Similarly, statements that describe our Company’s strategies, objectives, plans or goals are also forward-looking statements. All forward-looking statements are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with the expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company operates and our ability to respond to them, our ability to successfully implement our growth and expansion strategies, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally and changes in competition in our industry. Important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

- Uncertainty in relation to continuing effect of the COVID-19 pandemic on our business and operations;
- Our inability to enter into or maintain strategic relationships with MNOs;
- Failure, defects, delays and other problems involving the technology systems and infrastructure on which we rely for providing our services and solutions to our clients;
- Our inability to continue to make strategic acquisitions to grow our business and further diversify service offerings;
- Our dependence on our key personnel, including our Directors and senior management;
- Any inability to respond to changing conditions of market participants;
- Exchange rate fluctuations in various currencies in which we do business; and
- Slowdown in economic growth in India or the other countries in which we operate.

For further discussion on factors that could cause our actual results to differ from the expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 23, 131 and 328, respectively. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Forward-looking statements reflect the current views of our Company as of the date of this Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, Promoters, Directors, the Selling Shareholders, the BRLMs nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

The Selling Shareholders will, severally and not jointly, ensure that investors are informed of material developments in relation to statements and undertakings made by them in relation to themselves and their respective portion of the Equity Shares in this Red Herring Prospectus until the time of the grant of listing and trading permission by the Stock Exchanges.

Risks Related to our Company and our Industry

- 1. We depend in part on the success of our strategic relationship with third parties, particularly our direct relationships with mobile network operations (“MNOs”). Our inability to enter into or maintain such relationships, particularly with MNOs may adversely affect our business, financial condition and results of operations.***

We are dependent on our arrangements with third parties and MNOs in particular for connectivity in various regions around the world to provide our services to our clients. Further, in certain regions where we are unable to provide services and solutions in a cost efficient manner and in the absence of such relationships, we rely on indirect relationships with MNOs. Our business depends on the continuity of our relationship with these MNOs. As of June 30, 2020, we had direct relationships with over 240 MNOs and provide our enterprise clients with access to over 800 mobile networks. While the number of subscribers and the volume of messages have grown and continue to grow, we may not be able to maintain, identify or secure suitable relationships with MNOs. In addition, consolidation in the telecommunication industry may adversely impact the number of direct or other relationships that we are able to establish with MNOs. We may also not be able to maintain sufficient volumes in order to develop or sustain such relationships with MNOs. If we are unable to establish or maintain direct or other relationships with MNOs on the existing terms and conditions or the current commercial arrangement, or if MNOs terminate their agreements with us, we may be unable to attract new clients, which could have a significant impact on our reputation and profitability, and in turn, could have an adverse impact on our business, financial condition and results of operations. Further, we may be required to enter into new agreements or addendums to existing agreements with MNOs in order to secure

connectivity to the mobile networks, and there can be no assurance that MNOs will agree to these new agreements or addendums or that we will be able to negotiate new agreements or addendums on favorable terms.

Additionally, as a service provider to MNOs, we may be asked to assist and respond to issues or problems that our MNO clients experience. In case we are unable to respond to these issues or problems, these MNOs may terminate their agreements with us or suspend our services which could result in an adverse impact on our relationships and reputation with these MNOs and could have a significant effect on our ability to provide services and solutions in the future and negotiate new direct relationships with these MNOs.

2. *Failures, defects, delays and other problems involving the technology systems and infrastructure on which we rely for providing our services and solutions to our clients may adversely affect our business, financial condition and results of operations.*

We rely on various technology systems and infrastructure in providing our services and solutions to our clients. Our business could be interrupted by any damage to or the failure of our technology systems, infrastructure, hardware and software or impact of any failure of the networks, technology systems, infrastructure, hardware and software. Our systems and infrastructure are also vulnerable to damage and interruption from, among other things, power loss, transmission cable cuts and other telecommunication failures, natural disasters, computer viruses and software defects and errors by our employees or service providers. System failures or delays could disrupt our ability to provide our services and solutions through our communications platform, which could result in a loss of revenue from our current and potential clients as well as adversely impact our business operations and our reputation.

Defects in functionality or interruptions in the availability of our services and solutions, including user error, could result in a loss of or delayed market acceptance and use of our services and solutions, diversion of development and client service resources or result in a suspension of our services or termination of our agreements leading to a loss of revenue. Further, the availability or performance of our services and solutions could be adversely affected by a number of factors, including inability of our clients' to access the network of their MNOs, the mobile signal and connectivity of our clients' end-users, the failure of our technology systems and infrastructure, security breaches or variability in clients traffic volumes. In addition to potential liability, if we experience interruptions in the availability of our services and solutions, our reputation may be adversely affected, which could result in loss of clients and in turn, could have an adverse effect on our business, financial condition and results of operations.

In addition, costs incurred in correcting any material failures, defects, delays, errors or other problems involving our technology systems and infrastructure or our services and solutions may be substantial and could have an adverse effect on our business, financial condition and results of operations.

3. *Our Company, in the past, has delayed in complying with reporting guidelines under the provisions of the Foreign Exchange Management (Transfer or issue of security by a person resident outside India) Regulations, 2000 and we may be subject to regulatory action by RBI.*

Our Company, in the past, has faced instances of delay in complying with the reporting requirement at the time of making an investment into our overseas subsidiaries, namely, Form ODI and annual performance report with RBI under the provisions of the Foreign Exchange Management (Transfer or Issue of any Foreign Security) Regulations, 2000, as amended ("FEMA 20"), in relation to an investment made in September, 2014 into our Subsidiary, Routesms Solutions Nigeria Limited and in August, 2013 into our Subsidiary, Routesms Solutions FZE. In accordance with FEMA 20, we were required to submit Form ODI with the RBI at the time of making an investment into our overseas subsidiaries and subsequently every year annual performance report on or before December 31. However, our Company did not submit Form ODI with RBI at the time of making abovementioned investment in the respective Subsidiaries and to ensure compliance with such conditions, our Company had submitted applications dated January 16, 2018 to the authorised dealer bank for onward filing with RBI in relation to an investment made in September, 2014 into our Subsidiary, Routesms Solutions Nigeria Limited and subsequently, RBI vide its letter dated September 14, 2018 ratified the transaction. In respect to our investment into our Subsidiary, Routesms Solutions FZE in August 2013, our Company has submitted applications dated January 16, 2018 and December 10, 2018 to the authorised dealer bank for onward filing with RBI and the RBI took it on the record on May 16, 2019.

While no penalties have been imposed on our Company or our Subsidiaries in this regard, we cannot assure you that RBI or other regulatory authorities will not impose any penalty on us or will not take any penal action in relation to the delays in submitting Form ODI and annual performance report with RBI or the failure to obtain regulatory approvals under applicable regulations. In the event that any adverse actions are taken against us, our results of operations and profitability could be adversely affected.

4. Our Company and Subsidiaries are involved in certain legal and other proceedings. Any adverse outcome in any of these proceedings may adversely affect our profitability and reputation and may have a material adverse effect on our financial condition and results of operations.

Our Company and Subsidiaries are currently involved in a number of legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The summary of outstanding litigation in relation to criminal matters, tax matters, actions by regulatory/ statutory authorities and other material outstanding litigations against our Company and Subsidiaries have been set out below:

* To the extent quantifiable.

For further information, see “Outstanding Litigation and Material Developments” on page 371.

Decisions in any of the aforesaid proceedings adverse to our interests may have an adverse effect on our business, future financial performance and results of operations. If the courts or tribunals rule against our Company or Subsidiaries, we may face monetary and/or reputational losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities.

5. *Our acquisitions are subject to various risks, including risks relating to the integration of these acquired businesses with our existing operations. We may in the future continue to make strategic acquisitions to grow our business and further diversify service offerings. An inability to identify, complete and successfully integrate such acquisitions could adversely affect our business prospects, results of operations and financial condition.*

We have in past announced and completed a number of acquisitions in India and other jurisdictions to grow our business, expand our business segments and service offerings, and diversify our revenue streams. For further information, see “*Our Business – Acquisitions and Strategic Investments*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations – Presentation of Financial Information – Acquisitions and Investments*” on pages 131 and 333, respectively. For instance, on September 21, 2017, we entered into definitive agreements relating to the acquisition of 365squared (such acquisition, the “**365squared Acquisition**”). Our business and operations are subject to various risks relating to the 365squared Acquisition. While we believe that the 365squared Acquisition has resulted in the expansion of our mobile operator segment, there may be infirmities or irregularities in the operational and financial reporting procedures or in compliance with regulatory and other requirements by 365squared, and we may be subject to unforeseen risks, liabilities and obligations in this regard. We may also be required to expend significant management and other resources to ensure that the operational and financial reporting standards followed by 365squared are integrated to those followed in our existing operations. For further information on the 365squared Acquisition, see “*History and Certain Corporate Matters – Acquisition of 365squared Limited*” on page 156. As a result, our business and operations are subject to various risks arising out of the 365squared Acquisition and other acquisitions and investments.

We further continue to evaluate inorganic growth opportunities consistent with our business strategy of diversifying our service offerings and geographic presence while providing integrated business services to our clients. However, such proposed acquisitions may be subject to receipt of relevant approvals. There can be no assurance that we will be able to obtain such approvals in a reasonable timeframe, or at all. There can be no assurance that we will be able to successfully integrate the acquired businesses into our existing operations or achieve economies of scale. Our acquisition strategy involves various risks and challenges, including the diversion of management’s attention from our business operations; the potential loss of key employees and clients of the acquired businesses; potential disruption of business relationships with current clients; uncertainties that may impair our ability to attract, retain and motivate key employees; issues relating to management and integration of operations; potential deficiencies in financial control and statutory compliance at the acquired companies; an increase in our expenses and working capital requirements; a failure to achieve cultural compatibility and other benefits expected from an acquisition; and exposure to unanticipated liabilities of the acquired companies. An inability to integrate or manage these acquired businesses or entities may result in increased costs and adversely affect our results of operations. For instance, our Company has entered into a business transfer agreement dated June 15, 2020 to acquire certain technologies and related contracts from a Bengaluru-based company specializing in development of telecom related solutions, which includes, *inter alia*, multimedia messaging service center and short message service center platforms on a going concern basis. The acquisition is subject to customary closing conditions. However, as part of an ongoing litigation involving the Bengaluru-based company with a third party, the court has passed an order restricting the company from disposing off its assets pending the litigation. Accordingly, our acquisition has been delayed and we may be unable to consummate the transaction. In the event of such litigation or similar events involving the entities / businesses that we propose to acquire, we may be unable to complete our acquisitions and our business, financial condition and results of operation may be adversely effected.

We may not have any recourse against the entities from which we acquired these entities in connection with any loss that may arise out of such acquisitions. We may be adversely impacted by liabilities that we assume from our acquisitions, including known and unknown obligations, intellectual property or other assets, terminated employees, current or former clients, or other third parties, and we may fail to identify or adequately assess the magnitude of certain liabilities, shortcomings or other circumstances prior to acquisition, which could result in unexpected legal or regulatory exposure, unfavourable accounting treatment, unexpected increases in taxes, or other adverse effects on our business.

In addition, we may require additional financial resources for the successful expansion or reorganization of these recently acquired businesses and integrating their operations into our operations. An inability to raise adequate finances in a timely manner and on commercially acceptable terms for the expansion, reorganization or integration of

these businesses with our existing operations could materially and adversely affect our business, results of operations and financial condition.

In connection with any such acquisition or investment, we may incur debt, amortization expenses relating to intangible assets, large and immediate write-offs, assume liabilities or issue shares as payment for the acquisition that would dilute our current shareholders' percentage of ownership. If we are not able to realize the anticipated benefits or the expected return on our investments or acquisitions, or are unable to complete acquisitions or integrate the operations, software, technologies or personnel gained through any such acquisition, it could have an adverse effect on our business, financial condition and results of operations.

An inability to identify, complete and successfully integrate any acquired businesses into our operations, may affect our growth strategy, market share, profitability, or competitive position.

6. *We face a risk from potential claims resulting from client's misuse of our platform to send unauthorized text messages in violation of TRAI regulations.*

Text messages may subject us to potential risks, including liabilities or claims relating to regulatory regime in the various geographies in which we operate. The scope and interpretation of the laws that are or may be applicable to the delivery of text messages are continuously evolving and developing. For instance, the Securities and Exchange Board of India had issued a summon dated September 26, 2017 to our Company in the matter of "trading of certain entities in the scrip of Supreme Tex Mart Limited" and requested our Company to furnish certain documents and clarifications in this regard. Our Company by its letter dated October 4, 2017 has responded to the queries raised by SEBI and has additionally submitted the supporting documents. Further, SEBI issued a summon under Section 11(2) and 11C(5) of the Securities and Exchange Board of India Act, 1992 on July 11, 2018, to the Officials of our Company to appear before the investigating authority in connection with the investigations instituted by SEBI by an order dated March 7, 2017 in the case of Supreme Tex Mart Limited. SEBI has also sought various information with regard to customers of the Company including M/s. Cloud SMS Mobile, Web 10 Technologies and Future Fintrade who use our Company's platform to distribute messages through their main distributor who ultimately sent the messages to the operator for delivery of messages to the ultimate end-users. SEBI by its order dated March 5, 2019 imposed a monetary penalty against the noticees in the abovementioned matter for impounding the unlawful gain in the scrip of Supreme Tex Mart Limited. Further, SEBI by its order dated July 11, 2019 noted that the investigation in the matter has been completed and no adverse remark was issued against our Company. For further information, see "*Outstanding Litigation and Material Developments*" on page 371.

If we do not comply with these laws or regulations or if we become liable under these laws or regulations due to the failure of our clients to comply with these laws by obtaining proper consent, we could face claims which may adversely affect our business and results of operations. Further, we use our communications platform to provide services and solutions to clients. Any misuse of our communications platform or interruptions or failures of our platform, due to terrorist activity or any other reason, and the resulting threat to national security or mass miscommunication, could have an adverse impact on our business, results of operations and financial condition.

7. *Inability to comply with laws and regulations which impact our clients could adversely affect our business and results of operations.*

As a service provider, we must adapt to regulatory changes applicable in various industries in which our clients operate, and we are thus exposed to risks arising from regulations that impact our clients. The telecommunications industry in which our clients operate is subject to extensive government regulation. The Government of India along with the TRAI regulate many aspects of the telecommunications industry in India. Increased regulation or changes in existing regulation may require us to change our business policies and practices and may increase the costs of providing services to clients, which could have a material adverse effect on our financial condition and results of operations. The extensive regulatory structure under which our clients operate could constrain their flexibility to respond to market conditions, competition or change in their cost structure, and thereby adversely affect them. Changes in regulations impacting our clients may require us to adjust our systems, software or operations in order to continue to provide services to our existing clients or to qualify for required certifications or fulfill regulatory standards, which could result in an increase in research and development costs and other costs, and may have an adverse effect on our business, financial condition and results of operations.

8. Our contingent liabilities which have not been provided for in our financial statements, if materialize, may impact our financial condition.

The following table sets forth certain information relating to our contingent liabilities and commitments as of June 30, 2020:

(in ₹ million)	
Particulars	Amount
Income tax matters*	144.61
Service tax matters*	256.75
Guarantees given on behalf of the group by banks	192.47
Total	593.83

*The above figure does not include amounts towards certain additional penalty and interest that may devolve on the Group in the event of an adverse outcome as the same is subjective and not capable of being presently quantified.

For further information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Contingent Liabilities and other Off-Balance Sheet Arrangements”, “Financial Statements - Annexure V – Statement of Notes to the Restated Ind AS Consolidated Financial Information – Note 46 – Commitments and Contingencies” and “Financial Statements - Annexure V – Statement of Notes to the Restated Ind AS Consolidated Financial Information – Note 44 – Business Combinations” on pages 333, 235 and 237, respectively. Any or all of these contingent liabilities may become actual liabilities. In the event that any of our contingent liabilities materialize, our business, financial conditions and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current financial year or in the future.

9. We operate in a highly evolving market and any inability to respond to such changing conditions could adversely affect our business and results of operations.

The markets in which we operate are highly competitive and subject to frequent changes due to technological improvements and advancements, availability of new or alternative services and changing client preferences and demands, and can require significant investment in research and development by market participants. We expect competition to intensify further, as new entrants emerge in the industry due to the opportunities available and as existing competitors seek to expand their services. Consolidation among our competitors may also leave us at a competitive disadvantage. In addition, as we expand into international markets, we will increasingly compete with local and global providers of messaging services and telecommunications value added services.

We depend on our ability to adapt to the rapidly changing market by improving the features and reliability of our existing services and solutions, and by successfully developing, introducing and marketing new features, services, solutions and applications to meet client demands. We may not be able to successfully adapt to changes in the market or respond successfully or adequately to meet market demands in a cost-effective and timely manner or at all, especially in recent times due to the COVID-19 pandemic. Any failure by us to adapt to changes in the market or respond quickly, successfully or adequately to new or changing opportunities, technologies, standards or client demands could impair our ability to compete and retain clients, which could have an adverse effect on our business, financial condition and results of operations.

Further, our industry is characterized by fragmented and highly competitive market participants. Some or all of our competitors may have advantages over us, which include substantially greater financial resources, stronger brand recognition, longer operating histories, larger marketing budgets, broader geographic presence and more extensive relationship with clients and thus may be able to respond more quickly and effectively to new or changing opportunities, technologies, standards or clients demands than us.

Increased competition may result in pricing pressure and force us to lower the selling price of our services or cause a loss of business. In addition, our competitors may offer new or different services in the future which are more popular than our current services. If we are not successful as our competitors in our target markets, our sales could decline, or margins could be negatively impacted and we could lose market share, any of which could materially harm our business.

10. *We face foreign exchange risks that could adversely affect our results of operations and cash flows.*

Although our reporting currency is in Indian Rupees, we transact a significant portion of our business in several currencies other than Indian Rupees including Euro, U.S. Dollar, AED, Naira and Cedi, Pound Sterling and Singapore Dollar. In Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, 80.09%, 82.96%, 80.81% and 86.08%% of our Company's revenue from operations, respectively, was derived from sales outside of India. Our operating expenses and costs are in Indian Rupees and other currencies including Euro, U.S. Dollar and Pound Sterling. Our total expenses in Fiscal 2018, 2019 and 2020, and in the three months ended June 30, 2020 amounted to ₹ 4,529.91 million, ₹ 7,873.74 million, ₹ 8,839.82 million and ₹ 2,790.09 million, respectively. The exchange rate between the Indian Rupee and foreign currencies has fluctuated significantly in recent years and may continue to fluctuate in the future. Any significant appreciation of the Indian Rupee against foreign currencies in which we do business can fundamentally affect our competitiveness in the long term. As our Restated Financial Statements are presented in Indian Rupees, such fluctuations could have a significant impact on our reported results.

We undertake certain exchange rate hedging activities due to the size of our operations. Our wholly-owned subsidiary, 365squared has entered into a hedging forward contract and further, we may in the future implement hedging strategies to mitigate these risks. However, these hedging strategies may not eliminate our exposure to foreign exchange rate fluctuations and involve costs and risks of their own, such as ongoing management time and expertise, external costs to implement the strategy and potential accounting implications.

11. *Any disruption in the supply of power, IT infrastructure and telecommunications lines to our facilities could disrupt our cloud communication platform services and subject us to additional costs.*

Any disruption in basic infrastructure, including the supply of power, could negatively impact our ability to provide timely or adequate services to our clients. We rely on telecom connectivity and other infrastructure providers to maintain communications between our various facilities globally. Telecom networks are subject to failures and periods of service disruption which can adversely affect our ability to maintain active communications among our facilities and with our clients. Such disruptions may cause harm to our clients businesses as well. We may not be covered for any claims or damages if the supply of power, IT infrastructure or telecom connectivity is disrupted. This could disrupt our cloud communication platform services and subject us to additional costs and have an adverse effect on our business, financial condition and results of operations.

12. *Our revenues depend on a limited number of clients and a loss of such clients could adversely affect our financial condition and results of operations.*

We are dependent on limited number of clients for a substantial portion of our revenues. A reduction in the services we perform for such limited number of clients or the loss of a major client could result in a significant reduction in our revenue. Factors that may result in a loss of a client include our service performance, reduction in budgets due to macroeconomic factors or otherwise, shift in policies and political or economic factors or changes in their outsourcing strategies. We face significant competition in the services we provide our clients and we are typically not an exclusive service provider to our large clients. These factors may not be predictable or under our control. Significant pricing or margin pressure exerted by our clients could also adversely affect our business, financial condition and results of operations. Our Company earned revenue from two major customers who individually contributed more than 10% of our revenue in Fiscal 2020, while in Fiscal 2019, one major customer contributed more than 10% of our revenue in Fiscal 2019. Our largest client accounted for 6.49%, 19.86%, 14.58% and 15.45% of our revenue from operations in Fiscal 2018, 2019 and 2020, and in the three months ended June 30, 2020, respectively. Our ten largest clients accounted for approximately 36.08%, 46.00%, 52.50% and 63.65% of our revenue from operations in Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, respectively. The quantum of work we perform for our clients may vary from year to year. Thus, revenues generated from a particular client during a period may not be the same in any subsequent periods. Our clients may terminate their contracts with us, with or without cause, and with or without notice, at any time. If any one or more of our work orders or client contracts are terminated, our revenues and profitability could be materially and adversely affected.

13. *If we are unable to successfully protect our information technology infrastructure from actual or perceived security risk in a timely manner or at all, our business may be adversely affected.*

Our systems, like those of all businesses, are vulnerable to computer viruses, break-ins, software theft or destruction and similar disruptions from unauthorised tampering with our computer systems. We have data backup systems for all of our operations and checks and systems for ensuring network security against virus or other malignant attacks.

We always remain subject to third-party attempts and threats to breach our communications platform, software, network and data security and take advantage of other security vulnerabilities. Threats to our information technology security can take various forms, including viruses, worms, and other malicious software programs that attempt to attack our services and solutions and gain access to our computer networks and data centres. Persons who attempt to circumvent our information technology security may also launch targeted or coordinated attacks using novel methods. In addition, security threats may be caused by employee error or various means of unauthorized access to our internal systems or the data of our clients. Due to the rapidly evolving techniques used to obtain unauthorized access, or to sabotage systems, there is a risk that we will be unable to anticipate these techniques or to implement adequate preventative measures. These threats may result in breaches of our network or data security, disruptions of our service, solutions and internal systems, interruptions in our operations, harm to our competitive position from the compromise of confidential information or trade secrets, or otherwise harm our business. These third-party attempts and threats can result in the loss or corruption of our and our client data and may adversely impact our systems, operations and reputation, which could have an adverse effect on our business, financial condition and results of operations.

The agreements that we enter into with our clients for the engagement of our services have several contractual obligations including confidentiality, protection against security breach and insurance coverage. The engagements that we perform for our clients are often critical to our clients' businesses. If our client's proprietary rights are infringed by our employees in violation of any applicable confidentiality agreements and / or our clients perceive any deficiency in service, our clients may consider us liable for that act and seek damages from us. Our client contracts may require us to comply with certain security obligations including maintaining network security and back-up data, ensuring our network is virus free and verifying the integrity of employees that work with our clients by conducting background checks. Any failure in our client's system or breach of security relating to the services we provide to the client could damage our reputation or result in a claim for substantial damages against us.

In addition, clients using our services and solutions rely on the security of our network and infrastructure for achieving reliable service and the protection of their data. We receive and communicate a significant amount of data from our clients, and there is a risk that this information will be subject to computer break-ins, theft and other improper activity that could jeopardize the security of information handled by our services and solutions or cause interruptions in our operations.

Further, since we handle substantial amount of third party information, including personal data, we are subject to numerous laws and regulations designed to protect this information, such as the privacy laws and other laws applicable to data protection in India and other jurisdictions where we operate. These laws and regulations are increasing in complexity and number, change frequently and sometimes conflict among the various countries in which we operate. If any person, including any of our employees, negligently disregards or intentionally breaches our established controls with respect to client or company data, or otherwise mismanages or misappropriates that data, we could be subject to significant monetary damages, regulatory enforcement actions, fines and/ or criminal prosecution in one or more jurisdictions. These monetary damages might not be subject to a contractual limit of liability or an exclusion of consequential or indirect damages and could be significant. Unauthorized disclosure of sensitive or confidential client or Company data, whether through systems failure, employee negligence, fraud or misappropriation, could damage our reputation and cause us to lose clients.

In addition, to the extent that our competitors are subject to the abovementioned attempts, threats, break-ins, theft and other improper activity, we may experience reduced clients trust and acceptance of our services and solutions and our reputation may be adversely affected.

Accordingly, any such actions, irrespective of whether successful in breaching our security controls, could expose us to litigation, loss of clients, damage to our reputation, or otherwise have an adverse effect on our business, financial condition and results of operations.

14. Our global operations expose us to numerous risks, including sometimes conflicting legal and regulatory requirements, and violation of these regulations could adversely affect our business and results of operations.

As of June 30, 2020, we have operations in 18 locations across four continents. As we continue to expand internationally, we are subject to numerous telecommunication and other laws and regulations in these countries. In Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, 80.09%, 82.96%, 80.81% and 86.08% of our Company's revenue from operations, respectively, was derived from sales outside of India. Since we provide services to clients across the world, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, tariffs, taxation, sanctions, government affairs, anti-corruption, anti-bribery, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific to our clients' industries. In addition, certain of our services may be used by clients located in countries where voice and other forms of IP communications may be illegal or require special licensing.

Non-compliance with these regulations in the conduct of our business could result in termination of client contracts, fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Many countries also seek to regulate the actions that companies take outside of their respective jurisdictions, subjecting us to multiple and sometimes competing legal frameworks in addition to our home country rules. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners or other related individuals.

In addition, changes in regulations could increase our costs and could potentially prevent us from delivering our services and solutions in a cost efficient manner. For example, in a number of countries, the interconnection rates charged for transmissions between service providers, MNOs and end-users are set and controlled by local regulators. If these regulators were to change the interconnection rates, we may be required to pay higher rates, which could increase the costs of delivering our services and solutions to our clients, and there is a risk that we may not be able to pass on the increase to our clients, which could have an adverse impact on our gross margin and pricing. In addition, regulators may impose price ceilings or controls on mobile communications and data usage, which could have a significant impact on our revenue and margins. Similarly, regulators may restrict the type of communication that is permitted, which can require us to adjust our services to comply with local regulations which in turn can increase the costs associated with conducting business in certain countries.

15. Our revenues are highly dependent on clients primarily located in Asia, Europe and Africa. Any decline economic health of such regions could adversely affect our business, financial condition and results of operations.

We have derived a substantial portion of our revenue from services offered to clients based in Asia, Europe and Africa. If the economic conditions in such regions becomes volatile or uncertain or the conditions in the global financial market were to deteriorate, especially in recent times due to the COVID-19 pandemic, or if there are any changes in laws applicable to our services and operations or if any restrictive conditions are imposed on us or our business, the pricing of our services may become less favorable for us. Further, our clients located in these geographies may reduce or postpone their technology spending significantly which would adversely affect our operations and financial conditions. Any reduction in spending on cloud communication services may lower the demand for our services and negatively affect our revenues and profitability.

16. The loss of services of our senior management could adversely affect our business and results of operations.

We are dependent on the experience and the continued efforts of the senior members of our management team, many of whom have been with us for an extended period of time. Our growth strategy will place significant demands on our management and other resources because it requires us to continue to improve operational, financial and other internal controls, both in India and overseas. We are dependent on executives and key personnel, including competent sales

force as well as technology professionals with a detailed knowledge of our business and industry. The loss in the services of the members of our senior management and other key team members, particularly to competitors, or our failure to otherwise retain the necessary management and other resources to maintain and grow our business, may have an adverse effect on our results of operations, financial condition and prospects.

Our future success and our ability to maintain our competitive position and implement our business strategy are dependent to a large degree on our ability to identify, attract, train and retain personnel with skills that enable us to keep pace with growing demands and evolving industry standards and on the continued service and performance of our senior management team and other key team members in our business units.

Qualified individuals are in high demand and competition for qualified engineers and personnel in our industry is intense, and we may incur significant costs to retain or attract them. We may not be able to retain our existing engineers or personnel or attract and retain new engineers and personnel in the future. Many well qualified candidates may be subject to contractual non-compete clauses which may restrict our ability to employ them.

17. Deficiencies in or termination of services by third-party service providers such as network and server capacity providers or interruptions, failure to provide, delays or outages, may adversely affect our business, financial condition and results of operations.

We partner with messaging infrastructure / hardware providers to support our cloud communication platform services. For our SMS filtering, analytics, and monetization, we partner with firewall hardware providers and value-add original equipment manufacturers for end-to-end solutions. Our business depends on the capacity, reliability and security of infrastructure owned and managed by such third-party service providers. We do not have control over the operation, quality or maintenance of such infrastructure or whether such third party service providers will upgrade or improve their infrastructure, software, equipment and services. In such cases, it could require us or our clients to invest time and resources in updating or improving software, APIs, equipment or services, and may result in interruptions or delays in the provision of our services and solutions. Further, interruptions or failures of such networks, whether due to natural disaster, government policy, terrorist activity or any other reason, and the resulting reduction in transactions and communications processed by our communications platform for delivery via such networks, can have a significant impact on our revenue and could have an adverse effect on our business, financial condition and results of operations. We may experience interruptions, delays and outages in service and availability from time to time due to a variety of factors, including infrastructure changes, human or software errors and capacity constraints.

18. Our inability to manage our technology systems and infrastructure or the services and solutions that we provide may adversely affect our business, financial condition and results of operations.

We are required to keep pace with evolving technological advancements, client and small business user habits, internet security risks, risks of system failure or inadequacy, and governmental regulation and taxation, and each of these factors could adversely impact our business. In the event, we are unable to accurately predict and manage our technology systems and infrastructure requirements, including the capacity requirements with respect to our data centres, our existing or future clients may experience service outages resulting from the failure or disruption of our technology systems and infrastructure, which could adversely affect our reputation and business.

While we strive to maintain sufficient excess capacity to meet the needs of all our clients, there is a risk that we may not successfully manage our services and solutions or that our services and solutions will not remain effective while scaling to meet and address expanding client demands. If we are unable to provide our services and solutions at the scale required by our clients, potential clients may not adopt our offerings and existing clients may not renew their agreements, which could have an adverse effect on our reputation, business, financial condition and results of operations. If failures occur on our clients' multiple networks or software systems, it may be difficult for us to identify the source of the problem and to correct it on a timely basis or at all, in particular, as our clients generally use our services together with their own services and services from other vendors. The development of new solutions may impose a greater burden on our systems and may strain our administrative, operational and financial resources. Any of the foregoing problems could result in a loss of our revenue or adversely affect client relationships and business of our client, all of which could be detrimental to our business and reputation generally.

19. All Indian companies, including our Company, are subject to a new accounting standard, Ind AS 116, effective April 1, 2019.

The Ministry of Corporate Affairs (“MCA”) has vide notification dated March 30, 2019 notified ‘Ind AS 116 – Leases’ and we have adopted Ind AS 116 retrospectively from April 1, 2017. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract, *i.e.* the lessee and the lessor. Ind AS 116 introduces a single lease accounting model for lessee and requires the lessee to recognize right of use assets and lease liabilities for all leases with a term of more than twelve months, unless the underlying asset is low value in nature. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17. As per Ind AS 116, the lessee needs to recognise depreciation on right of use assets and finance costs on lease liabilities in the statement of profit and loss. The lease payments made by the lessee under the lease arrangement will be adjusted against the lease liabilities.

The change in accounting policy pursuant to the adoption of Ind AS 116 was considered retrospectively from April 1, 2017 in the Restated Financial Statements. Consequent to the adoption of Ind AS 116, the impact has been adjusted in the respective periods in the Restated Financial Statements. For further information, see “Financial Information – Note 40 – Statement of Restatement Adjustments – A.4 – Change in Accounting Policies – Impact of Ind AS 116” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Changes in Accounting Policies” on pages 204 and 333, respectively. Accordingly, the financial statements/information that we have prepared in accordance with Ind AS 116, including our Restated Financial Statements included in this Red Herring Prospectus and the financial statements/ information that we will prepare in accordance with Ind AS 116 in the future may not be comparable with our historical financial statements. Investors should rely solely on our Restated Financial Statements included in this Red Herring Prospectus for an assessment of our financial position and any investment decision in relation to the Offer.

The governmental and regulatory bodies in India may continue to notify such new accounting standards, regulations and/or policies. There can be no assurance that any such changes in accounting standards, regulations or policies would not lead to different accounting methods, which may have an adverse effect on our business, financial condition and results of operations.

20. Our services contain open source software, and we license some of our software through open source projects. Any risks associated with open source software, if not addressed, could have a material adverse effect on our business, financial position and results of operations.

We use open source software in some of our internal systems and technology platform. The terms of many open source licenses to which we are subject to have not been interpreted by domestic or foreign courts, and there is a risk that open source software licenses could be construed in a manner that impose unanticipated conditions or restrictions on our ability to provide or distribute our services or solutions. In addition, we may face claims from parties claiming ownership of, or demanding release of, the source code or derivative works that were developed using such software, or otherwise seeking to enforce the terms of the applicable open source license. These claims could also result in litigation, require us to purchase a costly license or require us to devote additional research and development resources to change our platform, any of which could have a negative effect on our business and operating results. Further, open source licensors generally do not provide warranties or controls on the origin of software. Any of these risks could be difficult to eliminate or manage, and, if not addressed, could have a material adverse effect on our business, financial position and results of operations.

21. Competition in the market for cloud communication platform services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.

Our business model is predominantly based on a dynamic pricing model where we have an ability to change the prices offered based on prevailing market rates. The charges that we pay to network service providers over whose networks we transmit communications can vary from time to time and are affected by volume and other factors which may be outside of our control and difficult to predict. We use an indigenously developed platform to ascertain the cost efficient routes to transmit A2P messages on behalf of our clients. If we are not able to predict the most optimal route or modify prices, we may be unable to pass these increases to our clients, which could adversely affect our business, results of operations and financial condition.

Further, as competitors introduce new products or services that compete with ours or reduce their prices, we may be unable to attract new clients or retain existing clients based on our historical pricing. As we expand in newer geographies, we also must determine the appropriate price to enable us to compete effectively internationally. Moreover, enterprises, which are a primary focus for our direct sales efforts, may demand substantial price concessions. If we are not able to attract new clients or retain existing clients based on our historical pricing, our business, results of operations and financial condition could be adversely affected.

22. *We may not be able to sustain our growth or manage such growth effectively or execute our business plan in the future in an effective timely manner or at all, which may adversely affect our business, financial position and results of operations.*

We have experienced rapid and significant growth in our operations and revenue in recent years. We were incorporated in 2004 and as of June 30, 2020, we have operations in 18 locations across four continents. Our revenue from operations increased at a CAGR of 37.61% from ₹ 5,049.48 million in Fiscal 2018 to ₹ 9,562.52 million in Fiscal 2020 and was ₹ 3,096.14 million in the three months ended June 30, 2020. The growth in our revenues was in large part due to strategic acquisitions in the recent past. In addition, we are expanding our international operations, and we have recently established operations in 10 new countries since April 1, 2016. While these growth rates are not indicative of our future growth, we expect this growth to place significant demands on our management, administrative and operational infrastructure. Our profit for the year/ period has increased from ₹ 466.77 million in Fiscal 2018 to ₹ 691.02 million in Fiscal 2020 and was ₹ 269.34 million in the three months ended June 30, 2020.

Our success will depend on our ability to manage our growth effectively and will require us to continuously evolve and improve our operational, financial, management, and internal controls, and our reporting systems and procedures.

In particular, continued expansion increases the challenges involved in:

- recruiting, training and retaining sufficient skilled technical, sales and management personnel;
- adhering to high quality and process execution standards;
- maintaining high levels of client satisfaction;
- preserving our culture, values and entrepreneurial environment; and
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems.

Any inability to manage our growth in a timely manner or at all may have an adverse effect on our business, financial condition and results of operations and could result in decline of the price of our Equity Shares.

23. *Failure to meet the level of performance in accordance with our contracts with clients could adversely affect our business, financial condition and results of operations.*

We use complex software and hardware systems for providing our services and solutions to our clients. Such software and hardware systems may suffer operational errors or performance problems. We have entered into contracts with some of our clients which contain provisions requiring us to maintain the services at or above certain minimum performance standards such as maximum A2P messages delivery times. Under these contracts, if we fail to meet the specified standards, we may be subject to liquidated damages or penalties, and in certain cases, termination of the contracts by our clients. We have in the past been subject to penalty claims by our clients. For instance, in May 2019 a penalty was imposed on us owing to failure or delay in delivery of messages for a particular client. We cannot assure you that in case any claims for damages are made by our clients, the limitations on liability we provide for in our service contracts will be enforceable, or that they will otherwise be sufficient to protect us from liability for damages.

24. *Any inefficiencies in or failure of our billing and management information systems may adversely affect our business, financial condition and results of operations.*

Maintaining billing and client management information systems are critical to protect our ability to increase revenue streams, avoid revenue loss and bill our client accurately and in a timely manner. We expect new technologies and applications to create increasing demands on our billing and client management systems. Problems such as

reconciliation of payments, revenue recognition and delayed payments will occur in the complexities involved in the process of billing and tracking payments by our clients. We are therefore required to expand and adapt our billing and credit control systems as we introduce new services and as our business expands. While we have not faced any material issues in the past, however, if adequate billing, credit control and client relation systems are unavailable or if upgrades or new systems are delayed or not introduced or integrated in a timely manner or at all, it could adversely affect our reputation, business, financial condition and results of operations.

25. *Failure to offer client support in a timely and effective manner may adversely affect our relationships with our clients.*

From time to time, our clients require our support teams to assist them in using our services effectively, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our clients effectively in a timely manner or at all, it could adversely affect our ability to retain existing clients and could prevent prospective clients from adopting our services. We may be unable to respond quickly enough to accommodate short-term increases in demand for client support. We also may be unable to modify the nature, scope and delivery of our client support to compete with changes in the support services provided by our competitors. Increased demand for client support, without corresponding revenue, could increase costs and adversely affect our reputation, business, results of operations and financial condition.

Our sales are highly dependent on our business reputation and on positive recommendations from our clients. While we have not faced any material issues in the past, however, any failure to maintain high-quality client support, or a market perception that we do not maintain high-quality client support, could adversely affect our reputation, business, results of operations and financial condition.

26. *If the market for enterprise cloud communication platform services does not develop according to our expectations or declines, our business, results of operations and financial condition may be adversely affected.*

The market for enterprise cloud communication services and solutions is not as mature as the market for legacy communication solutions and these services may not achieve or sustain high levels of demand and market acceptance. Our success will, to a substantial extent, depend on the desire of enterprises to communicate with client, employees and connected things globally via cloud communications instead of through legacy communications solutions and on the continued realization and development of new use cases by enterprise client. If enterprises do not perceive or realize the benefits of enterprise cloud communications services and solutions, the market for these services may not continue to develop, may decline or may not develop in the way we expect, which could have an adverse effect on our business, financial condition and results of operations.

27. *Our growth and revenue is subject to volatility and seasonality.*

Our revenue is subject to volatility across quarters, primarily as a result of fluctuations in traffic volumes and usage of our cloud communication platform services by our enterprise clients. Most of our agreements with our enterprise clients require our enterprise clients to pay for services and solutions on a per A2P message and on a per voice pulse basis, and we generate revenue based on each transaction or communication processed through our cloud communication platform services. These agreements generally do not provide for fixed or minimum recurring payments or traffic volumes. As a result, our results are highly dependent upon the continued purchase of services and usage of our cloud communication platform services by our enterprise clients.

If our clients decide for any reason not to continue to pay for our services at current levels or at current prices, if we are unable to upsell or encourage our clients to expand their use of our services or solutions, if there is a period of reduced, limited or restricted usage of our services and solutions by our clients, our growth may be adversely affected and there could be significant revenue volatility for that respective reporting period and there is a risk that we will not receive any fixed or minimum recurring payments, which could have a significant and immediate material adverse effect on our business, financial position and results of operations.

Since our business is dependent on our enterprise clients globally and the operations of such clients may be seasonal in nature. The seasonal nature of the business of our clients may adversely affect our result of operations and financial condition.

28. *Our sales cycle may become lengthier and more expensive and may be subject to implementation, customization and timing challenges and inability to respond to such challenges in an effective manner may adversely affect our business, financial condition and results of operations.*

As our business is currently targeted primarily at enterprise clients, we may face greater costs, longer sales cycles and less predictability in completing some of our sales. Generally, an enterprise client's decision to use our services is an enterprise-wide decision that requires a significant amount of our time and resources. For example, in certain cases, we may be required to provide prospective clients with greater levels of education regarding the use and benefits of our services, privacy and data protection laws and other regulations. In addition, larger clients may demand more customization, integration services and features, or may have existing systems in place that require more specialized software and APIs to access our services and solutions. As a result of these factors, sales opportunities may require us to devote greater sales support and professional services resources to individual clients, which can increase the costs and time required to complete these and other sales and may divert sales and professional services resources to a smaller number of larger transactions. In addition, to the extent that clients demand more customization, integration services and features, or require more specialized software and APIs, we may experience delays in revenue recognition from these transactions, pending resolution of the respective technical and implementation requirements. To the extent that the sales cycles for our enterprise clients become longer and more expensive, or require more customization, integration services and features, or specialized software and APIs, there could be an adverse effect on our business, financial condition and results of operations.

29. *Our application for the registration of "RouteSMS" trademark, logo and other trademarks are pending and the use of this or similar trade names by third parties may result in loss of business to such third parties, and any potential negative publicity relating to such third parties may adversely affect our reputation, the goodwill of our brand and business prospects.*

We believe that our success depends, in part, on our brand image. We believe that our trademarks and other proprietary rights have significant value and are important to identifying and differentiating our business from those of our competitors and creating and sustaining demand for our services. Among applications made for other trademarks, we have applied for the registration of "RouteSMS" with the Registrar of Trademarks on January 28, 2016 and yet to receive registration or final approval for use of such trademarks from the Registrar of Trademarks. For further information, see "Our Business – Intellectual Property" and "Government and Other Approvals" on pages 131 and 377, respectively. However, we cannot guarantee that any of our pending trademark applications will be approved by the applicable governmental authorities or that it will not be abandoned or objected by such authorities or by any third parties. Even if the applications are approved, third parties may seek to oppose or otherwise challenge these registrations.

Further, if we are not successful in registering our trademark we will not be entitled to the statutory protections. The trademark may be registered in the name of another entity, thereby preventing us from using the trademark and the logo. In the absence of a registered trademark, the redress available to us may be limited to relief for passing off of our marks by others which could negatively affect our brand image, goodwill and business. Litigation in relation to our intellectual property could be expensive and time consuming and could divert management resources.

30. *Our statutory auditors have highlighted certain matters of emphasis to their audit reports relating to our historical audited financial statements, which may affect our future financial results.*

Under Indian Auditing Standards, statutory auditors may include an emphasis of matter in their audit opinion under certain circumstances, including when a company's financial records have not been maintained in accordance with Ind AS. Our statutory auditors have included certain emphasis of matters in their audit reports relating to our audited financial statements for Fiscal 2018, Fiscal 2019, Fiscal 2020 and for the three months ended June 30, 2020. Our statutory auditors have provided the basis for their opinion, primarily relating to procedural delays in filing of forms with the authorised dealer in relation to delays in payment and receipt of foreign currency receivables and payables for which an application for regularisation has been made. Further, our statutory auditors note that in relation to outstanding service tax liabilities raised by the Commissioner of CGST there is no provision for liability that has been recognised in the financial statements. For further information, see "Management's Discussion on Financial Condition and Results of Operations – Auditors Observations and Emphasis of Matters" and "Financial Statements

- Annexure V – Statement of Notes to the Restated Ind AS Consolidated Financial Information – Financial Statements – Note 40 - Statement of restatement adjustments” on page 204. There can be no assurance that our statutory auditors will not include such matters of emphasis or other similar comments in the audit reports to our audited financial statements in the future, or that such modification will not affect our financial results in future fiscal periods.

There can be no assurance that our statutory auditors will not include such matters of emphasis or other similar comments in the audit reports to our audited financial statements in the future, or that such modification will not affect our financial results in future fiscal periods. Investors should consider these matters of emphasis and related remarks in evaluating our financial condition and results of operations. Any such modification in the auditors’ report on our financial statements in the future may also adversely affect the trading price of the Equity Shares.

31. *We are subject to risks associated with expansion into new geographic regions.*

Expansion into new geographic regions subjects us to various challenges, including those relating to our lack of familiarity with the culture, local laws and regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. For example, we acquired 365squared in Malta with effect from October 1, 2017. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including:

- compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in laws, regulations and practices and their interpretation;
- foreign ownership constraints and uncertainties with new local business partners;
- local preferences and service requirements;
- fluctuations in foreign currency exchange rates;
- inability to effectively enforce contractual or legal rights and adverse tax consequences;
- differing accounting standards and interpretations;
- stringent as well as differing labour and other regulations;
- differing domestic and foreign customs, tariffs and taxes;
- exposure to expropriation or other government actions; and
- political, economic and social instability.

By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

32. *If we do not develop enhancements to our services and introduce new services that achieve market acceptance, our business, results of operations and financial condition could be adversely affected.*

Our ability to attract new clients and increase revenue from existing clients depends in part on our ability to enhance and improve our existing services, increase adoption and usage of our services and introduce new services. The success of any enhancements or new services depends on several factors, including timely completion, adequate quality testing, actual performance quality, market-accepted pricing levels and overall market acceptance. Enhancements and new services that we develop may not be introduced in a timely or cost-effective manner, may contain errors or defects, may have inter-operability difficulties with our platform or other products or may not achieve the broad market acceptance necessary to generate significant revenue. We also have invested, and may continue to invest, in the acquisition of complementary businesses, technologies, services, products and other assets that expand the services that we can offer our clients. We may make these investments without being certain that they will result in services and products or enhancements that will be accepted by existing or prospective clients. Our ability to generate usage of additional services and products by our clients may also require increasingly sophisticated and more costly sales efforts and result in a longer sales cycle. If we are unable to successfully enhance our existing services to meet evolving requirements of clients, increase adoption and usage of our services products, develop new services and products, or

if our efforts to increase the usage of our services are more expensive than we expect, then our business, results of operations and financial condition could be adversely affected.

33. *Our indebtedness and the restrictions imposed by our financing agreements could adversely affect our ability to conduct our business and operations.*

As of June 30, 2020, we had total outstanding borrowings of ₹ 432.45 million. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions. These restrictive covenants *inter-alia* require us to obtain either the prior permission of such banks or financial institutions or require us to inform them of various activities, including, among others, alteration of our capital structure or raising of additional debt. In the event that we breach a restrictive covenant, our lenders could deem us to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives. Although we have received consents from our lenders for the Fresh Issue, these restrictive covenants may affect some of the rights of our Shareholders.

For further information, see “*Financial Indebtedness*” on page 330.

34. *We propose to utilize a part of the Net Proceeds to undertake potential acquisitions for which the targets are yet to be identified.*

We propose to utilize ₹ 830.00 million from our Net Proceeds of the Fresh Issue towards acquisitions and other strategic investments. While, our Company, through investment in its wholly owned subsidiary Route Mobile (UK) Limited by way of either equity or debt, may utilize ₹ 273.16 million for the payment of Earn out amount pursuant to the acquisition of 365squared Limited, the remaining amount will be used for other potential acquisitions where the target is yet to be identified (“**Unidentified Acquisitions**”). As on date of filing this Red Herring Prospectus, other than the Acquisition SPA, Supplemental Agreement and the business transfer agreement dated June 15, 2020 entered by our Company to acquire certain technologies and related contracts from a Bengaluru-based company specializing in development of telecom related solutions which includes, inter alia, multimedia messaging service center and short message service center platforms on a going concern basis, we have not entered into any definitive agreements towards any future acquisitions or strategic initiatives. The amount of Net Proceeds identified for acquisitions is based solely on management estimates. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of strategic initiatives undertaken, as well as general factors affecting our results of operation, financial condition and access to capital. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. With increase in costs, our actual deployment of funds may exceed our estimates and may result in cost overrun and cause additional burden on our financial position. In the interim, the Net Proceeds proposed to be utilized towards this object shall be deposited only in the scheduled commercial banks as may be approved by our Board. For further information, see “*Objects of the Offer*” on page 85.

35. *Our customers may develop in-house solutions and migrate part or all of the services that we provide them to these in-house solutions.*

Certain of our customers may choose to internally deploy certain functionality currently provided by our services which may lead to a loss of revenue streams from certain of our services as they will be able to meet their needs for these services in-house. If such customers develop in-house solutions or migrate the services that we provide to them, our business, results of operation and financial condition may be adversely affected.

36. *If we are unable to implement our marketing strategy in a cost-effective timely manner or at all, then our business, results of operations and financial condition would be adversely affected.*

In order to grow our business, we must continue to attract new clients in a cost-effective manner. We use a variety of marketing channels to promote our services and platform, including conducting regional client events, email campaigns, billboard advertising and public relations initiatives. If the costs of the marketing channels we use increase dramatically, then we may choose to use alternative and less expensive channels, which may not be as effective as the

channels we currently use. As we add to or change the mix of our marketing strategies, we may need to expand into more expensive channels than those we are currently in, which could adversely affect our business, results of operations and financial condition. We will incur marketing expenses before we are able to recognize any revenue that the marketing initiatives may generate, and these expenses may not result in increased revenue or brand awareness. If we are unable to maintain effective marketing programs, then our ability to attract new clients could be adversely affected, our advertising and marketing expenses could increase substantially and our results of operations may be adversely affected.

37. *If we are unable to maintain and enhance our brand and increase market awareness of our Company and products, our business, results of operations and financial condition may be adversely affected.*

We believe that maintaining and enhancing the “Route Mobile” brand and “365squared” brand identities and increasing the market awareness about us and our services and solutions, particularly among MNOs and enterprise clients is critical to achieving widespread acceptance of our platform, to strengthen our relationships with our existing clients and to our ability to attract new clients. The successful promotion of our brand will depend largely on our continued marketing efforts, our ability to continue to offer high quality services and solutions and to successfully differentiate our services, products and platform from competing products and services. Our brand promotion activities may not be successful or yield increased revenue. In addition, independent industry analysts often provide reviews of our services and competing products and services, which may significantly influence the perception of our services in the marketplace. If these reviews are negative or not as strong as reviews of our competitors’ products and services, then our brand may be harmed.

The promotion of our brand also requires us to make substantial expenditures, and we anticipate that these expenditures will increase as our market becomes more competitive and as we expand into new markets. To the extent that these activities increase revenue, this revenue still may not be enough to offset the increased expenses we incur. If we do not successfully maintain and enhance our brand, then our business may not grow, we may see our pricing power reduced relative to competitors and we may lose clients, all of which would adversely affect our business, results of operations and financial condition.

38. *If we are unable to collect our dues and receivables from our clients, our results of operations and cash flows could be adversely affected.*

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for services provided. We have a number of clients on a pre-paid business model where the client pays upfront allowing us to reduce the overall working capital cycle. In Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, 41.77%, 24.99%, 17.01% and 15.47%, respectively, of our revenue from operations were prepaid. The standard terms of the agreements with our post-paid clients require payments to be made within 30 – 60 days. Our average debtor cycle was 47 days, 52 days, 66 days and 57 days in Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, respectively. We maintain provisions against receivables. Actual losses on clients’ balances could differ from those that we currently anticipate and as a result we might need to adjust our provisions. There is no guarantee that we will be able to accurately assess the creditworthiness of our clients. Macroeconomic conditions, such as a potential credit crisis in the global financial system, could also result in financial difficulties for our clients, including limited access to the credit markets, insolvency or bankruptcy. Such conditions could cause clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of dues for client services also depends on our ability to complete our contractual commitments and subsequently bill for and collect our contractual dues. For instance, some of our customers have requested for extended payment terms due to the outbreak of COVID-19. For further details, please see “Risk Factors - The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could materially adversely affect our business, financial condition and results of operations” on page 23. We are unable to meet our contractual obligations including the service level requirements under our contracts, we might experience delays in the collection of, or be unable to collect, our balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience delays in billing and collection for our services, our cash flows could be adversely affected.

39. *Consolidation amongst, or change of ownership of, our MNO clients may result in the loss of MNO clients or reduce our potential client base, which would negatively impact our financial performance.*

Consolidation among MNOs may reduce our potential client base or may negatively impact our ability to expand our client base or may result in the loss of our current MNO client. In addition, as fewer MNO client gain control of the subscriber market, pricing pressure is likely to increase and consequently, a change of ownership of our MNO client could also result in the loss of our current client if the new owners select another messaging service provider to provide messaging solutions. All of the foregoing could have an adverse effect on our business, financial condition and results of operations.

40. *Indemnity provisions in our various business agreements potentially expose us to substantial liability for intellectual property infringement and other losses.*

Our agreements with our clients and other third-parties including MNOs typically include indemnification or other provisions under which we agree to indemnify or otherwise be liable to them for losses suffered or incurred as a result of claims of intellectual property infringement, damages caused by us, fraud or miscount by our employees or other liabilities relating to or arising from the use of our services or platform or content or other services provided by us or other acts or omissions. Further, in some of the agreement, the term of these contractual provisions often survives termination or expiration of the applicable agreement. Further, certain of our agreements with MNOs provide for a limit to the extent of their liability in case of any loss or damage in relation to the agreement, potentially further increasing our liability to third parties. Large indemnity payments or damage claims from contractual breach could harm our business, results of operations and financial condition. We may still incur substantial liability related to them. Any dispute with a client with respect to such obligations could have adverse effects on our relationship with that client and other current and prospective clients, reduce demand for our services and adversely affect our business, results of operations and financial condition.

41. *MNOs operate in a highly regulated industry and the licences and the regulatory environment in which they operate are subject to change, which may indirectly adversely affect our operations.*

We are dependent on MNOs to provide us connectivity to be able to provide our services and solutions to our clients. The telecommunications industry is subject to extensive government regulation and licencing requirements. The extensive regulatory structure under which they operate could constrain their flexibility to respond to market conditions, competition or changes in cost structure. In addition, our MNOs are required to obtain a wide variety of approvals and licences from various regulatory bodies. We cannot assure you that such approvals will be granted on a timely basis or at all. Regulatory bodies in different jurisdictions may also revise regulations or policies related to MNOs in the telecommunications industry on terms which may not be favourable to our MNO counterparts or which may result in uncertainties with respect to their implementation. In addition, the licences which our MNO counterparts require to operate in the telecommunications industry reserve broad discretion to such regulatory authorities to influence the conduct of their businesses by giving them the right to modify at any time the terms and conditions of such licences, take over our MNO counterparts' networks and terminate, modify, revoke or suspend the licences in the event of default by such MNOs in complying with the terms and conditions of the licences. Any unfavourable change in the regulatory environment may adversely affect the business, financial condition and prospects of our MNO counterparts and this may in turn have an adverse effect on our business and results of operations.

42. *The confidential information or data of our MNO clients may be misappropriated by our employees and as a result, cause us to breach our contractual obligations in relation to such confidential information.*

We enter into confidentiality and non-disclosure agreements with our employees to limit access to and distribution of the confidential information made available to them during the course of employment. We cannot assure you that the steps taken by us will adequately prevent the disclosure of confidential information by an employee or a subcontractor or a subcontractor's employee and we may not have internal controls and processes to ensure that our employees comply with their obligations under such confidentiality and non-disclosure agreements. If the confidential information is disclosed by us or is misappropriated by our employees or subcontractors, our clients may raise claims against us for breach of our contractual obligations. The successful assertion of any claim may have an adverse effect on our business, financial condition and results of operations.

43. *Our investments in technology, especially our research and development activities, may not yield the intended results in a timely manner or at all, which may adversely affect our financial condition and results of*

operations.

We invest in and intend to continue investing in newer technologies, including, technologies to enhance our R&D capabilities, particularly with a view to enter into new businesses. Our focus areas include Internet of Things, big data analytics, artificial intelligence and machine learning. Our choice of focus areas and investments in technology and human capital for R&D are based on the management's perception of the messaging and cloud based communications industry. We cannot assure you that such investments will yield the intended results. Our inability to achieve intended results from our investments in R&D may adversely affect our financial position and results of operations.

44. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.

We will be required to renew permits and approvals in relation to our existing operations and obtain new permits and approvals for any proposed operations as may be required under the applicable laws of the sector or region that we are operating in. There can be no assurance that relevant authorities will renew or issue any of such permits or approvals in the time-frame anticipated by us or at all. Our failure to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

Compliance with many of the regulations applicable to our operations may involve incurring significant costs and otherwise may impose restrictions on our operations. We cannot assure you that we will not be subject to any adverse regulatory action in the future. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and the business of our Company could be adversely affected. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of the terms and conditions stipulated under any of our licenses or permits, one or several of our licenses and certificates may be suspended or cancelled and we shall not be able to carry on the activities permitted thereunder. For further information, see "Government and Other Approvals" on page 377.

45. Our insurance coverage may not be adequate to cover all losses or liabilities that we may incur in our business and operations.

Our operations are subject to various risks inherent in cloud communication industry as well as fire, theft, earthquake, flood, acts of terrorism and other events beyond our control. We maintain insurance policies customary for our industry to cover certain risks, including fire and allied perils material damage, burglary and housebreaking, money in transit and/ or safe and electronic equipment. We also maintain a group mediclaim policy to cover our employees and their immediate family members. We also maintain directors' and officers' liability insurance and a public offering of securities insurance policy. In addition, we maintain insurance for vehicles owned by us. Our Company's insurance cover as on the date of June 30, 2020 is approximately ₹ 409.16 million in respect of its net block of property, plant and equipment which stood at ₹ 212.79 million as of June 30, 2020. Consequently, our Company's insurance cover as a percentage of its net block of property, plant and equipment as of June 30, 2020 was approximately 192.28%. For further information, see "Our Business – Insurance" on page 131.

Notwithstanding the insurance coverage that we carry, the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events not covered by insurance policies, could harm our financial condition, business and future results of operations. However, in some cases, we may not have obtained the required insurance coverage or such insurance policies may have lapsed. For instance, we currently do not maintain any insurance against cyber-crime, corporate general liability or key-man insurance. In addition, our insurance policies may not continue to be available on reasonable terms, at economically acceptable premiums, or at all. There can be no assurance that any claims filed will be honoured fully or timely under our insurance policies. Also, our financial condition may be affected to the extent we suffer any loss or damage that is not covered by insurance or which exceeds our insurance coverage.

46. *Certain premises, including our Registered Office are not owned by us and we have only leasehold or leave and license rights over them. In the event we lose such rights, our business, financial condition and results of operations and cash flows could be adversely affected.*

Certain premises used by our Company have been obtained on a lease basis, including our Registered Office. We cannot assure you that we will be able to renew our lease agreements or enter into new agreements in the future, on terms favourable to us, or at all. In the event that any lease agreement is not renewed, we will be required to expend time and financial resources to locate suitable land or building to set up our operations. Also, we may be unable to relocate to an appropriate location in a timely manner, or at all, and we cannot assure you that a relocated office will be as commercially viable.

If a lease agreement is terminated, prior to its tenure or if it is not renewed, or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area, which could adversely affect our market share. For further information on our properties, see “*Our Business – Properties*” on page 131.

47. *We have entered into, and will continue to enter into, related party transactions. There is no assurance that our future related party transactions would be on terms favourable to us when compared to similar transactions with unrelated or third parties.*

We have entered into and may, in the course of our business, continue to enter into transactions with related parties including our Promoters, Subsidiaries and Group Companies in the future. Primarily these transactions include purchase of messaging services, travelling and conveyance, business promotion expenses, expenses reimbursed by and to other companies, rental income, advances to Promoters and remuneration to Directors and Key Managerial Personnel's. For instance, we purchased messaging services amounting to ₹ 99.23 million, ₹ 1,207.80 million and ₹ 1,167.03 million from Spectrum Technologies, a Promoter Group entity, in Fiscal 2018, 2019 and 2020, respectively. For further information on our related party transactions, see “*Financial Information - Related Party Transactions*” on page 328. While we believe that all such transactions have been conducted on an arm length's basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favourable commercial terms with other parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest which may be detrimental to our Company. Although in terms of the Companies Act, 2013, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain related party transactions. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

48. *Our funding requirements and proposed deployment of the Net Proceeds of the Offer are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.*

Our Company intends to use the Net Proceeds for the purposes described in “*Objects of the Offer*” on page 85. Subject to this section, our management will have broad discretion on deployment of the Net Proceeds. Our Company proposes to utilize ₹ 365.00 million from the Net Proceeds towards repayment or prepayment, in part or in full, of the existing loan facilities availed by our Company from HDFC Bank Limited and Kotak Mahindra Bank Limited. In terms of the facility agreements entered by our Company with HDFC Bank Limited and Kotak Mahindra Bank Limited, a consent from them is obtained.

Investors will be relying on our judgement of our Company regarding the application of the Net Proceeds. While a monitoring agency will be appointed in compliance with the SEBI ICDR Regulations for monitoring utilisation of Net Proceeds, excluding the proceeds raised for general corporate purposes, our funding requirements and the proposed deployment of the Net Proceeds of the Offer are based on management estimates, quotations and our current business plan, and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies. We may have to revise our expenditure and funding requirements as a result of variations in costs, estimates,

quotations or other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling planned expenditure and funding requirements at the discretion of our Board.

49. *Certain of our Subsidiaries may have conflicts of interest as they are engaged in similar business and may compete with us.*

Certain of our Subsidiaries are authorized to engage in businesses similar to our business operations. For further information of such Subsidiaries, see section titled “*Our Subsidiaries*” on page 164. As a result, there may be conflicts of interest in allocating business opportunities between us and other Subsidiaries. There may also be conflicts of interest between our Subsidiaries and us in pursuing new contracts for cloud communication platform services. We have not entered into any non-compete agreements with our Subsidiaries. There can be no assurance that our Subsidiaries will not compete with our existing business or any future business that we may undertake or that we will be able to suitably resolve such a conflict without an adverse effect on our business. Any such present and future conflicts could have a material adverse effect on our business and financial performance.

50. *Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows and working capital and capital expenditure requirements.*

Any dividends to be declared and paid in the future are required to be recommended by our Board and approved by our shareholders, at their discretion, subject to our Dividend Policy, the provisions of the Articles of Association and applicable law, including the Companies Act. Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements. We cannot assure you that we will generate sufficient revenues to cover our operating expenses and, as such, pay dividends to our shareholders in future consistent with our past practices, or at all. For information relating to dividend declared by us in the past, see “*Dividend Policy*” on page 203.

51. *We face significant competition for highly skilled professionals, and our success depends in large part upon our ability to attract and retain these personnel. In Fiscal 2018, 2019 and 2020, and in the three months ended June 30, 2020, our Company’s attrition rates were 24.82%, 40.32%, 18.90% and 4.46%, respectively. Any inability on our part to attract and retain our key managerial personnel and/or talented professionals may adversely affect our business and results of operations.*

Our ability to execute projects and to obtain new clients depends largely on our ability to attract, train, motivate and retain highly skilled software professionals. The attrition rates in the industry in which we operate have been high due to a highly competitive skilled labor market. In Fiscals 2018, 2019 and 2020, and in the three months ended June 30, 2020, our Company’s attrition rates were 24.82%, 40.32%, 18.90% and 4.46%, respectively. We invest significant time and money in training the professionals that we hire to perform the services we provide. These professionals are often targeted by the lateral recruitment efforts of our competitors, and in some cases by our clients. We believe that there is also a significant competition in our industry among employers to attract software professionals with the skills necessary to perform the services we offer. In addition, we may have difficulty in redeploying and retraining our software professionals to keep pace with continuing changes in technology, evolving standards and changing client preferences. If we cannot hire and retain additional qualified personnel, our ability to bid on and obtain new projects may be impaired and our revenues could decline. In addition, we may not be able to expand our business effectively thereby affecting our revenues and profitability. For further information on our Key Managerial Personnel, see “*Our Management – Our Key Managerial Personnel*” on page 177.

52. *Our Promoters who are also our Directors and Key Managerial Personnel hold Equity Shares, and are, therefore, interested in our Company’s performance other than reimbursement of expenses incurred or normal remuneration of benefits.*

Our Promoters who are also our Directors and Key Managerial Personnel, have interests in our Company and Subsidiaries other than to the extent of normal remuneration or benefits and reimbursement of expenses incurred. For further information, see “*Our Management*” on page 177. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company.

53. *Our Promoters and Promoter Group will continue to retain significant control in our Company, which will allow them to influence the outcome of matters submitted to shareholders for approval.*

As of the date of this Red Herring Prospectus, our Promoters and Promoter Group hold 96.00% of pre-Offer share capital of our Company. Furthermore, after the completion of this Offer, our Promoters will control, directly or indirectly our Company and continue to hold substantial percentage of the issued and paid up equity share capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company.

54. *If there are delays or cost overruns in utilisation of Net Proceeds, our business, financial condition and results of operations may be adversely affected.*

We intend to utilise the Net Proceeds of the Offer as set forth in “*Objects of the Offer*” on page 85.

The fund requirement mentioned as a part of the objects of the Offer is based on internal management estimates and has not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies. Furthermore, we may need to vary the objects of the Offer due to several factors or circumstances including competitive and dynamic market conditions, variation in cost structures, changes in estimates due to cost overruns or delays, which may be beyond our control. Pursuant to Section 27 of the Companies Act, 2013, any variation in the objects of the Offer as disclosed in this Red Herring Prospectus, would require a special resolution of our shareholders. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

In particular, we propose to deploy a certain portion of the Net Proceeds to purchase an office space with approximately 55,000 sq. ft. of useable area located in the vicinity of Malad and Goregaon suburbs in Mumbai by utilizing ₹ 650.00 million from the Net Proceeds. For further information, see “*Objects of the Offer*” on page 85. Any failure to acquire the aforesaid office space pursuant to a particular portion of the Net Proceeds, may lead to a failure in our attempt to reduce our lease rental costs and improve our operational efficiencies. Further, a delay in utilising the Net Proceeds to pay the Earn out amount in respect of the 365squared Acquisition will also have a material impact on our operations, business and financial condition.

At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in this Red Herring Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company.

In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in this Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of

contract, which may adversely affect our business and results of operations.

55. *We have experienced negative cash flow in Fiscal 2018, and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.*

We have experienced negative net cash flows in Fiscal 2018, the details of which are provided below:

For further information on the negative cash flows in Fiscal 2018, see “*Management Discussion and Analysis of Financial Condition and Result of Operations*” on page 333. We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

56. *Industry information included in this Red Herring Prospectus has been derived from industry reports. There can be no assurance that such third party statistical, financial and other industry data in this Red Herring Prospectus may be complete or reliable.*

We have not independently verified data obtained from industry publications and other third party sources, including the ROCCO Reports, and Juniper Reports, referred to in this Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from these industry reports. Although we believe that the data may be considered to be reliable, the accuracy, completeness and underlying assumptions are not guaranteed and dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, any of the BRLMs or any of our or their respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Red Herring Prospectus.

Further, this Red Herring Prospectus contains certain statistical information relating to the cloud communication industry that is sourced from third parties. This information includes general market and industry data that is derived from both public and private sources, including market and industry data that is derived from both public and private sources, including market research, publicly available information and industry publications. Such data may also be produced on different bases from those used in other industry publications. Investors should exercise caution when relying upon such third-party information.

57. *We have capital commitments to our Subsidiaries and any failure in performance, financial or otherwise, of our Subsidiaries in which we have made investment could have a material adverse effect on our business, prospects, financial condition and results of operations of our Company.*

Our Company has made and continues to incur capital investments and other commitments either at the company level

or directly in its Subsidiaries for augmenting their respective businesses. These investments and commitments may include capital contributions to enhance the financial condition or liquidity position of our Subsidiaries. Our Company has made acquisitions and may make further capital investments in the future, which may be financed through additional debt, including through debt of our Subsidiaries. If the business and operations of these Subsidiaries deteriorate, our Company's investments may be required to be written down or written off. Additionally, certain advances may not be repaid or may need to be restructured or receivables may not be collected or our Company may be required to outlay further capital under its commitments to support such companies. For further information on our investments, outstanding advances to and receivables from our Subsidiaries refer to "*Financial Statements*" on page 204.

The obligation of our Company towards Subsidiaries is restricted to providing funding requirements in enhancing the business of its subsidiaries and providing credit support for various loans availed by them. Any failure in performance, financial or otherwise, of our Subsidiaries in which we have made investment could have a material adverse effect on our business, prospects, financial condition and results of operations of our Company.

58. *Two of our Key Managerial Personnel do not have documents evidencing certain information in relation to their relevant past experience and/or educational qualifications.*

Two of our Key Managerial Personnel, Sharad Kumar and Ramesh Helaiya, do not have documents evidencing certain information in relation to their respective past experience and/ or educational qualifications included in their respective biography under the section "*Our Management – Our Key Managerial Personnel*" beginning on page 177. Accordingly, in making such disclosures, we have relied on affidavits executed by Sharad Kumar and Ramesh Helaiya.

59. *We or our counterparties may engage in certain transactions in or with countries or persons that are subject to U.S. and other sanctions.*

U.S. law generally prohibits or restricts U.S. persons from directly or indirectly investing or otherwise doing business in or with certain countries or territories and with certain persons or businesses that have been specially designated by the OFAC or other U.S. government agencies. Other governments and international or regional organizations also administer similar economic sanctions.

We have undertaken certain transactions with entities doing business with, or located in, countries to which certain OFAC-administered and other sanctions apply. Although we believe that we have compliance systems in place that are sufficient to block prohibited transactions, and we have not been notified that any penalties or other measures will be imposed on us, there can be no assurance that we will be able to fully monitor all of our transactions for any potential violation.

We can provide no assurances that our future business will be free of risk under sanctions implemented by these jurisdictions or that we will conform our business to the expectations and requirements of the United States authorities or the authorities of any other government that do not have jurisdiction over our business but nevertheless assert the right to impose sanctions on an extraterritorial basis. Further, investors in the Equity Shares could incur reputational or other risks as a result of our or our counterparties' dealings in or with countries or with persons that are the subject of U.S. sanctions. In addition, because many sanctions programs are evolving, new requirements or restrictions could come into effect which might increase regulatory scrutiny of our business or result in one or more of our business activities being deemed to have violated sanctions, or being sanctionable.

60. *Some of our Group Companies and Subsidiaries have incurred losses in the preceding three financial years, based on their last audited financial statements available.*

Some of our Group Companies and Subsidiaries have incurred losses in the preceding three financial years, based on their audited financial statements available. For further information on our loss making Group Companies, see "*Group Companies – Loss making Group Companies*" on page 198. For further information, see "*Our Subsidiaries*" and "*Financial Statements*" on pages 164 and 204, respectively. There can be no assurance that our Group Companies or Subsidiaries will not incur losses in the future.

61. *Our Promoters and certain Group Companies have unsecured loans that may be recalled by the lenders at any time.*

Our Promoters and certain Group Companies currently have availed unsecured loans which may be called by their lenders at any time. In the event that any lender seeks a repayment of any such loan, our Promoters and Group Companies would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all.

62. *We may be classified as a passive foreign investment company, which could result in adverse U.S. federal income tax consequences to U.S. investors of our Equity Shares.*

We would be classified as a passive foreign investment company (“PFIC”) for any taxable year if, after the application of certain look-through rules, either: (i) 75% or more of our gross income for such year is “passive income” (as defined in the relevant provisions of the Internal Revenue Code of 1986, as amended), or (ii) 50% or more of the value of our assets (determined on the basis of a quarterly average) during such year is attributable to assets that produce or are held for the production of passive income.

Based on the value of our assets and the composition of our income, assets and operations, we believe we were not a PFIC for the taxable year ending on March 31, 2020. However, a separate determination must be made each year as to our Company’s PFIC status. Moreover, the PFIC determination depends, among other things, our market capitalization, which could fluctuate significantly. Accordingly, it is possible that we may become a PFIC for the current taxable year or future years. There will likely be certain adverse consequences to U.S. investors under United States tax laws if we were to be a PFIC in the current or any future taxable year in which such U.S. investors hold Equity Shares. In addition, in the event we are treated as a PFIC, U.S. investors will be subject to certain U.S. Internal Revenue Service information reporting obligations. U.S. investors should consult their tax advisors on this matter.

63. *The determination of the Price Band is subject to various factors and assumptions and the Offer Price may not be indicative of the trading price of the Equity Shares, upon listing on the Stock Exchanges subsequent to the Offer. Further, the current trading price of equity shares listed pursuant to certain past issues handled by the BRLMs is below their respective issue price.*

The determination of the Price Band is based on various factors and assumptions, and was determined by our Company and the Selling Shareholders in consultation with the BRLMs. Further, the Offer Price of the Equity Shares was determined by our Company and the Selling Shareholders in consultation with the BRLMs through the Book Building Process. This price is based on certain factors, as described under “*Basis for Offer Price*” on page 94 and may not be indicative of the trading price of the Equity Shares, upon listing on the Stock Exchanges subsequent to the Offer. The trading price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure that you will be able to resell the Equity Shares at or above the Offer Price.

Further, the BRLMs have previously handled issues wherein the market price of the issued shares declined below the issue price of shares in such issues within 30 days of their listing and in certain cases continued to trade at a price lower than their listing price on the 180th day from their listing. We cannot, therefore, assure you that the investor will be able to resell their Equity Shares at or above the Offer Price. For further information regarding the track record of past issues handled by each of the BRLMs, see “*Other Regulatory and Statutory Disclosures – Price Information of past issues handled by the BRLMs*” on page 383. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Offer Price.

64. *Our Company will not receive any proceeds from the Offer for Sale by the Selling Shareholders.*

The Offer consists of the Fresh Issue by our Company and an Offer for Sale by the Selling Shareholders. The entire proceeds of the Offer for Sale will be respectively transferred to the Selling Shareholders and will not result in any creation of value for us or in respect of your investment in our Company.

EXTERNAL RISK FACTORS

65. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or vaccine is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. For further information, see “*Our Business – Business Response to COVID-19*” on page 131. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations

and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure and drug development projects; disruptions or restrictions on our employees' and suppliers' ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

Also, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Recent Developments – Impact of COVID-19" on page 333.

66. *Unfavorable conditions in our industry or the global economy or reductions in spending on information technology and communications could adversely affect our business, results of operations and financial condition.*

Our results of operations may vary based on the impact of changes in our industry or the global economy on our clients. Our results of operations depend in part on demand for information technology and cloud communications. In addition, our revenue is dependent on the usage of our services, which in turn is influenced by the scale of business that our clients are conducting. To the extent that weak economic conditions result in a reduced volume of business for, and communications by, our clients and prospective clients, demand for, and use of, our products may decline. Further, weak economic conditions may make it more difficult to collect on outstanding accounts receivable. Small and medium-sized business may be affected by economic downturns to a greater extent than enterprises, and typically have more limited financial resources, including capital-borrowing capacity, than enterprises. The Indian economy has also been affected by the COVID-19 pandemic. For further discussion on the impact of COVID-19, please see "Risk Factors – The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations." on page 23. If our clients reduce their use of our services, or prospective clients delay adoption or elect not to adopt our services, as a result of a weak economy, this could adversely affect our business, results of operations and financial condition.

67. *There have been allegations in recent years that there may be health risks associated with the use of portable mobile communication devices which could adversely affect our business.*

Portable communication devices may pose health risks due to radio frequency emissions from such devices. Several mobile communications equipment manufacturers have undertaken studies concerning the health risks associated with using mobile communications devices and have publicly announced that there is no evidence of any health hazards or risks. However, the actual or perceived risk of mobile communications devices in India could adversely affect us through a reduced subscriber growth rate or a reduction in subscribers or reduced network usage per subscriber or through a claim for compensation.

68. *The markets in which we operate are subject to the risk of natural and manmade disasters including earthquakes, floods and storms.*

Some of the regions that we operate in are prone to earthquakes, floods, storms and other natural and manmade disasters. In the event that any of the telecommunication networks, other infrastructure providers and our facilities are affected by any such disasters, we may sustain damage to our operations and properties, suffer significant financial losses or be unable to complete our client's engagements in a timely manner, if at all. Further, in the event of a natural disaster, we may also incur costs in redeploying personnel and property.

In addition, if there is a major earthquake, flood or other natural disaster in any of the locations in which our significant clients including MNOs which provide us connectivity are located, we face the risk that our clients may incur losses, or sustained business interruption, which may impair our ability to provide services to our clients and may limit their ability to continue their purchase of services or solutions from us or even terminate the contract entered into with us by giving notice and paying for the portion of the work done and any non-recoverable investments made pursuant to the contract by us. A major earthquake, flood or other natural disaster in the markets in which we operate could have an adverse effect on our business, financial condition and results of operations.

69. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“GST”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2020 (“**Finance Act**”) on March 27, 2020, pursuant to assent received from the President, and the Finance Act will come into operation with effect from July 1, 2020. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, a draft of the Personal Data Protection Bill, 2019 (“**Bill**”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

70. *Significant differences exist between Ind AS and other accounting principles, such as IFRS and U.S. GAAP, which may be material to investors' assessment of our financial condition.*

The Restated Financial Statements for Fiscals 2018, 2019 and 2020 and for the three months ended June 30, 2020 have been prepared under Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 read with the Companies Act, 2013.

Except as otherwise provided in the “*Financial Statements*”, no attempt has been made to reconcile any of the information given in this Red Herring Prospectus to any other principles or to base the information on any other standards. Ind AS differs from other accounting principles with which prospective investors may be familiar, such as IFRS and U.S. GAAP. Accordingly, the degree to which the financial statements, which are restated in accordance with the SEBI ICDR Regulations, included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited. In addition, our Restated Financial Statements may be subject to change if new or amended Ind AS accounting standards are issued in the future or if we revise our elections or selected exemptions in respect of the relevant regulations for the implementation of Ind AS. For further information, see *Management’s Discussion and Analysis of Financial Condition and Results of Operations — Presentation of Financial Information – First Time Adoption of Ind AS* and “*Restated Financial Information - Notes to Restated Financial Information - Recent Accounting Pronouncements*” on pages 204 and 333, respectively.

71. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- the prolonged impact of the outbreak of the COVID-19 or any similar future outbreaks of influenza or a similar contagious diseases;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions, including in India's principal export markets;
- geopolitical events such withdrawal of the United Kingdom from the European Union have had and may continue to have an adverse effect on global economic conditions and stability of the global financial markets;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis; and
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

In addition, the ongoing COVID-19 pandemic has caused an economic downturn in several major economies and generated volatility in, and general adverse impact on, the global securities markets, including in India; further, it is not possible for us to predict the extent and duration of this volatility and adverse impact on the global or Indian securities markets, including any possible impact on our Equity Shares. For further discussion on COVID-19, see *"Risk Factors – The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations."* on page 23. Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

72. *Investors may not be able to enforce a judgment of a foreign court against us.*

Our Company is a company incorporated under the laws of India. A majority of our Company's Directors and officers are residents of India and a substantial portion of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

73. *Any downgrading of India's debt rating by an international rating agency could adversely affect our business.*

India's sovereign rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. In the past, rating agencies have downgraded India's sovereign rating. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

Risks Relating to the Equity Shares

74. The trading volume and market price of the Equity Shares may be volatile following the Offer.

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

75. The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.

The Offer Price of the Equity Shares will be determined by our Company and the Selling Shareholders in consultation with the Book Running Lead Manager through the Book Building Process. This price will be based on numerous factors, as described under “*Basis for Offer Price*” on page 94 and may not be indicative of the market price for the Equity Shares after the Offer. The market price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to resell their Equity Shares at or above the Offer Price.

76. The Equity Shares have never been publicly traded and the Offer may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and the investors may be unable to resell the Equity Shares at or above the Offer Price, or at all.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the stock exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world.

77. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares, and payments on Equity Shares may be subject to FATCA withholding after December 31, 2018.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central

Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on such long term capital gains exceeding ₹ 100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. For further information, see “*Statement of Tax Benefits*” on page 97.

Provisions under the U.S. Internal Revenue Code of 1986, as amended (the “**Code**”) and U.S. Treasury regulations promulgated thereunder commonly known as “**FATCA**” generally impose a 30% withholding tax on certain “foreign passthru payments” made by a non-U.S. financial institution (including an intermediary) that has entered into an agreement with the U.S. Internal Revenue Service (the “**IRS**”) to perform certain diligence and reporting obligations (each such non-U.S. financial institution, a “Participating Foreign Financial Institution”). If payments on the Equity Shares are made by a Participating Foreign Financial Institution (including an intermediary), this withholding may be imposed on such payments if made to any non-U.S. financial institution (including an intermediary) that is not a Participating Foreign Financial Institution and is not otherwise exempt from FATCA or other holders who do not provide sufficient identifying information to the payor, to the extent such payments are considered “foreign passthru payments”. Under current guidance, the term “foreign passthru payment” is not defined and it is therefore not clear whether or to what extent payments on the Equity Shares would be considered foreign passthru payments. Withholding on foreign passthru payments would not be required with respect to payments made before January 1, 2019.

The United States has entered into intergovernmental agreements with many jurisdictions (including India) that modify the FATCA withholding regime described above. We have registered with the IRS as a financial institution pursuant to the intergovernmental agreement between the United States and India. It is not yet clear how the intergovernmental agreements between the United States and these jurisdictions will address “foreign passthru payments” and whether such agreements will require us or other financial institutions to withhold or report on payments on the Equity Shares to the extent they are treated as foreign passthru payments. Prospective investors should consult their tax advisors regarding the consequences of FATCA, or any intergovernmental agreement or non-U.S. legislation implementing FATCA, to their investment in Equity Shares.

78. *Any future issuance of Equity Shares may dilute your shareholding and sale of Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. There can be no assurance that we will not issue Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

79. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 426.

80. *Fluctuations in the exchange rate between the Rupee and foreign currencies could have an adverse effect on the value of the Equity Shares in those currencies, independent of our operating results.*

The Equity Shares are quoted in Rupees on the Stock Exchanges. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the net proceeds received by investors. The exchange rate between the Rupee and foreign currencies (including U.S. dollar) has changed substantially in the last two decades and could fluctuate substantially in the future, which may have an adverse effect on the value of the Equity Shares and returns from the Equity Shares in foreign currency terms, independent of our results.

81. *Investors will be subject to market risks until the Equity Shares credited to the investor's demat account are listed and permitted to trade.*

Investors may begin trading the Equity Shares allotted to them only after they have been credited to an investor's demat account, are listed and permitted to trade. Since the Equity Shares are currently not traded on the Stock Exchanges, investors will be subject to market risk from the date they pay for the Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that the Equity Shares allocated to an investor will be credited to the investor's demat account or that trading in the Equity Shares will commence in a timely manner.

82. *Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced.

2. Acquisitions and other strategic initiatives

One of our strategies is to expand our global presence and/or our product offering inorganically through acquisition of companies that complement our competencies. We believe that we have, and we will benefit significantly from the acquisitions undertaken by us in the past. We keep on monitoring and identifying any strategic opportunities that would be a good fit with our business. The table below summarizes the acquisitions that we have undertaken over the recent past:

Name of Entity	Shareholding	Country of Incorporation	Year of acquisition
365squared Limited	100%	Malta	2017
Call 2 Connect India Private Limited	100%	India	2017
Start Corp India Private Limited	100%	India	2016
Cellent Technologies (India) Private Limited	100%	India	2016

These acquisitions have been done with a view to enhance our geographical presence, expand our product lines, and delivery capabilities across a broader domain and we further seek to enhance our position as a specialized player in the cloud-based communication service industry. For example, in September 2017, we acquired 100 percent shareholding in 365squared Limited, a company incorporated under the laws of Malta, which operates in SMS filtering, analytics and monetization. We believe this acquisition will help us in monetizing A2P in our Company beside the commercial application of SMS filtering and analytics that would be deployed by 365squared Limited and also allows us to become the gateway for A2P traffic. The benefits that we have derived from each of the past acquisitions are listed below:

- The acquisition of Cellent Technologies and Start Corp have enabled us to strengthen its presence primarily in the Middle East;
- The acquisition of Call2Connect has enabled us to add a new service offering, viz. voice, non-voice and consulting BPO services; and
- 365squared Acquisition has enabled us to add a new product line, viz. SMS filtering, analytics and monetization.

Rationale for acquisitions:

The following are the benefits which we typically intend to derive from our acquisitions:

(a) To increase our service offerings and expand our product line

We cater to customers across different business verticals. We often receive requests from existing clients as well as new customers to provide certain services which are not part of our current service offering. We typically seek to acquire companies which provide such services and those which would help us grow our service offerings. Additionally, we look at acquisitions that help us obtain a more localized knowledge about the requirements of a particular market or client. Further, we will also look at acquiring companies which will enable us to foray into newer

technologies, newer service/product offerings, or plug in gaps in the mobile communications eco-system/value chain where we are currently not present.

(b) Enhancing our geographical reach

One of our strategies is to increase our customer base and revenue from the geographies where we do not have presence as on date. In this context, we seek to acquire entities which have a geographical presence in these regions that would help us to either establish our presence in newer markets with the potential to enhance our global positioning, to consolidate our sourcing for cost savings or enhance our service offerings in these regions.

Towards this end, we propose to target companies that:

- have expertise in the domain we operate in;
- offer strong strategic fit to our existing business(es) or serving connected extensions;
- have new customers that we can serve with our existing capabilities;
- newer technological platform/services;
- have new capabilities to serve existing customers;
- have a good client base;
- enhance our geographical reach; and
- have a strong management team.

We intend to utilise ₹ 830.00 million from the Net Proceeds towards potential acquisitions and strategic initiatives. Route Mobile (UK) Limited entered into a share purchase agreement dated September 21, 2017 (“**Acquisition SPA**”) with Tonio Ellul, Roneel Prasad, Christopher Bianco and 365squared Limited. Route Mobile (UK) Limited has acquired 100% of the shareholding of 365squared Limited that is 2,001 ordinary shares, on October 1, 2017 for an aggregate consideration comprising upfront consideration and earn out amount (“**Acquisition Cost**”). As per the Acquisition SPA, the upfront consideration was Euro 10.00 million, subject to certain adjustments, which has been paid. Further, Route Mobile (UK) Limited entered into a supplemental agreement dated September 24, 2019 (“**Supplemental Agreement**”) to the Acquisition SPA with Tonio Ellul, Roneel Prasad, Christopher Bianco and 365squared Limited. The Supplemental Agreement fixed the earnout amount to Euro 9,090,392.00, out of which we had made payment of Euro two millions each to Tonio Ellul, Roneel Prasad and Christopher Bianco in terms of the Supplemental Agreement and may pay the balance amount of Euro 3,090,392.00 equivalent to ₹ 273.16 million (Exchange rate of ₹ 88.39 = 1 Euro, August 14, 2020 (www.fbil.org.in)), from the ₹ 830.00 million towards potential acquisitions and strategic initiatives, through investment in our wholly owned subsidiary Route Mobile (UK) Limited by way of either equity or debt.

As on the date of this Red Herring Prospectus, other than the Acquisition SPA and Supplemental Agreement as mentioned above and the business transfer agreement dated June 15, 2020 entered by our Company to acquire certain technologies and related contracts from a Bengaluru-based company specializing in development of telecom related solutions which includes, inter alia, multimedia messaging service center and short message service center platforms on a going concern basis, we have not entered into any definitive agreements towards any future acquisitions or strategic initiatives. The amount of Net Proceeds identified for acquisitions is based on our management’s estimates. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of strategic initiatives undertaken, as well as general factors affecting our results of operation, financial condition and access to capital.

These factors will also determine the form of investment for these potential strategic initiatives, i.e., whether they will be directly done by our Company or through investments in our Subsidiaries in the form of equity, debt or any other instrument or combination thereof. At this stage, our Company cannot determine whether the form of investment will be equity, debt or any other instrument or combination thereof. The portion of the Net Proceeds allocated towards this Object may not be the total value or cost of any such acquisitions, but is expected to provide us with sufficient financial leverage to enter into binding agreements.

In the event that there is a shortfall of funds required for such acquisitions and / or strategic initiatives then, such shortfall shall be met out of the amounts allocated for general corporate purposes and/or through internal accruals. In

case the shortfall cannot be met through internal accruals or out of the amounts allocated for general corporate purposes then we shall borrow from the domestic/international market and, if required, the promoters may, at their sole discretion, provide such credit enhancement to the lenders as may be mutually agreed with the lenders. In the event that there is a surplus, such amounts shall be utilised towards other objects or general corporate purposes.

The purchase of the property in Mumbai could help in significant reduction in the lease rental costs.

As on date of this Red Herring Prospectus, our Company has not purchased any property, which is to be paid for wholly or partly out of the proceeds of the Offer or the purchase or acquisition of which has not been completed.

The indicative cost per square feet for outright acquisition of such office premises, which comprises a cost estimate ranging from ₹ 15,000 – ₹ 16,000 per sq. ft. (based on the prevailing market rates) for an office space measuring approximately 55,000 sq. ft. aggregating cost ranging from ₹ 825.00 million to ₹ 880.00 million for which we intend to utilise ₹ 650.00 million from Net Proceeds and the remaining amount through internal accruals and/or debt. The cost estimate excludes stamp duty, registration cost, maintenance deposits, car parking, etc.

In the event that there is a shortfall of funds required for the purchase of office premises then, such shortfall shall be met out of the amounts allocated for general corporate purposes and/or through internal accruals. In case the shortfall cannot be met through internal accruals or out of the amounts allocated for general corporate purposes then we shall borrow from the domestic/international market and, if required, the promoters may, at their sole discretion, provide such credit enhancement to the lenders as may be mutually agreed with the lenders. In the event that there is a surplus, such amounts shall be utilised towards other Objects or general corporate purposes.

STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS AVAILABLE TO THE COMPANY, ITS MATERIAL SUBSIDIARIES AND SHAREHOLDERS OF THE COMPANY UNDER THE APPLICABLE DIRECT TAX LAWS IN INDIA AND IN RESPECTIVE COUNTRIES (IN THE CASE OF MATERIAL SUBSIDIARIES)

A. Direct Taxation

Benefits available to Route Mobile Limited (*formerly known as Routesms Solutions Limited*) ('the Company) including its Material Subsidiaries – viz (i) Route Mobile (UK) Limited – UK; (ii) Routesms Solutions FZE – UAE; and (iii) 365squared Limited – Malta; and the Shareholders of the Company under the Income-tax Act, 1961 (read with Income Tax Rules, circulars, notifications) as amended by the Finance Act, 2020, (hereinafter referred to as 'Indian Income Tax Regulations') and Income Tax regulations in the respective countries where material subsidiaries are located are as under.

1 Special Tax Benefits available to the Company

As per Section 2 of chapter II of Finance Act, 2020 (Rates of Income-tax), Income-tax shall be charged at the rates specified in Part III of the First Schedule. Since the Company's turnover is less than INR 400 crore in the previous year 2018-19, it can avail special tax rate of 25% (plus applicable surcharge and health and education cess) on the total income.

Further, the Company also has an option as per the provisions of Section 115BAA of the Income-tax Act, 1961 ("the Act") to opt for reduced tax rate of 22% (plus applicable surcharge and health and education cess) subject to fulfillment of certain conditions specified in the said Section. Under this option, the Company will not be eligible to claim some special exemptions and deductions. Further, in order to avail the benefit of lower tax rate, the Company has to opt for the same on or before the filing of Income-tax return for respective year. It is pertinent to note that in case where a Company does not opt for the lower tax rate, the Company would be liable to pay tax at the rate of 25% (plus applicable surcharge and health and education cess).

Dividend received by an Indian company from a specified foreign company (in which it has shareholding of 26% or more) is taxable at 15% (plus applicable surcharge and health and education cess) as per Section 115BBD of the Act.

As per Section 194 of the Act, the principal officer of the Company before paying any dividend to a resident shareholder shall deduct tax at the rate of 10%. However, provisions of Section 194 of the Act are not applicable to following class of shareholders:

- a. An individual shareholder to whom dividend paid or payable in a financial year does not exceed INR 5,000;
- b. The Life Insurance Corporation of India established under the Life Insurance Corporation Act, 1956 (31 of 1956), in respect of any shares owned by it or in which it has full beneficial interest;
- c. The General Insurance Corporation of India ("Corporation") or to any of the four companies ("Companies"), formed by virtue of the schemes framed under sub-section (1) of section 16 of the General Insurance Business (Nationalisation) Act, 1972 (57 of 1972), in respect of any shares owned by the Corporation or such Companies or in which the Corporation or such Companies has full beneficial interest;
- d. Any other insurer in respect of any shares owned by it or in which it has full beneficial interest.

As per Section 195 read with 115A of the Act, dividend payable by the Company to a non-resident shareholder shall be subject to deduction of tax at the rate of 20% (plus applicable surcharge and health and education cess). Such tax is required to be withheld by the Company while making payment of dividend, subject to the provisions of the respective Double Taxation Avoidance Agreement (tax treaty), as applicable.

Further, as per the provisions of Section 80M of the Act, dividend received by the Company from any other domestic company or a foreign company shall be eligible for deduction while computing its total income for the relevant year. The amount of such deduction would be restricted to the amount of dividend distributed by the Company to its

shareholders on or before one month prior to due date of filing of its Income-tax return for the relevant year. Since the Company has investments in Indian and foreign subsidiaries, it can avail the above-mentioned benefit under Section 80M of the Act. .

2 Special Tax Benefits available to the Material Subsidiaries of the Company

Under CTA09/Part 9A, distribution received by a UK company from a specified subsidiary, UK or foreign, is exempt from UK Corporation Tax.

As per the CTA09/S931E, distribution of the profits falls under the exempt class if the same is paid by the company and that company is controlled / managed / has substantial interest of recipient. The definition of the controlled / managed / has substantial interest is covered ICTA88/S755D of Income and Corporation Taxes Act 1988.

Since Route Mobile (UK) Limited has investments in foreign subsidiaries, it can avail the above-mentioned benefit while receiving dividends from its subsidiaries if the conditions mentioned above are fulfilled.

- (ii) Since 1 April 2008 most businesses, regardless of size, have been able to claim Annual Investment Allowance (AIA) on their expenditure on plant or machinery, up to a specified annual amount each year (subject to certain conditions mentioned below).
- Businesses are able to claim the AIA in respect of their expenditure on both main rate and 'special rate' plant and machinery. There are however certain exceptions, set out in Section 38B of the Capital Allowances Act 2001 (CAA), the main exception being expenditure on cars.
 - The AIA is a 100 per cent upfront allowance that applies to qualifying expenditure up to a specified annual limit or cap. Where businesses spend more than the annual limit, any additional qualifying expenditure will attract relief under the normal capital allowances regime, entering either the main rate or the special rate pool, where it will attract writing-down allowances at the main rate or special rate respectively. The applicable AIA is £1,000,000 from January 2019.

- (iii) Route Mobile (UK) Limited is a shareholder of a Maltese company, 365squared Limited. According to Maltese income tax legislation, Maltese companies are subject to corporate tax at the rate of 35% on their worldwide income and capital gains.

On distribution of dividend, Route Mobile (UK) Limited is entitled to a refund of part of the tax paid by the Maltese company on its profits. The purpose of this imputation system is to eliminate any double taxation that might arise on the distribution of such dividends.

Accordingly, Route Mobile (UK) Limited being shareholder of a Maltese company, 365squared Limited, may be entitled to refund of part of the tax paid by 365squared Limited following the distribution of dividend.

Cloud Communication

Cloud communication is an entirely new way to build, deploy, and scale enterprise communications systems. It includes, but is not limited to Voice over Internet Protocol or VoIP, Communication as a Service or CPaaS and Unified Communications or UC. It offers enterprises cost-effective communications solutions that combine voice, messaging and data communication services over networks of telecom operators or MNOs. The need for in-house software and hardware resources is replaced with internet-based servers and sites. With growing internet penetration, business models are evolving and cloud communication services are being used by enterprises for streamlining back-end operations as well as for engaging with customers, employees and other stakeholders.

Following are certain consumer facing use-cases for cloud communication services used by enterprises across diverse sectors:

- One Time Passwords or OTPs received through messages while using net banking or online payment gateways for online transactions;
- Message updates related to change in flight schedule or boarding gate from airlines to passengers;
- Transaction confirmation and delivery update message for e-commerce transactions; and
- Soliciting missed calls for supporting a cause and polling for television shows

At present, the following key messaging formats dominate mobile and internet communication:

- *Short Message Service or SMS* – Referred to colloquially as a ‘text message’, or simply as a ‘text’. An individual SMS is 160 characters in length, though several can be strung together to create longer messages – but nevertheless being billed per 160 character “message”;
- *Multimedia Messaging Service or MMS* – Referred to colloquially as a ‘picture message’, though this tag is based on its predominant usage. MMS also facilitates sending of audio and video files, and is becoming more common as handset and network technologies develop;

- *Instant Messaging or IM* – Referred to within the industry variously as either Over-the-Top or OTT owing to the fact that the message is carried over networks of MNOs as ‘anonymous’ data, and billed to the end-user as such, rather than as a SMS or MMS that is billed on a per message basis or internet protocol or IP based (because messaging service uses IP). IM has the ability to provide text, picture and video messaging, as well as file-sharing. These services are perceived as being in competition with SMS/MMS (and consequently, with MNOs);
- *Email* – Arguably the personal computer equivalent of SMS. In general, this market is considered to have less in common (and consequently, not in competition) with other forms of messaging, being more formal or less conversational (with mobile being on-the-go communication, as opposed to in-depth); and
- *Social Messaging* – This includes posting messages or uploading photo/video content to social networks like Facebook and micro-blogging via services such as Twitter.

IM, Email and Social Messaging require an internet enabled device.

The table below summarizes key drivers as well as constraints for these formats.

Format	Drivers	Constraints
SMS	Ubiquitous: Unlike IM and Social Messaging, SMS is a near ubiquitous technology with almost every handset in the world capable of receiving text messages, and three-quarters of mobile handset users actively using it	Perception: Outdated. There is a perception, that SMS is outdated and IP messaging can offer more both from an MNO and end-user perspective
	Reach: SMS can be sent to almost any of the 7.71 billion mobile subscribers globally, on virtually any network, in any market	Power of "free": OTT messaging business models, which are typically ad-funded or subscription based (which work out to be less expensive than SMS), are disrupting the market, leading end-users to expect messaging services to be free or, at least, less expensive
	Reliability: SMS is not dependent on mobile broadband connectivity, unlike IM and Social Messaging	Regulatory: Roaming regulations in Europe have reduced the price. MNOs can charge for messaging while roaming on other networks
MMS	Camera technology: Smartphone cameras continue to improve, approaching the image/video quality of compact digital cameras, promoting sharing	Pricing models in certain markets: MMS pricing in Western Europe, in particular, has constrained adoption and usage of service
	Integration into messaging user interface: Smartphones are making it easier to send an MMS, with greater integration into physical and digital interface	
Internet Messaging and Social Messaging	Smartphone and tablet adoption: Application ecosystems for these devices have enabled MNOs to distribute applications and “smarter” devices capable of running native apps are essential to adoption	Fragmented communities: Many IM communities are fragmented (with the exception of aggregative services), not providing interconnection with users signed up to other services
	3G/4G adoption: Mobile broadband coverage and bandwidth is driving these services, and continued roll-out of more advanced networks will add to the attractiveness of these services. As of 2017, there are 3.0 billion subscribers using OTT messaging applications	Reliance on mobile broadband: Some argue IM requires WiFi connectivity to provide an acceptable user experience. Even if users find 3G/4G bandwidth sufficient, they are dependent on coverage which is not always available

Format	Drivers	Constraints
	Power of "free": OTT messaging are typically funded by advertising and are therefore free to the end-user, and with the ability of many smartphones and tablets to connect via WiFi, users will only pay the cost of fixed-line subscriptions (which is often cheaper than mobile broadband per megabyte)	Impact on battery life: Like many other mobile applications which run constantly in the background, it is argued IM applications drain battery power, leading to a poor user experience
	Business model unsustainable: Some in the industry have questioned whether IM and Social Messaging can have a sustainable business model	Market instability: Related to the above, some IM and Social Messaging services have not remained in-business for long periods

Cloud communication involves the following sender – recipient relationships:

- *Application-to-Person or A2P* – An automated message sent by a software application to a device controlled by a human being. For instance, a message containing an OTP for an online payment. Given the infrastructure needed for this type of application, it will more likely be acting on behalf of an enterprise, while the recipient could be a potential or existing customer, business client or employee;
- *Person-to-Application or P2A* – A message sent by a device controlled by a human to a software application. For instance, a missed call for voting in support of a television reality show contestant;
- *Machine-to-Machine or M2M* – A message sent by a device controlled by a software application to another software application. For instance, a vehicle manufacturer's measurements of a car's health can offer advice as regards pre-emptive maintenance before more serious events occur that might incur increased repair costs. This allows the vehicle manufacturer to maintain a good relationship with the consumer and improve brand loyalty. M2M is the critical connectivity enabler for Internet of Things or IoT.

A2P and P2A messaging are referred interchangeably due to the fact that these types of messages are often two sides of a 'conversation'. For instance, a customer (person) sends a P2A message to her bank (or rather, an application on its server) requesting account information, and the bank (application) sends an A2P message back to the customer (person) with the requested information.

Due to its reach, ubiquity and reliability, SMS based A2P messaging is currently the largest enterprise cloud communication segment. A2P voice is a sub-scale, but fast growing segment. IoT, currently at a conceptual stage, represents the concept of providing a connected digital identity to physical objects and networking those identities and their data together. The interconnection of these objects is expected to usher in automation in enterprise workflow, while also enabling advanced applications like a smart grid, and expanding to areas such as smart cities. Analysis of the data that these objects produce aims to improve quality of life, efficiency, create value or reduce costs.

The Current State of Communications-as-a-Service ("CPaaS")

Mobile channels are becoming increasingly important for brands and enterprises to connect with customers, with service providers emerging that look to offer a comprehensive platform that enables the management of this communication. These are CPaaS platforms.

CPaaS platform is defined as a service or solution that enables brands and advertisers to communicate to clients through multiple outbound online and mobile channels *via* a singular centralised platform. There are a number of services that can be considered part of CPaaS platform, including messaging technologies such as SMS, Rich Communication Services ("RCS") and OTT messaging applications.

Also offered are push notifications, voice services and email. There are varying methods of monetisation with these services, however it is expected that the key to success for CPaaS platforms should not be measured by traffic, but by

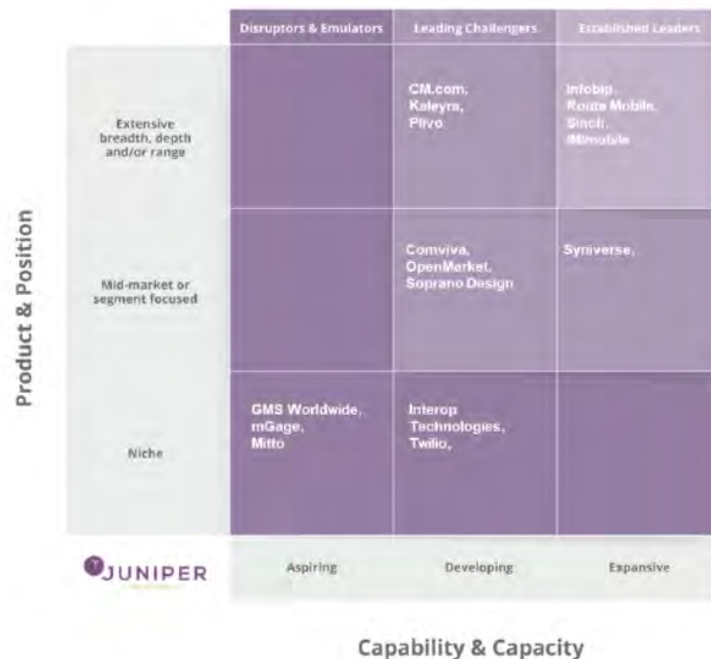

the number of communication platforms it can offer. Indeed, in the future, it is expected that the the introduction of chatbots, financial services, payment services and expansion into other sectors will be key for CPaaS providers maximising their revenue.

Regional Analysis of the Mobile Messaging

Region	Criteria	Details
North America	A2P SMS Traffic	The number of A2P SMS messages sent in North America will increase from 7.9 billion in 2019 to 1 trillion in 2024. This is in part due to a growing number of companies recognising the importance of omnichannel messaging to interact with customers and the growth of conversational commerce.
	A2P RCS Traffic	The future of RCS is bright in North America, with AT&T, T-Mobile, Verizon and Sprint forming CCMI in October 2019, and Google making RCS available to all Android users. Total A2P RCS traffic in North America is forecasted to reach 507.9 billion by 2024. The remaining question is whether Apple will announce RCS capability, as iOS devices dominate the US smartphone market.
Latin America	A2P SMS Traffic	The number of A2P SMS sent in Latin America is forecasted to reach 2.6 billion by 2024. Despite several operators in the region supporting RCS, SMS traffic is believed to remain popular. Messaging platform providers such as Sinch are acquiring companies that can strengthen their position in Latin America, demonstrating the strength of the messaging market in this region.
	A2P RCS Traffic	In April 2020, the GSMA reported that RCS had been launched in 14 countries in Latin America by six MNOs: (i) Claro (América Móvil); (ii) Movistar (Telefonica); (iii) Nextel; (iv) Oi; (v) Telcel (América Móvil); and (vi) Vivo (Telefonica). Total A2P RCS traffic in Latin America is forecasted to reach 86 billion by 2024. This will increase as RCS is rolled out to the other 19 countries, motivated by businesses wanting to engage with their customers in a more interactive way. As companies increasingly turn to rich content for customer interactions, operators not supporting RCS as a messaging platform risk losing traffic to their competitors.
West Europe	A2P SMS Traffic	Despite the predicted growth of RCS in West Europe, that the total number of A2P SMS messages sent in the region is forecasted to reach 135.9 billion by 2024, increasing from 123.5 billion in 2020. SMS will continue to be used by businesses to send notifications and OTPs to customers, as the plain text functionality will continue to be sufficient for these purposes.
	A2P RCS Traffic	The volume of RCS messages will continue to grow, reaching 110.8 billion by 2024. RCS services have been deployed by operators in 14 countries in the region, with Google rolling out RCS to all Android users in France, Spain and the UK. In

Region	Criteria	Details
		February 2020, Germany became the GSMA's first 'Gold Market' in Europe, with all three major network operators launching RCS services. This announcement will encourage other network operators to develop RCS capabilities, as RCS is more common and end users will begin to expect a higher standard in terms of messaging.
<i>Central and East Europe</i>	A2P SMS Traffic	The number of A2P SMS messages sent in the region will increase from 14.2 billion in 2019 to 20.9 billion in 2024. Due to the prevalence of featurephones in this region, businesses must continue to use SMS to reach customers who do not own RCS-enabled devices.
	A2P RCS Traffic	In Central & East Europe, RCS capabilities have been launched in seven countries by several network operators, including, Telekom Albania (OTE), Vodafone, Magyar Telekom, Orange, Telekom Romania (OTE) and MTS (Sistema). The total number of A2P RCS messages in Central and East Europe is forecasted to increase from 930.8 million to 21.9 billion in 2024. This surge will be partially caused by the influence of mobile platform providers, such as Infobip, which are based in the region and have the capacity to partner with operators to deliver RCS-based services.
<i>Far East and China</i>	A2P SMS Traffic	The volume of A2P SMS messages sent in Far East and China is forecasted to increase to approximately 53.5 billion in 2024. Whilst recent attacks from Chinese hackers on telecommunication networks may affect the future of P2P SMS, it is expected that businesses will continue to use A2P SMS, due to its ubiquity and ability to reach a large number of customers.
	A2P RCS Traffic	<p>The number of RCS messages sent in Far East and China will increase from 5.6 billion in 2019 to 16.9 billion in 2024. The uptake of RCS in this region is believed to be bolstered by the commitment made China Mobile, China Telecom and China Unicom in April 2020 to adopt the GSMA's Universal Profile specification. Even if only a nominal percentage of Chinese users adopt RCS messaging, this will massively bolster the user numbers due to China's large population.</p> <p>Both Japan and South Korea have been recognised by the GSMA as Gold Markets for RCS, suggesting that RCS use will increase amongst users in these countries. The number of RCS messages sent in Japan is forecasted to reach 2.5 billion by 2024, with South Korea reaching 5.6 billion at the same time.</p>
<i>Indian Subcontinent</i>	A2P SMS Traffic	The total number of A2P SMS messages sent in Indian Subcontinent will surpass 480 billion by 2024. This translates to \$5.3 billion in revenue for network operators. India will generate 30% of this traffic, bolstered by the presence of mobile platform providers such as Route Mobile Limited.
	A2P RCS Traffic	A total of 32 billion RCS messages is forecasted to be sent in Indian Subcontinent by 2024. This will be bolstered by Google's RCS solution, which is now available for Android smartphones in India. Mobile platform providers will be key to the rollout of RCS across the wider Subcontinent; it is believed that it is important for providers to consider collaboration with network operators, and potentially Google, to ensure smooth deployment.
<i>Rest of Asia Pacific</i>	A2P SMS Traffic	The total number of A2P SMS messages sent in the region is forecasted to reach 36.4 billion by 2024. This will equate to \$7.7 billion in total SMS revenue, decreasing from \$10.4 billion in 2019. Similar to other markets, SMS messages will continue to prove useful for the delivery of notifications and authentication codes to customers, but a level of cannibalisation may occur as a result of RCS implementation.
	A2P RCS Traffic	The region will have levels of growth akin to West Europe, with the number of A2P RCS messages increasing from 479 million in 2019 to 24.5 billion in 2024. As a result of select operators in developed countries, such as Australia and New Zealand, launching RCS, it is believed that operators in other countries will be pushed into action by consumer demand. According to the GSMA, the following MNOs have launched RCS solutions: (i) Telstra – Australia; (ii) Celcom (Axiata) – Malaysia; (iii) Vodafone – New Zealand; and (iv) Globe Telecom – The Philippines.

Region	Criteria	Details
<i>Africa and Middle East</i>	A2P SMS Traffic	The total number of A2P SMS messages sent in Africa & Middle East is forecasted to surpass 1.5 trillion by 2024. The popularity of SMS for mobile messaging in this region cannot be understated, as businesses use it to contact a large number of customers whilst keeping costs low. Moreover, many African customers continue to use featurephones, so brands need to keep using SMS messaging.
	A2P RCS Traffic	RCS traffic will increase from 364.9 million in 2019 to 7.4 billion in 2024. Orange has launched RCS services in Botswana, Burkina Faso, Cameroon, Democratic Republic of Congo, Cote d'Ivoire, Madagascar, Morocco, Niger and Tunisia. Working in collaboration with local telecommunication providers, Orange has also launched RCS capabilities in Guinea, Guinea-Bissau and Senegal (Orange/Sonetel), as well as in Jordan (Orange/Jordan Telecom). Other notable deployments include 9Mobile in Nigeria and Vodacom in South Africa. Whilst this list appears impressive at first, it is important to remember that several notable network operators have not deployed RCS in the region. It is suggested that Vodafone will be the next major operator to offer RCS solutions in Africa and Middle East, due to the company's prominent role in rolling out RCS in several European countries, as well as New Zealand and Turkey. The total revenues from RCS traffic in Africa and Middle East is forecasted to exceed \$188 million in 2024. Whilst this is a relatively small figure in comparison to other regions, such as North America, the increasing number of smartphones in the region suggests that Africa & Middle East is an emerging market for mobile messaging. Therefore, operators will benefit from establishing an early presence here and will be in a strong position to capitalise on future revenues from a growing market.

A2P Messaging

Market Outlook: A2P SMS Messaging

SMS technology appeals highly as a communication channel due to its ubiquity on smartphones. It is expected that this will be the case over the next five years; it is anticipated that 88% of A2P traffic will be attributable to SMS, falling from 98.8% in 2018.

There has been a significant evolution in the range of use cases for A2P messaging in recent years.

- Historically, A2P was used for alerts and, as PSMS (Premium SMS), a billing mechanism and carrier for simple content and services, both for one-off downloads or actions (eg voting) and for recurring payments.
- The latter use case has declined markedly in the past five years. This is due to a combination of the transition to an app-based economy, largely driven by card billing, and by regulatory action (in markets such as the US and the UK) against fraudsters.

Emerging messaging technologies, such as RCS, will begin to accumulate traffic share as operator and handset support increases. However, smartphone update cycles will limit adoption of the technology, thus limiting future RCS traffic. Nevertheless, the technology's potential cannot be understated, considering the revenue that operators can achieve through implementation of the technology compared to the minimal investment needed to support it.

It is believed that CPaaS vendors and Messaging-as-a-Platform ("Maap") solution providers will have a significant role to play in the future roll-outs of these services. Companies, such as Infobip, Sinch, CM.com and OpenMarket will continue to act as the key link between operator networks and the brands and enterprises that wish to use them.

It is considered the A2P SMS market established in regions such as North America and Europe. Further, future growth in these regions is forecasted to emanate from SMEs which have not yet adopted A2P as a communication tool, rather than any increase in messaging traffic per mobile subscriber or increase in the mobile subscriber base itself.

The State of Grey Route A2P SMS Messaging: Grey route A2P traffic is essentially traffic sent in violation of the carrier's terms and conditions, circumventing the network operator's own systems and from which MNOs cannot

generate any revenue. This traffic is primarily P2P in origin. Grey route opportunity was essentially created when MNOs sought to make a distinction between A2P and P2P traffic to better monetise the former. In doing so, and by charging a premium for directly connected A2P traffic, they created the conditions for a number of SMS aggregators to deliver A2P traffic via non-interconnected routes.

Quantifying the Mobile Messaging Ecosystem

SMS

As all mobile devices can send and receive SMS messages, it is believed that it is unlikely that this form of communication will be phased out, as SMS messages are ideal for reaching a wide audience.

Average SMS Traffic per Handset per Month, Split by Eight Key Regions and Global Average, 2019-2024

Source: Juniper Research

Based on the above figure, it is anticipated that all regions will have a fall in average handset traffic per month, due to the growing rise of OTT messaging applications such as WhatsApp, Viber and Messenger. As P2P traffic migrates to these channels, it is believed that operators have essentially lost traffic to these providers and must seek to expand existing messaging portfolios to compete. Further, it is believed that whilst P2P communication continues to migrate to OTT messaging applications, businesses will persist in their distribution of marketing information *via* A2P SMS. This will continue to be the case, even when RCS becomes more widely adopted.

SMS is quick fire and use cases such as fraud (prevention) and delivery notifications will stay within the SMS context.

A2P SMS

With an open rate of 98%, SMS messages are an ideal platform for businesses looking to supplement their marketing arsenal. Using SMS, enterprises can distribute marketing material to a wide audience and ensure fast delivery to user devices. Moreover, SMS enables companies to gather and subsequently analyse message data, so they can understand their customer base and develop targeted marketing messages.

SMS can also be used as part of the 2FA process, with OTP (One Time Passcode) notifications being sent to users over SMS to verify financial transactions. A representative asserted that: *'SMS may be limited in terms of features; 2FA, notifications and alerts are still the main use cases. Depending on culture, one will witness differences (in SMS use).'*

Competitive SMS Business Pricing – Wholesale Agreements will be Key

Total annual SMS traffic is expected to decline from 9.1 trillion in 2019 to 7.8 trillion in 2024. This is mainly due to the continuing decline in P2P SMS, as end users adopt other messaging platforms to communicate with one another. Despite the emergence of RCS as a new channel, the total number of A2P SMS messages sent is expected to grow from 3.2 trillion in 2019 to 4.6 trillion in 2024. By entering into wholesale agreements, network operators can reach businesses that utilise bulk SMS text messaging techniques as part of their marketing plan. Whilst wholesale agreements offer operators the opportunity to more accurately predict messaging revenues, it is suggested that operators must still take steps to ensure that SMS pricing is competitive and profitable to maximise both the network's user base and revenues.

There are expected to be 7.72 billion mobile subscribers globally at the end of 2017, that are projected to grow at a CAGR of 2.5% to 8.74 billion by 2022.

Despite being the oldest form of value-added services, SMS, the most prominent form of mobile messaging, remains a key part of MNO revenues. Time and time again, the word that is used to define the success of SMS is its ubiquity. The penetration of mobile devices, the number of devices that support SMS, and the number of mobile subscribers that engage in it are so large, that as a messaging channel it is unrivalled. The vintage of SMS, which with most technologies are perceived as a hindrance, is its real strength. It has been around for so long that almost everyone can do it, and almost everyone does.

Furthermore, the simplicity of SMS makes it so versatile that the potential usage of it is wide-ranging, meaning that it has been adopted in a huge number of ways beyond simple P2P communication. A2P and P2A SMS are increasing as a proportion of SMS traffic, with enterprises finding that the ubiquity of SMS and the wide coverage of MNOs make it an ideal channel to communicate with their customers, employees and other stakeholders.

Globally, profitability of MNOs is declining due to increasing competition from mobile virtual network operators or MVNOs, emergence of OTT messaging services like WhatsApp, increasing communication over social media and low Average Revenue per User or ARPU in rural segments of emerging markets which are the overwhelming majority of new subscriber additions. Growth in OTT messaging services has threatened revenues of MNOs, with P2P SMS being a major casualty.

For instance, in the Netherlands, where WhatsApp rapidly gained traction, KPN experienced a 60% decline in P2P SMS usage levels between 2011 and 2013. KPN has subsequently not published messaging data. Similar declines have also been reported in South Korea following the widespread adoption of KakaoTalk, while OTT adoption in China since 2013 has seen SMS volumes decline. P2P SMS revenue for MNOs declined at a rate of 18.8% globally between 2013 and 2015. Average SMS sent per subscriber per month are projected to further decline at a CAGR of 4.7% globally, with North America witnessing a steeper decline of 9.0%.

The table below sets out the projected decline in average SMS sent per subscribers per month over the periods indicated.

<i>(in million, except percentages)</i>

Global	134.6	130.1	125.2	119.5	112.5	106.0	-4.7%

For MNOs, SMS has historically been by far and away the most valuable data service. As consumers migrate to OTT messaging, the value to them of P2P SMS comes into question. Hence, there is an increasing attraction of being able to charge enterprises a premium for their A2P messaging.

The size of the global A2P messaging market (including only directly connected A2P revenue) was US\$ 37.9 billion in 2017 and is projected to grow at a CAGR of 4.4%. Emerging markets like Latin America, Africa and Middle East are expected to grow faster.

The table below sets out the projected increase in the size of the A2P market across the regions identified and in the periods indicated.

The schematic below provides an illustration of the A2P messaging value chain:

SMS aggregators (pure play aggregators or cloud communication companies) operate the gateways that provide the connectivity to the networks of MNOs for enterprises seeking to use A2P messaging. Tier 1 aggregators, processing over one billion A2P messages per annum, typically rely primarily on direct connectivity to the MNO's SS7 network, using the Short Message Peer to Peer or SMPP protocol. However, below these Tier 1 players are numerous smaller players, often processing far smaller numbers (tens or hundreds of millions) of A2P messages per annum, in many cases wholly reliant on grey routes to deliver their messages.

SMS firewalls provide protection against malicious attacks, unsolicited SMS and fraud. Next-generation firewall providers are capable of identifying (and blocking) grey route traffic, thereby increasing the monetization of legitimate traffic. A number of firewall providers also allow operators to understand the profile of the messaging traffic by conducting analytics of the traffic flow.

Tier 1 players can fulfill multiple roles within the value chain. Several of the Tier 1 players within SMS aggregation are also amongst the market leaders for firewalls.

A2P Messaging Market – Key trends

Rise of grey route traffic

Grey route A2P traffic is essentially traffic which is sent in violation of the MNO's terms and conditions, circumventing the MNOs own systems and from which the MNOs cannot generate any revenues. This traffic is primarily P2P in origin; the grey route opportunity was essentially created when MNOs sought to make a distinction between A2P and P2P traffic to better monetize the former. In so doing, and by charging a premium for directly connected A2P traffic, they created the conditions for a number of SMS aggregators to deliver A2P traffic via non-interconnected routes.

Inter-operator competition and the emergence of OTT messaging services led MNOs to offer SMS bundles (often unlimited) at low prices. In emerging markets, a number of MNOs and MVNOs now offer large text bundles for less than a dollar. For example, Telenor Pakistan had offers of a bundle of 10,000 SMS for just PKR40 (\$0.38). These

bundles are being used to fulfill A2P messaging, and are ideal for those players without the capability or inclination to seek direct connectivity with MNOs through AA19 agreements.

Furthermore, routing traffic via networks in a third country also allows SMS aggregators to save money via arbitrage, as they take advantage of the different settlement rates of the countries concerned. This means that even in markets where there are AA19 agreements between the MNOs (which define the charges of terminating messages between their networks), the MNOs concerned will only generate minimal revenues per message.

Following is the projected share of grey route SMS traffic:

Region	2017	2018	2019	2020	2021	2022
North America	36.8%	33.1%	29.8%	26.8%	24.1%	21.7%
Latin America	42.4%	40.3%	38.3%	36.4%	34.6%	32.8%
Western Europe	17.0%	15.3%	13.7%	12.3%	11.1%	9.9%
Central and Eastern Europe	14.9%	14.2%	13.5%	12.9%	12.2%	11.6%
Far East and China	7.6%	7.1%	6.7%	6.3%	5.9%	5.5%
Indian Subcontinent	46.3%	44.4%	42.5%	40.5%	38.4%	36.3%
Rest of Asia Pacific	27.4%	26.1%	24.8%	23.5%	22.3%	21.2%
Africa and Middle East	40.4%	38.4%	36.5%	34.7%	32.9%	31.3%
Global	29.9%	28.0%	26.1%	24.4%	22.7%	21.2%

On a global basis, grey route A2P messages cost just 25% of the price of directly connected A2P traffic. In 2015, MNOs lost US\$ 12.2 billion of potential revenue due to grey route traffic. This is driving demand for firewall (SMS filter) solutions amongst MNOs.

Into the cloud

Increasingly, Tier 1 SMS aggregators are offering cloud based business grade A2P messaging solutions. These players provide global delivery capabilities through mix of direct and indirect relationships with MNOs across the globe. Such cloud platforms can easily and quickly scale mobile communications while reducing latency and increasing delivery rates. They may also offer a proprietary adaptive routing platform, which routinely tracks millions of data points to immediately determine the fastest and most reliable route to deliver A2P messages.

Enterprises demanding faster, reliable A2P traffic

As enterprises increasingly deploy A2P messaging for marketing, alerts and authentication purposes, they want to ensure that messages are delivered and delivered in a timely manner. Many such messages will be time-critical, and failure in this regard could potentially have a serious adverse effect on a brand's standing. For example, as banks increasingly seek to use mobile channels to engage with their customers, any failure to deliver promised alerts, or timely authorizations, would justifiably leave them open to claims for compensation, with higher-profile cases also impacting their brand. It might also lead to a wider disenchantment with A2P messaging as a communication channel.

MNOs demanding minimum commitments and consolidating traffic at group level

Current trend is for MNOs to demand a minimum volume commitment from SMS aggregators. Given the underlying financial and risk management requirements, only Tier 1 aggregators in a particular market can make these commitments. Other players either buy from or terminate through these Tier 1 aggregators.

A further key trend is that network operator groups are increasingly seeking to consolidate their A2P services at the group level through the establishment of dedicated units. Where previously national operating companies would arrange the contracts with the SMS aggregators, the contracts are now being executed at their dedicated global units. The rationale being that it will enable the groups to strike harder bargains with the Tier 1 aggregators and to reduce the scale of grey route traffic. Through these units the MNOs can also provide SMS hubs with direct connections, with platforms typically offering features such as high performance routing and low latency delivery.

Deutsche Telekom, Telenor, Telefonica and Orange are some of the large global MNOs who have implemented group consolidation. Vodafone, having first established Vodafone Carrier Services in 2013, introduced the Vodafone Messaging Hub in May 2015. The hub now serves the SMS requirements of Vodafone's over 400 million customers worldwide. Additionally, it is being offered as a service to other MNOs and A2P aggregators looking to transit SMS on its network. These hubs are themselves becoming connected to each other. For example, in December 2015, Telefonica and Deutsche Telekom reached an agreement to directly connect their respective A2P messaging hubs.

Cloud communication companies also provide SMS hubs to simplify the interworking between MNOs enabling them to increase their international SMS coverage without entering into multiple bilateral arrangements. Robust SMS hubs prevent fraudsters and spammers from bypassing standard interconnections and delivering messages to mobile subscribers without any extensive control.

RCS Business Messaging

Total number of RCS users is expected to rise to 1.2 billion by the end of 2020. This has largely been driven by continuing increased support from both operators, and the uptake of RCS-capable smartphones as users upgrade handsets.

Global Number of Mobile Subscribers that are RCS Capable (m), Split by 8 Key Regions: 1.2 billion subscribers

Source: Juniper Research

There is significant uptake in North America and Far East and China in terms of RCS penetration. There has clearly been a staggered development of RCS across multiple countries owing to the uptake of smartphones and operators' support of the technology. This phase is expected to continue over the next five years, as many operators prioritise other technology, such as IoT or 5G networks over RCS messaging standards. Additionally, the level of virtualisation over a network will continue to play a crucial role in the number of operator RCS launches. A key advantage of RCS is that it can 'piggy back' on the back of the roll-out of 5G standards. This will be critical for the growth of RCS over the next five years.

By 2025, it is anticipated that there will be over 1.4 billion 5G connections. Whilst this is lower than the total number of RCS subscribers, it provides a perfect platform for long-term growth as there will certainly be subscribers that will be pushed on to RCS-capable connections.

CPaaS: Regional Business Analysis

North America

North America is categorised by high mobile traffic and a developed ecosystem which has been quick to adopt new technologies. Indeed, the Cross Carrier Messaging Initiative (“CCMI”) has accelerated the adoption of RCS. Both the US and Canada are expected to experience its highest annual growth towards the end of the forecast period. This owes to the increasing prevalence of RCS.

Notably, Multimedia Message Service (“MMS”) usage has remained high in the US, and it is anticipated that mobile subscribers in the country will continue to use media rich functionality over RCS. It must also be noted that Canada also has a high penetration of subscribers on RCS capable networks with Bell, Rogers and Telus having all supporting the service.

Latin America

It is believed that Latin America must be explored by CPaaS vendors wishing to expand their coverage globally over the next five years. This region has a large addressable user base which can be exploited by vendors wishing to enter the space. However, it is believed that the most immediate revenue opportunity comes in the form of SMS business messaging.

Source: Juniper Research

Over 95% of revenue in 2020 can be attributable to SMS business messaging. Despite the increasingly popularity of WhatsApp in the country, the ubiquity of SMS still leads to it being the most used service in the region over CPaaS platforms. It must also be noted that usage of the WhatsApp for Business API is likely to have significant usage outside of the CPaaS space.

West Europe

It is forecasted that, whilst there are distinct differences in the average revenue per mobile subscriber, there is a positive upward trend over the next five years.

Source: Juniper Research

By 2025, it is believed that the majority of revenue will be driven by the A2P SMS market, with this technology being the source of over 70% of revenue by 2025. RCS will account for 20% of revenue, whilst voice services will account for approximately 6% of CPaaS revenue in West Europe.

Central and East Europe

Countries within Central and East Europe have historically been accustomed to mobile communication from brands and enterprises, and it has been a key region for many incumbent service providers.

Source: Juniper Research

There is an upwards trend across the region, as CPaaS players are expected to build upon the established A2P SMS services in the region with both RCS and OTT business messaging. Indeed, RCS business messaging is expected to account for 18% of revenue by 2025, whilst OTT messaging is anticipated to account for only 1.2%.

Far East and China

Source: Juniper Research

For example, WeChat for Business in China has been developed to enable A2P communications over the app, and there has been some support from CPaaS platforms for this service.

Indian Subcontinent

Financial issues for operators in this region have led to issues with the launch of new services, such as 5G and RCS. Indeed, operators in the region were delayed in launching LTE networks over the past decade, and it is anticipated that operators will once again be delayed in launching 5G networks. This issue has been exacerbated by the presence of COVID-19 in the region.

Source: Juniper Research

OTT business messaging is expected to present larger opportunities in the CPaaS sector. This will largely be driven by the prevalence of WhatsApp in India. As a result, we expect brands and enterprises to leverage OTT business messaging over RCS services over the next five years. This is also due in part to operators in India inability to launch new services over their networks at present.

From a CPaaS perspective, it is believed that this region will offer little immediate growth opportunities for emerging technologies. Whilst WhatsApp is popular, we expect the strict regulation on the usage of its API to limit uptake. However, as the market progresses, the region is likely to benefit from a relaxation of these regulations. These regulations are likely to be relaxed in order to increase traffic over the OTT channel.

As with most other regions, it is believed that the growth of A2P SMS revenue for CPaaS platforms will be driven by increasing migration of traffic from other markets to the CPaaS market itself, rather than any acceleration in growth in the overall number of A2P SMS traffic.

Rest of Asia Pacific

The total number of OTT mobile subscribers is forecasted to exceed that of the forecasts number of RCS subscribers over the next five years.

Africa and Middle East

One key aspect of Africa and Middle East is the high revenue from voice services. This is due to the low penetration of smartphones in many countries. In turn, there is a lower requirement for services such as RCS, OTT business messaging and push notification services over CPaaS platforms.

CPaaS Platform Providers

CPaaS solutions enable businesses to integrate real-time communication features into their own applications without the need to build complex infrastructure and interfaces. Companies are only required to pay for the services they use, with CPaaS providers adopting per-call, per-video or per-message billing models. CPaaS providers use cloud technology to help companies implement omnichannel communications in a cost-effective manner, subsequently boosting revenue and bolstering customer relationships.

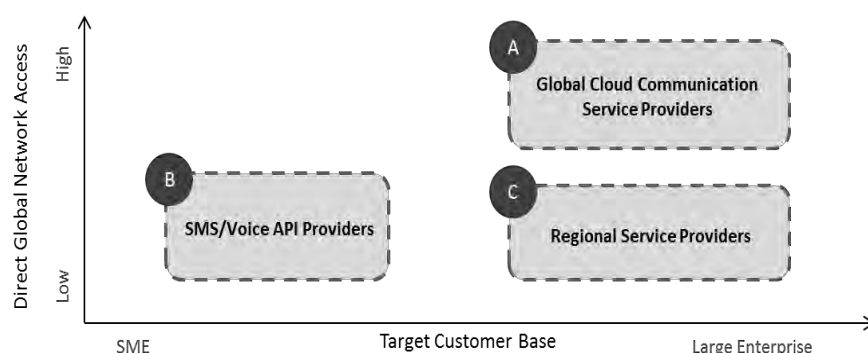

Must be Agile & Support as Much New Technology as Possible

CPaaS players must expand their offerings and support as many technologies as possible. This recommendation mirrors the strategy of CPaaS players; the more technology integrations and features available through a CPaaS platform, the easier it will be for CPaaS vendors to market their solutions. Whilst the majority of CPaaS solutions enable businesses to include communication features, such as OTT messaging, SMS and push notifications, in their native apps, CPaaS providers must be agile and adapt to the emergence of new technology, such as RCS messaging. In the future, it is believed that CPaaS platform providers will compete in terms of the completeness of their platform, as brands and advertisers gravitate to companies with a comprehensive offering.

Enterprise Cloud Communication

The enterprise cloud communications market is characterized by a high degree of fragmentation. Players can broadly be categorized into three groups: (i) Global Cloud Communications Service Providers; (ii) Regional Service Providers (including divisions of MNOs); and (iii) Cloud API Providers. These groups can in turn be segmented by their target customers (small and medium enterprises (SMEs) or large enterprises) and their ability to offer direct access to global mobile networks.

The market has proliferated in recent years, while in the case of Tier 1 and Tier 2 players there has been a degree of consolidation. Also, global enterprise IT majors are acquiring these companies to add A2P messaging to their mobile portfolios. Hence, Syniverse acquired VeriSign's messaging business (2009), MACH (2013) and Aicent (2014); SAP acquired Sybase in 2010; CLX acquired Voltari's messaging business in 2014 and mBlox in May 2016.

Emerging Areas – IoT and Big Data

Internet of Things or IoT is, at present a focus area for many enterprises. Efficiency gains, cost savings and new revenue models are the principal benefits accruing from IoT. High rate of IoT adoption and deployment in enterprises can be attributed to the value-add and business cases being very clear and measurable. The following table projects the number of connected enterprise and public sector devices:

<i>(in million, except percentages)</i>

Global	8,861.3	10,946.8	13,789.1	17,935.9	23,982.4	31,026.1	28.5%

It is widely acknowledged that the real value of connected IoT units will be derived through the conversion of data into actionable information. The reason for this is that the majority of connected units will be M2M modules, producing small amounts of data each, albeit at large scale i.e. Big Data. Consequently, where nearly the entirety of the Internet's history has involved the analysis of human-produced data, frequently composed of relatively large, organized chunks of data, the IoT landscape presents a scenario where sense must be made of large amounts of byte sized data packets that are not structured into any particular format. The rise of data produced over the Internet and indeed, an increased amount of data produced by machines has already created a scenario where traditional databases are, in many instances, not fit for purpose. The characteristics of Big Data can usually be thought of as 'big' in terms of volume, velocity and variety. In many instances, IoT data, due to its velocity, will be useful only for a short period of time. Therefore, applications leveraging data of this nature demand very short latency, with the typical route of sending data to the internet cloud for processing becoming unfeasible in many instance.

Consistent with our strategy of pursuing inorganic growth to deepen our relationship with MNOs and broaden our product and service portfolio, we acquired 365squared Limited with effect from October 1, 2017, which operates in SMS analytics, firewall, filtering and monetization. Further, we also acquired Call2Connect, effective April 1, 2017, a company which offers voice, non-voice and consulting BPO services to some of the largest enterprises in India.

Our operations are internally aligned into the following business verticals: (i) enterprise; (ii) mobile operator; and (iii) business process outsourcing (“BPO”).

Enterprise. Our enterprise vertical primarily provides cloud based communication platform to enterprises to enable digital communication through multiple channels including RCS, A2P / P2A messaging, 2Way Messaging, OTT business messaging, enterprise email and URL shortening; and Mail2SMS. Our platform also provides enterprise voice application services including interactive voice response, Click2Call, missed call facility and outbound dialer, which enable enterprises, to connect incoming and outgoing voice calls to their applications and systems. Our CPaaS platform gives our current and potential customers the ability to leverage our Super Network and APIs to build out their digital communication service needs. We provide a suite of APIs for various communication channels, across multiple geographies that are scalable and flexible to fit the customers’ requirements. We have also launched Route Mobile API Developer Network – a program that enables developers to leverage capabilities of our platform and seamlessly deploy digital communication features within their applications / software.

Mobile Operator. Our main service offerings in this segment include SMS analytics, firewall, filtering, monetization and CPaaS and hubbing solutions. Our analytics based SMS firewall solution helps MNOs identify grey route traffic terminating on their networks, block grey route traffic, identify the source of such grey route traffic, and monetize such traffic. We have developed multiple engagement models, to offer flexibility to MNOs while using our solution. We typically engage with MNOs on a revenue share model when deploying this solution. Certain MNOs also engage with us for our hubbing solution and CPaaS offerings, to leverage our global connectivity and A2P platform.

Business Process Outsourcing (BPO). We provide a range of BPO services including client support, technical support, booking and collection services. Our strategic objective is to integrate our BPO capabilities with our enterprise voice platform and deliver end-to-end offerings to enterprise customers.

We are an associate member of the GSMA and an accredited open hub connectivity solution provider with our internally developed cloud communications platform allowing us to handle both A2P and peer-to-peer (“P2P”) traffic for enterprises, OTT players and MNOs. In addition, Route Mobile (UK) Limited is also an associate member of GSMA. In the three months ended June 30, 2020, through our cloud communications platform, we processed more than 6.95 billion billable transactions. In Fiscal 2020, our platform managed more than 30.31 billion billable transactions from our clients and was used by more than 2,700 clients while it managed more than 24.74 billion billable transactions in Fiscal 2019. We have established direct relationships with MNOs that provide our clients with global connectivity. As of June 30, 2020, we had direct relationships with over 240 MNOs and four short messaging service centres hosted in various geographies across the globe. We are able to access more than 800 networks across the world, as of June 30, 2020.

Competitive Strengths

We believe that the following are our primary competitive strengths:

Omni-channel cloud communication platform service provider with diversified service offerings for enterprises

We are among the leading CPaaS providers to enterprises, OTT players and MNOs. According to the ROCCO Report 2020, we were ranked as a tier one A2P service provider internationally. Further, we were ranked second globally as a tier one A2P service provider for 2017 (*Source: ROCCO Report 2017*). Being an associate member of the GSMA and an accredited open hub connectivity solution provider allows us to manage both A2P and P2P traffic for enterprises and MNOs. In addition, Route Mobile (UK) Limited is also an associate member of GSMA.

We assist enterprises in their digital communication strategy by enabling multiple channels of communication to deliver messages to their stakeholders – including customers, suppliers, and employees. Enterprises can choose to communicate with the end user through select channels, for example SMS, or through multiple channels including SMS, OTT business messaging, voice and email amongst others. For example, in a typical online financial transaction, a customer receives OTP from his bank through multiple channels including, SMS, email and / or an automated voice call. Additionally, we have developed a single unified API, an ‘omni-channel platform’, which incorporates communication modes such as A2P / P2A / 2Way Messaging, email, RCS messaging, voice and OTT business messaging, allowing enterprises to reach customers on both traditional and all leading OTT platforms.

1. Our team works closely with enterprises to integrate enterprises' internal IT solutions with our CPaaS platform.
2. Enterprises leverage various digital communication APIs offered by us to communicate with their end-customers.
3. Developer community integrates with one or more APIs offered by us.
4. Developers enable their companies to leverage our platform's digital communication capabilities within their applications / websites.
5. Our platform enables one-way or 2 way communication with end-users over multiple communication channels.

Enterprises use our platform to send transaction confirmations, notifications, feedback requests, updates, customer care information, 2FA pins, OTP messages and promotion messages amongst other communication to their end-customers.

Our platform helps enterprises increase brand loyalty, customer retention through improved customer interaction and enhanced engagement.

With growing internet penetration, business models are evolving and cloud communication services are being used by enterprises for streamlining back-end operations as well as for engaging with customers, employees and other stakeholders. The size of the global A2P messaging market (including only directly connected A2P revenue) was US\$ 37.9 billion in 2017 and is estimated to grow at a CAGR of 4.4% (*Source: Juniper Reports*). In Fiscal 2018, 2019 and 2020, through our in-house developed cloud communications platform, we processed more than 21 billion, 24.74 billion and 30.31 billion billable transactions, respectively, while in the three months ended June 30, 2020, we processed more than 6.95 billion billable transactions. Our 45 member technical team, as of June 30, 2020, are engaged in developing new and customized solutions for clients across sectors and industries. Further, our competitive position is enhanced by our ability to leverage our existing relationships with our clients, whom we will continue to target for increasing spend on cloud-based communications by cross-selling newer offerings, and expansion into newer sectors and geographies.

MNO focused suite of products

Globally, telecom providers lost over \$11 billion in revenues in 2018 due to delivery of messages through “grey routes” (*Source: Juniper Reports*). With the use of our analytics based SMS firewall, we assist MNOs in identifying and plugging such revenue leakages due to grey routes, driving additional revenues for them, and for us.

We have been able to diversify our service offerings in the mobile operator segment with our acquisition of 365squared to include SMS analytics, firewall, filtering and monetization solutions. We proactively help MNOs identify A2P revenue leakage and monetize the same. In addition, we assist MNOs in securing their networks and improve their understanding of how A2P messages terminate on their network. On an average, our SMS firewall contracts with MNOs have a tenure of three years, with certain contracts providing for automatic renewal for further two years, which we believe provides us with reasonable visibility and stickiness of revenue from such business.

We also offer our CPaaS to MNOs by which we help them extend A2P messaging services to enterprises and other aggregators. Further, our SMS hubbing solution allows inter-connectivity between smaller MNOs to connect to global operators, and expand their network and services to their subscribers when they roam across the globe.

We have added the IVN solution for MNOs. This solution enables MNOs to offer additional mobile number to existing subscribers, on the same mobile device, without any additional KYC requirements or SIM cards. The virtual number is assigned instantly and is linked to the subscribers existing KYC profile. We believe that this solution will help us further deepen relationships with our MNO clients.

Global connectivity through established relationships with MNOs

As of June 30, 2020, we had direct relationships with over 240 MNOs (“**Super Network**”) and provided our enterprise clients with access to over 800 mobile networks. We partner with some of the key players across the globe.

We also have six strategically located data centres. We believe our global presence enables us to offer our clients the flexibility of multiple routes, better speed of delivery and an ability to optimize cost of delivery per message. We are able to serve our clients better as a result of our direct relationship with MNOs. As of June 30, 2020, we had direct relationships with 161 MNOs in EMEA, 32 MNOs in the APAC region, 48 MNOs in North America and South America, six MNOs in India and one MNO in Australia. As of June 30, 2020, we have served over 30,150 clients, cumulatively since inception, globally through our offices across Africa, Asia Pacific, Europe, Middle East and North America.

Based on our Super Network, we believe that we are an attractive partner for enterprises allowing them to communicate cost-effectively across multiple geographies. The significant number of our direct relationships with a broad range of MNOs allows us the ability to provide our services at a competitive cost and helps ensure high quality of service for our enterprise clients.

Our existing direct and indirect reach to mobile subscribers globally provides us the ability to attract varied categories of enterprises that need to communicate with their clients. Our established presence in all major geographies provides us an opportunity to leverage the growth in the cloud-communications space. Following our acquisition of 365squared we have further strengthened our direct arrangements with MNOs.

Diversified and global client base across industries serviced locally

We have a diverse enterprise client base across a broad range of industries including social media companies, banks, financial institutions, e-commerce entities, travel aggregators and other client facing companies. Additionally, our MNO clients include over 25 operators across four continents, as of June 30, 2020. In addition, our client base is spread across four continents and as of June 30, 2020, we had served over 30,150 clients, cumulatively since inception. In Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, our ten largest clients accounted for 36.08%, 46.00%, 52.50% and 63.65% of our revenue from operations, respectively, while our single largest client accounted for 6.49%, 19.86%, 14.58% and 15.45% of our revenue from operations in such periods. Our diverse global client base helps us limit our dependency on a specific client, industry or geography and reduces financial risk. We believe our leadership position as a cloud-communication service provider is supported by our global operations with 18 locations, as of June 30, 2020, allowing us to serve our clients locally in the jurisdiction they operate.

Our track record of delivering quality and innovative solutions across various segments enable us to develop and strengthen our relationships with our clients and increase business from existing clients. We are in regular communication with our clients through dedicated client teams that include sales and engineering personnel, which allows us to work closely with our clients on an ongoing basis and provide them end-to-end services. We have historically experienced strong client retention and have derived a significant proportion of revenues from existing client accounts that have continued to grow.

We have also leveraged our diversified client base to up-sell to existing clients as and when we launch new services and features or when our clients expand their operations and use cloud-communications for new services. For example, we have sold voice services to a messaging client and vice-versa. We believe that increased integration of new services increases client engagement and, over the long-term, client loyalty. As a result, we have been able to strengthen our relationship with our clients across sectors.

Scalable delivery platform supported by robust infrastructure

Our cloud-based delivery platform enables us to build and manage applications without having to create and maintain the underlying infrastructure for each client. We are therefore able to provide enterprises with solutions to operate applications without purchasing, configuring or managing the underlying hardware and software. We currently operate at a throughput capacity of over 10,000 messages per second. Our six strategically located data centres provide our operations with the resilience required to meet the requirements of our clients. We have adopted secure protocols and offer 128-bit encryption to our clients. Additionally, our scalable platform requires limited capital expenditure as and when we add new clients or new services or when traffic volumes increase. Our platform allows our clients to scale elastically without having to redevelop their applications or change their communications infrastructure.

According to the ROCCO Report 2017, we have been ranked first in terms of our ‘implementation process’, our ‘uptime performance’ and our ‘route monitoring and management’. We believe that these parameters ensure low latency and high availability for clients. In addition, we have the ability to serve our clients through 18 locations across Africa, Asia Pacific, Europe, Middle East and North America. Our ability to consistently deliver on stringent service level agreements with our clients reflects our robust infrastructure.

Robust business model and consistent financial track record

We have a number of clients on a pre-paid business model where the client pays upfront allowing us to reduce the overall working capital cycle. Our revenue from operations increased at a CAGR of 37.61% from ₹ 5,049.48 million in Fiscal 2018 to ₹ 9,562.52 million in Fiscal 2020 and was ₹ 3,096.14 million in the three months ended June 30, 2020. In Fiscal 2018, 2019 and 2020, and in the three months ended June 30, 2020, 41.77%, 24.99%, 17.01% and 15.47% of our revenue from operations, respectively, was prepaid. The standard terms of the agreements with our post-paid clients require payments to be made within 30 – 60 days.

In addition to a security deposit or a credit line paid in advance by us, we are typically required to pay MNOs within a specified period, usually ranging between 45 and 60 days. We believe this business model provides us with a negative working capital cycle and supports flexibility in pricing our services. Further, our revenue is directly linked to usage

based on each transaction or communication sent by clients and is based on a pricing model where we have an ability to change the prices offered based on prevailing market rates or owing to increase in rates by MNOs as a result of regulatory action or legislation. Our pricing control mechanism also ensures that relationship managers and system administrators are unable to price services below a certain base, which also ensures margin protection.

We have experienced sustained growth in our business in recent years, including currently during the ongoing outbreak of COVID-19. We have not required any capital infusion in our Company since Fiscal 2007 and we have grown our operations primarily through internal accruals. We have been consistently profitable since the last decade. We believe that our sustained growth is attributable to our high operating margins and low-cost base.

Experienced Promoters and senior management team

Business Strategies

Our business strategies are focused on the following elements:

Continue to develop omni-channel digital communication offerings and innovative solutions

We have continuously focused on retaining and deepening relationships with our existing customer base with the help of a dedicated key accounts management team. We have grown our revenues with respect to particular customers and intend to focus on revenue expansion through cross-selling and up-selling a wider range of services and solutions to our existing customers. Our R&D team has augmented our CPaaS platform with several new channels of digital communication, which will drive growth in the near term. We intend to leverage newer solutions with our existing customers and position ourselves as the partner of choice for these customers. We believe that offering a one-stop-solution addressing enterprises' communication requirements across all digital channels will increase stickiness of our relationship with our existing customers and augment our ability to serve start-ups and young enterprises. These differentiated offerings will also help us initiate business engagement with potential customers who do not currently use our services.

We have made significant investments in developing our communication services and solutions. These investments have enabled us to expand our product and service offerings to include major mobile communication channels, including messaging, email, OTT and voice. We continue to track new technologies, industry segments and market trends in the mobile technology sector. We intend to leverage our existing platform, diverse enterprise client base and Super Network to capitalize on the growth opportunity in cloud-communications space and endeavour to be a one-stop communications solution provider to such enterprise clients and MNOs.

Continue to focus on developer community program

Route Mobile API Developer or RAPID network is an initiative to formally launch our developer community program. The objective of this program is to enable developers to leverage the capabilities of our CPaaS platform and seamlessly

deploy communication features within their applications / software. Through the developer community program, we are in the process of adopting a bi-modal go-to-market strategy. The developer community program primarily will focus on agility, enabling developers and their enterprises to experiment with our APIs and leverage our platform to improve their digital communication solutions. Our business partners, system integrators and third party developers will have access to an online portal with APIs allowing them to integrate with our platform and develop digital communication solutions for end-users.

Enhance service offerings through inorganic opportunities

Since Fiscal 2017, we have expanded our operations through a number of acquisitions and successfully integrated these businesses into our operations. We continue to focus on building our presence in new markets and addressing the need for cloud-communications services in new industries. We intend to continue our strategic expansion plans through inorganic growth opportunities in new markets and geographies allowing us to complement our existing operations. Through strategic acquisitions, we intend to increase the scale of our operations, access new clients and enter high-growth geographies in a cost-effective manner.

We believe that our experience, track-record and approach of identifying and implementing our inorganic growth strategy will enable us to acquire and successfully integrate new businesses. In conjunction with our organic growth strategies, we intend to pursue strategic acquisitions or investments by selectively evaluating targets in order to increase our product and service offerings, expand our existing client base and our geographic reach to strengthen our position as a global cloud-communication platform services provider. We acquired 365squared, Call2Connect, Start Corp and Cellent Technologies, which has resulted in the expansion of our operations across Europe, Middle East, Africa and Asia-Pacific and has enabled us to supplement our product and service offerings to include SMS filtering, analytics, and monetization. For instance, our Company has entered into a business transfer agreement dated June 15, 2020 to acquire certain technologies and related contracts from a Bengaluru-based company specializing in development of telecom related solutions which includes, *inter alia*, multimedia messaging service center and short message service center platforms on a going concern basis. The acquisition is subject to customary closing conditions. For further information, see “*Risk Factors - Our acquisitions are subject to various risks, including risks relating to the integration of these acquired businesses with our existing operations. We may in the future continue to make strategic acquisitions to grow our business and further diversify service offerings. An inability to identify, complete and successfully integrate such acquisitions could adversely affect our business prospects, results of operations and financial condition.*” on page 23. We continue to evaluate potential opportunities that would allow us access to superior technology to enable additional solutions for enterprises as well as MNOs, a larger client base as well as direct connectivity to mobile operators. We also intend to leverage our inorganic growth and strategic acquisitions and partnerships to increasingly cross-sell our products and services to our expanded client base.

Grow presence in additional markets to serve clients locally

With our leading position in the cloud-communication space coupled with the anticipated growth in this sector, we intend to continue to grow in the markets where we currently operate and further expand our offerings in additional markets. We intend to meet the requirements of a broader range of global developers and enterprises. In order to attract and secure new clients, we will continue to develop our network of offices to increase awareness amongst enterprises. We also plan to focus on further strengthening our position in certain important enterprise markets, such as Africa and Latin America, which have significant potential for cloud-communication services. We have operations in Kenya, Ghana, Uganda, Zambia and Nigeria, through our subsidiaries, Route Connect (Kenya) Limited, Route Mobile Limited, Route Mobile (U) Limited, Route SMS Solutions Zambia Limited and ROUTESMS Solutions Nigeria Limited, respectively. We also have operations in the Americas, where we anticipate significant potential to serve OTT and enterprise clients. In addition to the aforementioned, we continue to target expansion into newer geographies directly through strategic acquisitions. We believe this allows us to meet regulatory requirements that require service providers to have a direct presence in the region, ensures regional expertise and enables us to maintain lower operating costs.

Leverage our CPaaS platform and BPO expertise to deliver virtual contact centre solutions

We added BPO capabilities through the acquisition of Call2Connect, with effect from April 1, 2017. Our strategic objective is to integrate our BPO capabilities with our enterprise voice platform and deliver end-to-end offerings to

enterprise customers. Our CPaaS offerings enable enterprises address their digital communication requirements while our BPO services intend to address customer / vendor / partner requirements to interact with a human interface. Further, we intend to leverage Call2Connect's expertise in call centre and other BPO services, combined with our expertise in technology driven digital communication enablement to create a new revenue stream through virtual contact centre solutions.

Products and Solutions

We provide a range of products and solutions across diverse sectors, including but not limited to the sectors mentioned below:

Enterprise

Enterprises are increasingly adopting CPaaS because it removes the need for enterprises to own hardware, and delivers simpler, quicker and more cost-effective access to the digital communication functionality that businesses need to build applications with better user experiences and customer engagement. Communication APIs add value to these enterprises for everyday interactions.

We offer enterprise clients a cloud communications platform that can be deployed and integrated with existing business applications and systems. Our dedicated technical and support teams are available 24X7 to facilitate integration and deployment of any of our products and services. To ensure compatibility with a client's existing infrastructure without the need for additional resources at their end, we have developed several plug-and-play APIs with the ability to customize as per requirements.

We provide the following services:

Communication Platform as a Service

Communication Platform as a Service ("CPaaS") is a cloud-based platform that enables developers to add real-time communications features to their own applications without needing to build backend infrastructure and interfaces.

The platform is divided into three layers or tiers:

Web tier: Customers and sub-customers interact with the platform using various interfaces. Sub-customers can send messages through a web portal or panel. They can also use plug-ins, desktop applications, or APIs for sending messages. Customers use an administrator portal or panel to control sub-customers. The administrator portal can perform user creation, SMS queue management, routing configuration, and gateway management and display various reports.

Middle tier: This tier receives and forwards messages while processing them for credit deduction and sending delivery reports.

Database tier: The database stores and forwards messages to SMS centres. The layer has database servers for storing do-not-dial and opt out numbers and archiving messages and call detail records.

Enterprise Messaging

The A2P messaging platform has been completely developed in-house allowing clients to connect through a choice of interfaces (HTTP, SMPP or web panel) and send messages globally. With the ability to send customized, personalized, and scheduled messages. Our messaging platform and customized messaging solutions can be deployed to communicate with internal and external stakeholders and help businesses enhance customer engagement through real time communication across segmented audiences. Typical use cases for this product include transactional alerts, account related notifications, booking confirmations, one-time passwords, reminders for bill payments, event alerts, operational notifications, and promotional alerts.

2Way Messaging

The 2Way Messaging service enables enterprises to keep end-users engaged through message exchanges in a seamless, cost-effective manner without the need for any additional applications, software, or investment and is highly customizable to tailor the optimal approach for each individual organization. Typical use cases for our 2Way Messaging service include surveys, account inquiries, process inquiries, call back requests, subscription services and specific and personalized information requests.

OTT Business Messaging

Customers use an OTT messaging platform to deliver text, images, buttons, links, directly to users. Messages are language independent being up to 1,000 characters in length. Messages use push notifications with the organisation's logo incorporated in the sender ID. Business messaging finds use in retail banking, mortgage industry, stock markets, e-commerce, retail, hospitality, travel, and healthcare.

Rich Communication Services

Rich Communication Services ("RCS") is a communication protocol between telecom operators, OEMs and messaging partners for A2P rich messaging. RCS enables enterprises to create more conversational and engaging solutions for consumers. We facilitate enterprises in creating enterprise business accounts, which deliver the messages to the end-users. RCS uses GSM bandwidth that enables assured delivery of messages and better reach. Typical use cases for RCS include travel and tourism, wherein an airline can utilize RCS messaging by sending tickets and boarding passes without any data connectivity, and healthcare, wherein patients can manage appointments through interactive appointment calendars.

Enterprise Email Sender

Our enterprise email sender service helps enhance customer communication with content rich and intuitive emails. The service equips clients with sophisticated campaign management tools such as A/B testing, drag & drop editor, campaign preview across interfaces, segmentation, campaign reports, and assures instant inbox delivery.

URL Shortening

Enterprises often send out links to websites or product pages to induce a sale or transmit additional information to end-users. Sending a traditional web link can add unnecessary characters to a message, results in increased costs and provides no additional analytical information. URL shortening enables clients to automatically generate a shortened uniform resource locator (“URL”) for every single number and provides data on click rates, geographical information, type of browser used and operating system. Since each URL is unique for each number, URL shortening enables personalization based on click through rates, device information and location.

Interactive Voice Response

Interactive voice response (“IVR”) is a system that captures customer inputs over the phone and generates the required response. IVR can be both incoming and outbound. IVR handles incoming calls, but when combined with an outbound dialer, it can call out and take customer responses for campaigns and surveys. It can provide instructions, pull up data and read it to customers, or simply record customers’ input. With outbound IVR, a call is made to customers during which a voice prompt is played. The flow of responses is pre-defined and actions are taken based on clients’ inputs. The service can employ static, pre-recorded or personalized voice responses. Campaign results are then shared within analytics teams. With inbound IVR, customers can call an IVR number for queries, offers or to participate in contests. The IVR facility is most prevalent for telephone banking – determining account balance, payments, transfers, and other requests, order management – placement and confirmation of orders, online subscriptions, ticket bookings, arrival / departure information and customer care / support services.

Click2Call

The Click2Call service is a tool that simplifies instant calling with cloud-based back-end support. Clients can introduce our widget on their website allowing them to trigger a call between an agent and the customer once the customer provides his/her number.

Missed Call

The missed call service is an engagement tool that enables inbound inputs from customers through a simple, free of charge phone call. The tool can be deployed to capture responses or queries and send automated messages or arrange calls to customers.

A virtual mobile number is published and displayed through various mediums such as billboards, banners or promotional messages. When a customer dials the number, the call is redirected to our server and is disconnected. The caller’s details are captured in our systems. An automated response is then sent to the customer in the form of either a message, an IVR, or an actual phone call from a customer care executive.

Outbound Dialer

The outbound dialer facility allows enterprises to make automatic calls to pre-defined customer lists and play one-time passwords, promotional messages, or reminders as per their requirements. The message to be broadcasted is created and uploaded as an audio file along with a list of numbers. Our system automatically dials the list of numbers and plays the recorded audio. The system updates the status of calls in the database. The system also redials un-responded calls at scheduled times and within a defined time-frame. Outbound dialer allows enterprises to view reports on the voice panel and also provides a status regarding total calls, successful calls, failed calls and no-response calls.

Mobile Operator

SMS Filtering, Analytics, and Monetization

We offer SMS filtering, analytics, and monetization solutions through 365squared. Our solutions allow MNOs to control and monetize A2P messages terminating on their network.

365analytics. All our solutions are powered by our 365analytics software. 365analytics is a real-time detection and traffic analytics software with an intelligence that is constantly updated based on our global intelligence. It is capable of detecting spam, faking, flooding, spoofing and bulk messaging traffic using analytics. It undertakes automated

brand simulation giving detailed information on how traffic is reaching subscribers, classifies message traffic based on type, A2P brand and A2P brand message type and also has detailed reporting functionality.

Our SMS filtering, analytics and monetization services include:

365secure. This service offers MNOs a fully managed service for A2P message revenue assurance and fraud protection. 365secure is primarily for MNOs with limited or no filtering capability.

365managed. For MNOs with an existing filtering platform we integrate with our system to offer a managed revenue solution.

Route Hub

The route hub solution enables flow of messages between MNOs and mobile virtual network operators with different protocols and technologies and does not require any bi-lateral agreements. The solution not only resolves interoperability issues by providing a single path, but also reduces the cost of connecting to independent messaging hubs available. In addition to lower costs and an expedited setup, traffic generated from hubs is of better quality as it is from other legitimate operators. A single agreement with a hub provides maximum reach thereby enabling better coverage, reduced complexities, easy connectivity and reporting and billing efficiencies.

Instant Virtual Number

Our Instant Virtual Number (“IVN”) solution is a virtual number that is configured on the top of an existing primary mobile number. Through IVN calls can be made and received using an identifiable virtual number, eliminating the need of having an additional SIM card. We provide the hardware and we partner with a third party to provide the software for the IVN solution. Our IVN solution allows for number whitelisting and blacklisting, time-based operation, recycling of dormant virtual numbers and automatic reallocation of recycled virtual numbers.

Industry Focused Solutions

Omni-channel solution for e-commerce brands

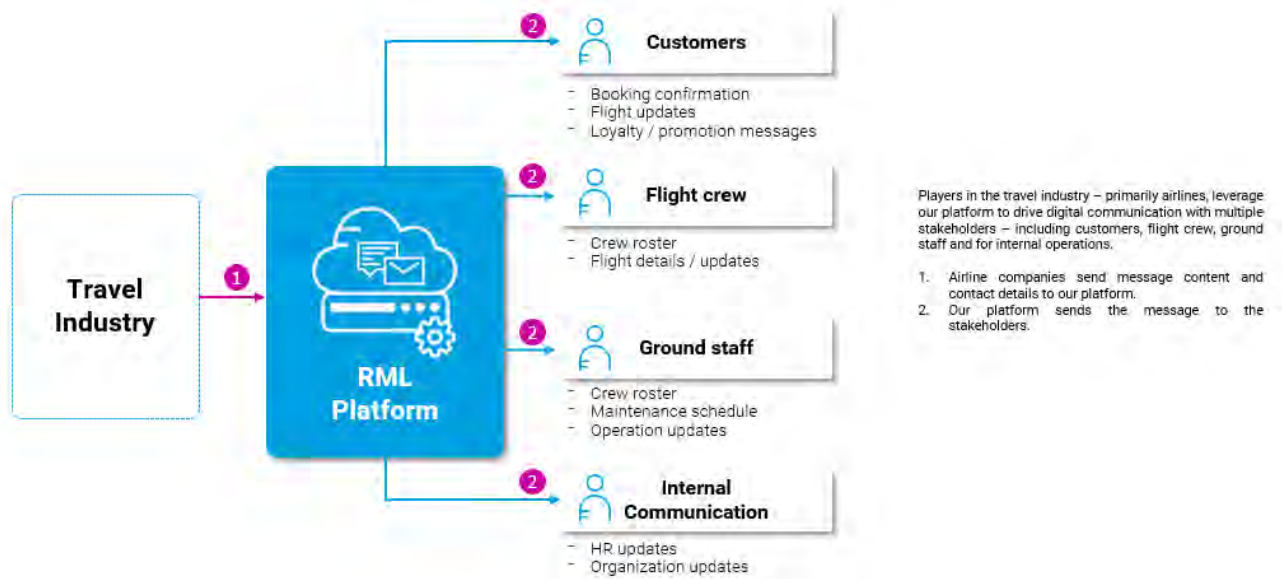

Our omni-channel platform enables digital communication across voice as well as SMS channels and provides detailed reports that enable e-commerce brands to drive member specific initiatives.

Digital communication solutions for banking / healthcare / retail sectors

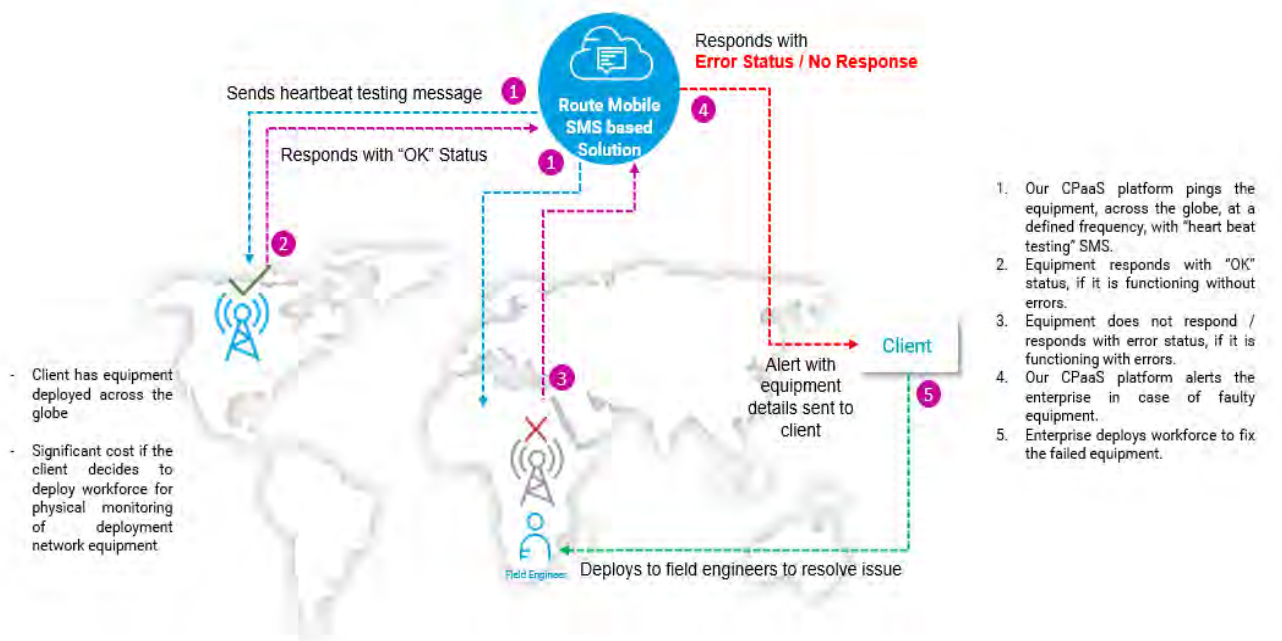

Our platform ensures quality of service through low latency and high delivery ratio. We offer GDPR compliant services and ensure data security and information integrity.

Digital communication solutions for travel industry

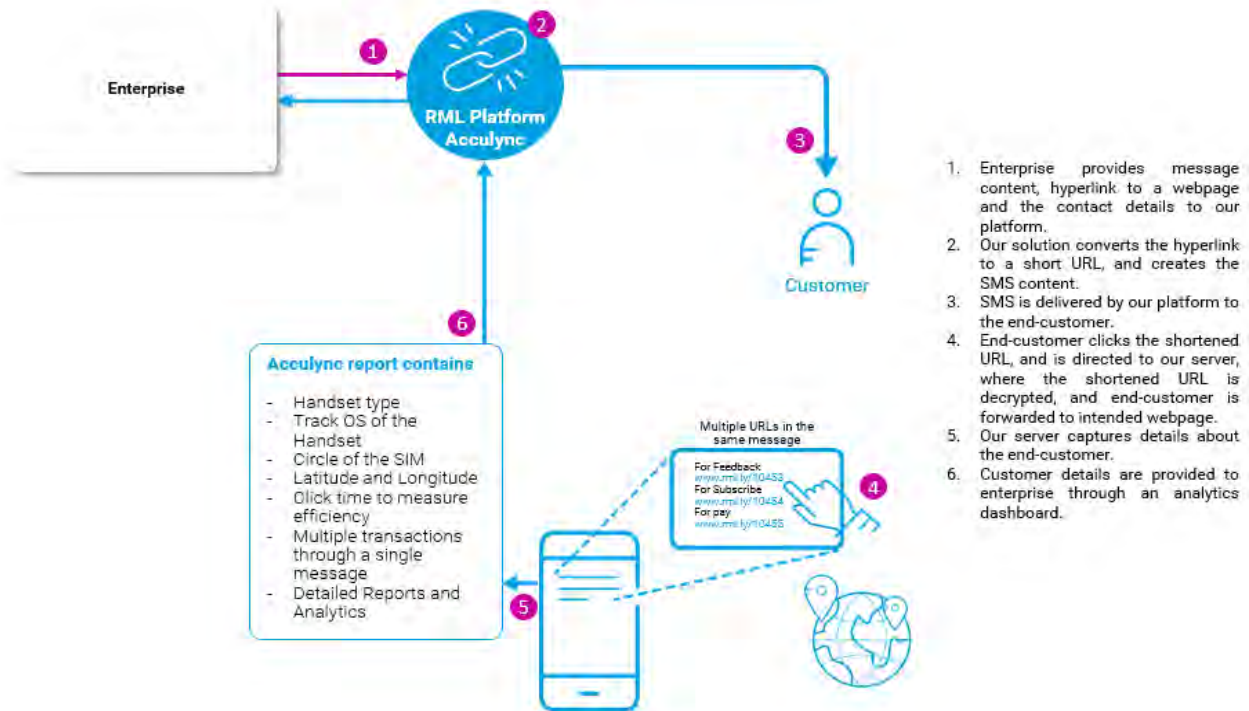

We offer comprehensive digital communication solutions to players in the travel industry, particularly to airlines. Our clients in the travel industry leverage our platform and our global reach to run their digital communication programs with various stakeholders including employees, their customers and third parties.

Internet of Things enabling communication solutions

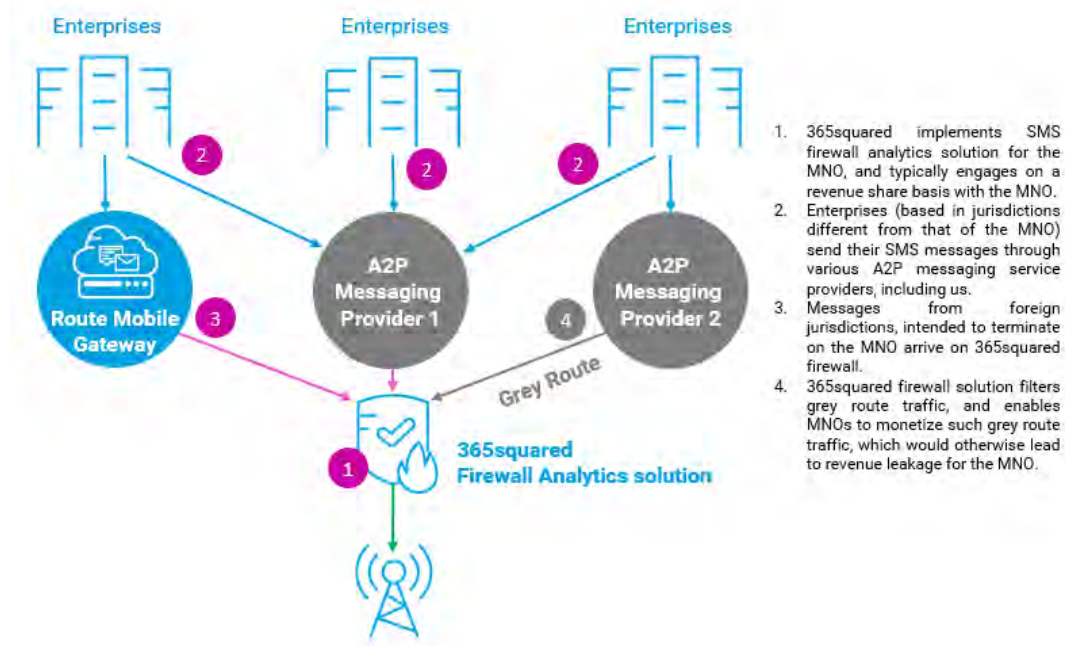

With the use of our platform, the client has been able to reduce requirement for on-the-ground personnel for equipment monitoring and is able to undertake real-time monitoring of equipment globally with centralized reporting. This results in faster reaction to potential equipment failure, thereby minimizing equipment downtime.

URL shortening solution for retail and banking and financial services sectors

SMS firewall solution for telecom operators

Our firewall solution helps identify and block international traffic arriving on an operators' network through grey routes. With the implementation of the solution, MNOs have been able to generate revenues that they were earlier unable to realize on account of their inability identify A2P traffic arriving through grey routes.

Infrastructure

Cloud Communications Platform

We operate an internally developed software-based cloud communications platform with capabilities to manage messaging, voice and mobile data traffic. We handle all traffic generated from our enterprise clients through our cloud communications platform.

We have a total transaction processing capacity of up to four billion transactions per month. In the three months ended June 30, 2020, we processed over 6.95 billion billable transactions. Our platform is modular and scalable, allowing us the flexibility of use while delivering functionality. Our platform managed more than 30.31 billion billable transactions from our clients and was used by more than 2,700 clients in Fiscal 2020, as compared to managing more than 24.74 billion billable transactions in Fiscal 2019.

Data Centers

Our infrastructure is distributed across six data centers globally. All of these data centers are equipped with requisite failovers and redundancies necessary for maintaining 24x7 operations. Our current deployment is across five geographical regions with systems deployed across data centers in India, Singapore, Malta, the United Kingdom and the United States. Each of the locations are served by multiple independent carriers and connectivity.

Our data centers are linked to each other via encrypted private networks to ensure data security. This also allows us to securely transfer data between various data centers. Each of these data center deployments are complete platforms which serve their local regions as well as participate in our global routing network.

Layers

Our platform is divided into three distinct layers, namely, database, application and storage area network ("SAN") layers.

The database and application layers are powered by carrier grade hardware in a N+1 (a backup node for each active node) redundancy pattern to ensure maximum availability. Our platform relies on virtualization software to optimally use hardware resources as well as provide fallback/ backup capability for the application and database layers. All applications are run as groups/ clusters to prevent a single failure from disrupting the service.

The SAN layer consists of storage systems backed by fiber channel networks consisting of switches and fiber optics. The storage systems have internal redundancy using mirroring between deployed disk systems. Our SAN layer is highly scalable and can be expanded as per requirements.

Disaster Recovery

In addition, we also maintain a disaster recovery setup in India where critical systems are backed-up to ensure business continuity in case of natural disasters. This layout in addition to our defined backup policies allows us to ensure high uptimes and provide uninterrupted service to our clients.

Client Base

We believe that the quality and breadth of our client relationships is critical to our business.

Enterprise

Our enterprise division targets enterprises in all industries that need messaging services (including A2P messages, email, voice applications, RCS and OTT business messaging) globally. Cumulatively since inception, our client base in this business vertical has grown from over 16,000 clients as of March 31, 2015 to over 26,700 clients as of March 31, 2020 and we had over 30,150 clients as of June 30, 2020, including several Fortune Global 500 companies. We have a diverse enterprise client base across a broad range of industries including social media companies, banks and financial institutions, e-commerce entities and travel aggregators.

In the enterprise business vertical, our client contracts typically range for periods between 12 to 36 months and usually include automatic renewal provisions. While such arrangements generally do not stipulate any minimum traffic volume commitments from our clients, traffic volumes usually tend to increase over the course of relationship.

Operator

We provide mobile operators with specialized solutions including SMS filtering, analytics, monetization, hubbing and CPaaS. Our existing relationships with MNO's who are our suppliers, enables us to leverage the existing partnership for bilateral sales for our products. Typical contract durations with MNO's for our SMS filtering, analytics and monetization services range for an initial term of one to three years and are subject to an automatic renewal for one year unless terminated.

BPO

Our relationships with clients are typically long-term. The initial term in our contracts with our BPO clients ranges from a period of 12 months up to 24 months. We endeavour to offer seamless delivery of services and support to clients. We believe, we offer our BPO clients with customized infrastructure and high levels of data security.

Client Support

To cater to our global client base, we provide 24x7 client support from our Registered Office based in Mumbai as well as regional offices in Europe. Our support staff assist with live client queries across all our services and are supported by technical development team who help clients with initial integration and setup. For high value enterprise clients, we designate key account managers as a single point of contact for any queries and if required, a resident client support staff within a client's premises.

We also have a routing team that monitors route quality, country specific issues with a particular network, and other factors to enhance message delivery.

While we have a large and diversified client base, in each of our business verticals, we are dependent on business from certain significant clients. The table below sets forth certain information relating to the relative revenue contribution of our key clients as a percentage of total revenue across our various business verticals in the periods indicated:

Revenues	Fiscal 2018	Fiscal 2019	Fiscal 2020	Three Months Ended June 30, 2020
Percentage of Total Revenue (%)

The registration of a trademark is valid for a period of 10 years and can be renewed in accordance with the specified procedure.

Application for trademark registry has to be made to Controller-General of patents, designs and TM Act who is the Registrar of Trademarks for the purposes of the TM Act. These Restated Consolidated Financial Information were approved by the Board of Directors of the Company in their meeting held on August 25, 2020.

The Restated Consolidated Financial Information have been specifically prepared for the purpose of inclusion in the offer document to be filed by the Company with the Securities and Exchange Board of India ("SEBI") in connection with the proposed Initial Public Offering ('IPO') through offer for sale by selling shareholders and fresh issue of equity shares of the Company (referred to as the "Issue").

The Restated Consolidated Financial Information have been prepared to comply in all material respects with the requirements of Section 26 of Part I of Chapter III of the Act and the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended ("SEBI Regulations") and The Guidance Note on Reports in Company Prospectuses (Revised 2019) issued by the Institute of Chartered Accountants of India ("ICAI"), as amended from time to time (the "Guidance Note").

The Restated Consolidated Financial Information have been compiled from audited special purpose interim consolidated financial statements of the Group for three months ended June 30, 2020 and annual consolidated financial statements for the years ended March 31, 2020, March 31, 2019 and March 31, 2018 prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) read with Section 133 of the Companies Act, 2013 (the "Act") and other relevant provisions of the Act to the extent applicable (hereinafter collectively referred to as "Audited Consolidated Financial Statements").

The Restated Consolidated Financial Information have been compiled by the Management from the Audited Consolidated Financial Statements and:

- there are no audit qualifications on these Audited Consolidated Financial Statements;
- there were no changes in accounting policies during the respective years of these financial statements except for the new and amended Ind AS 115 'Revenue from Contracts with customers' and Ind AS 116 'Leases';
- material amounts relating to adjustments for previous years (if any) in arriving at profit of the years to which they relate, have been appropriately adjusted;

- adjustments have been made for reclassification of the corresponding items of income, expenses, assets and liabilities, in order to bring them in line with the Groupings as per the audited special purpose interim consolidated financial statements of the Group as at and for the three months ended June 30, 2020 and the requirements of the SEBI Regulations.

These Restated Consolidated Financial Information are presented in Indian Rupees (INR), which is also the entity's functional currency. All amounts have been rounded off to the nearest million with two decimals, unless otherwise indicated.

Significant accounting policies – The accounting policies set out below have been applied consistently to the periods presented in the Restated Consolidated Financial Information.

Current and non-current classification: All assets and liabilities have been classified as current or non-current as per the Group's normal operating cycle and other criteria set out in Schedule III of the Act. Based on the nature of service and time taken between acquisition of assets for processing and their realisation in cash and cash equivalents, the Group has ascertained its operating cycle as twelve months for the purpose of the classification of assets and liabilities into current and non-current.

(ii) Basis of measurement

The consolidated financial statements have been prepared on a historical cost convention and accrual basis, except for the following assets and liabilities:

- i) Certain financial assets and liabilities that are measured at fair value
- ii) Defined benefit plans-plan assets measured at fair value

(iii) Critical estimates and judgements

The preparation of Restated Consolidated Financial Information in conformity with Ind AS requires management to make estimates, assumptions and exercise judgement in applying the accounting policies that affect the reported amounts of assets, liabilities and disclosure of contingent liabilities at the date of financial statements and the reported amounts of income and expenses during the period/year.

The Management believes that these estimates are prudent and reasonable and are based upon the Management's best knowledge of current events and actions. Actual results could differ from these estimates and differences between actual results and estimates are recognised in the periods in which the results are known or materialised.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed.

• Impairment of investments

The Group reviews its carrying value of investments carried at amortised cost annually, or more frequently when there is an indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for.

• Useful lives of property, plant and equipment and Intangible assets

The Group reviews the useful lives of property, plant and equipment and intangible assets at the end of each reporting period. This reassessment may result in change in depreciation and amortisation expense in future periods.

- **Valuation of deferred tax assets**

The Group reviews the carrying amount of deferred tax assets at the end of each reporting period. The policy for the same has been explained in point (ix).

- **Defined benefit obligation**

The cost of post-employment benefits is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, future salary increases and mortality rates. Due to the long term nature of these plans, such estimates are subject to significant uncertainty.

- **Fair value of financial instruments**

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. In applying the valuation techniques, management makes maximum use of market inputs and uses estimates and assumptions that are, as far as possible, consistent with observable data that market participants would use in pricing the instrument. Where applicable data is not observable, management uses its best estimate about the assumptions that market participants would make. These estimates may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

- **Impairment of financial assets**

The impairment provisions for financial assets disclosed are based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

- **Impairment of Goodwill**

The Group estimates the value-in-use of the cash generating unit (CGU) based on the future cash flows after considering current economic conditions and trends, estimated future operating results and growth rate and anticipated future economic and regulatory conditions. The estimated cash flows are developed using internal forecasts. The discount rate used for the CGU's represent the weighted average cost of capital based on the historical market returns of comparable companies.

- **Share-based payments**

Estimating fair value for share-based payments requires determination of the most appropriate valuation model, which is dependent on the terms and conditions of the grant. The estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the option, volatility and dividend yield and making assumptions about them.

- **Contingencies**

Management has estimated the possible outflow of resources at the end of each annual reporting financial year, if any, in respect of contingencies/litigations against the Group as it is not possible to predict the outcome of pending matters with accuracy.

- **Research and development costs**

Management monitors progress of internal research and development projects by using a project judgement as required in distinguishing research from the development phase. Development costs are recognised as an asset when all the criteria are met, whereas research costs are expensed as incurred.

Management also monitors whether the recognition requirements for development costs continue to be met. This is necessary due to inherent uncertainty in the economic success of any product development.

- **Leases – Estimating the incremental borrowing rate**

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the fund necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment.

(iv) Principles of Consolidation and equity accounting

(a) Subsidiaries

The Restated Consolidated Financial Information incorporate the financial statements of Route Mobile Limited (RML) and entities controlled by RML and its subsidiaries.

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date the control ceases.

The Group combines the financial statements of the parent and its subsidiaries, line by line by adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. The financial statements of the parent company and its subsidiaries have been consolidated using uniform accounting policies. When necessary, adjustments are made to the financial statements of the subsidiaries to bring their accounting policies in line with the Group's accounting policies. The financial statements of the subsidiary companies used in the consolidation are drawn up to the same reporting date as that of the parent i.e. 31 March/30 June.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit and loss, consolidated statement of changes in equity and consolidated balance sheet.

Refer Annexure V, note 45 for the list of subsidiaries considered in the Restated Consolidated Financial Information. Subsidiaries are consolidated from the date on which effective control is acquired and are excluded from the date that control ceases.

(b) Associate

Associate is an entity over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investment in associate is accounted for using the equity method of accounting, after initially being recognised at cost.

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in statement of profit and loss,

and the Group's share of other comprehensive income of the investee in other comprehensive income. Dividend received or receivable from associates are recognised as reduction in the carrying amount of the investment.

When the Group's share of losses in an equity accounted investment equals or exceeds its interest in the entity, including any other unsecured long term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payment on behalf of the other entity.

Unrealised gains on transactions between the Group and its associate are eliminated to the extent of the Group's interest in the entity. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the assets transferred. Accounting policy of the equity accounted investee have been changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity accounted investment is tested for impairment.

(v) Revenue recognition

Revenue is measured at the fair value of consideration received or receivable. Revenue is recognised upon transfer of control of promised services to the customers at the consideration which the Group has received or expects to receive in exchange of those services. Amount disclosed as revenue are reported net of discounts and applicable taxes which are collected on behalf of the government.

(i) Revenue from messaging services– The Group recognises revenue based on the usage of messaging services. The revenue is recognised when the Group's services are used based on the specific terms of the contract with customers.

Income from services is recognised when the service is rendered in terms of the agreements/ arrangements with parties, net of service tax or goods and services tax.

Revenue in excess of invoicing are classified as unbilled revenue while invoicing /collection in excess of revenue for services to be performed in future are classified as deferred revenue / advances from customers.

Liquidated damages and penalties are accounted as per the contract terms wherever there is a delayed delivery attributable to the Group and when there is a reasonable certainty with which the same can be estimated.

(ii) Profit on sale of investments is recorded on transfer of title from the Group and is determined as the difference between the sale price and carrying value of the investment.

(iii) Dividend are recognised in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Group, and the amount of the dividend can be measured reliably.

(iv) Interest income for all debt instruments is recognised using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of financial asset. When calculating the effective interest rate, the Group estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

(vi) Leases

The Group considers whether contract is, or contains a lease. A lease is defined as 'a contract, or part of a contract, that convey the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether: (i) the contract involves the use of an identified asset (ii) the Group has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Group has the right to direct the use of the asset.

Group as a lessee

At lease commencement date, the Group recognises a right-of-use asset (ROU) and lease liability on the balance sheet.

The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group and any lease payments made in advance of the lease commencement date.

The Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Group also assesses the right-of-use asset for impairment when such indicators exist.

At the commencement date of lease, the Group measures the lease liability at the present value of the lease payments to be made over the lease term, discounted using the interest rate implicit in the lease if that rate is readily available or the Group's incremental borrowing rate.

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities.

Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance, fixed), and payments arising from options reasonably certain to be exercised. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest expenses. It is remeasured to reflect any reassessment or modification.

When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset or Statement of profit and loss, as the case may be.

Lease liability and ROU asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

The Group has elected to account for short-term leases and leases of low-value assets using the exemption given under Ind AS 116, Leases. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term or on another systematic basis if that basis is more representative of the pattern of the Group's benefit.

Group as a lessor

Leases for which the Group is a lessor classified as finance or operating lease.

Lease income from operating leases where the Group is a lessor is recognised as income on straight line basis over the lease term.

(vii) Borrowing costs

Borrowing costs attributable to the acquisition and construction of qualifying assets are capitalised as part of the cost of such assets upto the date such assets are ready for their intended use. Other borrowing costs are charged to profit or loss. Borrowing cost is calculated using effective interest rate on the amortised cost of the instrument.

(viii) Foreign currency

The functional currency of the Company and its Indian subsidiaries is the Indian Rupee (₹) whereas the functional currency of foreign subsidiaries is the currency of their country of domicile.

Transactions in foreign currency are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are translated at the exchange rate prevailing on the Balance

sheet date and exchange gains or losses arising on settlement and restatement are recognised in the Restated Consolidated Statement of Profit and Loss.

Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated at period/year end.

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) Assets and liabilities are translated at the closing rate on the balance sheet date
- (b) Income and expenses are translated at the average exchange rate (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated based on rates prevailing at the date of transaction).
- (c) All resulting exchange differences are recognised in other comprehensive income.

When a foreign operation is sold, the associated exchange differences are reclassified to statement of profit and loss, as part of the gain or loss on sale.

Fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

(ix) Income taxes

Income tax expense comprises Current tax expenses and net change in the deferred tax assets or liabilities during the period/year. Current and deferred taxes are recognised in the Statement of profit and loss, except when they relate to items that are recognised in Other comprehensive income or directly in Equity, in which case, the current and deferred tax are also recognised in Other comprehensive income or directly in Equity respectively.

Current Income taxes

The current income tax includes income taxes payable by the Group computed in accordance with the tax laws applicable in the jurisdiction in which the parent company and its subsidiaries, operate and generate taxable income. Advance taxes and provision for current income tax are presented in the Balance sheet after offsetting the advance tax paid and income tax provision arising in the same jurisdiction and where the relevant tax paying units intend to settle the asset and liability on a net basis.

Deferred income taxes

Deferred income tax is recognised using Balance sheet approach. Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount, except when the deferred income tax arises from the initial recognition of an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of recognition.

Deferred tax assets are recognised to the extent future taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent it is no longer probable that sufficient taxable profit will be available to allow deferred income tax assets to be utilised. At each reporting date, the Group re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent it has become reasonably certain, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be received or settled.

Deferred tax liabilities are not recognised for temporary differences between the carrying amount and tax bases of investment in subsidiaries where the Group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(x) Financial instruments

Financial assets and liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial assets or financial liability.

(I) Financial assets

Classification

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

The Group reclassifies debt investments when and only when its business model for managing those assets change.

Initial measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss. Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Subsequent measurement of debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest, are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

- Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

- Fair value through profit or loss: Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income.

De-recognition of financial assets

A financial asset is de-recognised only when

- The Group has transferred the rights to receive cash flows from the financial asset or
- retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Cash and cash equivalents

Cash and cash equivalents for the purpose of the cash flow statement comprise of the cash on hand and at bank and current investments with an original maturity of three months or less. Cash and cash equivalents consists of balances with banks which are unrestricted for withdrawal and usage.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

(II) Financial liabilities

Borrowings and other financial liabilities are initially recognised at fair value (net of transaction costs incurred). Difference between the fair value and the transaction proceeds on initial recognition is recognised as an asset / liability based on the underlying reason for the difference.

Subsequently, all financial liabilities are measured at amortised cost using the effective interest rate method

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss. The gain / loss is recognised in other equity in case of transactions with shareholders.

(III) Derivative Financial Instruments

The Group uses currency swaps as derivative instruments to mitigate the risk of changes in currency rates. Such derivative instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently measured at fair value.

(xi) Property plant and equipment (including Capital Work-in-Progress)

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes inward freight, adjustment for GST credit, taxes and expenses incidental to acquisition and installation, up to the point the asset is ready for its intended use.

Assets acquired but not ready for use or assets under construction are classified under Capital work in progress.

(xii) Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any.

Research and development

Expenses on research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are recognised in the consolidated statement of profit and loss as incurred.

Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditure is capitalised only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, the assets are controlled by the Company, and the Company intends to and has sufficient resources to complete development and to use or sell the asset. The expenditure capitalised includes the cost directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in the consolidated statement of profit and loss as incurred.

(xiii) Depreciation/Amortisation

Depreciation on Property, plant and equipment is provided to the extent of depreciable amount on written down value (WDV) method over the useful lives of assets as determined by the management which is in line with Part-C of Schedule II of the Act with residual value of 5%, except servers and network (part of Computers).

Servers and networks are depreciated over a period of five years on written down value (WDV) method, based on internal assessment and technical evaluation carried out by the management, and which represents the period over which they expect to use these assets.

Leasehold improvements are amortised over the period of lease or their estimated useful life, whichever is earlier, on a straight-line basis.

Depreciation on assets acquired under finance lease is spread over the lease period or useful life, whichever is shorter on a straight line basis.

Computer software/technical know how is amortized over a period of three years on written down value method (WDV).

Following table summarises the nature of intangibles and their estimated useful lives and amortization on a straight line basis:

Nature of Intangibles	Useful lives
Trade mark	5 years
License	5 years
Software	3 to 4 years
Customer relationship	10 years
Non-compete fees	7 years

Depreciation is calculated pro-rata from/to the date of addition/deletion.

(xiv) Impairment of assets

Non-financial assets

The carrying amount of the non-financial assets are reviewed at each Balance Sheet date if there is any indication of impairment based on internal /external factors. An impairment loss is recognised whenever the carrying amount of an asset or a cash generating unit exceeds its recoverable amount. The recoverable amount of the assets (or where applicable, that of the cash generating unit to which the asset belongs) is estimated as the higher of its net selling price and its value in use. Impairment loss is recognised in the statement of profit and loss.

After impairment, depreciation / amortisation is provided on the revised carrying amount of the asset over its remaining useful life.

A previously recognised impairment loss is increased or reversed depending on changes in circumstances. However, the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation / amortisation if there was no impairment.

Financial assets

The Group assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the Group applies the simplified approach permitted by Ind AS 109, Financial Instruments, which requires expected lifetime losses to be recognised on initial recognition of the receivables.

(xv) Employee benefits

All short term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees and recognised as expenses in the consolidated Statement of Profit and Loss.

The Group's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the consolidated Statement of Profit and Loss on accrual basis. The Group has categorised its Provident Fund and the Employees State Insurance Scheme as a defined contribution plan since it has no further obligations beyond these contributions.

The Group's liability towards gratuity, being defined benefit plan is accounted for on the basis of an independent actuarial valuation using the projected unit credit method, done at the year end. Gratuity liability is not funded and the payments are made to the employees directly when they leave the organisation post completion of 5 years of service or at the time of retirement (with minimum 5 years of service), whichever is earlier.

Service cost and the net interest cost is included in employee benefits expense in the consolidated statement of profit and loss. Actuarial gains and losses arising on the measurement of defined benefit obligation is credited/charged to other comprehensive income.

Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the period/year end.

(xvi) Provisions, contingent liabilities and contingent assets

A provision is recognised when the Group has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on management estimate of the amount required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current management estimates.

Contingent liabilities are disclosed in respect of possible obligations that arise from past events, whose existence would be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group.

Contingent assets are not recognised in the financial statements. However, its is disclosed only when an inflow of economic benefits is probable.

(xvii) Earnings per share

Basic earnings per share are computed by dividing net profit after tax (excluding other comprehensive income) by the weighted average number of equity shares outstanding during the period/year.

Diluted earnings per share is computed by dividing net profit after tax (excluding other comprehensive income) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share.

(xviii) Business combinations

Business combinations are accounted for using the acquisition method as per Ind AS 103, Business combinations. The cost of an acquisition is measured at the fair value of the assets transferred, equity instruments issued and liabilities incurred / assumed at the date of acquisition, which is the date on which control is transferred to the Group. The cost of acquisition also includes the fair value of any contingent consideration. Identified assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value on the date of acquisition.

The Group recognises any non-controlling interest in the acquired entity on an acquisition by acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Purchase consideration paid in excess of the fair value of net identifiable assets acquired is recognised as goodwill. Where the fair value of identifiable assets and liabilities exceed the cost of acquisition, after reassessing the fair values of the net assets and contingent liabilities, the excess is recognised as capital reserve.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of transaction. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or financial liability. Amount classified as financial liability are subsequently remeasured at fair value with changes in fair value recognised in profit or loss.

Acquisition related costs incurred in connection with a business combination such as stamp duty, legal fees, due diligence fees and other professional and consulting fees are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss / other comprehensive income.

(xix) Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. For the purposes of impairment testing, goodwill is allocated to the Group's cash generating units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating units is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in Consolidated Statement of Profit and Loss.

(xx) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting, nature of the products / process, organisation structure as well as differential risks and returns, using the information provided to the board of directors and chief operating officer, together, the chief operating decision maker ('CODM').

(xxi) Share based payments

Share-based compensation benefits are provided to employees via the ROUTE MOBILE LIMITED-Employee Stock Option Plan 2017 (the 'ESOP scheme'). The fair value of options granted under the Employee Stock Option Plan 2017 is recognised as an employee benefits expense with a corresponding increase in equity. The total amount to be expensed is determined by reference to the fair value of the options granted:

- including any market performance conditions (e.g., the entity's share price)
- excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining an employee of the entity over a specified time period), and
- including the impact of any non-vesting conditions (e.g. the requirement for employees to serve or hold shares for a specific period of time).

The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a corresponding adjustment to equity.

(xxii) Government Grants

Government grants are recognised when there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis that the related costs, for which it is intended to compensate, are expensed.

When the grant relates to an asset, its recognition as income in the consolidated statement of profit and loss is linked to fulfilment of associated export obligations.

The Group has chosen to present grants received to income, as other income in the consolidated statement of profit and loss.

(xxiii) Share issue expense

The transaction costs of an equity transaction are accounted for as a deduction from equity to the extent they are incremental costs directly attributable to the equity transaction.

Goodwill was tested for impairment in accordance with the Group's procedure for determining the recoverable value of such assets which is done annually, or more frequently when there is an indication for impairment.

The recoverable amount of the Cash Generating Unit (CGU) is the higher of fair value less cost to sell ("FVLCTS") and its value in use ("VIU"). The FVLCTS of the CGU is determined based on the market capitalisation approach. The VIU is determined based on discounted cash flow projections.

Based on above testing, no impairment was identified as of June 30, 2020, March 31, 2020, March 31, 2019 and March 31, 2018 as the recoverable value exceeded the carrying value.

- (a) Route Mobile Limited (RML) and Call2Connect (C2C) have been awarded incentive plan under the India BPO Promotion Scheme (IBPS), envisaged under Digital India Programme. In accordance with the agreement with Software Technology Parks of India, Government of India by RML, a Special Purpose Vehicle was formed in the name of "Route Connect Private Limited" (RCPL) with 74% stake held by RML and the balance by C2C.

I. Fair value hierarchy

The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the group has classified its financial instruments into the three levels prescribed under the Ind AS. An explanation of each level follows below:

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. For example, listed equity instruments that have quoted market price.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

II. Valuation techniques used to determine fair value

Significant valuation techniques used to value financial instruments include:

- the fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date.

The fair values for Security deposits, loan to employees, fixed deposits, non-current borrowings and lease liability are based on discounted cash flows using a discount rate determined considering the borrowing rate quotation received from the bank.

III. Financial assets and liabilities measured at fair value - recurring fair value measurement:

Particulars	June 30, 2020	March 31, 2020	March 31, 2019	March 31, 2018
Investment in Mutual funds	123.94	118.98	106.66	-

Fair value of the mutual funds are based on NAV at the reporting date.

Since the valuation of investment is done based on price available in the observable inputs, the investment is categorised as Level 2.

IV. Assets and liabilities which are measured at amortised cost for which fair values are disclosed

(It is categorised under Level 3 of fair value hierarchy)

Particulars	June 30, 2020		March 31, 2020		March 31, 2019		March 31, 2018

During the periods mentioned above, there have been no transfers amongst the levels of hierarchy.

The carrying amounts of trade receivables, cash and bank balances, current investments, other current financial assets, trade payables, current borrowings and other current financial liabilities are considered to be approximately equal to their fair value.

38 Financial risk management

The Group is exposed primarily to fluctuations in foreign currency exchange rates, credit risk, liquidity risk and interest rate risk which may adversely impact the fair value of its financial instruments. The Group has a risk management policy which covers risk associated with the financial assets and liabilities. The risk management policy is approved by Board of Directors of Holding Company. The focus of the Board of Directors is to assess the unpredictability of the financial environment and to mitigate potential adverse effect on the financial performance of the Group.

The Group's principal financial liabilities comprises of borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the group's operations. The group's principal financial assets include current investments, trade and other receivables, and cash and bank balances and bank deposits that derive directly from its operations.

A Credit risk

Credit risk is the risk of financial loss arising from counterparty failure to repay or service debt according to the contractual terms and obligations. Credit risk encompasses both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration of risks. Credit risk is controlled by analysing credit limits and credit worthiness of the customer on continuous basis to whom the credit has been granted after obtaining necessary approvals for credit. The financial instruments that are subject to concentration of credit risk principally consist of trade receivables, cash and bank balances and bank deposits.

The trade receivables of the Group are typically non-interest bearing un-secured customers. The customer base is widely distributed both economically and geographically. Credit risk is controlled by analysing credit limits and credit worthiness of the customer based on their financial position, past experience and other factors, on continuous basis to whom the credit has been granted after obtaining necessary approvals for credit.

The credit limit policy is established considering the current economic trends of the industry in which the Group is operating.

The Group measures the expected credit loss of trade receivables based on historical trend, industry practices and the business environment in which the entity operates, accordingly provision is created. Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the Group. Where loans or receivables have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognized as income in the consolidated statement of profit and loss.

Bank balances and deposits are held with only high rated banks and majority of other security deposits are placed majorly with government agencies.

The table below provides details regarding past dues receivables as at each reporting date:

B Liquidity risk

Liquidity risk is the risk that the group may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The group's objective is to maintain optimum levels of liquidity and to ensure that funds are available for use as per requirement.

The liquidity risk principally arises from obligations on account of following financial liabilities viz. borrowings, trade payables and other financial liabilities.

The group's corporate finance department is responsible for liquidity and funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the group's net liquidity position through rolling forecasts on the basis of expected cash flows.

C Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: Foreign currency risk, interest rate risk and price risk. The group's exposure to market risk is primarily on account of foreign currency exchange rate risk.

(i) Foreign currency risk

The group operates internationally and portion of the business is transacted in several currencies and consequently the group is exposed to foreign exchange risk through its sales in overseas markets and purchases from overseas suppliers in various foreign currencies. Foreign currency exchange rate exposure on overseas sales is partly balanced by purchasing of services in the respective currencies.

Interest rate risk arises from the sensitivity of the financial liabilities to changes in market rate of interest. The entity's exposure to the risk of changes in market interest rate relates primarily to the current borrowings with floating interest rate.

According to the Group, interest rate risk exposure is only for floating rate borrowings. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

2. For the year ended March 31, 2017, the Board of Directors of the Holding Company at its meeting held on September 04, 2017 had recommended final dividend of ₹ 75 million (₹ 1.5 per equity share) which was approved by the shareholders in the Annual General Meeting of the Holding Company held on September 22, 2017. The final dividend was declared and paid during the year ended March 31, 2018. During the financial year 2016-17, the Holding Company had received dividend from its foreign subsidiary, Routesms Solutions (FZE) ("RSMS Dubai") amounting to ₹ 355.40 million. Tax on such dividend received, was paid by the Holding Company u/s 115BBD of the Income tax Act, 1961.

The amount of dividend liable to payment of Dividend Distribution Tax (DDT) u/s 115-O(1A)(i)(b) of the Income tax Act, 1961, will be based on the amount of dividend to be declared by the Holding Company as reduced by the amount of dividend, if any, received from a foreign subsidiary company and tax on such balance dividend is payable by the domestic company u/s 115BBD.

As tax u/s 115BBD was paid by the Holding Company on the dividend received and such dividend received is greater than the amount of dividend declared, no dividend distribution tax is payable on the dividend declared by the Holding Company during the year ended March 31, 2018.

Overview

We provide cloud-communication platform as a service ("**CPaaS**") to enterprises, over-the-top ("**OTT**") players and mobile network operators ("**MNOs**"). According to the ROCCO Report 2020, we were ranked as a tier one application-to-peer ("**A2P**") service provider internationally. Further, we were ranked second globally as a tier one A2P service provider in 2017. (Source: ROCCO Report 2017). We were also ranked first for 'value added services' provided, our 'implementation process' and our 'uptime performance' among tier one vendors. (Source: ROCCO Report 2017). Our enterprise solution comprises two primary components – the front-end that provides an interface for enterprises to integrate with, and a back-end which is directly integrated with over 240 MNOs, and provides access to over 800 MNOs across the globe, as of June 30, 2020, enabling us to leverage their SMS and voice channels for digital communication ("**Super Network**"). Further, the backend is also integrated with OTT business messaging solution providers, and is capable of supporting Rich Communication Services ("**RCS**") business messaging, offering multiple channels of communication to enterprises. Our omni-channel platform enables enterprises to leverage various modes of digital communication to engage with their stakeholders – including customers, employees and vendors.

Our range of enterprise communication services include application-to-peer ("**A2P**") / peer-to-application ("**P2A**") / 2Way Messaging, RCS, OTT business messaging, voice, email, and omni-channel communication. Further, we also

offer SMS analytics, firewall, filtering and monetization, SMS hubbing and Instant Virtual Number (“IVN”) solutions to MNOs across the globe. Our clients include some of the world’s largest and well-known organisations, including a number of Fortune Global 500 companies.

We were incorporated in 2004 and are headquartered in Mumbai, India. As of June 30, 2020, we have serviced over 30,150 clients, cumulatively since inception, across sectors including social media, banking and financial services, aviation, retail, internet/ e-commerce, logistics, healthcare, hospitality, media and entertainment, pharmaceuticals and telecom. As on the date of this Red Herring Prospectus, our global operations included nine direct and 12 step-down subsidiaries serving our clients through 18 locations across Africa, Asia Pacific, Europe, Middle East and North America. Consistent with our strategy of pursuing inorganic growth to deepen our relationship with MNOs and broaden our product and service portfolio, we acquired 365Squared Limited with effect from October 1, 2017, which operates in SMS analytics, firewall, filtering and monetization. Further, we also acquired Call2Connect, effective April 1, 2017, a company which offers voice, non-voice and consulting BPO services to some of the largest enterprises in India.

Our operations are internally aligned into the following business verticals: (i) enterprise; (ii) mobile operator; and (iii) business process outsourcing (“BPO”).

Enterprise. Our enterprise vertical primarily provides cloud based communication platform to enterprises to enable digital communication through multiple channels including RCS, A2P / P2A messaging, 2Way Messaging, OTT business messaging, enterprise email and URL shortening; and Mail2SMS. Our platform also provides enterprise voice application services including interactive voice response, Click2Call, missed call facility and outbound dialer, which enable enterprises, to connect incoming and outgoing voice calls to their applications and systems. Our CPaaS platform gives our current and potential customers the ability to leverage our Super Network and APIs to build out their digital communication service needs. We provide a suite of APIs for various communication channels, across multiple geographies that are scalable and flexible to fit the customers’ requirements. We have also launched Route Mobile API Developer Network – a program that enables developers to leverage capabilities of our platform and seamlessly deploy digital communication features within their applications / software.

Mobile Operator. Our main service offerings in this segment include SMS analytics, firewall, filtering, monetization and CPaaS and hubbing solutions. Our analytics based SMS firewall solution helps MNOs identify grey route traffic terminating on their networks, block grey route traffic, identify the source of such grey route traffic, and monetize such traffic. We have developed multiple engagement models, to offer flexibility to MNOs while using our solution. We typically engage with MNOs on a revenue share model when deploying this solution. Certain MNOs also engage with us for our hubbing solution and CPaaS offerings, to leverage our global connectivity and A2P platform.

Business Process Outsourcing (BPO). We provide a range of BPO services including client support, technical support, booking and collection services. Our strategic objective is to integrate our BPO capabilities with our enterprise voice platform and deliver end-to-end offerings to enterprise customers.

We are an associate member of the GSMA and an accredited open hub connectivity solution provider with our internally developed cloud communications platform allowing us to handle both A2P and peer-to-peer (“P2P”) traffic for enterprises, OTT players and MNOs. In addition, Route Mobile (UK) Limited is also an associate member of GSMA. Recent Development

Impact of COVID-19

COVID-19 was recognized as a pandemic by the World Health Organization on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India have taken preventive or protective actions, such as imposing country-wide lockdowns, restrictions on domestic and international travel and business operations and advising or requiring individuals to limit their time outside of their homes. The steps taken to counter the effects of the pandemic have resulted in a period of economic downturn and business disruption in India. The impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

Because of a government mandated lockdown in India we have had to temporarily close all of our offices in India, and all of our corporate and branch/ regional office operations transitioned to a remote working environment. Despite this, our business and operations have continued to run effectively in the remote working environment. We have deployed security systems to safeguard assets and customer data as well as issued detailed work from home protocols to enable secure usage and ensure no service or support disruptions to our customers. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. For further information, see “*Business – Business Response to COVID-19*” on page 131. There is no

certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. For instance, some of our customers have requested for extended payment terms due to the outbreak of COVID-19. Also see, please see “*Risk Factors - If we are unable to collect our dues and receivables from our clients, our results of operations and cash flows could be adversely affected.*” on page 23. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences, including downturns in business sentiment generally or in our sector in particular.

Also, see “*Risk Factors – The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations*” on page 23.

Factors Affecting Results of Operations and Financial Condition

Integration of acquired entities

We have engaged in inorganic growth and strategic acquisitions where we believe doing so is consistent with our strategic goals. For example, in Fiscal 2017, we acquired 365squared. With the acquisition of 365squared, we have been able to expand our service offerings to include SMS filtering, analytics and monetization services. We completed the acquisition of 365squared with effect from October 1, 2017. The acquisition was financed through a Euro denominated loan. The Restated Financial Statements include an amount of ₹ 263.74 million, as of June 30, 2020, as payable on account of business combination, in connection with the acquisition of 365squared. As of March 31, 2020 and March 31, 2019, this amount was ₹ 509.77 million and ₹ 730.71 million, respectively. Our financial condition and results of operations were materially impacted by the acquisition of 365squared. For further details, see “*Financial Statements - Annexure V – Statement of Notes to the Restated Ind AS Consolidated Financial Information – Note 44 – Business Combinations*” on page 204. While we endeavor to integrate the businesses we acquire, there can be no assurance that the integration will be done successfully or in a time bound manner. See also, “*Risk Factors – Our acquisitions are subject to various risks, including risks relating to the integration of these acquired businesses with our existing operations. We may in the future continue to make strategic acquisitions to grow our business and further diversify service offerings. An inability to identify, complete and successfully integrate such acquisitions could adversely affect our business prospects, results of operations and financial condition.*” on page 23.

Market for cloud communication services

Our business and results of operations are affected by changes in demand for our services and solutions, which are primarily driven by the growth of the cloud communications market and the mobile operator software and services market. As a provider of cloud communication services and solutions to enterprises, our results of operations are directly linked to the overall growth of the enterprise cloud communications market, in particular, the A2P messaging market segment.

The size of the global A2P messaging market (including only directly connected A2P revenue) was US\$ 37.9 billion in 2017 and is projected to grow at a CAGR of 4.4%. Emerging markets like Latin America, Africa and Middle East are expected to grow faster. With growing internet penetration, business models are evolving and cloud communication services are being used by enterprises for streamlining back-end operations as well as for engaging with customers, employees and other stakeholders. (Source: Juniper Reports)

Within the cloud communication market, we believe that our results of operations are primarily affected by the growth in the number of smartphones and mobile data traffic, transition of critical services to the cloud – resulting in increased demand for our services and solutions and the corresponding increase in investment in cloud-based solutions by enterprises. There are expected to be 7.72 billion mobile subscribers globally at the end of 2017 that are projected to grow at a CAGR of 2.5% to 8.74 billion by 2022 (*Source: Juniper Reports*).

Relationships with Enterprises and MNOs

Our enterprise division targets enterprises in all industries that need messaging services (including A2P messages, voice applications and mobile connectivity) globally. Cumulatively since inception, our client base in this business vertical has grown from over 16,000 clients as of March 31, 2015 to over 26,700 clients as of March 31, 2020 and we had over 30,150 clients as of June 30, 2020, including several Fortune Global 500 companies. We have a diverse enterprise client base across a broad range of industries including banks and financial institutions, e-commerce entities, travel aggregators and social media companies. With respect to our existing enterprise clients, we strive to maintain a close working relationship with these clients and actively upsell to these clients in order to increase the usage of our services and solutions and increase our revenues. We also make significant investments to secure new enterprise clients and have increased our sales and marketing personnel and number of offices and sales representatives. In addition, our relationships with MNOs also has a significant impact on our results of operations. We have a significant number of direct relationships with mobile operators, and provide our enterprise clients with direct access to a global network of over 800 mobile networks, as of June 30, 2020. In addition, as of June 30, 2020, we had direct relationships with over 240 MNOs. Direct relationships reduce our cost of goods sold and services and positively impact gross margin. For example, cost of goods sold and services is generally lower for transactions via the networks of mobile operators with whom we have direct relationships, as we are not required to pay a third-party to facilitate the connection. As a result of our direct relationships with MNOs, we are able to offer our clients with the flexibility of multiple routes and better speed of delivery and also reduce our cost of delivery per message. In addition, as a provider of cloud communication services, direct relationships with MNOs allow them to engage us as their cloud communication service provider partners to strengthen their service portfolio in certain markets. We have also increased the number of employees dedicated to the development and maintenance of its direct relationships. Our profitability may be negatively impacted as a result of increased operating expenses in connection with developing and maintaining direct relationships with such MNOs.

Operational efficiency

Our ability to maintain operational efficiency affects our results of operations and cash flow and is driven by our size and scalability and cost control relating to administrative, marketing, personnel and general expenses. Furthermore, our global presence and geographic reach have helped us to secure direct relationships and connectivity with a significant number of MNOs, which can reduce costs and increase the geographic scope, quality and security of our offerings. As of June 30, 2020, we served over 30,150 clients, cumulatively since inception, globally through our offices across Africa, Asia Pacific, Europe, Middle East and North America. Our cloud-based delivery platform enables us to build and manage applications without having to create and maintain the underlying infrastructure for each client. We are therefore able to provide enterprises with solutions to operate applications without the need for substantial additional investments in underlying hardware and software. The scalability of our communications platform also helps us become more efficient in managing cost of goods sold and services and personnel costs. We are able to benefit from lower cost of goods sold and services relating to the procurement of additional services or licensing rights when integrating new clients. A failure to scale our services and solutions in a manner that effectively meets our clients demands may reduce our operational efficiency and could therefore, adversely affect our reputation and business, and which might in turn have a material adverse effect on our business, financial condition and results of operations.

Purchase of Messaging Services

Our results of operations are impacted by our purchase of messaging services from mobile operators. Our purchase of messaging services is our largest expense. As a percentage of total revenue, expenses relating to purchases of messaging services was 66.88%, 78.25%, 78.93% and 79.87% in Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, respectively. As the demand for, and use of, our Company's services increases, we are required to purchase additional messaging services from MNOs, thereby resulting in an increase in our total expenses. The

purchase of messaging services is significantly impacted by the dynamics of the markets in which traffic terminates. Certain markets, including Europe, have high costs relating to the purchase of messaging services, while other markets, have lower costs. Such differences in pricing across geographies impacts our financial condition.

Personnel costs

A principal component of our ability to compete effectively is our ability to attract and retain qualified employees. Personnel-related costs comprise one of our largest operating expenses. Our expenses towards employee benefits constituted 9.90%, 6.50%, 6.01% and 4.17%, respectively, of our total revenues for the period ended Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020.

Our operations have grown significantly in recent years and as a result of the various acquisitions, the number of full-time employees has increased significantly. We have particularly increased the number of sales and marketing employees. These sales and marketing professionals have helped drive our growth and attract new clients. We have invested significantly in the recruitment of mid-level managers and sales and marketing professionals, and expect personnel costs to continue to grow in line with the size of our operations and the expansion of our network of offices. We incur costs for new hires associated with the expansion of our operations, client base and offices. To effectively manage personnel costs, we use our offices for multiple purposes, including for research and development and sales and marketing.

We have granted 2,811,500 options to eligible employees under Route Mobile Limited – Employee Stock Option Plan 2017’ (“**ESOP 2017**”). The objective of the ESOP 2017 is to reward employees who contribute significantly to our profitability and shareholder’s value as well as encourage improvement in performance and retention of talent. As of date of this Red Herring Prospectus, the total options in force under the ESOP 2017 are 2,494,000.

Foreign currency exposure

As on the date of this Red Herring Prospectus, our global operations included nine direct and 12 step-down subsidiaries serving our clients through 18 locations across Africa, Asia Pacific, Europe, Middle East and North America and are operations are subject to certain currency risks that arise from currency exposure. Such risks relate to future business transactions, recorded assets and liabilities and net investments in foreign operations. For example, our payables consists primarily of Euro, U.S. Dollar, AED, Naira and Cedi and the receivables comprise mainly of Indian Rupees, Euro, U.S. Dollar, AED, Naira and Cedi. Accordingly, we are exposed on a transactional basis to changes in these foreign exchange rates. In addition, certain of the our results and financial positions are reported in the relevant local currencies, including Euro, U.S. Dollar, Naira and AED, which are translated into Indian Rupees at the applicable exchange rates for inclusion in the consolidated financial statements, which are stated in Indian Rupees. The exchange rates between the local currencies and Indian Rupees have fluctuated significantly and may in the future fluctuate significantly. Any significant appreciation of the Rupee against foreign currencies, especially the USD and the Euro, is likely to have an impact on our ability to compete effectively with international competitors, and maintain or grow our profit margins.

Regulation of markets

We are subject to regulatory and compliance requirements relating to labour, license requirements, connectivity to telecommunications networks, communication signals and code types, data protection, anti-corruption, anti-money laundering, tax and VAT, antitrust and administrative actions and other regulatory regimes in the markets where we operate. We have policies and procedures in place that are designed to ensure that we operate in compliance with applicable law and that compliance issues, if any, are identified and appropriately elevated within the organization. Based on our prior experience and technical know-how, we believe that we are well positioned to respond and adapt our operations to market regulations. Generally, market regulations and changes in market regulations, particularly in markets with strict regulatory environment, have increased our operating expenses and cost of goods sold and services during the relevant fiscal. New regulations may result in increased costs, as we may be required to invest a significant amount of time and resources to gain certification or approval under newly imposed rules. Costs relating to certifications and approvals differ by market and are highly dependent on the scope of the regulations and our ability to respond and implement new procedures.

Seasonality

Our business is subject to seasonality and fluctuations in end-customer usage of enterprise communications throughout the year, which can impact the number of communications processed through our platform and our revenues generated from our services and solutions. The extent to which our results and business are subject to seasonality is largely dependent upon the diversity of our client base and the degree to which these clients utilize enterprise communications in connection with seasonal events or periods. For example, clients that operate in the retail and travel industries generally experience periods of increased business activity during the holiday season, which can increase their usage of our services and solutions and thus increase the revenues generated during such periods.

Significant Accounting Policies

The Restated Financial Statements for the three months ended June 30, 2020 and for the years ended March 31, 2020, 2019 and 2018 have been prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 and subsequent amendments thereof, and comply in all material respects with the requirements of Part I of Chapter to the Companies Act, 2013, the SEBI ICDR Regulations and the “Guidance Note on Reports in Company Prospectus (Revised 2019)” issued by the ICAI.

Critical estimates and judgements

The preparation of financial statements in conformity with Ind AS requires management to make estimates, assumptions and exercise judgement in applying the accounting policies that affect the reported amounts of assets, liabilities and disclosure of contingent liabilities at the date of financial statements and the reported amounts of income and expenses during the period/ year.

Our management believes that these estimates are prudent and reasonable and are based upon the Management’s best knowledge of current events and actions. Actual results could differ from these estimates and differences between actual results and estimates are recognised in the periods in which the results are known or materialised.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed.

- **Impairment of investments**

The Group reviews its carrying value of investments carried at amortised cost annually, or more frequently when there is an indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for.

- **Useful lives of property, plant and equipment and Intangible assets**

The Group reviews the useful lives of property, plant and equipment and intangible assets at the end of each reporting period. This reassessment may result in change in depreciation and amortisation expense in future periods.

- **Valuation of deferred tax assets**

The Group reviews the carrying amount of deferred tax assets at the end of each reporting period. The policy for the same has been explained under the head “*Income taxes*”.

- **Defined benefit obligation**

The cost of post-employment benefits is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, future salary increases and mortality rates. Due to the long term nature of these plans, such estimates are subject to significant uncertainty.

- **Fair value of financial instruments**

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. In applying the valuation techniques, management makes maximum use of market inputs and uses estimates and assumptions that are, as far as possible, consistent with observable data that market participants would use in pricing the instrument. Where applicable data is not observable, management uses its best estimate about the assumptions that market participants would make. These estimates may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

- **Impairment of financial assets**

The impairment provisions for financial assets disclosed are based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

- **Impairment of Goodwill**

The Group estimates the value-in-use of the cash generating unit (CGU) based on the future cash flows after considering current economic conditions and trends, estimated future operating results and growth rate and anticipated future economic and regulatory conditions. The estimated cash flows are developed using internal forecasts. The discount rate used for the CGU's represent the weighted average cost of capital based on the historical market returns of comparable companies.

- **Share-based payments**

Estimating fair value for share-based payments requires determination of the most appropriate valuation model, which is dependent on the terms and conditions of the grant. The estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the option, volatility and dividend yield and making assumptions about them.

- **Contingencies**

Our management has estimated the possible outflow of resources at the end of each annual reporting financial year, if any, in respect of contingencies/litigations against the Group as it is not possible to predict the outcome of pending matters with accuracy.

- **Research and development costs**

Our management monitors progress of internal research and development projects by using a project judgement as required in distinguishing research from the development phase. Development costs are recognised as an asset when all the criteria are met, whereas research costs are expensed as incurred.

Our management also monitors whether the recognition requirements for development costs continue to be met. This is necessary due to inherent uncertainty in the economic success of any product development.

- **Leases – Estimating the incremental borrowing rate**

Our Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate ('IBR') to measure lease liabilities. The IBR is the rate of interest that the company would have to pay to borrow over a similar term, and with a similar security, the fund necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment

Principles of consolidation and equity accounting

- **Subsidiaries**

The restated consolidated financial statements incorporate the financial statements of our Company and entities controlled by the Company and its subsidiaries. Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date the control ceases.

The Group combines the financial statements of the parent and its subsidiaries, line by line by adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. The financial statements of the parent company and its subsidiaries have been consolidated using uniform accounting policies. When necessary, adjustments are made to the financial statements of the subsidiaries to bring their accounting policies in line with the Group's accounting policies. The financial statements of the subsidiary companies used in the consolidation are drawn up to the same reporting date as that of the parent i.e., March 31/ June 30.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit and loss, consolidated statement of changes in equity and balance sheet. Subsidiaries are consolidated from the date on which effective control is acquired and are excluded from the date that control ceases.

- **Associate**

Associate is an entity over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investment in associate is accounted for using the equity method of accounting, after initially being recognised at cost. Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in statement of profit and loss, and the Group's share of other comprehensive income of the investee in other comprehensive income. Dividend received or receivable from associates are recognised as reduction in the carrying amount of the investment.

When the Group's share of losses in an equity accounted investment equals or exceeds its interest in the entity, including any other unsecured long term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payment on behalf of the other entity. Unrealised gains on transactions between the Group and its associate are eliminated to the extent of the Group's interest in the entity. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the assets transferred. Accounting policy of the equity accounted investee have been changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity accounted investment is tested for impairment.

Revenue recognition

Revenue is measured at the fair value of consideration received or receivable. Revenue is recognised only when it can be reliably measured and it is probable that the economic benefits will flow to the Group. Amount disclosed as revenue are reported net of discounts and applicable taxes which are collected on behalf of the government.

(i) Revenue from messaging services – The Group recognises revenue based on the usage of messaging services. The revenue is recognised when the Group's services are used based on the specific terms of the contract with customers.

Income from services is recognised when the service is rendered in terms of the agreements/ arrangements with parties, net of service tax or goods and service tax.

Amounts received or billed in advance for services to be performed in future are recorded as advances from customers / advance billing.

Liquidated damages and penalties are accounted as per the contract terms wherever there is a delayed delivery attributable to the Group and when there is a reasonable certainty with which the same can be estimated.

(ii) Profit on sale of investments is recorded on transfer of title from the Group and is determined as the difference between the sale price and carrying value of the investment.

(iii) Dividend are recognised in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Group, and the amount of the dividend can be measured reliably.

(iv) Interest income for all debt instruments is recognised using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of financial asset. When calculating the effective interest rate, the Group estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

Leases

The Group considers whether contract is, or contains a lease. A lease is defined as ‘a contract, or part of a contract, that convey the right to use an asset (the underlying asset) for a period of time in exchange for consideration’.

To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether: (i) the contract involves the use of an identified asset (ii) the Group has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Group has the right to direct the use of the asset.

Group as a lessee

At lease commencement date, the Group recognises a right-of-use asset (ROU) and lease liability on the balance sheet.

The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group and any lease payments made in advance of the lease commencement date.

The Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Group also assesses the right-of-use asset for impairment when such indicators exist.

At the commencement date of lease, the Group measures the lease liability at the present value of the lease payments to be made over the lease term, discounted using the interest rate implicit in the lease if that rate is readily available or the Group’s incremental borrowing rate.

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (‘IBR’) to measure lease liabilities.

Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance, fixed), and payments arising from options reasonably certain to be exercised. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest expenses. It is remeasured to reflect any reassessment or modification.

When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset or Statement of profit and loss, as the case may be.

Lease liability and ROU asset have been separately presented in the balance sheet and lease payments have been classified as financing cash flows.

The Group has elected to account for short-term leases and leases of low-value assets using the exemption given under Ind AS 116, Leases. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these

are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term or on another systematic basis if that basis is more representative of the pattern of the Group's benefit.

Group as a lessor

Leases for which the Group is a lessor classified as finance or operating lease.

Lease income from operating leases where the Group is a lessor is recognised as income on straight line basis over the lease term.

Borrowing costs

Borrowing costs attributable to the acquisition and construction of qualifying assets are capitalised as part of the cost of such assets up to the date such assets are ready for their intended use. Other borrowing costs are charged to profit or loss. Borrowing cost is calculated using effective interest rate on the amortised cost of the instrument.

Foreign currency

The functional currency of our Company and its Indian subsidiaries is the Indian Rupee whereas the functional currency of foreign subsidiaries is the currency of their countries of domicile.

Transactions in foreign currency are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are translated at the exchange rate prevailing on the Balance sheet date and exchange gains or losses arising on settlement and restatement are recognised in the Statement of Profit and Loss.

Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated at year end.

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) Assets and liabilities are translated at the closing rate on the balance sheet date
- (b) Income and expenses are translated at the average exchange rate (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated based on rates prevailing at the date of transaction.
- (c) All resulting exchange differences are recognised in other comprehensive income.

When a foreign operation is sold, the associated exchange differences are reclassified to statement of profit and loss, as part of the gain or loss on sale.

Fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

Income taxes

Income tax expense comprises current tax expenses and net change in the deferred tax assets or liabilities during the year. Current and deferred taxes are recognised in the statement of profit and loss, except when they relate to item that are recognised in Other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in Other comprehensive income or directly in equity respectively.

Current income taxes

The current income tax includes income taxes payable by the Group computed in accordance with the tax laws applicable in the jurisdiction in which the parent company and its subsidiaries, associate operates and generate taxable

income. Advance taxes and provision for current income tax are presented in the balance sheet after offsetting the advance tax paid and income tax provision arising in the same jurisdiction and where the relevant tax paying units intend to settle the asset and liability on a net basis.

Deferred income taxes

Deferred income tax is recognised using balance sheet approach. Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount, except when the deferred income tax arises from the initial recognition of an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of recognition.

Deferred tax asset are recognised to the extent future taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent it is no longer probable that sufficient taxable profit will be available to allow deferred income tax assets to be utilised. At each reporting date, the Group re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent it has become reasonably certain, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be received or settled.

Deferred tax liabilities are not recognised for temporary differences between the carrying amount and tax bases of investment in subsidiaries and associate where the Group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Financial instruments

Financial assets and liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial assets or financial liability.

Financial assets

Classification

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held.

For investments in equity instruments, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

The Group reclassifies debt investments when and only when its business model for managing those assets change.

Initial measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss. Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Subsequent measurement of debt instruments

Subsequent measurement of debt instruments depend on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest, are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.
- **Fair value through other comprehensive income (FVOCI):** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.
- **Fair value through profit or loss:** Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income.

De-recognition of financial assets

A financial asset is de-recognised only when

- The Group has transferred the rights to receive cash flows from the financial asset or
- Retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Cash and cash equivalents

Cash and cash equivalents for the purpose of the cash flow statement comprise of the cash on hand and at bank and current investments with an original maturity of three months or less. Cash and cash equivalents consists of balances with banks which are unrestricted for withdrawal and usage.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of our Company's cash management.

Financial liabilities

Borrowings and other financial liabilities are initially recognised at fair value (net of transaction costs incurred). Difference between the fair value and the transaction proceeds on initial recognition is recognised as an asset / liability based on the underlying reason for the difference.

Subsequently, all financial liabilities are measured at amortised cost using the effective interest rate method

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss. The gain / loss is recognised in other equity in case of transactions with shareholders.

Derivative Financial Instruments

The Group uses currency swaps as derivative instruments to mitigate the risk of changes in currency rates. Such derivative instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently measured at fair value.

Property plant and equipment (including Capital Work-in-Progress)

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes inward freight, adjustment for GST credit, taxes and expenses incidental to acquisition and installation, up to the point the asset is ready for its intended use.

Assets acquired but not ready for use or assets under construction are classified under Capital work in progress.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any.

Research and development

Expenses on research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are recognised in the consolidated statement of profit and loss as incurred.

Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditure is capitalised only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, the assets are controlled by the Company, and the Company intends to and has sufficient resources to complete development and to use or sell the asset. The expenditure capitalised includes the cost directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in the consolidated statement of profit and loss as incurred.

Depreciation/ Amortisation

Depreciation on property, plant and equipment is provided to the extent of depreciable amount on written down value (WDV) method over the useful lives of assets as determined by the management which is in line with Part-C of Schedule II of the Act with residual value of 5%, except servers and network (part of Computers).

Servers and networks are depreciated over a period of five years, based on internal assessment and technical evaluation carried out by the management, and which represents the period over which they expect to use these assets.

Leasehold improvements are amortised over the period of lease or their estimated useful life, whichever is earlier, on a straight-line basis.

Depreciation on assets acquired under finance lease is spread over the lease period or useful life, whichever is shorter on a straight line basis.

Computer software/technical know how is amortized over a period of three years on written down value method (WDV).

Following table summarises the nature of intangibles and their estimated useful lives:

Nature of Intangibles	Useful lives
Trade mark	5 years
License	5 years
Software	3 – 4 years
Customer relationship	10 years
Non-compete fees	7 years

Depreciation is calculated pro-rata from/to the date of addition/deletion.

Impairment of assets

Non-financial assets

The carrying amount of the non-financial assets are reviewed at each Balance Sheet date if there is any indication of impairment based on internal /external factors. An impairment loss is recognised whenever the carrying amount of an asset or a cash generating unit exceeds its recoverable amount. The recoverable amount of the assets (or where applicable, that of the cash generating unit to which the asset belongs) is estimated as the higher of its net selling price and its value in use. Impairment loss is recognised in the statement of profit and loss.

After impairment, depreciation / amortisation is provided on the revised carrying amount of the asset over its remaining useful life.

A previously recognised impairment loss is increased or reversed depending on changes in circumstances. However, the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation / amortisation if there was no impairment.

Financial assets

The Group assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the Group applies the simplified approach permitted by Ind AS 109, Financial Instruments, which requires expected lifetime losses to be recognised on initial recognition of the receivables.

Employee benefits

All short term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees and recognised as expenses in the consolidated statement of profit and loss.

The Group's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the consolidated statement of profit and loss on accrual basis. The Group has categorised its Provident Fund and the Employees State Insurance Scheme as a defined contribution plan since it has no further obligations beyond these contributions.

The Group's liability towards gratuity, being defined benefit plan is accounted for on the basis of an independent actuarial valuation using the projected unit credit method, done at the year end. Gratuity liability is not funded and the payments are made to the employees directly when they leave the organisation post completion of 5 years of service or at the time of retirement (with minimum 5 years of service), whichever is earlier.

Service cost and the net interest cost is included in employee benefit expense in the consolidated statement of profit and loss. Actuarial gains and losses arising on the measurement of defined benefit obligation is credited/ charged to other comprehensive income.

Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end.

Provisions, contingent liabilities and contingent assets

A provision is recognised when the Group has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on management estimate of the amount required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current management estimates.

Contingent liabilities are disclosed in respect of possible obligations that arise from past events, whose existence would be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group.

Contingent assets are not recognised in the financial statements. However, it is disclosed only when an inflow of economic benefits is probable.

Earnings per share

Basic earnings per share are computed by dividing net profit after tax (excluding other comprehensive income) by the weighted average number of equity shares outstanding during the period/year.

Diluted earnings per share is computed by dividing net profit after tax (excluding other comprehensive income) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share.

Business combinations

Business combinations are accounted for using the acquisition method as per Ind AS 103, Business combinations. The cost of an acquisition is measured at the fair value of the assets transferred, equity instruments issued and liabilities incurred / assumed at the date of acquisition, which is the date on which control is transferred to the Group. The cost of acquisition also includes the fair value of any contingent consideration. Identified assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value on the date of acquisition.

The Group recognises any non-controlling interest in the acquired entity on an acquisition by acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Purchase consideration paid in excess of the fair value of net identifiable assets acquired is recognised as goodwill. Where the fair value of identifiable assets and liabilities exceed the cost of acquisition, after reassessing the fair values of the net assets and contingent liabilities, the excess is recognised as capital reserve.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of transaction. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or financial liability. Amount classified as financial liability are subsequently remeasured at fair value with changes in fair value recognised in profit or loss.

Acquisition related costs incurred in connection with a business combination such as stamp duty, legal fees, due diligence fees and other professional and consulting fees are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss / other comprehensive income.

Segment reporting

Operating segments are reported in a manner consistent with the internal reporting, nature of the products / process, organisation structure as well as differential risks and returns, using the information provided to the Board of Directors and chief operating officer, together, the chief operating decision maker.

Share based payments

Share-based compensation benefits are provided to employees via the "ROUTE MOBILE LIMITED" Employee Stock Option Plan 2017 (the 'ESOP scheme'). The fair value of options granted under the Employee Stock Option Plan 2017 is recognised as an employee benefits expense with a corresponding increase in equity. The total amount to be expensed is determined by reference to the fair value of the options granted:

- including any market performance conditions (e.g., the entity's share price)
- excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining an employee of the entity over a specified time period), and
- including the impact of any non-vesting conditions (e.g. the requirement for employees to serve or hold shares for a specific period of time).

The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a corresponding adjustment to equity.

Government Grants

Government grants are recognised when there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis that the related costs, for which it is intended to compensate, are expensed.

When the grant relates to an asset, it's recognition as income in the consolidated statement of profit and loss is linked to fulfilment of associated export obligations.

The Group has chosen to present grants received to income, as other income in the consolidated statement of profit and loss.

Principal Components of Income and Expenditure

Revenue

Our total revenue consists of revenue from operations and other income.

Revenue from Operations

Revenue from operations includes revenue from sale of services – messaging services, call center services and other operating revenue comprising of software development fees.

Other Income

Other income primarily included interest income on financial assets measured at amortised cost comprising fixed deposits and security deposits, government grant receivable, liabilities no longer payable - to be written back, net gain arising on financial assets designated as fair value through profit or loss, excess provision towards trade receivable written back, rental income and miscellaneous income. Miscellaneous income comprises interest on income tax refund, and profit on sale of assets.

Expenses

Our expenses consist primarily of purchase of messaging services, employee benefit expenses, finance costs, depreciation and amortisation expenses and other expenses.

Employee Benefit Expenses

Employee benefit expenses include salaries, wages and bonus payments to our employees, contribution to provident and other funds and staff welfare expenses. Given the nature of our business, employee benefit expenses represent our most significant operating expense.

Finance Costs

Finance costs included interest on borrowings from banks, interest on finance lease obligations, interest on delayed payment of statutory dues, interest on delayed payment of income taxes, interest expenses on financial liability measured at amortised cost and other borrowing costs.

Depreciation and Amortization

Depreciation is provided on the written down value over estimated useful life of the assets except servers and networks estimated by the management. Intangible assets are amortized over a period of three years. Depreciation for assets purchased/ sold during the year is proportionately charged. Leasehold improvements are amortised over the period of lease or their estimated useful life, whichever is earlier, on a straight-line basis. Depreciation is calculated pro-rata from/to the date of addition/deletion.

Other Expenses

Other expenses include expenses relating to rent for lease of office facilities, travelling and conveyance, legal and professional charges, business promotion expenses, repairs and maintenance charges, net loss on foreign currency transactions and translation, and communication expenses, among others.

Taxation

Income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income-tax Act, 1961 of India. Tax expenses relating to foreign operations are determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (“MAT”) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that our Company and its Indian subsidiaries will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably, and it is probable that the future economic benefits associated with it will fructify. Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods.

Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. In the event of unabsorbed depreciation and carry forward of losses, deferred tax assets are recognised only to the extent there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available to realise such assets. In other situations, deferred tax assets are recognised only to the extent there is reasonable certainty that sufficient future taxable income will be available to realise these assets.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where our Company is able to and intends to settle the asset and liability on a net basis.

- Our volume of transactions in the enterprise segment grew significantly in Fiscal 2019. In addition, we added additional customers in new geographies;
- Full year consolidation of 365squared for Fiscal 2019 has led to growth in total revenues in Fiscal 2019;
- We secured two firewall contracts in India and Africa that led to increase in revenues during Fiscal 2019; and
- We have discontinued our wholesale voice business owing to low profit margins.

Revenue from Operations

As a percentage of total revenue, expenses relating to purchases of messaging services were 78.25% in Fiscal 2019 as compared to 66.88% in Fiscal 2018.

Except as disclosed in our Restated Financial Statements or otherwise in this Red Herring Prospectus, there are no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that we believe are material to investors.

Historical and Planned Capital Expenditures

In Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, our capital expenditure (including capital advances) was ₹ 59.49 million, ₹ 105.44 million, ₹ 72.75 million, and ₹ 2.74 million, respectively.

We believe that our capital expenditures in Fiscal 2020 will be financed by funds generated from operations, borrowings as well as the proceeds from the Offer. Our actual capital expenditures may be significantly higher or lower than these planned amounts, or the timing of such expenditures may change, due to various factors, including, among others, changes in macroeconomic conditions, unplanned cost overruns and our ability to generate sufficient cash flows from operations.

Related Party Transactions

We enter into various transactions with related parties in the ordinary course of business. Primarily these transactions include purchase of messaging services, travelling and conveyance, business promotion expenses, expenses reimbursed by and to other companies, rental income, advances to Promoters and remuneration to Directors and KMPs. For further details relating to our related party transactions, see *Annexure V – Statement of Notes to the Restated Ind AS Consolidated Financial Information - Financial Statements* on page 204.

Quantitative and Qualitative Disclosures about Market Risk

We are exposed to various types of market risks in the ordinary course of business, including credit risks, interest rate risks and foreign currency exchange risks.

Credit Risk

We are exposed to credit risk on amounts owed to us by our clients. If our clients do not pay us promptly, or at all, it may impact our working capital cycle and/or we may have to make provisions for or write-off on such amounts. In Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, our trade receivables were ₹ 972.92 million, ₹ 1,447.07 million, ₹ 2,036.99 million and ₹ 1,840.24 million, respectively.

Interest Rate Risk

Interest rates for borrowings have been volatile in India in recent years. Our operations are funded to a significant extent by debt. Any increase in interest expenses may have an adverse effect on our results of operations and financial condition. Our borrowings may carry interest at variable rates as well as fixed rates. Although we may in the future engage in interest rate hedging transactions or exercise any right available to us under our financing arrangements to terminate the existing debt financing arrangement on the respective reset dates and enter into new financing arrangements, there can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Exchange Rate Risk

Changes in currency exchange rates influence our results of operations. A portion of our revenues, particularly relating to our international operations, is denominated in currencies other than Indian Rupees including Euro, U.S. Dollar, AED, Naira, Cedi, Pound Sterling and Singapore Dollar. A portion of our expenses, including operating expenses in connection with our international operations, as well as certain of our capital expenditure on hardware and software, may also be denominated in currencies other than Indian Rupees. In addition, certain of our results and financial positions are reported in the relevant local currencies, including Euro, U.S. Dollar, Naira and AED, which are translated into Indian Rupees at the applicable exchange rates for inclusion in the consolidated financial statements, which are stated in Indian Rupees.

Depreciation of the Indian Rupee against the U.S. dollar and other foreign currencies may adversely affect our results of operations by increasing the cost of financing any debt denominated in foreign currency that we may enter into in the future or any proposed capital expenditure in foreign currencies. Any significant appreciation of the Rupee against

foreign currencies, especially the USD and the Euro, is likely to have an impact on our ability to compete effectively with international competitors and maintain or grow our profit margins.

Although we may selectively enter into hedging transactions to minimize our currency exchange risks, there can be no assurance that such measures will enable us to avoid the effect of any adverse fluctuations in the value of the Indian Rupee against other relevant foreign currencies.

Liquidity Risk

Liquidity risk arises from the absence of liquid resources, when funding loans, and repaying borrowings. This could be due to a decline in expected collection, or our inability to raise adequate resources at an appropriate price. This risk may be minimized through a mix of strategies, including the maintenance of back-up bank credit lines, having diversified sources for funding both long term and short-term loans and following a forward looking borrowing program based on projected loans and maturing obligations.

Unusual or Infrequent Events or Transactions

Except as described in this Red Herring Prospectus, there have been no other events or transactions that, to our knowledge, may be described as “unusual” or “infrequent”.

Segment Reporting

Other than as disclosed in our Restated Financial Statements, we do not follow any other segment reporting. See, “*Financial Statements - Annexure V – Statement of Notes to the Restated Ind AS Consolidated Financial Information*” on page 204. Our operations are internally aligned into the following business verticals: (i) enterprise; (ii) mobile operator; and (iii) business process outsourcing, which have been discussed in detail in “*Our Business*” on page 131.

Significant Dependence on Clients

Revenues from any particular client may vary between financial reporting periods depending on the nature and term of ongoing contracts with such client. We are dependent on a limited number of clients for a substantial portion of our revenues. Our Company earned revenue from two major customers who individually contributed more than 10% of our revenue in Fiscal 2020, while in Fiscal 2019, one major customer contributed more than 10% of our revenue in Fiscal 2019. Our largest client accounted for 6.49%, 19.86%, 14.58% and 15.45% of our revenue from operations in Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, respectively. Our ten largest clients accounted for approximately 36.08%, 46.00%, 52.50% and 63.65% of our revenue from operations in Fiscal 2018, 2019 and 2020 and in the three months ended June 30, 2020, respectively. See also, “*Risk Factors – Our revenues depend on a limited number of clients and a loss of such clients could adversely affect our financial condition and results of operations.*” on page 23.

Known Trends or Uncertainties

Other than as described in this section and in “*Risk Factors*” on page 23, to our knowledge, there are no known trends or uncertainties that are expected to have a material adverse impact on our revenues or income from continuing operations.

Future Relationship between Cost and Income

Other than as described in this section, “*Risk Factors*” and “*Our Business*” on pages 23 and 131, respectively, to our knowledge there are no known factors that will have a material adverse impact on our operations and finances.

Seasonality of Business

Our results of operations do exhibit seasonality. We are subject to seasonality and fluctuations in end-customer usage of enterprise communications through the year. We may have variation in our financial results from financial period to financial period as a result of various factors, including those described under “*Factors Affecting our Results of*

Operations” above and in “*Risk Factors*” on page 23. While the business operations of certain of our clients are seasonal, given the size of our operations and large and diverse client base, seasonality of businesses affecting such clients do not have any material impact on our business and results of operations.

Competitive Conditions

We operate in a competitive environment. See “*Our Business*”, “*Industry Overview*” and “*Risk Factors*” on pages 131, 109 and 23, respectively, for further details on competitive conditions that we face in our business.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 (collectively the “**UPI Circular**”) in relation to streamlining the process of public issue of equity shares and convertibles. Subsequently, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Under this phase, physical submission of the Bid cum Application Form by a Retail Individual Bidder through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will compulsorily be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Information for Bidders

The relevant Designated Intermediary will enter each Bid option into the electronic Bidding system as a separate Bid and generate an acknowledgement slip (Acknowledgement Slip), for each price and demand option and give the same to the Bidder. Therefore, a Bidder can receive up to three Acknowledgement Slips for each Bid cum Application Form. It is the Bidder's responsibility to obtain the Acknowledgement Slip from the relevant Designated Intermediary. The registration of the Bid by the Designated Intermediary does not guarantee that the Equity Shares shall be allocated/Allotted. Such Acknowledgement Slip will be non-negotiable and by itself will not create any obligation of any kind. When a Bidder revises his or her Bid, he /she shall surrender the earlier Acknowledgement Slip and may request for a revised Acknowledgement Slip from the relevant Designated Intermediary as proof of his or her having revised the previous Bid.

In relation to electronic registration of Bids, the permission given by the Stock Exchanges to use their network and software of the electronic bidding system should not in any way be deemed or construed to mean that the compliance with various statutory and other requirements by our Company and/or the BRLMs are cleared or approved by the Stock Exchanges; nor does it in any manner warrant, certify or endorse the correctness or completeness of compliance with the statutory and other requirements, nor does it take any responsibility for the financial or other soundness of our Company, the management or any scheme or project of our Company; nor does it in any manner warrant, certify or endorse the correctness or completeness of any of the contents of this Red Herring Prospectus; nor does it warrant that the Equity Shares will be listed or will continue to be listed on the Stock Exchanges.

In the event of an upward revision in the Price Band, RIBs who had Bid at Cut-off Price could either (i) revise their Bid, or (ii) shall make additional payment based on the cap of the revised Price Band (such that the total amount i.e. original Bid Amount plus additional payment does not exceed ₹ 200,000, if the Bidder wants to continue to Bid at Cut-off Price). The revised Bids must be submitted to the same Designated Intermediary to whom the original Bid was submitted. If the total amount (i.e. the original Bid Amount plus additional payment) exceeds ₹ 200,000 with respect to RIBs, the Bid will be considered for allocation under the Non-Institutional Portion. If, however, the Retail Individual Bidder, as the case may be, does not either revise the Bid or make additional payment and the Offer Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of allocation, such that no additional payment would be required from the Retail Individual Bidder and the Retail Individual Bidder is deemed to have approved such revised Bid at Cut-off Price.

In the event of a downward revision in the Price Band, Retail Individual Bidders who have bid at Cut-off Price may revise their Bid; otherwise, the excess amount paid at the time of Bidding would be unblocked after Allotment is finalised.

Any revision of the Bid shall be accompanied by instructions to block the incremental amount, if any, to be paid on account of the upward revision of the Bid.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

As per current foreign investment policies, the transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy; and (iii) the pricing is in accordance with guidelines prescribed by SEBI / RBI. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT, all investments by entities incorporated in a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investors**”), will require prior approval of the Government of India, as prescribed in the Consolidated FDI Policy. It is not clear from the press note whether or not an issuance of the Equity Shares to Restricted Investors will also require a prior approval of the Government of India and each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required and such approval has been obtained, the Bidder was required to intimate the Company and the Registrar about such approval within the Bid/Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer. For further details, see “*Offer Procedure*” on page 407.

VI.	TRANSFER AND TRANSMISSION OF SHARES
57.	The Company shall keep a book called the 'Register of Transfers' and therein shall be fairly and distinctly entered the particulars of every transfer or transmission of any share in the Company.
58.	No transfer shall be registered unless a proper instrument of transfer has been delivered to the Company. Every instrument of transfer (which shall be in the form specified in the Rules) shall be duly stamped, dated and shall be executed by or on behalf of the transferor and the transferee and in the case of a share held by two or more holders or to be transferred to the joint names of two or more transferees by all such joint-holders or by all such joint transferees, as the case may be, several executors or administrators of a deceased member proposing to transfer the shares registered in the name of such deceased member shall all sign the instrument of transfer in respect of the share as if they were the joint-holders of the share. The instrument of transfer shall specify the name, address and occupation, if any, of the transferee.
59.	In the case of the death of any one or more of the persons named in the Register as the joint-holders of any share, the survivor or survivors shall be the only persons recognised by the Company as having any title to

	or interest in such share, but nothing herein contained shall be taken to release the estate of the deceased joint-holder from any liability on the shares held by him jointly with any other person.
60.	On the death of a member, the survivor or survivors where the member was a joint holder, and his nominee or nominees or legal representatives where he was a sole holder, shall be the only persons recognised by the company as having any title to his interest in the shares.

61.	Subject to the provisions of the last preceding Article, any person to whom the right to any share has been transmitted in consequence of the death or insolvency of any member or otherwise by operation of law may, with the consent of the Board (which they shall not be under any obligation to give) and upon his producing such evidence that he sustains the character in respect of which he proposes to act under the Article and of his title as the Directors think sufficient be registered as a member in respect of such shares . This clause is hereinafter referred to as the 'transmission clause'. A transfer of the share or other interest in the Company of a deceased member thereof made by his legal representative shall, although the legal representative is not himself a member be as valid as if he had been a member at the time of effecting the transmission.
62.	Every transmission of a share shall be verified in such a manner as the Directors may require and the Company may refuse to register any such transmission until the same be so verified or unless an indemnity be given to the Company with regard to such registration which the Directors at their discretion shall consider sufficient; provided nevertheless, that there shall not be any obligation on the Company or the Directors to accept any indemnity, the Directors shall have the same right to refuse to register a person entitled by transmission to any shares or his nominee as if he were the transferee named in an ordinary transfer presented for registration.
63.	A person entitled to share by transmission may, until the Directors otherwise determine as provided in Article 129, receive and give discharge for any dividends, bonuses or other moneys payable in respect of the share, but he shall not be entitled to vote at any meetings of the Company and to any of the rights and privileges of a member, unless and until he shall have become a member in respect of the shares.
64.	An application for the registration of a transfer of shares or other interest of a member in the Company may be made either by the transferor or the transferee. Where such application is made by the transferor and relates to partly paid shares, the transfer shall not be registered unless the Company gives notice of the application to the transferee and the transferee makes no objection to the transfer within two weeks from the delivery of the notice.
65.	It shall not be lawful for the Company to register a transfer of any shares unless the proper instrument of transfer duly stamped, dated and executed by or on behalf of the Transferor and by or on behalf of the Transferee and specifying the name and address and occupation of the Transferee has been delivered to the Company along with the scrip and if no such scrip is in existence, along with the letter of allotment of the shares. Where the proper instrument of transfer is not received by the Company within a period of two months from the date on which the instrument is dated, the Directors may at their sole discretion be entitled to seek such documentation including indemnities as it may deem fit, from both the transferor and transferee, or from the person who has lodged the same for transfer, and the Board may at its sole discretion be entitled to give effect to the transfer on receipt of such documentation and indemnities (save where an order of a competent court is produced, the Board shall then give effect to the transfer).
	If the Company refuses to register the transfer of any shares, the Company shall within one month from the date on which the instrument of transfer is lodged with the Company send to the Transferee and the Transferor notice of the refusal as provided in Article 66.
	Nothing in clause (1) shall prejudice any power of the Company to register as shareholder any person to whom the right to any share has been transmitted by operation of law.
	Nothing in this Article shall prejudice any power of the Company to refuse to register the transfer of any share.

-
66. The Board may, at its absolute and uncontrolled discretion and without assigning or being under any obligation to give any reason, decline to register or acknowledge any transfer or transmission of shares and in particular, may so decline in any case in which the Company has a lien upon the shares or any of them or in the case of shares not fully paid-up whilst any moneys called or payable at a fixed time in respect of the shares desired to be transferred or any of them remain unpaid or unless the transferee is approved by the Board. Nothing in Section 56 of the Act shall prejudice this power to refuse to register the transfer of or the transmission by operation of law of the right to, any shares or interest of a member in or debentures of the Company. The registration of a transfer shall be conclusive evidence of the approval by the Board of the transferee, but so far only as regards the share or shares in respect of which the transfer is so registered and not further or otherwise and not so as to debar the Board to refuse registration of any further shares applied for. If the Board refuses to register the transfer or transmission of any shares notice of the refusal shall within two months from the date on which the instrument of transfer on intimation of transmission was delivered to the Company be sent to the Transferee and the Transferor or to the person giving intimation of the transmission, as the case may be.
-
67. The Transferor shall be deemed to remain the holder of the shares until the name of the transferee shall be entered in the Register of Members.
-
68. Every instrument of transfer which shall be registered shall remain in the custody of the Company. If the transfer relates to the only share or all the shares comprise in the certificate, such certificate or a new certificate in lieu thereof shall, after the registration of the transfer, be delivered to the transferee and if the transfer relates only to a part of the shares comprised in the certificate, the same shall, on registration of the transfer be retained by the Directors and cancelled and new certificates will be issued to the transferor and the transferee in respect of the shares respectively, held by them.
-
69. -
70. The Company shall incur no liability or responsibility whatever in consequence of its registering or giving effect to any transfer of shares made or purporting to be made, by an apparent legal owner thereof (as shown or appearing in the Register of Members), to the prejudice of any person or persons having or claiming any equitable right, title or interest to or in the same shares, notwithstanding that the Company may have had notice of such equitable right title or interest or prohibiting registration of such transfer and may have entered such notice or referred thereto in any book of the Company; and the Company shall not be bound or required to regard or attend or give effect to any notice which may be given to it of any equitable right, title or interest or be under any liability whatsoever for refusing or neglecting so to do, though it may have been entered or referred to in some books of the Company; but the Company shall nevertheless be at liberty to regard and attend to any such notice and give effect thereto, if the Directors shall so think fit.
-
71. The provision of these Articles shall mutatis mutandis apply to the transfer or transmission by operation of law of debentures of the Company.

-
- to cancel any shares which, at the date of the passing of the resolution in that behalf, have not been taken or agreed to be taken by any person and diminish the amount of its share capital by the amount of the shares so cancelled.
-
73. The Directors may from time to time without any sanction of the Company, whenever all the shares in the issued capital shall not have been subscribed and whether all the shares for the time being subscribed shall have been fully called up or not, issue further shares of such value as they may think fit out of the unsubscribed balance of the issued capital. Such further shares shall be issued upon such terms and

The right to issue further shares provided in this clause, shall include a right to the Company, to issue any instrument, including Global Depositary Receipt.

76.	The Directors shall, whenever there is a change in the share capital, file with the Registrar of Companies notice of the increase of the capital as provided by Section 64 of the said Act within thirty days after the passing of the resolution authorising the increase.

But the Board may from time to time, if they think fit, fix the minimum amount of stock transferable and restrict or forbid the transfer of fractions of that minimum, but with full power, nevertheless, at the discretion to waive such rules in any particular case. Notice of such conversion of shares into stock or reconversion of stock into shares shall be filed with the Registrar of Companies as provided in the said Act.
78.	The stock shall confer on the holders thereof respectively the same privileges and advantages, as regards participation in profits and voting at meetings of the Company and for other purposes, as would have been conferred by shares of equal amount in the capital of the Company of the same class as the shares from which such stock was converted but no such privileges or advantages, except the participation in profits of the Company or in the assets of the Company on a winding up, shall be conferred by any such aliquot part of, consolidated stock as would not, if existing in shares, have conferred such privileges or advantages. No such conversion shall affect or prejudice any preference or other special holders of the share and authenticated by such evidence (if any) as the provisions herein contained shall, so far as circumstances will

	admit, apply to stock as well as to shares and the words “share” and “shareholder” in these presents shall include “stock” and “stock-holder
