and these loans were utilized for working capital needs & other funding requirements of the Company from time to time. We intend to repay an aggregate of ₹ 25.00 lakhs of the said outstanding loan. We believe that the proposed repayment will enable us to improve our debt-equity ratio and reduce the total unsecured loans. For details of the outstanding loans proposed for repayment or prepayment, in full or in part from the Net Proceeds, refer the chapter “*Objects of the Issue*” on page 58 of this Draft Prospectus. The amount utilized to prepay / repay these loans will, therefore, not be available for investment in our business and will not result in any immediate increase in the value of your investment in our Equity Shares.

10. If we are unable to compete successfully with our competitors, our market position and profitability could be adversely impacted.

Our Company faces stiff competition from domestic as well as global market. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. The basis of competition includes introduction of other manufacturers manufacturing products in direct competition with our products, market for the products and type of product such as new products, product range, price etc. Furthermore, we may not be able to differentiate our products from those of our competitors; to successfully develop or introduce new products on a timely basis or at all that are less costly than those of our competitors; or to offer customers payment and other commercial terms as favorable as those offered by our competitors. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue.

There is no assurance that we will continue to compete successfully in future. Some of our competitors may be able to price their products more attractively or may be able to distribute their products more effectively through establishing better distribution networks, or may have greater access to capital, superior marketing and other resources. If we are unable to remain sufficiently competitive, or are unable to keep pace with them, our business and operating results will be adversely affected.

11. Strong competition in the Ayurvedic & Herbal Medicine sector could decrease the market share and compel the company to either reduce the cost charged or increase the sales prices being charged to the end consumer. In either of the cases, we may have an adverse impact on the revenues and profitability.

The industry in which we are operating is highly and increasingly competitive and unorganized. The competitive pricing and other factors may adversely affect our results of operations and financial condition. Competition may result in pricing pressures, reduced profit margins or loss market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

12. Our Company has reported certain negative cash flows from its operating, investing and financing activities on the basis of Restated Financial Statements, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its operating, investing and financing activities in the previous years. Following are the details of our cash flow position during the last three financial years and three months period ended June 30, 2021 based on restated financial statements:-

(₹in lakhs)

Particulars	For Period Ended June 30, 2021	For the Year Ended March 31,		
		2021	2020	2019
Net Cash Generated from Operating Activities	(3.67)	(44.98)	244.08	18.46
Net Cash Generated from Investing Activities	(0.66)	(9.38)	(0.05)	(0.78)
Net Cash Generated from Financing Activities	9.36	44.08	(237.31)	(17.58)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For details, please see “Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our company” on page 147 of this Draft Prospectus.

13. We do not have our own manufacturing facility for the Allopathic Pharmagoods which are marketed by us and we have to rely on third parties for procuring products sold by our Company.

We are engaged in marketing, trading and distribution of wide range of pharmaceutical formulation products, Herbal and FMCG products. As on date of Draft Prospectus, we do not have our own manufacturing facility for Allopathic Pharma products, and we have to rely on third parties for manufacturing the formulation products, which are marketed by us under our own brand names. Any decline in the quality of products manufactured by

third parties or delay in delivery of products by such parties, may adversely affect our operations. Further there can be no assurance that such parties shall continuously provide their products to us or would not cater to demand of our competitors. Any withdrawal of services from such manufacturers or supply of services to competitors at better rates may adversely affect our result of operations and future prospects.

14. Although our company is engaged in Manufacturing of Ayurvedic, Cosmeceuticals, Wellness and Food supplement products of our own and also for third party, we have low net profit margins as compared to industry standards.

Although our company is engaged in Manufacturing of Ayurvedic, Cosmeceuticals, Wellness and Food supplement products of our own and also for third party in Domestic market. Our company had reported net profit margins of 1.25 %, 0.98 %, 0.91% and 0.00 % for the three month period ended June 30, 2021 and financial year ending March 31, 2020, 2019, and 2018 respectively. Due to lower margins, we have lower EPS for our shareholders and it may continue to do so. If the margins do not increase over time, we may continue to earn lower profits on higher revenues resulting in slower growth and affect overall financial condition. The management believes that lower margins are mainly due to non-compromise on quality and compliance which is beneficial in the long run. If we are unable to increase our margins, it may affect our growth prospects, profitability, operations and overall financial condition along with ability to absorb the fixed costs, if any, for the producers of new and innovative products.

15. The company is in Process to make its corporate office its new registered office from where major of the business is being conducted and all records and books of accounts are maintained.

The company is in Process of changing registered office, from 105, 1st Floor, Barodia Tower, Plot No 12, D Block Central Market Prashant Vihar New Delhi New Delhi DL 110085 to Jeevan Vihar extension, Near Shubham Garden, Murthal Road, Sonipat, Haryana-131001. Our shareholders have approved the same in EGM dated November 20, 2021 and the forms are currently filed with Registrar of Companies and in process of approval. All records and documents pertaining to Business and Books of accounts are being maintained at our corporate office situated at B-Wing, Shubham Garden Complex, Murthal Road, Sonipat, Haryana- 131001. Our current registered office is not fully shut down till it is changed in the records of regulators. We shall have to obtain new government approval as per the local government body requirement once our registered office is changed.

Due to the above mentioned change our new customers and other authorities/personnel who are unaware of the fact may not be able to reach out of us in our current registered office, which could adversely affect our Business, and hence revenue may be impacted.

16. Marketing and distribution of Our Company's products are not directly handled by it.

The Company does not handle the marketing of its own products directly. These are marketed through a wide network of distribution channel consisting of approximately 75 distributors in the country. Marketing and sales is duly monitored by the company to ensure effective marketing. Accordingly, any shortcomings in the performance would impact the revenues and profitability of the Company. The sales of the Company's products are largely dependent on the actions of their dealers. These dealers represent the Company in front of the end users of its products and their performance and attitude reflect on the Company. These dealers are being trained and are continued to be under close and continuous monitoring. While dealers are monitored regularly through monthly checks by marketing field force, there can be no assurance that such measures will prove effective in deterring or detecting undesirable behavior on the part of the Company's dealers. Failure to effectively monitor and control the distribution network of dealers could adversely affect the Company's revenue and brand image.

17. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends on our key managerial personnel and our ability to attract and retain them. Any loss of our key person could adversely affect our business, operations and financial condition.

The success of our business operations is attributable to our Promoter, Directors and the technical team. We believe that our relation with our Promoter, who has rich experience in markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. Our Promoter has been actively involved in the day-to-day operations and management since the incorporation of the Company. Further, our Promoter has also promoted other companies/ firms/ ventures and may continue to do so. If there is any diversion of his attention

to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoter or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

We also depend significantly on the expertise, experience and continued efforts of our technical and servicing team, hence, our performance and success substantially depends on the ability to attract and retain our key employees, including our management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could seriously impair our ability to continue to manage and expand our business. Our success is also dependent on our continuous ability to identify, hire, train retain and motivate R&D team, technical team and sales and marketing personnel. Competition for personnel in our industry is intense, and the availability of suitable and qualified candidates is limited. If we fail to hire and retain our employees, the loss of their services could harm our business operations and financial condition could be adversely affected.

18. Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company has entered into certain transactions with our related parties including our Promoters, Promoter Group, Directors and their relatives and our Group Entities. There are various sales and purchase transactions too with our Group Entities amounting to Rs. 26.86 lakhs and Rs. 69.40 lakhs for the period/ year ended June 30, 2021 and March 31, 2021 respectively. For details, please see “Annexure XXVI- “Related Parties Transaction” of Restated Financial Statements” on page 127 of this Draft Prospectus.

While we believe that all such transactions have been conducted on the arm’s length basis, we cannot assure you that we might have obtained more favorable terms had such transactions been entered into with unrelated parties. Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate will not have an adverse effect on our business, results of operations, cash flows and financial condition.

19. The availability of counterfeit drugs, such as drugs passed off by others as our products, could adversely affect our goodwill and results of operations.

Entities in India and abroad could pass off their own products as ours, including counterfeit or pirated products. For example, certain entities could imitate our brand name, packaging materials or attempt to create look-alike products. As a result, our market share could be reduced due to replacement of demand for our products and adversely affect our goodwill. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

20. We are dependent upon few suppliers for our raw material for our current manufacturing facilities. In an eventuality where our suppliers are unable to deliver us the required materials in a time-bound manner it may have a material adverse effect on our business operations and profitability.

For the period ended June 30, 2021 and year ended March 31, 2021 our top 10 suppliers contributed around 88.19 % and 79.23 % respectively and top 5 suppliers contributed around 69.68 % and 68.22% of our purchases. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to source our raw material on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition. Any problems faced by our suppliers in their manufacturing facilities resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customer’s requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

21. If we inadvertently infringe on the patents of others, our business may be adversely affected.

We operate in an industry characterized by extensive patent litigation, including frivolous litigation by competitors to delay grant of patent. Patent litigation can result in significant damages being awarded and injunctions that could prevent the sale of certain products or require us to pay significant royalties in order to continue to sell such products. While it is not possible to predict the outcome of patent litigation, we believe any adverse result of such litigation could include an injunction preventing us from selling our products or payment of significant damages or

royalty, which would affect our ability to sell current or future products or prohibit us from enforcing our rights against others. The occurrence of any of these risks could adversely affect our business, financial condition and results of operations.

22. *In addition to normal remuneration, other benefits and reimbursement of expenses of our Directors and key managerial personnel(including our Promoter) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors/ Promoter or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Promoter will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

23. *Product liability and other civil claims and costs incurred as a result of product recalls could have a material adverse effect on our business.*

Due to the nature of our business, we face an inherent business risk of exposure to product liability or recall claims in the event that our products fail to meet the requirements as set by the standards and we may be subject to claims resulting from our manufacturing defects or negligence in storage, packaging or handling etc. Even unsuccessful product liability claims would likely require us to incur substantial expenses on litigation, divert management's time, adversely affect our goodwill and impair the marketability of our products. We are liable for the quality of the products we manufacture, for the duration of their shelf life. While we follow stringent quality control processes and quality standards, there can be no assurance that our products would be of uniform quality, we cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims, which could have a material adverse effect on our business, financial condition or results of operations.

24. *Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.*

Our business operations require us to obtain and renew from time to time, certain approvals, licenses, registration and permits, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. If we fail to maintain such registrations and licenses or comply with applicable conditions, then such respective regulatory can impose fine on our company or suspension and/or cancellation the approval/licenses which may affect our business adversely. Some of the permits, licenses and approvals etc. are granted for a fixed period of time and may expire and for which we may have to make an application for obtaining the approval or its renewal.

Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. Moreover, there can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Further, certain statutory and regulatory authority may put certain terms and conditions, which are required to be complied with by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. For more information on the various statues applicable to our company, please refer chapter titled "Key Industry Regulations and Policies" appearing on Page no. 97 of this Draft Prospectus

25. *Any change in the regulations, enforcement procedures or regulatory policies established by regulatory agencies could increase the costs or time of development of our products and delay or prevent sales of our products and our revenues could decline and we may not achieve profitability.*

Our products generally must receive regulatory clearance from appropriate regulatory authority before they can be sold. Any change in the regulations, enforcement procedures or regulatory policies set by the regulatory agencies could increase the costs or time of development of our products and delay or prevent sales of our products. We cannot determine what could be the future effect on our business pursuant to changes in regulations, statutes, legal interpretation or policies, when and if promulgated, enacted or adopted. These could vary from changes in manufacturing methods to labeling process to changes in regulatory filing process. Such changes, or new legislation, could increase the costs or delay or prevent sales of our products and our revenues may decline and we may not be able to achieve profitability. With respect to environmental, safety and health laws and regulations, we cannot accurately predict the outcome or timing of future expenditures that we may be required to make in order to comply with such laws as they apply to our operations and manufacturing facilities. In addition, increase in the time that is required for us to obtain regulatory approval could delay our commercialization of new products.

26. If we do not maintain and increase the number of our arrangements for the distribution of our products, our business, results of operations and financial condition could be adversely affected.

Our reliance on, and inability to control, local sale, marketing and distribution agents could adversely affect our business, financial condition and results of operations. We may not be able to find suitable partners or successfully enter into arrangements on commercially reasonable terms or at all. Additionally, our distribution partners may make important marketing and other commercial decisions concerning our products without our input. As a result of these arrangements, many of the variables that may affect our business, are not exclusively within our control. Moreover, we retain some of our partners and distributors on a non-exclusive basis, which allows them to engage with our competitors. We also compete for partners with other leading Ayurvedic and herbal medicine companies that may have more visibility, greater brand recognition and financial resources, and a broader product portfolio than we do. If our competitors provide greater incentives to our partners, our partners may choose to promote the products of our competitors instead of our products. Our dependence on distribution partnerships to market some of our products may subject us to a number of risks, including:

- not being able to control the amount and timing of resources that our partners may devote to the marketing of our products;
- our partner's marketing our products outside their designated territory, possibly in violation of the exclusive distribution rights of other distributors;
- financial difficulties; and
- significant changes in a partner's business strategy that may adversely affect its willingness or ability to fulfill its obligations under any arrangement.

27. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

The Company has been handling labour and related issues efficiently and this has contributed to the smooth functioning of the operations. The Company is conscious about the need for introducing more automation in the operations. Labour intensive operations call for good monitoring and maintenance of relations. Non-availability of labourers and/or any dispute between the labour and management may affect the business operation of the Company.

28. Our Company is dependent on the continuing operation of our manufacturing facilities.

Any significant interruption in manufacturing at our facilities could have a material adverse effect on our business, results of operations and financial condition. Our manufacturing facilities are concentrated in a single region and all of the products are manufactured at one location. These facilities are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, industrial accidents, power interruptions etc. Further, any materially adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing facilities could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of, or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cashflows and future business prospects.

29. *Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.*

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high Debtors which may result in a high risk in case of non-payment by these Debtors. In the event we are not able to recover our dues from our Debtors, we may not be able to maintain our Sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors and we may be forced to go for Corporate Debt Restructuring (CDR) which may result in adversely affecting our operations and future prospects.

30. *The shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.*

Our manufacturing process requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involve significant capital expenditure and per unit cost of electricity produced is very high. Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

31. *Our business requires us to obtain and renew certain licenses and permits from government, regulatory authorities and the failure to obtain or renew them in a timely manner may adversely affect our business operations Government approvals*

Our business requires us to obtain and renew from time to time, certain approvals, licenses, registrations and permits, some of which have expired and for which we have either made or are in the process of making an application for obtaining the approval or its renewal. In addition, we require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by authorities such as the Government of India, the State Governments and certain other regulatory and government authorities, for operating our business.

Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have an adverse effect on our business, financial condition and results of operations. Further, we cannot assure that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations. For further details, please refer to the section titled “Government and Other Approvals” on page 165 of this Draft Prospectus

32. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income.

33. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications.

In addition, disruptions in the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or reasons beyond our control, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

34. *Failure to protect our intellectual property may adversely affect our reputation, goodwill and business operations.*

As on the date of this Draft Prospectus, we have not yet obtained registration for our corporate logo and some our products which are sold under the brand name of “Fabino” and hence we do not enjoy the statutory protection accorded to a registered trademark. Additionally, we have not made any application for the registration of the same. We may remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our logo and product name, which may adversely affect our reputation and business and could require us to incur additional costs. Further, the trademarks as mentioned in the chapter titled “Our Business” on page no 74, belong to our Director Atul Kumar Jain. The said trademarks are being used by the Company vide No Objection Certificate (“NOC”) granted by our director Atul Kumar Jain. If our Director withdraws, refuses to renew or terminates this arrangement, we will not be able to make use of the said trademark and name in connection with our business. Some of the trademarks have expired and are under the process of renewal. Any failure to renew registration of our registered trademarks may affect our right to use them in future. Additionally, our Company has filed one trademark applications for the registration of word which has currently been objected to, by the concerned parties. Accordingly, our Company may be required to resort to litigations or other proceedings to enforce, protect or determine the validity and scope of our intellectual property rights, in respect of the aforesaid objected trademark and to defend against third party infringements, which may be expensive and resource-consuming and may also create uncertainty regarding the ownership of such rights.

We believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For further details pertaining to our intellectual property, please refer to the chapter titled “Our Business” beginning on page no 85 of this Draft Prospectus.

35. *Our failure to keep our technical knowledge confidential could erode our competitive advantage.*

We possess certain technical knowledge about our products. Our technical knowledge is a significant independent asset, which may not be adequately protected by intellectual property rights such as Trademark registration. Some of our technical knowledge is protected only by secrecy. As a result, we cannot be certain that our technical knowledge will remain confidential in the long run.

Even if all reasonable precautions, whether contractual or otherwise, are taken to protect our confidential technical knowledge of our products and business, there is still a danger that certain proprietary knowledge may be leaked, either inadvertently or willfully, at various stages of the production process. A significant number of our employees have access to confidential product information and there can be no assurance that this information will remain confidential. Moreover, certain of our employees may leave us and join our various competitors. Although we may seek to enforce non-disclosure agreements in respect of research and development and certain other key employees, we cannot guarantee that we will be able to successfully enforce such agreements. The potential damage from such disclosure is increased as many of our designs and products are not patented, and thus we may have no recourse against copies of our products and designs that enter the market subsequent to such leakages. In the event that the confidential technical information in respect of our products or business becomes available to third parties or to the general public, any competitive advantage that we may have over other companies in the automotive components sector could be harmed. If a competitor is able to reproduce or otherwise capitalise on our technology, it may be difficult, expensive or impossible for us to obtain necessary legal protection. Consequently, any leakage of confidential technical information could have an adverse effect on our business, results of operations, financial condition and future prospects.

36. Industrial accidents at our manufacturing facility may adversely affect our operation.

Our manufacturing facilities are subject to operating risk resulting in fatal accidents which can cause injury to the labour and employees of the company and this could also cause damage to the property and plant and machinery situated at the factory which could have an adverse effect on our operations. Though, we have taken adequate safety measures in order to avoid such mishaps, but in case of any such happening of the event out of our control, we cannot assure you whether it will be sufficient or not. Further occurrence of such accidents could impact our production schedules, costs, revenue and ability to meet customer demand.

37. We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

Any failure or defect in our products could result in a claim against us for damages or may lead to recalling of our products regardless of our responsibility for such a failure or defect. However, our Company is well equipped with in-house testing laboratory to test the products. Our finished product has to undergo a strict quality check to ensure that they are of relevant quality as per the standards set. Our in house testing laboratory regulates and monitors the quality and ensures that the same is as per the required standards. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, or any other unforeseen events could affect our reputation and our results from operations.

38. We are subject to risks associated with expansion into new markets.

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including: compliance with a wide range of:

1. laws, regulations and practices, including uncertainties associated with changes in laws, regulations and practices and their interpretation;
2. local preferences and service requirements;
3. fluctuations in foreign currency exchange rates;
4. inability to effectively enforce contractual or legal rights and adverse tax consequences;
5. differing accounting standards and interpretations;
6. stringent as well as differing labour and other regulations;
7. differing domestic and foreign customs, tariffs and taxes;
8. exposure to expropriation or other government actions; and

9. political, economic and social instability.

39. Our inability to sell our products through third parties can adversely affect our revenues.

We rely on various channels to sell our products in different states of India and Nepal, including emerging and regulated market. We cannot assure you that we will be able to maintain a sufficiently diversified sales network for our products in all of our markets, nor can we assure you that we will be able to renew the contracts with our distributors on the same terms and conditions. Furthermore, we have limited ability to control and manage the activities of these third-party sales channels. If any third party in our sales channels treats our competitors' products more favorably than ours, or stops selling our products, and we are unable to find appropriate substitutes, our business, financial condition and results of operations may be adversely affected.

40. We have not identified any alternate source of raising the funds mentioned as our 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for setting up the denim processing unit or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company.

41. Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the funding plan has not been appraised by any bank or financial institution and is not subject to any monitoring by any independent agency. Our Company's management will have flexibility in utilizing the Net Proceeds from the Issue. Any variation in the utilization of our Net Proceeds as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

Our Company intends to use the Net Proceeds from the Fresh Issue for the purposes described in "Objects of the Issue" on page 58 of this Draft Prospectus. In terms of Regulation 262 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹ 10,000 lakhs. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. The funding plans are in accordance with our own estimates and have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our Company's efforts to use the Net Proceeds from the Issue to achieve profitable growth in its business. Our Board will have significant flexibility in temporarily investing the Net Proceeds of the Issue. Accordingly, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of its business, increased profitability or an increase in the value of your investment.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in the SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in this Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

42. Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.

We regularly commit resources prior to receiving payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

43. We do not have any insurance coverage for protecting us against any material hazards.

As on the date of Draft Prospectus, our Company has not taken any insurance policies in relation to any assets. However we have Marine Cargo Insurance policies for our exports. In the event of any uncertain events our business and other assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which will not be compensated by insurance. There can be no assurance that in the event of any hazards, whether we will be able to sustain our operations again within reasonable time frame. If our Company suffers a large loss we may be required to make substantial payments and our results of operations and financial condition may be adversely affected. Further, if we are to obtain fresh insurance, we have to incur costs not yet provided for in our financials. Also, we cannot guarantee that we will be able to identify an insurance policy suitable to our needs within a reasonable premium. If we buy new policies we may have to put a strain on our existing cash flows and thus affect our results of operation and financial condition. We seek to set up a Herbal Ayurvedic & Wellness products manufacturing plant in Sonipat, Haryana post the issue. We may seek insurance for the new manufacturing facility.

44. Our Promoters and members of the Promoter Group will continue to jointly retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After the completion of this IPO, our Promoters and Promoter Group will beneficially own approximately 56.82 % of our post-Issue equity share capital. As a result, the Promoter and Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

45. Our inability to manage our growth may disrupt our business and reduce our profitability.

A principal component of our strategy is to broaden the product mix and increase penetration in markets, also expand our global sales. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous upgradation increases the challenges involved in retaining high quality human resources, technology upgradation for manufacturing, financial management, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

46. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects/ schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter "Objects of the Issue" on page 58 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

47. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology upgradation is essential to provide better products. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

48. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

49. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and there can be no assurance that we will be able to pay dividends in the future.*

We currently intend to invest our future earnings, if any, to fund our growth. The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Hence, there can be no assurance that we will be able to pay dividends in the future

50. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

51. *Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity

Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

52. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

53. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

54. Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

55. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms. In addition, we cannot assure you that any required approvals for borrowing in foreign currency will be granted to us without onerous conditions, or at all. Such, and other, limitations on raising foreign capital may adversely affect our business growth, results of operations, and financial condition.

EXTERNAL RISK FACTORS

56. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations. For details see section titled “Key Industry Regulations and Policies” on page no 97 of this draft prospectus.

57. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

58. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and neighbouring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

59. A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India’s sovereign debt rating or a decline in India’s foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise

a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

60. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in and our operations are in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include: political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;

- occurrence of natural or man-made disasters;
- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- changes in India's tax, trade, fiscal or monetary policies;
- prevailing regional conditions,
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- Other significant regulatory or economic developments in or affecting India.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

61. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.*

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditure incurred. Our business and financial performance may be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations.

To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see "*Statement of Special Tax Benefits*" on page 66 of this Draft Prospectus for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose

onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

62. Any adverse change in India's credit rating by an international rating agency could materially adversely affect our business and profitability.

India's sovereign rating is Baa3 with a "negative" outlook (Moody's), BBB-with a "stable" outlook (S&P) and BBB-with a "negative" outlook (Fitch). India's sovereign rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse change in India's credit ratings by international rating agencies may adversely impact the Indian economy and consequently our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares

63. If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and may adversely affect our business, cash flows and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

64. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions another countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in NIFTY, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

SECTION VI – ABOUT OUR COMPANY

INDUSTRY OVERVIEW

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and industry sources. Neither we nor any other person connected with the Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly, investment decisions should not be based on such information. You should read the entire Draft Prospectus, including the information contained in the sections titled “*Risk Factors*” and “*Financial Statements*” and related notes beginning on page nos. 19 and 127 of this Draft Prospectus.

Global Economic Overview

The global economic recovery is continuing, even as the pandemic resurges. The fault lines opened up by COVID-19 are looking more persistent—near-term divergences are expected to leave lasting imprints on medium-term performance. Vaccine access and early policy support are the principal drivers of the gaps.

The global economy is projected to grow 5.9 percent in 2021 and 4.9 percent in 2022, 0.1 percentage point lower for 2021 than in the July forecast. The downward revision for 2021 reflects a downgrade for advanced economies—in part due to supply disruptions—and for low-income developing countries, largely due to worsening pandemic dynamics. This is partially offset by stronger near-term prospects among some commodity-exporting emerging market and developing economies. Rapid spread of Delta and the threat of new variants have increased uncertainty about how quickly the pandemic can be overcome. Policy choices have become more difficult, with limited room to maneuver.

Speeding up the vaccination of the world population remains the top policy priority, while continuing the push for widespread testing and investing in therapeutics. This would save millions of lives, help prevent the emergence of new variants, and hasten the global economic recovery. As discussed in Chapter 1, an IMF proposal lays out concrete, cost-effective steps to vaccinate at least 40 percent of the population in every country by the end of 2021 and 70 percent by mid-2022.¹¹ It is also crucial to ensure that financially constrained countries can continue essential spending while meeting other obligations. The IMF’s recent General Allocation of Special Drawing Rights, equivalent to \$650 billion, provided much-needed international liquidity. Moreover, doubling down efforts to curb greenhouse gas emissions is critical—current actions and pledges are not enough to prevent a dangerous overheating of the planet. The international community should also resolve trade tensions and reverse the trade restrictions implemented in 2018–19, strengthen the rules-based multilateral trading system, and complete an agreement on a global minimum for corporate taxes that halts a race to the bottom and helps bolster finances to fund critical public investments.

Emerging Markets Lead the Rebound

Emerging markets, excluding China, have faced numerous cyclical challenges in recent years. Now, with more favourable COVID-19 dynamics in many developing nations, emerging markets could set the pace for global growth. Morgan Stanley economists expect this momentum to continue into next year. At the same time, emerging markets should benefit from widening U.S. current account deficits, low U.S. real interest rates, a weaker dollar, and accommodative macroeconomic policies. That adds up to 7.4% GDP growth for emerging markets in 2021, led by a forecast 9.8% improvement in India.

Pharmaceutical market- Global

The pharmaceutical industry is responsible for the research, development, production, and distribution of medications. The market has experienced significant growth during the past two decades, and pharma revenues worldwide totaled 1.27 trillion U.S. dollars in 2020.

Top pharmaceutical companies

The pharma industry is comprised of some major multinational companies. Based on the prescription drugs market, Pfizer is one of the world's leading pharmaceutical companies. The company, which has its global headquarters in New York City, generated total revenues of around 51.7 billion U.S. dollars in 2019, the majority of which was derived from sales of its products. However, the company saw a heavy drop in revenues in 2020, after the spin-off of its Upjohn generics business. Other top global players from the United States include Johnson & Johnson, Merck & Co., and AbbVie.

Pharma industry by country

Many of the leading pharma companies come from the United States, and, therefore, it is no surprise that the country has the largest national pharmaceutical market worldwide. China has become one of the main players in the industry, and annual growth rates of the emerging pharma market have been strong in recent years. However, projected pharmaceutical sales show that the established markets of North America and Europe will still be leading the way in 2024. Some of the biggest European companies are Novartis, Roche, GlaxoSmithKline, and Sanofi.

Pharmaceutical market: worldwide revenue 2001-2020

The global pharmaceutical market has experienced significant growth in recent years. As of end-2020, the total global pharmaceutical market was valued at about 1.27 trillion U.S. dollars. This is a significant increase from 2001 when the

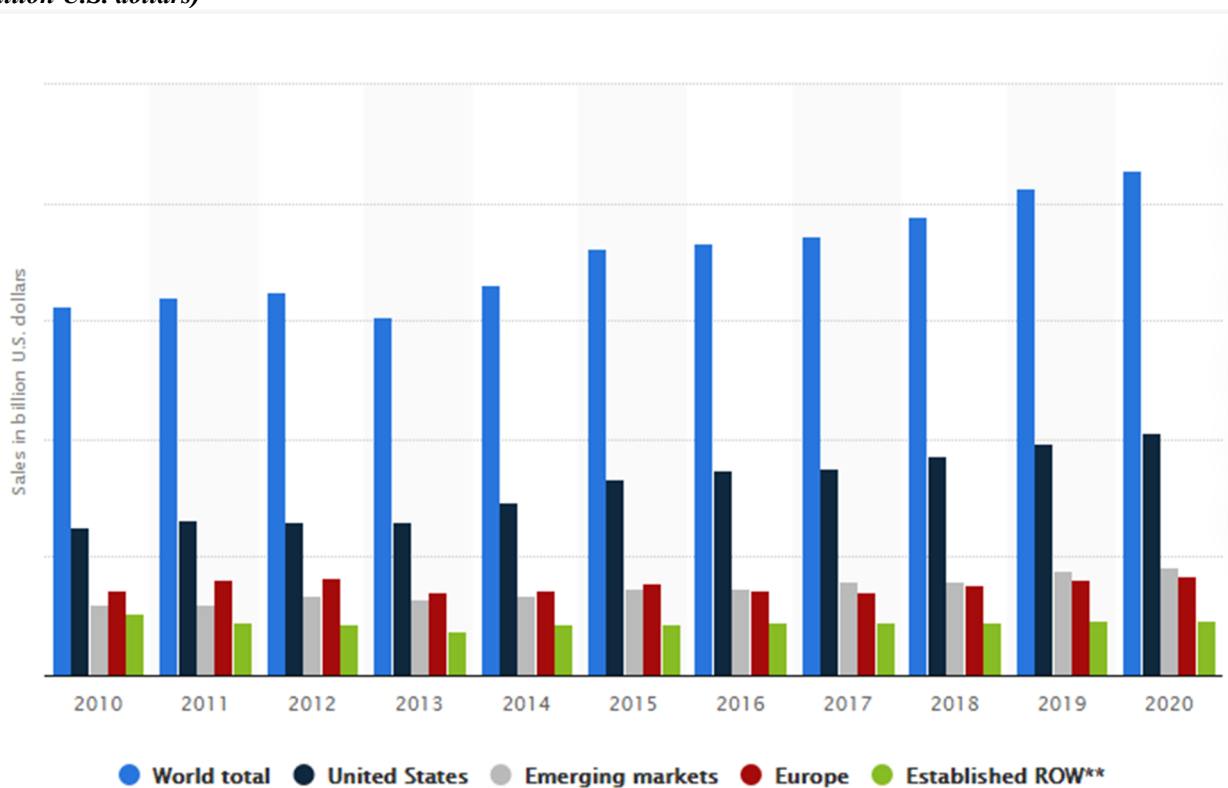

market was valued at just 390 billion U.S. dollars. The pharmaceutical market plays a key role in how people get medications and what people pay for medication. However, some markets are better for pharmaceutical companies than others.

Globally, the United States has emerged as the leading market for pharmaceuticals, followed by the group of emerging markets. Emerging markets can include middle and low-income countries such as Brazil, India, Russia, Colombia and Egypt, to name a few. Despite increasing revenues globally, the Latin American region accounts for the lowest share of the global pharmaceutical market's revenues.

The top pharmaceutical products sold globally include Humira, Eliquis and Revlimid. Many of these pharmaceuticals are approved to treat multiple chronic conditions or cancers. Oncologics is the top therapeutic class for drug sales globally, followed by antidiabetics. However, the sales of drugs for autoimmune diseases and diabetes has experienced some of the largest growth in spending in recent years.

Globally, India ranks 3rd in terms of pharmaceutical production by volume and 14th by value. The domestic pharmaceutical industry includes a network of 3,000 drug companies and ~10,500 manufacturing units.

India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers with a potential to steer the industry ahead to greater heights. Presently, over 80% of the antiretroviral drugs used globally to combat AIDS (Acquired Immune Deficiency Syndrome) are supplied by Indian pharmaceutical firms.

Market Size

According to the Indian Economic Survey 2021, the domestic market is expected to grow 3x in the next decade. India's domestic pharmaceutical market is estimated at US\$ 42 billion in 2021 and likely to reach US\$ 65 billion by 2024 and further expand to reach ~US\$ 120-130 billion by 2030.

India's biotechnology industry comprising biopharmaceuticals, bio-services, bio-agriculture, bio-industry, and bioinformatics. The Indian biotechnology industry was valued at US\$ 64 billion in 2019 and is expected to reach US\$ 150 billion by 2025.

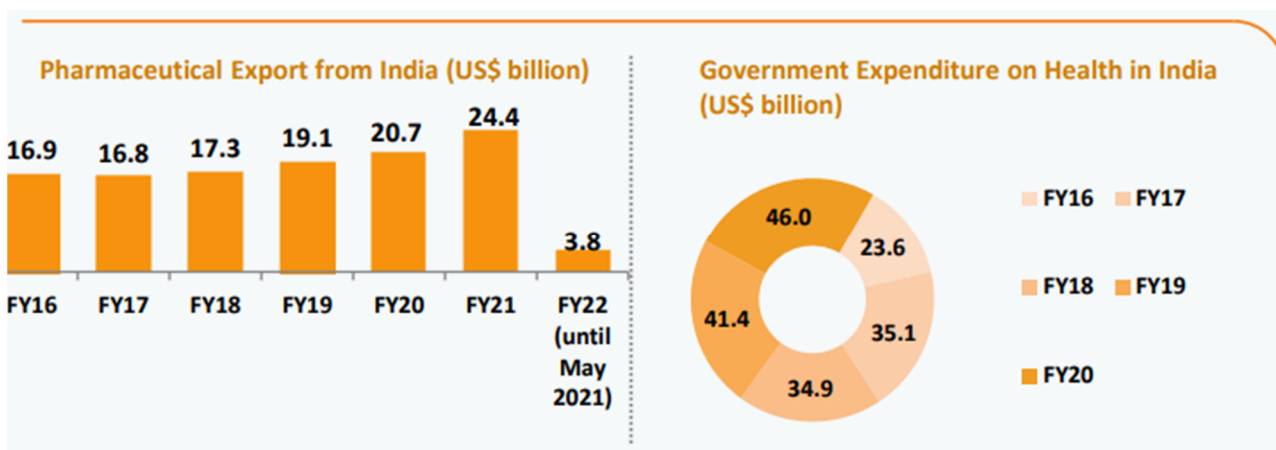

India's medical devices market stood at US\$ 10.36 billion in FY20. The market is expected to increase at a CAGR of 37% from 2020 to 2025 to reach US\$ 50 billion.

As of August 2021, CARE Ratings expect India's pharmaceutical business to develop at an annual rate of ~11% over the next two years to reach more than US\$ 60 billion in value.

In the global pharmaceuticals sector, India is a significant and rising player. India is the world's largest supplier of generic medications, accounting for 20% of the worldwide supply by volume and supplying about 60% of the global vaccination demand. The Indian pharmaceutical sector is worth US\$ 42 billion and ranks 3rd in terms of volume and 13th in terms of value worldwide.

In August 2021, the Indian pharmaceutical market increased at 17.7% annually, up from 13.7% in July 2020.

Exports

The country's pharmaceutical sector contributes 6.6% to the total merchandise exports. As of May 2021, India supplied a total of 586.4 lakh COVID-19 vaccines, comprising grants (81.3 lakh), commercial exports (339.7 lakh) and exports under the COVAX platform (165.5 lakh), to 71 countries. Indian drugs are exported to more than 200 countries in the world, with US being the key market. Generic drugs account for 20% of the global export in terms of volume, making the country the largest provider of generic medicines globally. India's drugs and pharmaceuticals exports stood at US\$ 3.76 billion between April 2021 and May 2021. The foreign direct investment (FDI) inflow in the Indian drugs and pharmaceuticals sector stood at US\$ 18.12 billion between April 2000 and June 2021.

Investments and Recent Developments

The Union Cabinet has given its nod for the amendment of existing Foreign Direct Investment (FDI) policy in the pharmaceutical sector in order to allow FDI up to 100% under the automatic route for manufacturing of medical devices subject to certain conditions.

The Indian drugs and pharmaceuticals sector received cumulative FDIs worth US\$ 17.99 billion between April 2000 and March 2021.

(Source: <https://www.ibef.org/industry/pharmaceutical-india.aspx>)

Competitive Landscape

The wound care market in India is still in its growth phase and is quite a fragmented one characterized by the presence of several manufacturers and fierce competition existing between them. Johnson and Johnson emerged as the market leader in this space, in terms of revenue. Smith and Nephew and Datt Medi products were the next two leading companies. These companies had strong product portfolio along with strong distribution systems and promotion strategies that enabled them to keep hold of their market share.

Future Outlook

Medicine spending in India is projected to grow 9-12% over the next five years, leading India to become one of the top 10 countries in terms of medicine spending.

Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers, which are on the rise.

The Indian Government has taken many steps to reduce costs and bring down healthcare expenses. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

Business response to COVID-19

Since the onset of the COVID-19 pandemic in March 2020, our Company’s operations have been affected and our manufacturing units had to close down and only resumed in November 2020. However our trading business was operational but at a very small scale. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. After the first wave, we engaged in the marketing of sanitizers and trading of Disposable Masks, PPE kits etc, our products were identified as essential goods and our operations were not shut down. However our other operations came to a standstill. The demand for PPE kits and Sanitizers increased manifolds during the pandemic which had a positive impact on our business. However, due to limited availability of logistics and supply chain constraints, we were impacted during the initial

period of the lockdown. We continued our operations after making arrangements to meet the government's requirements on sanitization, people movement and social distancing.

The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in "Risk Factors" on page 19 of this Draft Prospectus. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business. For more details, see Risk Factors Affecting Results of Operations and Financial Condition – COVID-19 Pandemic on page 19 of this Draft Prospectus.

Our intellectual property includes trademarks associated with our business. The trademarks registered and held by us include the “Fabino” and “Keepshine” trademarks. These intellectual properties helps us to distinguish our business from the competitors. Trademarks and brands are an efficient commercial communication. In the age of social media, trademarks allows business to utilize the internet and social media. Trademark registration also provides legal security to manufacturers and helps drug manufacturers to take legal action against counterfeits. Having trademarks registered helps us in better marketing and branding of goods. It will also help us to create a positive image for the company.

Low Debt Balance Sheet

We believe that we are one of the very few pharmaceutical companies operating on a low debt balance sheet model (except Director loans and loans to corporate entities), i.e. as on June 30, 2021, our Company has no outstanding loans from any banks or financial institutions. Though, we may need to raise bank funding for our on-going or future projects, we intend to re-pay the same at the earliest and continue to operate under the low-debt balance sheet model. Further, a low debt balance sheet increases our fund raising capability in case of any future project on a much larger scale and accordingly enables us to expand our reach to other regions across the Nation and also overseas. Our Company can undertake expansion plan which may require additional capital and the same is aided by our current low leverage balance sheet, enabling us to raise capital at attractive interest rates and also on favourable terms

Strong Marketing Capability

Our marketing and distribution network in India and Overseas comprises a specialized team of Marketing Executives, which enables us to market our products to over 12 states across India. We also market our products to various hospitals and medical institutions through our channel partners in different states, which constitute an important channel for the distribution of our products. Our domestic marketing infrastructure consists of dedicated teams & individuals associated with us directly and as channel partners, which formulate marketing and promotional strategies for our products. We believe that our marketing strategies, trained sales representatives and distribution network enable us to increase our market share across key areas and build and develop our brands.

Our Strategies

Our strategic objective is to improve and consolidate our position in the Pharmaceutical, Wellness and FMCG market with a continuous growth philosophy. The below points indicate how we will achieve our goals:

Working Capital Augment

Our business operations are working capital intensive. In order to effectively expand our products portfolio, Business arenas and also increase in the number of verticals and explore various geographical locations, along with the existing facilities we need to have access to a larger amount of liquid funds and sufficient working capital. We believe there is growing trend towards Pharmaceutical, FMCG and Wellness products. Along with the increasing demand, we expect to increase our order taking appetite thus increasing our volumes, revenues and scale of operations and we will require substantial working capital for the same. It is hence our strategy to raise funds from this issue and augment our fund based working capital capabilities. We believe that companies with high liquidity on their balance sheet would be able to better exploit market opportunities. Hence, in order to effectively operate and maximize our capacity utilization at the existing facilities we need to have access to a larger amount of liquid funds and sufficient working capital. For further details of the proposed working capital requirements of the company, kindly refer to the Chapter titled “*Objects of the Issue*” on page no. 58 of this Draft Prospectus.

Geographical Diversification

We cater to both, the domestic as well as international markets. We aim to further develop our domestic sales networks in two ways: firstly nurturing existing relationships with clients and secondly by creating new distribution channels in non-penetrated geographies considering various cities. We currently supply in the Haryana, Delhi, parts of Punjab, Himachal Pradesh, Eastern Uttar Pradesh, Orissa , Jharkhand , parts of West Bengal, Andhra Pradesh and Nepal.

We seek to set up a Herbal Ayurvedic & Wellness products manufacturing plant in Sonipat, Haryana. Its expected production is 12 million Capsules and 1.2 million of Syrup bottles per annum. This will help us expand further into Central India, South India, Other Gulf Countries and West African Countries where our strategy is primarily to become the preferred supplier. Our company is focusing on increasing growth in the export markets. Exports brings in better realization of margins, prompt delivery due to faster and planned pace of projects, better payment terms and access to larger markets. This also reduces the risk of dependence on a single market and ensures that any slowdown in the market would not affect overall growth and performance of our company.

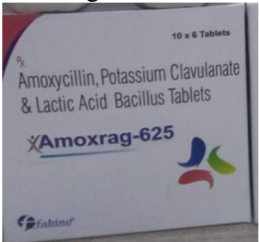

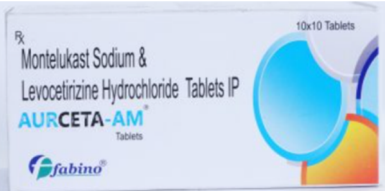

We believe that we have developed good clientele network in domestic and export markets and going forward shall be able to take advantage of our existing operations and network to expand these markets.

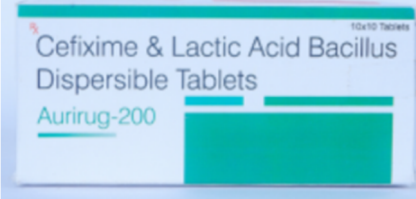

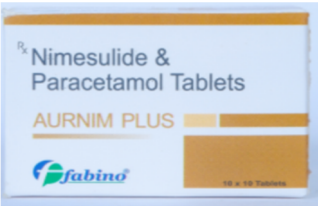

Digital Marketing

We actively use social media for customer engagement, service provision and interaction with our vendors. We intend to increase our touch points and engagement with customers through various digital and technology initiatives. We are already active on social media websites such as Instagram, Twitter and Facebook. After our Herbal Plant is set up, we plan to start an E -Commerce store integrated with our Website and start our operations directly. We believe that the granularity of data available with us, both geographically and across various segments will enable us to enhance our distributions and help us to increase our customer base both locally and globally.

Raw Materials

Raw Material identification is the initial stage of the manufacturing process. The key raw materials that we use for our manufacturing operations include Soya Flour, Soya Protein, Skimmed Milk Protein, Sugar, Maltodextrin, Multiminerals, Vitamins, Colours, Flavours, and Preservatives etc. Raw materials are procured from the trusted vendors from the market which confirms to the quality standards as required. Our products are manufactured with the best available technical know-how, using quality raw materials under stringent quality assurance under the supervision of well experienced staff. Packaging materials include Corrugated Cartons, Pouches, Glass & Pet Jars and Tin Cans, BOPP Tape, Strip etc. These materials are procured by our Company from local suppliers at negotiated prices. Although we do not have long term contracts with any of our suppliers right now, we plan to enter them as soon as our volumes meet their minimum order requirements for discounted prices.

Our business is based on three core models (i) Manufacturing, (ii) Marketing Own Brands and (iii) Loan License.

- **Manufacturing Process:** The following diagram sets forth information on the major steps involved in the manufacturing of the following:

Manufacturing process of Protein Powder and Granules and Malt Powder

Step 1: The Soya Protein is mostly procured from the Indian states of Madhya Pradesh, Gujarat and local vendors. This material is kept in an Air Dryer to remove any moisture.

Step 2: Other ingredients like Skimmed Milk Protein, Sugar, Maltodextrin, Multiminerals, Vitamins, Colours, Flavours, Soya protein, preservatives etc are added to Soya Protein and all material is put into Mass Mixture for mixing thoroughly.

Step 3: The mixture is passed through a Shifter Vibrator to separate the powder and granules. The material is spread in large steel trays and is placed in the Air Dryer and heated at about 150 degrees for a few hours for baking and removing any trace of moisture. Again the material is placed in the dryer to remove any moisture which might exist in the Air Dryer.

Step 4: This final powder goes through the shifter and is then sent for packing. Semi-automatic Machine is used for the packing of the protein powder in different forms like pouches, glass & Pet jars and Tin cans.

Step 5: Quality checks is the next step in the process where finished products are checked if they match the quality standards as per FSSAI. Final product is then dispatched to the respective customer.

- **Marketing our Own Brand:**

Most of our product range is manufactured by third party manufacturers on made to order basis as per our instructions or as per the manufacturer. These products are then marketed by our company. The products under this category are tablets, capsules, soft gelatin capsules, Gel, syrups, suspension, injections, Vitamin –C tablets, coffee, tea etc. The following are the steps:

Step 1: Order are collected from market for the above-mentioned products. These orders may vary depending on the season or time of the year.

Step 2: The received orders are now segregated and allocated to different third party manufacturers to make the same under Fabino's brand name.

Step 3: The Final branded products are then transported to our warehouse from the third party manufacturing unit. Certificate of analysis from each batch of manufacturer is also provided.

Step 4: The products are then supplied to the customers through our sales representatives.

- **Loan Licensing**

Under this business model, we receive orders from clients and the products manufactured are supplied for agreed charges. The manufacturers use raw materials and packaging materials as per needs and provide with the finished goods and the same is then transported to the client. All product manufactured under loan license facility are labeled as "manufactured by Fabino". We will start manufacturing under loan license in the near future.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company faces stiff competition from domestic as well as global market. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price is the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Due to industry's fragmented nature, there is no authentic data available to our Company on total industry size and markets share of our Company vis-a-vis the competitors. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. . Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue.

The CGST Act mandates every supplier providing the goods or services to be registered within the State or Union Territory it falls under, within 30 days from the day on which he becomes liable for such registration. Such registrations can be amended, as well as cancelled by the proper office on receipt of application by the registered person or his legal heirs. There would be four tax rates namely 5%, 12%, 18% and 28%. The rates of GST applied are subject to variations based on the goods or services. Under GST, SGST is a tax

E. OTHER LAWS

Competition Act, 2002

The Competition Act, 2002 (“Competition Act”) aims to prevent anti-competitive practices that cause or are likely to cause an appreciable adverse effect on competition in the relevant market in India. The Competition Act regulates anti-competitive agreements, abuse of dominant position and combinations. The Competition Commission of India (“Competition Commission”) which became operational from May 20, 2009 has been established under the Competition Act to deal with inquiries relating to anti-competitive agreements and abuse of dominant position and regulate combinations. The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti-competitive agreement, abuse of dominant position or a combination, which even though entered into, arising or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

The Companies Act, 2013

The Companies Act, 2013 (“Companies Act”), has been introduced to replace the existing Companies Act, 1956 in a phased manner. The Companies Act deals with laws relating to companies and certain other associations. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Companies Act prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of companies. It deals with issue, allotment and transfer of securities and various aspects relating to company management. It provides for standard of disclosure in public issues of capital, particularly in the fields of company management and projects, information about other listed companies under the same management, and management perception of risk factors.

The Indian Stamp Act, 1899

The Indian Stamp Act, 1899 prescribes the rates for the stamping of documents and instruments by which any right or liability is, or purports to be, created, transferred, limited, extended, extinguished or recorded. Under the Indian Stamp Act, 1899, an instrument not ‘duly stamped’ cannot be accepted as evidence by civil court, an arbitrator or any other authority authorized to receive evidence. However, the document can be accepted as evidence in criminal court.

Transfer of Property Act, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer property by operation of law, is governed by the Transfer of Property Act, 1882 (“T.P. Act.”). The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter.

The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: The transfer of ownership in property for a price, paid or promised to be paid.
- Mortgage: The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognizes several forms of mortgages over a property.
- Charges: Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- Leases: The transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.
- Leave and License: The transfer of a right to do something upon immovable property without creating interest in the property.

Further, it may be noted that with regards to the transfer of any interest in a property, the transferor transfers such interest, including any incidents, in the property which he is capable of passing and under the law, he cannot transfer a better title than he himself possesses.

The Registration Act, 1908

The Registration Act, 1908 was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Act is used for proper recording of transactions relating to other immovable property also. The Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

The Indian Contract Act, 1872

The Indian Contract Act, 1872 (“Contract Act”) codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963

The Specific Relief Act is complimentary to the provisions of the Contract Act and the T.P. Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. ‘Specific performance’ means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

The Trademarks Act, 1999

Under the Trademarks Act, 1999 (“Trademarks Act”), a trademark is a mark capable of being represented graphically and which is capable of distinguishing the goods or services of one person from those of others used in relation to goods and services to indicate a connection in the course of trade between the goods and some person having the right as proprietor to use the mark. A ‘mark’ may consist of a device, brand, heading, label, ticket, name signature, word, letter, numeral, shape of goods, packaging or combination of colors or any combination thereof. Section 18 of the Trademarks Act requires that any person claiming to be the proprietor of a trade mark used or proposed to be used by him, must apply for registration in writing to the registrar of trademarks. The trademark, once applied for and which is accepted by the Registrar of Trademarks (“the Registrar”), is to be advertised in the trademarks journal by the Registrar. Oppositions, if any, are invited and, after satisfactory adjudications of the same, a certificate of registration is issued by the Registrar. The right to use the mark can be exercised either by the registered proprietor or a registered user. The present term of registration of a trademark is 10 (ten) years, which may be renewed for similar periods on payment of a prescribed renewal fee.

The Copyright Act, 1957 ("Copyright Act")

ANNEXURE IV

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

I. Corporate Information

Fabino Life Sciences Limited is a Public Limited Company domiciled in India, having place of business, at 105, 1st Floor, D – Block, Central Market, Prashant Vihar and incorporated under the provisions of Company Act, 1956. The Company is engaged in the trading of medicines.

II. Significant Accounting Policies

1. Basis of Presentation of Financial Statements:

The Financial Statements are prepared in accordance with the Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention (except in case of assets for which provision for impairment is made), on the accrual basis of accounting and complying with the provisions of the Companies Act, 2013. Accounting policies not specifically referred to otherwise, are in consonance with accounting principles generally accepted in India and Accounting Standards issued by The Institute of Chartered Accountants of India (ICAI) to the extent applicable. The accounting policies adopted in preparation of financial statements are consistent with those of previous year.

2. Use of Estimates:

The preparation of financial statements in conformity with Indian GAAP requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Although, these estimates are based upon management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amount of assets & liabilities in future period.

3. Cash Flow Statement:

The company reports cash flow from operating activities using Indirect Method, whereby net profit or loss is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments, and items of income or expense associated with investing or financing cash flows. Cash & cash equivalents for the purpose of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of 3 months or less.

4. Fixed Assets and Depreciation

Fixed assets are calculated as per the schedule II of the Companies Act, 2013 and carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets includes interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use and other incidental expenses incurred up to that date. Subsequent expenditure relating to fixed assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

5. Inventories:

Stores and spares are valued at cost; Inventories are valued at the lower of cost (on FIFO basis) and the net Realizable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges. Work-in-progress and finished goods include appropriate proportion of overheads and, where applicable, excise duty.

Net Realizable value is the estimated Selling price in the ordinary course of business less estimated costs of completion and estimated costs necessary to make the Sale.

As stated the Inventories are valued at the lower of cost (on FIFO basis) and the net Realizable value. However, the inventories are not inclusive of Duties & Taxes, yet there is no effect on Profits

6. Revenue Recognition:

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the Revenue can be reliably measured.

Sale of Goods: Revenue from sale of goods is recognized when all the risks and rewards of ownership of goods have been passed to buyer, usually on delivery of the goods. Sales are being accounted for at Gross Sales value excluding Duties & Taxes thereon. Duties & Taxes have been accounted for separately through Duties & Taxes A/c under Current Liabilities. The Company collects Duties and Taxes including Sales taxes and Value added taxes (VAT) and Goods and Service Tax (GST) on the behalf of the government and therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue.

7. Cash and Bank Balances:

Cash and bank balances comprises of two sub-headings, viz., “Cash and cash equivalents” and “Other bank balances.” Cash and Cash equivalents constitutes items defined in accordance with AS 3. Cash is defined to include cash on hand and demand deposits with banks. Cash Equivalents are defined as short term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value. Other bank balances would comprise of items such as balances with banks to the extent of held as margin money or security against borrowings etc., and bank deposits with more than three months maturity.

8. Earnings per Share:

Basic Earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average numbers of equity shares outstanding during the period are adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares).

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

9. Segment Reporting:

The Company is engaged in manufacturing , marketing , packing, trading of pharmaceutical, allopathic, herbal, veterinary, and other wellness focused consumer products etc. The company also exports wellness and FMCG products. Thus there is only one business segment. Hence segment reporting is not provided. There is no geographical segment

10. Accounting for Taxes:

Current Taxes: Current Income Tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. The provision for Current Tax is based on the elements of Income and expenditure as reported in the financial statements and computed in accordance with the provisions of the Indian Income Tax Act, 1961.

Deferred Taxes: Deferred Tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

RECENT DEVELOPMENT

Impact of COVID-19

Since the onset of the COVID-19 pandemic in March 2020, our Company’s operations have been affected and our manufacturing units had to close down and only resumed in November 2020. However our trading business was operational but at a very small scale. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. After the first wave, we engaged in the marketing of sanitizers and trading of Disposable Masks, PPE kits etc, our products were identified as essential goods and our operations were not shut down. However our other operations came to a standstill. The demand

for PPE kits and Sanitizers increased manifolds during the pandemic which had a positive impact on our business. However, due to limited availability of logistics and supply chain constraints, we were impacted during the initial period of the lockdown. We continued our operations after making arrangements to meet the government's requirements on sanitization, people movement and social distancing.

The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in "Risk Factors" on page 19 of this Draft Prospectus. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business. For more details, see Risk Factors Affecting Results of Operations and Financial Condition – COVID-19 Pandemic on page 19 of this Draft Prospectus.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Availability of Look-alikes, Counterfeit wound care products

Entities in India and abroad could pass off their own products as ours, including counterfeit or pirated products. For example, certain entities could imitate our brand name, packaging materials or attempt to create look-alike products. As a result, our market share could be reduced due to replacement of demand for our products and adversely affect our goodwill. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

Our reliance on third parties for certain aspects of our business like transportation and logistics exposes us to certain risks.

We rely on third parties for manpower required for the manufacture of our products, as well as for performance of certain functions and services carried out at our manufacturing and office premises. We also rely on third party transporters for logistics support. Our reliance on third parties may affect our timelines for making delivery to our customers.

As we rely on transport and logistics service providers for transporting a portion of our product supplies, any failure on their part to perform their services in the expected manner could result in us breaching our committed delivery timelines. Factors such as the financial instability of suppliers, vendors' non-compliance with applicable laws, labour disputes, currency fluctuations, changes in tariff or import policies, severe weather, political uncertainty, terrorist attacks and transport capacity and cost may disrupt our supply chains, which may result in increased costs or delivery delays. Therefore, there is no assurance that third party will be able to meet their contractual commitments to us, or that we will not be required to incur additional costs to remedy any deficiencies in their services. A significant disruption in the availability of third-party services may, in turn, disrupt our operations and adversely affect our inventory management, business and financial condition, at least until alternative sources are arranged.

Substantial portion of our revenues has been dependent upon limited number of customers.

We derive and may continue to derive a significant portion of our revenue from a relatively limited number of clients. During the three months period ended June 2021 and fiscal year ended 2021, we derived 57.19 % and 54.06 % of our total revenue respectively from our top five clients. Significant dependence on certain clients may increase the potential volatility of our results of operations, if we are unable to expand the volumes of our business with our existing clients, maintain our relationship with our key clients or diversify our client base. Further, any significant reduction in demand for our products from our key clients, any requirement to lower the price offered by these clients, or any loss or financial difficulties caused to these clients, or bad debts of the dues from these clients, or change in relationship with the clients could have a material adverse effect on our business, result of operations, financial conditions and cash flow.

Marketing and distribution of Our Company's products are not directly handled by it.

The Company does not handle the marketing of its own products directly. These are marketed through a wide network of distribution channel consisting of approximately 75 distributors in the country. Marketing and sales is duly monitored by the company to ensure effective marketing. Accordingly, any shortcomings in the performance would impact the revenues and profitability of the Company. The sales of the Company's products are largely dependent on

the actions of their dealers. These dealers represent the Company in front of the end users of its products and their performance and attitude reflect on the Company. These dealers are being trained and are continued to be under close and continuous monitoring. While dealers are monitored regularly through monthly checks by marketing field force, there can be no assurance that such measures will prove effective in deterring or detecting undesirable behavior on the part of the Company's dealers. Failure to effectively monitor and control the distribution network of dealers could adversely affect the Company's revenue and brand image.

General economic and business conditions

As a Company with its complete operations in India, we are affected by general economic conditions in the country and in particular economic factors that affect pharmaceutical industry in India. India's gross domestic product, or GDP, has been and will continue to be of importance in determining our operating results and future growth.

SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased

manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017 has notified the specific ministries handling relevant sectors.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP issued the Consolidated Foreign Direct Investment Policy notified by the D/o IPP F. No. 5(1)/2017-FC-1 dated August 28, 2017, with effect from August 28, 2017 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect prior to August 28, 2017. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DIPP issues an updated circular.

Amidst the current pandemic caused by Covid-19, the Government of India has amended the extant FDI Policy, vide Press Note No. 3 (2020 Series). The said amendment has also been made in the Foreign Exchange Management (Non-debt Instrument) Rules, 2019. As per the aforesaid amendment a non-resident entity can invest in India, subject to the FDI Policy except in those sectors/activities which are prohibited. However, an entity of a country, which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, can invest only under the Government route. Further, in the event of the transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within this restriction/purview, such subsequent change in beneficial ownership will also require Government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI and (iv) documentation, reporting requirements and other conditions as may be specified by the RBI in consultation with the Central Government, are adhered for such transfers

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For details, see “*Issue Procedure*” on page no. 187 of this Draft Prospectus.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws.
