2. ***We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations.***

We are engaged in the business of manufacturing, assembly and sale of light emitting diode (“LED”) strip lights. Our business is significantly dependent on our ability to successfully identify customer requirements and preferences and gain customer acceptance for our products. If we are unable to successfully identify customer requirements and preferences and gain customer acceptance for our products, our business may be affected.

We are dependent on certain customers who have contributed to a substantial portion of our total revenues. In the aggregate, our top 5 customers accounted for 68.02%, 65.94%, 57.66% and 75.64% of our revenue from operations for the nine-month period ended December 31, 2022, and for the Financial Year ended March 31, 2022, Financial Year ended March 31, 2021 and Financial Year ended March 31, 2020, respectively. There is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers.

Reliance on a limited number of customers for our business may generally involve several risks. These risks may include, but are not limited to, reduction, delay or cancellation of orders from our significant customers; failure to renegotiate favourable terms with our key customers; the loss of these customers; all of which would have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company. In order to retain some of our existing customers we may also be required to offer terms to such customers which we may place restraints on our resources.

Maintaining strong relationships with our key customers is, therefore, essential to our business strategy and to the growth of our business. Some of these customers have been associated with us for the past three years. The loss of any key customer, may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers to offset any loss of revenue from the loss of any of our top five customers. We may also not be able to easily re-allocate our resources and assets in a timely or efficient manner.

Our profitability also depends on the performance and business of our key customers. Our revenues are directly affected by the sales of our products by our customers under their own brand names. We rely on the success of our customers in marketing and selling these products and therefore any negative impact on their reputation may also have an effect on our business.

3. *The markets in which our customers compete are characterized by consumers and their rapidly changing preferences and other related factors including lower manufacturing costs and therefore as a result our Company may be affected by any disruptions in the industry.*

The markets in which we and our customers compete are characterized by rapidly changing preferences, evolving industry standards and continuous improvements in products and services. If the end-user demand is low for our customers products, companies for who we manufacture products may see significant changes in orders from customers and may experience greater pricing pressures. Therefore, risks that could harm the customers of our industry could, as a result, adversely affect our Company as well. Our success is therefore dependent on the success achieved by our customers in developing and marketing their products. If standards of products supported by our customers become obsolete or fail to gain widespread commercial acceptance, our customers may experience a reduced demand for their products which may affect our sales, a decline in sales and in operating margins depending on the nature of the product and the end user demand and all of these combined may gradually result in a loss of customers.

Additionally, industry-wide competition for market share of various products can result in aggressive pricing practices or requirement of better products by our customers and therefore our customers may also choose to source the products from other beneficial methods as may be available to them. These conditions may adversely affect the prices of the products which we supply, which may lead to reduced revenues, lower profit margins or loss of market share etc, any of which would have a material adverse effect on our business, financial condition and results of operations.

4. *We do not own our registered office, manufacturing units from which we carry out our business activities. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our manufacturing operations and, consequently, our business.*

As on the date of this Draft Prospectus, our registered office and our manufacturing units have been taken on lease by our Company. For details, please refer to the chapter titled “***Business Overview- Properties***” on page 113 of this Draft Prospectus. There can also be no assurance that our Company will be able to renew the lease agreements entered into with third parties in a timely manner or at all. Further, there can be no assurance that we will not face any disruption of our rights as a lessee/ licensee and that such leave and license and lease agreements will not be terminated prematurely by the licensor/lessor. Any such non-renewal or early termination or any disruption of our rights as lessee / licensee will adversely affect our business operations.

Further, we cannot assure you that we will be able to continue the above arrangements on commercially acceptable / favorable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangement for new offices and other infrastructure, and we cannot assure

that the new arrangements will be on commercially acceptable/favorable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

5. *Our success is dependent on our management, skilled manpower. Our inability to attract and retain key personnel or the loss of services of our Promoter Director may have an adverse effect on our business prospects.*

Divyansh Mukesh Gupta, our one of the Promoter and Managing Director of the Company along with management have significantly contributed to the growth of our business, and our future success is dependent on the continued services of such management team. Our inability to retain any key managerial personnel may have an adverse effect on our operations. Our ability to execute orders and to obtain new clients also depends on our ability to attract, train, motivate and retain highly skilled professionals, particularly at managerial levels. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be able to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our management team, our whole-time directors or other key personnel or an inability on our part to manage the attrition levels; may materially and adversely impact our business, results of operations, financial condition and growth prospects.

The success of our business is also dependent upon our ability to hire, retain, and utilize key managerial personnel including engineers who have the required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the requisite expertise and we may not be able to satisfy the demand from customers for our services because of our inability to successfully hire and retain qualified personnel.

Such skilled personnel may also not be easily available in the market. If we cannot attract and retain qualified personnel it could have a material adverse impact on our business, financial condition, and results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees.

6. *Shortages in, or rises in the prices of, raw materials or components for products we manufacture, which account for majority of our costs, may adversely affect our business.*

Our production depends on obtaining adequate supplies of input components on a timely basis. We procure the local as well as imported raw materials for our business. The imported raw materials include LED diodes, resistors, printed circuit boards. These raw materials are indispensable in manufacturing of our products and are integral to our manufacturing process. We, therefore, maintain inventory of these raw materials for 3-4 months on an average. We purchase our local raw materials within shorter periods from various approved/empanelled third-party component manufacturers that satisfy our quality standards and meet our volume requirements.

As we do not have control of the schedules of the suppliers and hence there can be delays in us receiving the raw materials. Similarly, in cases where we import the raw materials, we are also exposed to exchange fluctuations and we may not be able to control any sudden escalation in prices during the production cycle. The purchase orders we issue to our suppliers do not contain detailed terms and conditions for eventualities where the supply is not done in accordance with the supply terms agreed with our suppliers. For instance, where we have specified the delivery schedule to be four weeks from the date of the purchase order, our purchase order does not specify the damages that we may levy on our suppliers in case the material is not delivered to us with 4 weeks. Shortages of raw materials and components at prices favourable to us could result in reduced production or delays in production, which may restrict our capacity to fulfil large orders at short notice or prevent us from making scheduled shipments to customers. Any future inability to accept high volume orders at short notice or make scheduled shipments could cause us to experience a reduction in our sales and could adversely affect our relationship with existing customers as well as prospective customers.

Details of purchase of imported and local raw materials as compared to total purchases for the respective periods are stated as under:

(₹ in lakhs, except percentages)

Raw Materials	Nine-month period ended December 31, 2022	% of Purchase	March 31, 2022	% of Purchase	March 31, 2021	% of Purchase	March 31, 2020	% of Purchase
Domestic raw materials	1592.91	45.12%	875.65	35.00%	440.67	34.54%	187.25	43.14%
Imported Raw materials*	1937.38	54.88%	1613.49	65.00%	835.24	65.46%	246.81	56.86%
Total	3,530.29	100.00%	2,489.15	100.00%	1,275.91	100.00%	434.06	100.00%

* These includes raw materials procured from local suppliers as well from overseas suppliers.

7. We may be subject to financial and reputational risks due to product quality and liability issues which may have an adverse effect on our business, financial condition and results of our operations.

In the event that we and our suppliers are not able to meet the regulatory quality standards, or strict quality standards imposed by our customers, which are applicable to us in our manufacturing processes, it could have an adverse effect on our business, financial condition, and results of operations. To the extent that products shipped by us to our customers do not, or are not deemed to, satisfy such warranties, we could be responsible for repairing or replacing any defective products, or, in certain circumstances, for the cost of effecting a recall of all products which might contain a similar defect, as well as for consequential damages. However, we are still subject to claims from our customers if end products sold by our customers fail to perform or cause injury or damage due to problems in our products within the warranty terms. If any of the products sold by us fail to comply with applicable quality standards, it may result in customer dissatisfaction, which may have an adverse effect on our business, sales and results of operations. From time to time, due to human or operational error, orders may not meet the specifications required by those customers and may therefore be rejected by customers. Any issues with products not meeting required specifications could reduce our revenue and negatively impact our reputation and financial performance.

While we undertake sample-based testing of our products in accordance with the requirements of the customers, the possibility of future product failures could cause our Company to incur substantial expense to replace defective products, provide refunds or resolve disputes with our customers through litigation, arbitration or other means. There can be no assurance that we will be able to recover any losses incurred as a result of product liability in the future from any third party, or that defects in the products sold by us, regardless of whether we are responsible for such defects, would adversely affect our reputation in the marketplace and customer relationships, result in monetary losses and have a material adverse effect on our business, financial condition and results of operations.

8. Our manufacturing facilities are critical to our business. Any disruption in the continuous operations of our manufacturing facilities would have a material adverse effect on our business, results of operations and financial condition.

As on the date of this Draft Prospectus, our Company runs its business through 2 (two) manufacturing facilities situated in Vasai and Bhiwandi, in the state of Maharashtra. Our revenue is presently derived from products manufactured at these manufacturing facilities, therefore, any disruption to our manufacturing facilities may result in production shutdowns. These facilities are subject to certain operating risks, such as the breakdown or failure of equipment, power supply, performance below

expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government and regulatory authorities. For details related to the capacity utilisation and locations of these manufacturing facilities, please refer to the chapter titled **“Business Overview”** on page 113 of this Draft Prospectus.

Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted supply of our products is critical to our business. In particular, if operations at our manufacturing facilities were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute or unrest, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

9. *We are yet to obtain consents/ no objection certificate from lenders of our Company for the Issue.*

Our Company has entered into agreements for borrowings with certain lenders. These agreements include certain restrictive covenants regarding inspection of books of accounts of the Company, inspection of manufacturing facilities of the Company, repaying secured loan and unsecured loans, undertake guarantee obligations, which shall require our Company to obtain prior approval. In accordance with the terms of the loan agreements, our Company had applied to Union Bank of India for obtaining their consents/ non-objection certificates for undertaking this Issue, however, as of date of this Draft Prospectus, our Company has not received the consent or no-objection certificate from the bank. We have vide mail dated May 15, 2023, had requested the bank to provide us with their consent/no objection certificate w.r.t the Issue. The bank communicated to the Company vide its mail dated May 20, 2023 confirming acknowledgement of receiving the Company’s request. However, as of date of this Draft Prospectus, we have not received the consent and no-objection certificate from the bank. Undertaking the Issue without obtaining consents/no objection certificates from the aforementioned bank may constitute a breach of covenant under the relevant financing documents, which could entitle the respective bank to consider this Issue as an event of default under the loan agreements, thereby entitling them to take adverse actions against our Company as per their respective agreements. The occurrence of any of the events mentioned above can adversely affect our business, results of operations and financial condition.

10. *In the twelve months prior to the date of filing the Draft Prospectus, the Company had issued Equity Shares at a price, which may be lower than the Issue Price.*

In the twelve months prior to the date of filing of the Draft Prospectus, the Company had allotted 45,00,000 Equity Shares as bonus shares to its existing shareholders. For further details on the issuance of Bonus shares, please refer to the chapter titled **“Capital Structure”** on page 61 of this Draft Prospectus.

11. *There have been certain instances of regulatory non-compliances or delays or errors in the past. We may be subject to regulatory actions and penalties for any such past or future non-compliance or delays or errors and our business, financial condition and reputation may be adversely affected.*

There have been certain instances of regulatory non-compliances and delays in the past by our Company. For example, there were inadvertent delays in the filing of Form MGT-14 that were required to be filed for special resolutions passed at the extra-ordinary meeting of members of the Company held on October 16, 2019. Consequently, we filed Form CG-1 with the Ministry of Corporate Affairs in 2020 for condonation of such delays, pursuant to which such delays were condoned by them.

We cannot assure you that, in the future, we will not be subject to any liability on account of such non-compliances or that no action would be taken by the RoC or any other regulatory or statutory body in future in relation to this error. If we are subject to any such liability, it may have a material adverse effect on our reputation, financial condition and results of operations. Further, there can be no assurance

that there will be no such delays or non-compliances in the future and our Company will not be subject to adverse actions by the authorities.

We are also required to make certain payments to various statutory authorities from time to time, including but not limited to payments pertaining to employee provident fund, employee state insurance and income tax. There have been delays in this respect for payment of GST for Fiscal 2018, 2019, 2020, 2021 and 2022, provident fund for Fiscal 2021, 2022 and 2023, respectively in the state of Maharashtra, we cannot assure you to that we will be able to pay our statutory dues timely, or at all, in the future. Any failure or delay in payment of such statutory dues may expose us to statutory and regulatory action, as well as significant penalties, and may adversely impact our business, results of operations and financial condition.

12. *We require certain approvals and licenses in the ordinary course of business, some of the approvals have been expired or have not been obtained or are required to be updated with the new registered office of the Company. Any failure to successfully obtain/renew/update such registrations may adversely affect our operations, results of operations and financial condition.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we are in the process of applying for revision of certain approvals, licenses, registrations and permits pursuant to the conversion of the Company and the change of the address of the Registered Office of the Company, which is currently pending before the relevant authority. Our Company has also applied for the renewal of the consent to operate, which expired on March 31, 2023, to be obtained from the Maharashtra Pollution Control Board for its factory unit situated in Vasai. Our Company has made an application for obtaining the consent to establish and consent to operate from the Maharashtra Pollution Control Board for its factory unit situated in Bhiwandi.

Further, our Company has made an application for the renewal of the no objection certificate from the fire department, for its factory units situated at Bhiwandi and Vasai. However, our Company is yet to receive the acknowledged copy of the application from the relevant authority for the renewal application made for the factory unit situated in Bhiwandi. Additionally, our Company has obtained the TAN certificate from the Income Tax Department, Government of India. However, it is unable to trace a copy of the same. In this respect, neither we, nor the Lead Manager have been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that we will be able to trace the relevant documents pertaining to his educational qualifications in the future, or at all.

For further details, please refer to chapter titled “***Government and Other Approvals***” beginning on page 233 of this Draft Prospectus.

There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any

of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

13. *The success of our manufacturing process is dependent upon few suppliers for our raw material supplies for our business operations. In an eventuality where our suppliers are unable to deliver us the required materials in a time – bound manner it may have a material adverse effect on our business operations and profitability.*

For the nine months period ended December 31, 2022 and for the Financial Year ended March 31, 2022, Financial Year ended March 31, 2021 and Financial Year ended March 31, 2020, our top 10 suppliers contributed more than 74.75%, 92.25%, 75.17% and 78.18% of our purchases respectively. Although we believe that there are sufficient suppliers in the market, however in the event of a delay, inadequacy or default in deliveries by any of our suppliers, there are chances that we may not be able to source our raw material on an adequate and timely basis or on commercially acceptable terms which could adversely affect our business, results of operations and financial condition to the extent we are unable to line up supplies from alternate suppliers.

It is also critical for us that our suppliers adhere to the quality standards and product specifications that have been furnished to them by us, and failure by them to adhere to the same would adversely affect the quality and/or timely delivery of our products. In the event we become subject to product liability or performance guarantees caused by defective raw materials obtained from an outside supplier, it may adversely affect our reputation as a supplier, financial condition and results of operations.

14. *Our insurance coverage may not adequately protect us against all material hazards.*

We procure insurance for our operations against stock insurance and standard coverage for manufacturing facilities. Our existing insurance coverage may be insufficient to cover all the risks associated with our business and operations. We also cannot assure you that we will renew our existing insurance policies in a timely manner or at all. In the case of an uninsured loss, a loss in excess of insured limits or a loss for which we do not have coverage or coverage is prohibitively expensive, including those caused by natural disasters and other events beyond our control, we may be required to pay for losses, damages and liabilities out of our own funds, which could materially and adversely affect our business, financial condition and results of operations. Even if our insurance coverage is adequate to cover our direct losses, we may not be able to take remedial actions or other appropriate measures. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future.

Our Company has covered itself against certain risks. The insurance policies obtained by us consist of fire insurance with add on cover for earthquakes, terrorism and in certain cases, for our manufacturing facilities, machinery and other equipment and products that we manufacture. Our significant insurance policies as specified in chapter titled “***Business Overview***” on page 113 of this Draft Prospectus. While we believe that the insurance coverage that we maintain is in accordance with industry custom, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all material losses. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, that is not covered by insurance or exceeds our insurance coverage, the loss would have to be borne by us and our cash flows, results of operations and financial performance could be adversely affected.

15. *We may be subjected to risks associated with product warranty.*

Our products are subject to different periods of warranties from one year to five years from the date of sale of the products against manufacturing defects and subject to our warranty terms and conditions. In the event of claimed defects or non-performance of our products, our practice is to accept such genuine claims and to replace such products. In the future, we might also face material number of warranties claims due to defects in our products. Defects, if any, in our products could adversely affect our reputation and demand for our products. In the event that defects, or warranty claims become more frequent, there may be an adverse effect on our operating results and financial condition.

16. Any inability on our part to maintain quality standards could adversely impact our business, results of operations and financial condition. Quality control is a vital element for our sector.

Our business is dependent on the trust our customers have in the quality of our products. The projects we execute or the products we manufacture must meet our customers' quality standards. We are ISO 9001:2015 certified as a manufacturer of LED strip lights. Although we have put in place quality control procedures, we cannot assure that our products will always be able to satisfy our customers' quality standards. Any negative publicity regarding our Company, or products, including those arising from a drop – in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations.

17. Our Company has negative cash flows from its operating and investing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating and investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(Rs. In Lakhs)

Particulars	For the period ended December 31, 2022	As on March 31,		
		2022	2021	2020
Net Cash Flow from / (used in) Operating Activities	68.49	206.96	21.93	(163.82)
Net Cash Flow from / (used in) Investing Activities.	(138.92)	(343.72)	(80.62)	(155.19)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

18. Any inability on our part to keep pace with the technological developments could adversely impact our business, results of operations and financial conditions.

Any rapid change in our customers' expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. We believe that we have always strived to cater to the growing demand of our customers by fulfilling their technical requirements. Our failure to anticipate or to respond adequately to changing technical, market demands and/ or client requirements could adversely affect our business and financial results.

19. We engage contract labour for carrying out certain business operations.

In order to retain operational efficiencies, we also engage independent contractor through whom we engage contract labour for performance of certain functions at our manufacturing facilities. We are responsible for any wage payments to be made to such labourer's in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our business, results of operations and financial condition.

We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Further, we also employ contract labor at our factory. Any disruptions with the laborer's may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage

and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labor policies, and we may face the threat of labor unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

20. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

We maintain large amounts of inventory at our premises at all times. Although we have set up security measures, our operations may be subject to incidents of theft or damage to inventory. There can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future which could adversely affect our results of operations and financial condition. For instance, we had in the past experienced theft of few finished products at our manufacturing facilities. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurer the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition.

21. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to obtain sales orders, hire, train, supervise and manage new employees, expand our marketing channels and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or marketing channels will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

22. *Our Company has unsecured loans that may be recalled by the lenders at any time and our Company may not have adequate funds to make timely payments or at all.*

Our Company has availed unsecured loans from related parties, which may be recalled at any time. As on December 31, 2022, we had unsecured loans amounting to ₹141.13 Lakhs. Such loans may not be repayable at the time of demand by such related parties. In the event that any lender seeks repayment of any such unsecured loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations.

For further details, please refer to the chapter titled ***“Financial Indebtedness”***, beginning on page 214 of this Draft Prospectus.

23. *Under-utilization of our manufacturing capacities and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.*

As of December 31, 2022, our Company runs its business through 2 (two) manufacturing facilities situated in Vasai and Bhiwandi, in the state of Maharashtra. For further details, please refer to the chapter titled ***“Business Overview”*** on page 113 of this Draft Prospectus. Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by, our customers. In the event we face prolonged disruptions at our

facilities including due to interruptions in the supply of electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition.

24. Information in relation to our installed capacity and capacity utilization of our manufacturing facility included in this Draft Prospectus is based on various assumptions and estimates, and future production and capacity utilization may vary.

Information relating to our installed capacities and the capacity utilization of our manufacturing facility included in this Draft Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials, actual product mix vis-à-vis the products mix envisaged for computation of our installed capacity and assumptions relating to potential utilization levels and operational efficiencies. While we have obtained a certificate from Ashok Sonje Engineers and Valuers, dated May 15, 2023 actual capacities and utilization rates may differ significantly from the estimated installed capacities or estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our installed capacity or estimated capacity utilization information for our existing facility included in this Draft Prospectus.

For further details, please refer to the chapter titled “**Business Overview**” on page 113 of this Draft Prospectus.

25. We have entered into Related Party Transactions and continue to do so in future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.

Our Company has entered into transactions with our certain related parties. While we believe that all such transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to the chapter titled “**Restated Financial Statements**” beginning on page 169 of this Draft Prospectus.

26. Delays or defaults in client payments could affect our operations.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

27. Some of our Group Companies have incurred losses in the past and may incur losses in the future.

Some of our group companies have incurred losses in the preceding three fiscals. The details of profit/loss incurred by such Group Companies for the preceding four fiscals are as follows:

(₹ in Lakhs)

Sr. No	Name of the Group Company	Profit / (Loss) after tax		
		As on March 31, 2022	As on March 31, 2021	As on March 31, 2020
1	Kundan Industries Limited	(1657.04)	36.38	20.62
2	Kundan Fastners Multitrade Private Limited	(0.43)	Nil	1.09
3	Kundan Fastening Private Limited*	(0.58)	NA	NA

* Kundan Fastening Private Limited was incorporated on April 19, 2021.

For further details on the financial information of our Group Companies, please refer to the chapter titled “*Our Group Companies*” on page 166 of this Draft Prospectus.

28. *Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.*

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labor, workplace and related laws and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- a. Bureau of Indian Standards Act, 2016;
- b. The Factories Act of 1948;
- c. Fire Prevention Laws;
- d. Environmental Laws

The above-mentioned enactments govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non – compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

For further details, please refer to the chapter titled ““*Key Industry Regulations and Policies*” on page 134 of this Draft Prospectus.

29. *We may not be able to sustain if there is no effective implementation of our business and growth strategy.*

Success of our business will depend greatly on our ability to effectively implement our business and growth strategy. We cannot provide assurance that we will be able to execute our strategy on time and within the estimated budget, or that we will meet the expectations of targeted customers. Changes in regulations applicable to the industry in which we operate may also make it difficult to implement our business strategy. Inability on our part to manage our business and effectively implement growth strategy could have a material adverse effect on our business, financial condition and profitability.

30. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

After the issue our promoters along with the promoter group will continue to hold collectively [●]% of the post Equity share capital of the Company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

31. *The markets we serve are subject to cyclical demand and vulnerable to economic downturn, which could harm our business and make it difficult to project long-term performance. In addition, our business is seasonal.*

Demand for our products depends in upon the level of capital and maintenance expenditures by the end-users. These customers’ expenditures historically have been cyclical in nature and vulnerable to economic downturns. Decreased capital and maintenance spending by these customers could have a

material adverse effect on the demand for our products and our business, financial condition, and results of operations. In addition, this historically cyclical demand limits our ability to make accurate long-term predictions about the performance of our Company. Even if demand improves, it is difficult to predict whether any improvement represents a long-term improving trend or the extent or timing of improvement. There can be no assurance that historically improving cycles are representative of actual future demand.

In addition, our business is subject to seasonality. The second and third quarters tend to be the strongest sales periods in any given fiscal year as spending on LED lighting tends to increase during the festive season in India and shortly thereafter.

32. *We are dependent on third party transportation and logistics service providers. Any increase in the charges of these entities could adversely affect our business, results of operations and financial condition.*

Based on customer preferences, we may be required to pay the transportation costs for the products we sell. In addition, we may have to pay for transportation costs in relation to the delivery of some of the raw materials and other inputs to our manufacturing facilities. We do not own any vehicles for the transportation of our products and/or raw materials, we therefore rely on third party transportation and logistics providers for delivery of our raw materials and products. This makes us dependent on third-party transportation and logistics providers. We do not have any long-term contractual arrangements with such third-party transportation and logistics providers. Disruptions of logistics could impair our ability to procure raw materials and/or deliver our products on time, which could materially and adversely affect our business, results of operations and financial condition.

Our freight charges for the nine-month period ended December 31, 2022, and for the Financial Year ended March 31, 2022, Financial Year ended March 31, 2021 and Financial Year ended March 31, 2020 accounted for ₹ 71.38 Lakhs, ₹ 41.14 Lakhs, ₹ 22.24 Lakhs, ₹ 5.00 Lakhs, respectively. We are subject to the risk of increases in freight costs. If we cannot fully offset any increases in freight costs, through increases in the prices for our products, we would experience lower margins. In addition, any increase in export tariffs also will increase expenses which in turn may adversely affect our business, results of operations and financial condition.

33. *If we are unable to establish and maintain an effective internal controls and compliance system, our business and reputation could be adversely affected.*

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines.

We periodically test and update our internal processes and systems. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances.

We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. Maintaining such internal controls requires human diligence and compliance and is therefore subject to lapses in judgment and failures that result from human error. Likewise, any such errors may adversely affect our business, results of operations and financial condition.

34. *If companies with products that we currently manufacture or may manufacture in the future do not continue to outsource manufacturing to electronics manufacturing companies in India, our sales could be adversely affected.*

In recent years, branded companies operating and selling products under their respective brands in these segments, have increasingly outsourced the manufacturing of their products to electronics manufacturing service providers in India. We believe that we have benefited from this outsourcing trend due to our flexibility and ability to reduce costs in manufacturing these products. A customer's decision

to outsource is affected by its ability and capacity for internal manufacturing and the competitive advantages of outsourcing. There can be no assurance that the customers will continue to outsource or increase the share of outsourcing. If these companies do not continue to outsource the manufacturing of their products or reduce the amount of manufacturing outsourced by them or if our customers decide to perform these functions internally or because they use other providers of these services, our Company's future growth could be limited and our sales and operating results may suffer.

35. *We presently do not own the trademark or logo under which we currently operate and if third parties infringe the trademark, logo and intellectual property that we use, our business and reputation would be adversely affected.*

Our Company has applied for various trademark registrations in relation to our Company and our services. The application made by our Company for registration of trademark **KUNDAN** and **KUNDAN** under Class 11 and 35, respectively of the Trade Marks Act, 1999 has been objected to. Further, our Company has made an application for the registration of trademark **KUNDAN** under Class 9, 35, 11, 16, however, our Company has not received an acknowledgement from the authorities as on date. For further details, please see refer to the chapter titled "**Government and Other Statutory Approvals**" beginning on page 233 of this Draft Prospectus.

With respect to our trademarks that have been applied for and/or are under objection or opposed, we cannot assure you that we will be successful in removing the objections or contend the opposition. As a result, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted. We cannot guarantee that any of our registered or unregistered intellectual property rights or our know-how, or claims thereto, will now or in the future successfully protect what we consider to be the intellectual property underlying our products and business, or that our rights will not be opposed or otherwise challenged.

While we endeavour to ensure that we comply with the intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company, pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses.

36. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and may be subject to change based on various factors, some of which are beyond our control. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business, results of operations and financial condition.*

We intend to use the Net Proceeds for the purposes described under chapter titled "**Objects of the Issue**" beginning on page 74 of this Draft Prospectus. The Objects of the Offer comprise (a) Funding the incremental working capital requirements of our Company, (b) General corporate purposes (the amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds). Further our Objects of the Offer have not been appraised by any bank, financial institution or other independent agency. Our management will have broad discretion to revise our business plans, estimates and budgets from time to time. Consequently, our funding requirements and deployment of funds may change, which may result in rescheduling of the proposed utilization of Net Proceeds and increasing or decreasing expenditure for a particular activity, subject to compliance with applicable law. Further, pursuant to Section 27 of the Companies Act, 2013, any variation in the Objects of the Offer would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Offer, in accordance with applicable law.

In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilization towards the Objects of the Offer is lower than the proposed deployment, such balance will be used for future growth opportunities, if required. If

estimated utilization of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

37. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer to the chapter titled “*Dividend Policy*” beginning on page 168 of this Draft Prospectus.

38. *We have not commissioned an industry report for the disclosures made in the chapter titled ‘Industry Overview’ and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have not commissioned an industry report for the disclosures made in the chapter titled “*Industry Overview*” beginning of page 102 of this Draft Prospectus and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Prospectus. Further, the industry data mentioned in this Draft Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

39. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than Rs.10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances.

EXTERNAL RISK FACTORS

40. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

41. *Natural calamities could have a negative impact on the Indian economy and cause our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged

spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

42. *Changing regulations in India could lead to new compliance requirements that are uncertain.*

The regulatory environment in which we, and our key customers, operate is evolving and is subject to change. The Government of India may implement new laws or other regulations that could affect the logistics industry or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

43. *Investors may not be able to enforce a judgment of a foreign court against us.*

Our Company is a company incorporated under the laws of India. All our Company's Directors and officers are residents of India and all of our assets are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

44. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

45. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

46. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

47. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

48. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.*

The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the draft prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the draft prospectus should accordingly be limited

RISK RELATED TO OUR EQUITY SHARES

49. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares has been determined by our Company in consultation with the LM, and through the Fixed Issue Process. This price is based on numerous factors, as described under "**Basis for Issue Price**" on page 84 of this Draft Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Issue Price.

50. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;

- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

51. *Our Equity Shares have not been publicly traded prior to this Issue. After this Issue, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.*

Prior to this Issue, there has been no public market for our Equity Shares. An active trading market on the Stock Exchanges may not develop or be sustained after this Issue.

The trading price of our Equity Shares after this Issue may be subject to significant fluctuations in response to factors including general economic, political and social factors, developments in India's fiscal regime, variations in our operating results, volatility in Indian and global securities markets, developments in our business as well as our industry and market perception regarding investments in our business, changes in the estimates of our performance or recommendations by financial analysts, and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. The trading price of our Equity Shares may also decline in reaction to events that affect the entire market and/or other companies in our industry even if these events do not directly affect us and/or are unrelated to our business or operating results.

52. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

53. *Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely affect the trading price of our Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the requirements specified by the RBI. If the transfer of shares is not in compliance with such requirements or falls under any of the specified exceptions, then prior approval of the RBI will be required. Further, in accordance with press note 3 of 2020, dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade, Government of India, the FDI Policy has been recently amended to state that all investments by entities incorporated in a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments.

In addition, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection or tax clearance certificate from the income tax authority. Additionally, the Indian government may impose foreign exchange restrictions in certain emergency situations, including situations where there are

sudden fluctuations in interest rates or exchange rates, where the Indian government experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the Indian government's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

54. *Investors may have difficulty enforcing foreign judgments against us or our management.*

We are a limited liability company incorporated under the laws of India. All our directors and executive officers are residents of India and a majority of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of CPC on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

55. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

A public company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offer document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

56. *There is no guarantee that our Equity Shares will be listed on NSE Emerge in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue.

In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the NSE Emerge within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

57. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

58. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

59. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

These special tax benefits are dependent on the Company fulfilling the conditions prescribed under the Income Tax Law. Hence, the ability of the Company to derive the special tax benefits is dependent upon fulfilling such conditions, which are based on business imperatives it faces in the future, it may or may not choose to fulfil.

1. Lower corporate tax rate under Section 115BAA of the Income-tax Act, 1961 (“the Act”):

As per Section 115BAA of the Act as inserted vide the Taxation Laws (Amendment) Act, 2019, with effect from Financial Year 2019-20 (i.e. AY 2020-21), a domestic company has an option to pay income tax in respect of its total income at a concessional tax rate of 22% (plus surcharge of 10% and cess) provided the company does not avail specified exemptions/incentives/ deductions or set-off of losses, unabsorbed depreciation etc. and claiming depreciation in prescribed manner and complies with other conditions specified in section 115BAA of the Act.

In case a company opts for Section 115BAA of the Act, provisions of MAT under Section 115JB of the Act would not be applicable and MAT credit of the earlier year(s) will not be available for set-off.

The option needs to be exercised on or before the due date of filing the tax return in prescribed manner. Option once exercised, cannot be subsequently withdrawn for the same or any other tax year and therefore, shall apply to subsequent assessment years. Further, if the conditions mentioned in section 115BAA of the Act are not satisfied in any year, the option exercised shall become invalid in respect of 155 such year and subsequent years, and the other provisions of the Act shall apply as if the option under section 115BAA had not been exercised.

WORLD ECONOMIC OUTLOOK

The baseline forecast is for growth to fall from 3.4 percent in 2022 to 2.8 percent in 2023, before settling at 3.0 percent in 2024. Advanced economies are expected to see an especially pronounced growth slowdown, from 2.7 percent in 2022 to 1.3 percent in 2023. In a plausible alternative scenario with further financial sector stress, global growth declines to about 2.5 percent in 2023 with advanced economy growth falling below 1 percent. Global headline inflation in the baseline is set to fall from 8.7 percent in 2022 to 7.0 percent in 2023 on the back of lower commodity prices but underlying (core) inflation is likely to decline more slowly. Inflation’s return to target is unlikely before 2025 in most cases.

The January 2023 World Economic Outlook update projects that global growth will fall to 2.9 percent in 2023 but rise to 3.1 percent in 2024. The 2023 forecast is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook but below the historical average of 3.8 percent. Rising interest rates and the war in Ukraine continue to weigh on economic activity. China’s recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic levels.

ROAD AHEAD

Local electronics design and production are being positively influenced by ongoing domestic consumption, changing dynamics in the global supply chain, and a plethora of policy initiatives to assist indigenous manufacturing in the current period is most advantageous. The smooth implementation of new initiatives and the reversal of restrictive laws will go a long way toward boosting international business confidence in India's business environment and attracting manufacturing investments.

In India, Sony, Samsung, LG Electronics, Panasonic, and other companies are the market leaders in ESDM sector. Government efforts are concentrated on bridging the digital gap. Projects like "Digital India," "Smart Cities," "ePanchayats," "National Optical Fiber Network," etc. enhanced consumer demand for electronic goods around the nation. India's middle class is rapidly expanding, which has improved the affordability of electronics products. The demand for electronic goods has increased as consumers' preferences for products and devices with smart technology (like smart LED TVs) and inventive designs have changed and disposable incomes have increased. The personal disposable income in India increased at a CAGR of 15.6% between FY07 and FY11, which is directly correlated with consumers' desire to spend money on electronics.

Fueled by strong policy support, huge investments by public and private stakeholders and a spike in demand for electronic products, the ESDM sector in India has bright prospects ahead of it and is predicted to reach US\$ 220 billion by 2025, expanding at 16.1% CAGR between 2019-2025.

OUR BUSINESS STRATEGIES

Improve and increase operational efficiencies

We will continue to focus on further increasing our operations and improving operational effectiveness at our production facilities. Higher operational effectiveness results in greater production volumes and greater sales, and therefore allows us to spread fixed costs over a higher number of units sold, thereby increasing profit margins. We will also continue to identify various strategic initiatives to improve our operational efficiencies and reduce operating costs. We continue to focus on investing in automation, modern technology and equipment to continually upgrade our products including the quality of our products to address changing customer preferences as well as to improve operational efficiency.

Optimal utilization of resources

Our Company constantly endeavours to improve our manufacturing process, skill up-gradation of workers, using latest technology in machineries to optimize the utilization of resources. We regularly analyse our

existing raw material procurement and manufacturing processes to identify the areas of bottlenecks and correct the same. This helps us in improving efficiency and putting resources to optimal use.

Expand into new product lines

We intend to cater to the increasing demand of our existing customers and also to increase our existing customer base by enhancing our product portfolio. Based on market intelligence, discussions with our customers and research by our R&D team, we are able to produce new products that have been well-accepted in our target markets. For instance, we plan to upscale our technology and enter into high margin products.

Enhance customer base by entering new geographies

We intend to cater to the increasing demand of our existing customers and also to increase our existing customer base by enhancing our product portfolio. * These includes raw materials procured from local suppliers as well from overseas suppliers.

Our business is dependent on our supply chain management. We have strong supply chain relationships both in India and in overseas. We also source raw materials from vendors primarily in China. We usually do not enter into long-term supply contracts with any of our raw material suppliers and typically source raw materials from third-party suppliers or the open market. Our suppliers are selected based on quality, price, cost effectiveness, company history, service levels and delivery capability. We negotiate the price for each purchase order, and we generally have more than one supplier for each raw material. The terms and conditions including the terms related to return policy are set forth in the purchase orders. Arrangements with raw material and packing material suppliers are subject to, among other things, regulatory requirements, various import duties and other government clearances. We do not have any suppliers on an exclusive basis for any raw materials. The prices of our raw materials are based on, or

Phased implementation of Unified Payments Interface

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, an RII also had the option to submit the ASBA Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II:

This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Under this phase, submission of the physical ASBA Form by an RII through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II till further notice.

Phase III:

The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days.

The Offer will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Bid/Issue Opening Date.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 (the “UPI Streamlining Circular”), SEBI

has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post–Issue LM will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders using the UPI.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the LM.

Further, pursuant to SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all Retail Individual Bidders applying in public issues where the application amount is up to ₹500,000 shall use UPI and shall also provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules.
