Financial Highlights

Commenting on results, Mr. Vijay Gupta, Chairman & CEO, SoftTech Engineers Limited said:

"Financial year 2018-19 has been a milestone year for our Company. During the year, we have witnessed the Company's continued performance and an uptick in demand for our products resulting in a robust & strong order book.

Our Company has registered a revenue of Rs. 62.76 crore and overall profit of Rs. 7.79 crore. This growth has been driven by all scalable products especially a strong demand for our product PWIMS, besides continuous high traction for AutoDCR. Our deep industry knowledge and insight with strategic approach to business efficiency and transformation combined with the excellent team have been our key strengths.

We continue to witness traction for our products and our bookings this quarter have been very good till date. Our pipeline remains strong, as we have promised in our earlier years to enter international market, we are in lines with that and have ventured into USA, Finland and Asia pacific countries by setting up subsidiaries and business partners. Our organic growth momentum is picking up in FY20 which will help our Company to jump to the next level, increasing our sales revenue and at the same time achieving higher profit margins, which will help us to achieve greater heights.

I would like to thank you for your support, consistent commitment, engagement and encouragement. We continue to seek your participation in our next leg of growth and footprint expansion."
