An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Prospectus, particularly the “Financial Information of the Company” and the related notes, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 153, 99, and 155, respectively and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer, including the merits and the risks involved. Note: The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. A. INTERNAL RISK FACTORS

1. *There are outstanding legal proceedings involving our Company, Promoters and Directors which, may have a material adverse effect on our business, operations and financial condition.*

Our Company and Promoter are parties to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and forums. Mentioned below are the details of the proceedings involving our Company and Promoter as on the date of this Draft Prospectus along with the amount involved, to the extent quantifiable –

Litigations against our Company:-

Nature of Cases	No. of Outstanding Cases	Amount in dispute/demanded to the extent ascertainable
Litigation/Matters involving tax Liabilities (Income Tax demant under Section 154 and 143(1)(a) of the Income Tax Act, 1961)	1	1.79 Lakhs

Litigations against our Promoter (Mr. Norat Mal Chaudhary):-

Nature of Cases	No. of Outstanding Cases	Amount in dispute/demanded to the extent ascertainable
Litigation/Matters involving tax Liabilities (Income Tax demant under Section 143(1)(a) of the Income Tax Act, 1961)	1	0.02 Lakhs

2. *Increase in the cost of, or a shortfall in the availability of our raw material i.e. yarn could have an adverse effect on our business, operations and financial condition.*

We use yarn of different qualities for manufacturing of our products including cotton shirting, cotton suiting, fancy fabric, yarn dyed fabrics and blended fabric of polyester. The price of raw materials have been fluctuating which is evident from the cost of material consumed to *revenue ratio as under:

(Rs. In Lakhs)

Particulars	For the period ended November 30, 2022	For the Year ended March 31		
		2022	2021	2020
Total Revenue	6,108.76	8698.36	7475.54	9933.61
Cost of Material Consumed	5,293.98	7649.10	6426.31	8657.72
% of total revenue	86.66%	87.94%	85.96%	87.16%

**On the basis of Restated financial statement.*

The price and availability of raw material depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, duties and taxes and trade restrictions. The yarns are procured from local suppliers such as dealers, traders and brokers available in Rajasthan as well as from other states like Gujarat, Maharashtra, Punjab, etc. which are cost efficient and easily available. We usually do not enter into long term supply contracts with any of our suppliers and typically place orders with them after firm-orders is received. The absence of long term contracts at fixed prices exposes us to volatility in the prices of material that we require. If we are unable to compensate for or pass on our increased costs to end-customer, such price increases could have an adverse impact on our result of operations, financial condition and cash flows. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure material from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations.

3. Our profits are fluctuating in nature.

In the past three financial years as per restated financials our revenues have been fluctuating. The revenue from Operations for the period ending November 30, 2022, F.Y. 2021-22, F.Y. 2020-21 and F.Y. 2019-20 were Rs. 6108.76 Lakhs, Rs. 8695.75 Lakhs, Rs. 7470.44 Lakhs and Rs. 9930.66 lakhs respectively. Our Profit After Tax (PAT) for the above mentioned periods were Rs. 214.32 lakhs, Rs. 41.90 lakhs, Rs. 32.14 lakhs and Rs. 29.32 lakhs, respectively. The profit increased significantly for the period ended November 30, 2022 due to the following reasons -

1. In the period there was good global as well as domestic demand of cotton suiting fabric. We believe there are few players who are experts in manufacture of cotton suiting fabric. Sahaj Fashions Limited being one of the prominent manufacturer of cotton suiting fabric benefited from large orders with better profitability margins to the Company.
2. The cotton prices were at 30 years high during the period mainly because of low production of cotton at global level. Our company Sahaj Fashions Limited being a reputed and old player in the market with good relations with its suppliers of raw cotton yarns had inventory at cheaper rates which helped the company to improve cost efficiency and maintain good profit margins in the period.
3. The Company has also started catering to new clients with their customised demands such as suitings/ bottomwears for which there are comparatively lesser players in the market. This has also helped the company to achieve good profit margins as compared to previous years.

Therefore, we cannot assure you that our growth strategies will be successful or that we will be able to continue to expand our operations and we may not be able to maintain the current growth trajectory. Further, our ability to sustain our rate of growth depends significantly upon our ability to select and retain key managerial personnel, maintaining effective risk management policies and training managerial personnel to address emerging challenges.

4. Within the parameters as mentioned in the chapter titled ‘Objects of this Offer’ beginning on page 76, our Company’s management will have flexibility in applying the proceeds of this Offer. The fund requirement and deployment mentioned in the Objects of this Offer have not been appraised by any bank or financial institution.

The fund requirement and deployment, as mentioned in the “Objects of the Offer” on page 76 is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan and operation position. We cannot assure that the current business plan will be implemented or orders shall be executed in its entirety or at all. In view of the competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. Further, the deployment of the funds as stated under chapter “Objects of the Offer” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. However, our Audit Committee will oversee the fund utilization of IPO proceeds. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds could adversely affect our growth plans.

5. Any delay or default in payment from our customers could result in the reduction of our profits and affect our cash flows.

Our operations involve extending credit, ranging typically from 5 to 6 months, to our customers. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Accordingly, we had and may continue to have high levels of outstanding receivables.

*Details of Trade Receivables for the last three Fiscal Years are as under:

(Rs. In Lakhs)

Particulars	For the period ended	For the Year ended March 31		
		March 31, 2022	March 31, 2021	March 31, 2020

	November 30, 2022			
Trade Receivables	3,693.94	4,291.50	3,761.13	3589.78
Total revenue	6,112.27	8698.36	7475.54	9933.61
Trade Receivables % of total revenue	60.43%	49.34%	50.31%	36.14%

**On the basis of Restated Financial statement.*

If our customers delay or default in making these payments, our profits margins and cash flows could be adversely affected.

6. The Company is dependent on few numbers of customers. Any loss of top 10 customers will significantly affect our revenues and profitability.

Following are the details of Top 10 customers of our company:

(Rs. in Lakhs)

Particular	As on	As on	As on	As on
	November 30, 2022	March 31, 2022	March 31, 2021	March 31, 2021
Revenue from Operations	6,108.76	8,695.75	7,470.44	9,930.66
Top 10 Customers contribute	3454.72	4,438.64	6,773.48	8,607.10
% of total Revenue	56.44	51.04%	90.67%	86.87%

Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

For further details, please refer to section titled “Our Business” beginning on page 99.

7. Our business is dependent on our manufacturing facilities and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations or under-utilization of our manufacturing facilities could have an adverse effect on our business, operations and financial condition.

As on the date of this Draft Prospectus, we conducted our operations through our two manufacturing facilities, details as under:

Manufacturing Facility(ies)		Address
Rajasthan	Unit 1 for Weaving	Khasra No. 1474, Industrial Estate, Gram: Shreenagar, Tehsil: Nasirabad, Kishangarh, Four Lane Expressway, Distt. Ajmer, Rajasthan – 305025.
	Unit 2 for Sizing	Khasra No. 1629, 1648/1770, 1674/7769, Industrial Estate, Gram: Shreenagar, Tehsil: Nasirabad, Kishangarh, Four Lane Expressway, Distt. Ajmer, Rajasthan – 305025.

(Both lands are adjacent to each other)

Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same. In addition, we may be required

to carry out planned shutdowns of our facilities for maintenance, statutory inspections and testing, or may shut down certain facilities for capacity expansion and equipment upgrades. We may also face protests from local citizens at our existing facilities or while setting up new facilities, which may delay or halt our operations.

Although we have not experienced any significant disruptions at our manufacturing facilities in the past, except during Lockdown, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations or the under-utilization of our manufacturing facilities, which in turn may have an adverse effect on our business, results of operations and financial condition.

8. *Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.*

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization may differ significantly from the estimated production capacities or historical estimated capacity utilization of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Prospectus. For further information, see the section titled “Our Business” on page 99.

9. *Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our operations.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors, inventories, security deposits, marketing and promotions, advance to suppliers, cash and cash equivalents. On an average, our debtors are realized in 5-6 months and we require to maintain inventory of about 3-4 months. We have also availed sanctioned financing facilities from bank. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, it may affect our business operations and financials.

10. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will Offer or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

We have regular system of checking for any regulatory license being expiring & to apply for renewal within stipulated time. For further details, please refer to section titled “Government and Other Statutory Approvals” beginning on page 165.

11. Shareholding of our Promoter and Promoter Group are shown in Public Category in the records of both the Depositories.

The shareholding of all of our Promoter and Promoter Group are shown in Public Category in the records of the Depositories. However, the Company is in the process of reclassifying the category and taking the required steps in due course.

12. Our lenders have imposed certain restrictive conditions on us under our financing arrangements.

Under our financing arrangements with our lenders, we are required to obtain the prior written consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans.

13. Our Company had negative cash flows in some of the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

Our Company had negative cash flows in some of the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

(Rs. In Lakhs)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

In the event that we are required to vacate the aforementioned premises, we would be required to make alternative arrangements for new offices and other infrastructure and we cannot assure that the new arrangements will be on commercially acceptable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay increased charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

15. *Our Company has not made provision for Gratuity Payment as required under The Payment of Gratuity Act 1972. The company has not complied with AS-15- Employee Benefits as Issued by ICAI.*

The Accounting Policy followed by us is not in conformity with the Accounting Standard prescribed by the Institute of Chartered Accountants of India, regarding disclosure of Present Value of Obligations with respect to the retirement benefits to be paid to the employees. The Accounting Standard stipulates that these liabilities should be accounted in the Books on Accrual Basis. However, our company has made the suitable adjustments for the above in the restated financial statements.

16. *Our Company had filed Draft Prospectus in the past and after getting in-principle approval from the NSE, the Company shelved the plan to list considering the market condition.*

For the purpose of Initial Public Offer of equity shares, our Company on September 12, 2018 filed the Draft Prospectus with the National Stock Exchange of India Limited and received the in-principle approval for the same on November 06, 2018. On receiving the in-principle approval which was valid for one year, after internal consultation with the Management, our Company decided to shelve the plan of going ahead with the IPO considering the market conditions at that period and overall business environment for the sector. We cannot guarantee that after filing Draft Prospectus and getting in-principle approval we will go ahead for final listing.

17. *Our Company has not filed MSME- 1 form as required under MSME Act, 2006*

The Micro, Small and Medium Enterprises Development Act, 2006 make its obligatory for the Company to file the e-form MSME-1 if dues payable to MSME entities exceed 45 day on product or services received from the MSME vendors. Our Company has not followed up with its vendors to segregate the MSME vendors and consequently there is risk of regulatory action under the Micro, Small and Medium Enterprises Development Act, 2006.

18. *Our Restated Financial Statements are Prepared and Signed by a Peer Reviewed Chartered Accountant who is not Statutory Auditor of our Company.*

Our Restated Financial Statements are prepared and signed by M/s. Raman Chawla & Associates., Chartered Accountants and FRN i.e. 035543N, who is not the Statutory Auditor of our Company. However, our statutory Auditor also holds valid peer review certificate as on date of this Draft Prospectus.

19. *One of our Key Management Personnel are associated with the Company less than one year.*

One of our Key Management Personnel i.e. Company Secretary & Compliance Officer is associated with the Company for a period of less than one year. For details of Key Management Personnel and their appointment, please refer to chapter “*Our Management*” beginning on page 126.

20. *We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.*

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

21. *If we are unable to raise additional capital, our business prospects could be adversely affected.*

We intend to fund our development plans through our internal accruals, cash flow from operations and working capital from banks. We will continue to incur significant expenditure in maintaining and growing our existing manufacturing infrastructure. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our internal accruals and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on favourable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

22. *Our Company has availed certain unsecured loans that are recallable by the lenders at any time.*

Our Company has availed unsecured loans to the tune of Rs. 555.36 Lakhs as on November 30, 2022 that are recallable on demand by the lenders including our Promoter & Promoter Group. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenure. We may not be able to secure fresh funds or have internal accruals to repay those loans. As a result, our cash flow may be affected resulting in working capital constraints. However since all of them belong to promoter group, we do not foresee any such situation. For further details please refer chapter titled “*Restated Financial Statement*” beginning on page 153.

23. *A shortage or non-availability of electricity, fuel or water may adversely affect our manufacturing operations and may have an adverse effect on our business, results of operations and financial condition.*

Our manufacturing operations require a significant amount and continuous supply of electricity, fuel and water and any shortage or non-availability may adversely affect our operations. The manufacturing process of our products requires significant power. We currently source our water requirements from local body water supply, canals & bore wells and depend on state electricity boards. The total power requirement for our manufacturing unit situated in Rajasthan is 590 HP at 360 KVA for Weaving and 290 HP at 165 KVA for Sizing which is fulfilled by Ajmer Vidyut Vitran Nigam Ltd. Although we also have D.G. sets for emergency power requirement which assist in the manufacturing process and for other general purposes. We cannot assure you that our facilities will be operational during power failures.

Any failure on our part to alternate sources of electricity or fuel, in a timely manner, and at an acceptable cost, may have an adverse effect on our business, results of operations and financial condition.

24. *Our manufacturing activities are dependent upon availability of skilled and unskilled labour.*

Our manufacturing unit in Rajasthan is dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our manufacturing schedule and timely delivery to customers which may adversely affect our business and results of operations.

Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

25. The average cost of acquisition of Equity Shares by our Promoter is lower than the Offer price.

26. Changes in latest technology or requirement of machinery based on business opportunity may adversely affect Our Company’s results of operations and its financial condition.

Modernization and technology upgradation are essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Presently, we are using the machinery as per the best of our knowledge. However, in future we may be required to implement new technology or upgrade the machinery and other equipment’s employed by us. Further, the costs in upgrading our technology and modernizing the machinery may be significant which could substantially affect our finances and operations. Also, the cost of implementing new process would require substantial new capital expenditures and could adversely affect our business, prospects, results of operations and financial condition.

27. We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

We have entered into certain transactions with our Promoter, Promoter Group and group companies and may continue to do so in future. For absolute value of all transactions entered into with our related party entities please refer to Statement of Related Party Transactions under chapter “*Restated Financial Statements*” beginning on page 153. These transactions or any future transactions with our related parties could potentially involve conflicts of interest. However the Company cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on business and financial results. Our Company shall follow the provisions as laid down under Companies Act, 2013 and SEBI (LODR) Regulations, 2015.

We further confirms that the Related Party Transactions undertaken by the Company as per the latest audited financial statements as on F.Y. 2021-22 and November 30, 2022 are in accordance with the Companies Act, 2013.

28. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

29. *Our success depends largely upon the services of our Management and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.*

Our success largely depends on the continued services and performance of our management and other key personnel. Though they have been assisted by team of professionals, the loss of service of the Promoter and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new turn key projects and expand our business.

30. *Certain documents in relation to educational qualifications and experience of our Promoters & Directors are not available.*

Certain supporting documentation for details required to be stated under brief profiles of Promoters & Directors of our Company in “*Our Management*” on page 126, including in respect of educational qualifications and work experience could not be made available to our Company, despite due enquiries with such Directors and KMPs. We have relied on certain indirect sources for such information.

31. *Our operations are subject to environmental, health and safety laws and regulations.*

Our operations are subject to various Central and State environmental laws and regulations relating to the control of pollution in the area where we operate. In particular, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liability to the Government and third parties, and may result in our incurring costs to remedy such discharge or emissions. There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. Environmental laws and regulations in India have been increasing in stringency and it is possible that they will become significantly more stringent in the future. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations, may impose new liabilities on us or result in the need for additional investment in pollution control equipment, either of which could adversely affect our business, financial condition or prospects. While as of the date of this Draft Prospectus, we are not subject to any environmental legal proceedings, we may be impleaded in such legal proceedings in the course of our business. Such legal proceedings could divert management time and attention, and consume financial resources in defense or prosecution of such legal proceedings or cause delays in the production, development or commencement of operations of our projects. No assurance can be given that we will be successful in all, or any, of such proceedings.

32. *Our inability or failure to maintain a balance between optimum inventory levels and our product offering at our stores may adversely affect our business, results of operations and financial condition.*

We strive to keep optimum inventory at our stores and working capital requirements through our dynamic supply chain management. An optimal level of inventory is important to our business as it allows us to respond to consumer demand effectively and to maintain a range of merchandise at our stores. At the same time, we aim to minimize excessive inventories which would result in higher levels of discounting. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale in our stores. In addition, if we underestimate customer demand for our products, we may lose our reputation and brand image.

We are dependent on our third-party manufacturers, as some of the products are procured on job work basis, and these manufacturers, may not be able to deliver products to meet our requirements, and this could result in delays in the shipment of products to our points of sale and may damage our reputation and customer relationships. There can be no assurance that we will be able to successfully manage our inventory at a level appropriate for future customer demand. To maintain an optimal inventory, we monitor our inventory levels based on our projections of demand as well as on a real-time basis. Unavailability of products, which are in high demand, may depress sales volumes and adversely affect our customer relationships.

If we over-stock inventory, our required working capital will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet consumer demand and our operating results may be

adversely affected. Any mismatch between our planning and the actual consumption by consumers can impact us adversely, leading to potential excess inventory and requiring us to resort to higher markdown and thus lower margins, in order to clear such inventory. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

Inventory levels in excess of consumer demand may result in inventory write – offs and the sales of excess inventory at a discounted price, which would cause our gross margin to suffer. Any write – downs or write – offs and sale of excess inventory at discounted prices could also impair the strength and exclusivity of our brands. In addition, if we underestimate consumer demand for products distributed by us, we may not be able to service the demand for the products and this may damage our reputation and consumer relationships.

33. *Our future funds requirements, in the form of Fresh Issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any Fresh Issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

34. *We are subject to risk of fraud, theft, embezzlement by our employees, contractors and customers, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

As of November 30, 2022, we had total inventory of Rs. 2,126.08 Lakhs as per our Restated Financial Statements. Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during stocking. We may also encounter some inventory loss on account of employee/vendor fraud, theft, embezzlement and general administrative error. Although, we have set up various security measures, including cctv in our offices, deployment of security guards and follow stringent operational processes such as periodic stock tracking, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

35. *Orders placed by customers may be delayed, modified, cancelled or not fully paid by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may result in the postponement of the delivery of products or cause its cancellation. Accordingly, it is difficult to predict with certainty that, when, and to what extent we may be able to deliver the orders placed. Further, we may be bound to certain terms in the contracts entered with the customers any non-adherence to the same may lead to breach of the contract, which may subject us to penalties and liquidated damages. Any failure to adhere to the conditions which may be beyond our control may subject us to liquidated damages which could have an effect on the result of operation and cash flow.

36. *There have been some instances of delayed filing of records and returns required to be filed by the Company with various regulatory authorities.*

There have been some instances of delayed filing by the Company in respect of the filings required to be made with regulatory authorities, including filings under Companies Act. Till date, the Company has not received any notices from any authorities, however, there can be no assurance that the regulator may not initiate proceedings against us or that we will be able to sufficiently defend against any action initiated by regulators in relation to regulatory compliances for all instances and periods. Any adverse order passed or penalty imposed by regulators on us may adversely affect our business and results of operations.

37. *Third party industry and statistical data in this Prospectus may be incomplete, incorrect or unreliable.*

Neither Lead Manager nor we have independently verified the data obtained from the official and industry publications and other sources referred in this Prospectus and therefore, while we believe them to be true, there

can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. The discussion of matters relating to India, its economy and our industry in this Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data or report and do not take responsibility for any errors or omissions or for the results obtained from using their data or report. Accordingly, investors should not place undue reliance on, or base their investment decision on this information.

38. *Loans availed by our Company have been secured on personal guarantees of our Promoter group. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees or collateral securities provided by our Promoter group.*

Our Promoter Group Member has provided personal guarantees as security to secure our existing borrowings of Rs. 3848.00 Lakhs taken from State Bank of India and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter group may be invoked and/ or the security may also be enforced, which could negatively impact the reputation and Net Worth of the Promoter group. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter group may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Financial Indebtedness*” on page 154.

39. *Our lender have charge over our immovable properties in respect of finance availed by us.*

We have secured our lender by creating a charge over our immovable properties in respect of loans / facilities availed by us. We have been extended Working Capital loan (Fund Based and Non- Fund Based Limits) from State Bank of India and HDFC Bank Limited respectively against hypothecation of our Company’s property. For further details, please refer to section titled “*Financial Indebtedness*” beginning on page 154.

40. *Our insurance coverage may not be sufficient or may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

We have taken insurance which may not be adequate enough for covering the entire future unforeseen liabilities that might occur in the normal course of business. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time by the insurers. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected. For further details on insurance arrangements, see the section titled “*Our Business*” on page 99.

41. *There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only if Offer size exceeds Rs. 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Offer proceeds. However, as per the Section 177 of the Companies Act, 2013, the Audit Committee of our Company would be monitoring the utilization of the Offer Proceeds.

42. Any Penalty or demand raised by statutory authorities in future will affect our financial position of our Company.

Our Company is engaged in business of manufacturing of yarns, which attracts tax liability as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Labour cess etc. Though, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of our Company.

43. Our Promoters and the members of our Promoters Group will continue to retain significant control in the Company after the Offer, which will enable them to influence the outcome of matters submitted to shareholders for approval. Our Promoters and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

As on the date of this Draft Prospectus, our Promoter and the members of our Promoter Group hold 97.95% Issued equity share capital of the Company. After completion of the Offer, our Promoter and the members of our Promoter Group will hold 63.78% of the equity shares capital of the Company and continue to retain a significant control of the Company. As a result, our Promoter and our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoter and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Our Promoter and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

44. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an Offer of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not Offer additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

45. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

46. *After the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.*

47. *Applicants to this Offer are not allowed to withdraw their Applications after the Offer Closing Date.*

In terms of the SEBI (ICDR) Regulations, Applicants in this Offer are not allowed to withdraw their Applications after the Offer Closing Date. The Allotment in this Offer and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Offer Closing Date and the date of Allotment in this Offer. Occurrence of any such events after the Offer Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Offer Price. To the extent the market price for the Equity Shares declines below the Offer Price after the Offer Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Offer or cause the trading price of our Equity Shares to decline.

48. *The determination of the Offer Price is based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.*

Furthermore, the Offer Price of the Equity Shares will be determined by our Company in consultation with the Lead Manager. These will be based on numerous factors, including market demand and factors as described under "Basis for Offer Price" on page 83 and may not be indicative of the market price for the Equity Shares after the Offer.

49. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

As a listed Indian entity, there are provisions in Indian law that may delay or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions require certain compliances, such as undertaking an open offer, which may prevent a potential acquirer from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, it is possible that such a takeover would not be attempted or consummated.

50. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.

The Equity Shares will be listed on the SME platform of National Stock Exchange of India Limited (“NSE Emerge”). Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors’ ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors’ demat accounts, or that trading in the Equity Shares will commence, within the time periods as specified herein. We could also be required to pay interest at the applicable rates if allotment is not made, unblocking intimation/ refund intimation, as applicable are not dispatched or demat credits are not made to investors within the prescribed time periods.

We are not a publicly listed company and have not, historically, been subjected to the compliance requirement or the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management’s attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

52. There is no guarantee that the Equity Shares Issued pursuant to this Offer will be listed on the NSE – Emerge in a timely manner.

Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the Stock Exchange. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose

tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

59. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.*

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the financial statements included in the Draft letter of offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Prospectus should accordingly be limited.

60. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

61. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its road & rail networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

62. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing even domestically, and the interest rates and other commercial terms at which such additional financing may be unfavorable. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

63. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

64. *There may be less information available in the Indian securities markets than in more developed securities markets in other countries.*

There is a difference between the level of regulation and monitoring of the Indian securities markets and that of the activities of investors, brokers and other participants in securities markets in more developed economies. SEBI is responsible for monitoring disclosure and other regulatory standards for the Indian securities market. SEBI has issued regulations and guidelines on disclosure requirements, insider trading and other matters. There may be less publicly available information about Indian companies than is regularly made available by public companies in more developed countries pursuant to such disclosure requirements, which could adversely affect the market for our Equity Shares. As a result, investors may have access to less information about our business, financial condition, cash flows and results of operation, on an ongoing basis, than investors in companies subject to the reporting requirements of other more developed countries.

65. *There is no public market for the Equity Shares or Equity Shares outside India.*

After this Offer, there will continue to be no public market for our Equity Shares in the United States or any country other than India, we cannot assure you that the face value of the Equity Shares will correspond to the price at which the Equity Shares will trade subsequent to this Offer. This may also affect the liquidity of our Equity Shares and Equity Shares and restrict your ability to sell them.

66. *Any trading closures at the Stock Exchanges may adversely affect the trading prices of our Equity Shares.*

Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or Offer trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

67. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

Pursuant to the terms of the borrowing arrangements, prepayment of certain indebtedness may attract prepayment charges as prescribed by the respective lender. GLOBAL ECONOMIC OVERVIEW

The global economy is traversing a number of turbulent challenges. Inflation higher than in several decades, tightening financial conditions in most regions, Russia’s invasion of Ukraine, and the lingering COVID-19 pandemic, all weigh heavily on the outlook. Normalization of monetary and fiscal policies that were unprecedentedly supportive during the pandemic is cooling demand as policymakers aim to lower inflation back to the targeted range. But a growing share of economies is in a growth slowdown or outright contraction. The global economy’s future health rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply-side disruptions, for example, in China. Global growth is forecast to slow from 6% in 2021 to 3.2% in 2022 and 2.7% in 2023. This is the weakest since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic, and reflects significant slowdowns for the largest economies: the US GDP contracting in the first half of 2022, a euro-area contraction in the second half of 2022, and prolonged COVID-19 outbreaks and lockdowns in China with a growing property-sector crisis. About a third of the world economy faces two consecutive quarters of negative growth. Global inflation from 4.7% in 2021 was forecast to rise to 8.8% in for 2022 but to decline to 6.5% in 2023 and to 4.1% by 2024. Inflation surprises have been most widespread in advanced economies, with greater variability in emerging market and developing economies. Risks to the outlook are unusually large and to the downside. Monetary policy could miscalculate the right stance to reduce inflation. Policy paths in the largest economies could continue to diverge, leading to further US dollar appreciation and cross-border tensions. More energy and food-price shocks might cause inflation to persist for longer. Global tightening in financing conditions could trigger widespread emerging market debt distress. Halting gas supplies by Russia have depressed output in Europe. A resurgence of COVID-19 or new global health scares might further stunt growth. A worsening of China’s property sector crisis could spill over to its banking sector and weigh heavily on its growth, with negative cross-border effects. And geopolitical fragmentation could impede trade and capital flows, further hindering climate policy cooperation. The balance of risks is tilted firmly to the downside, with about a 25% chance of one-year-ahead global growth falling below 2%—in the 10th percentile of global growth outturns since 1970. Warding off these risks starts with monetary policy staying the course to restore price stability.

Front-loaded and aggressive monetary tightening is critical to avoid inflation de-anchoring as a result of households and businesses basing their wage and price expectations on their recent inflation experience. Fiscal policy’s priority is the protection of vulnerable groups through targeted near-term support to alleviate the burden of the cost-of-living crisis felt across the globe. But its overall stance should remain sufficiently tight to keep monetary policy on target. Addressing growing government debt distress caused by lower growth and higher borrowing costs requires a meaningful improvement in debt resolution frameworks. With tightening financial conditions, macro prudential policies should be on guard against systemic risks. Intensifying structural reforms to improve productivity and economic capacity would ease supply constraints and, in doing so, support monetary policy in fighting inflation. Policies to fast-track the green energy transition would yield long-term payoffs for energy security and the costs of ongoing climate change.

Phasing in the right measures in the coming eight years will keep macroeconomic costs manageable. And last, successful multilateral cooperation will prevent fragmentation that could reverse the gains in economic well-being from 30 years of economic integration.

Inflation and Uncertainty

The world is in a volatile period: economic, geopolitical, and ecological changes all impact the global outlook. Inflation has soared to multi-decade highs, prompting rapid monetary policy tightening and squeezing household budgets, just as COVID-19-pandemic-related fiscal support is waning. Many low-income countries are facing deep fiscal difficulties. At the same time, Russia’s ongoing war in Ukraine and tensions elsewhere have raised the possibility of significant geopolitical disruption. Although the pandemic’s impact has moderated in most countries, its lingering waves continue to disrupt economic activity, especially in China. And intense heat waves and droughts across Europe and central and south Asia have provided a taste of a more inhospitable future blighted by global climate change. Amid these volatile conditions, recent data releases confirm that the global economy is in a broad-based slowdown as downside risks.

The second quarter of 2022 saw global real GDP modestly contract (declining 0.1 percentage point at a quarterly annualized rate), with negative growth in China, Russia, and the US, as well as sharp slowdowns in eastern European countries most directly affected by the war in Ukraine and international sanctions aimed at pressuring Russia to end hostilities. At the same time, some major economies did not contract—euro area growth surprised on the upside in the second quarter, led by growth in tourism-dependent southern European economies.

Forward-looking indicators, including new manufacturing orders and sentiment gauges, suggest a slowdown among major economies. In some cases, however, signals conflict—with some indicators showing output weakness amid labour market strength. An important factor underpinning the slowdown in the first half of this year is the rapid removal of monetary accommodation as many central banks seek to moderate persistently high inflation. Higher interest rates and the associated rise in borrowing costs, including mortgage rates, are having their desired effect in taking the heat out of domestic demand, with the housing market showing the earliest and most evident signs of slowdown in such economies as the US. Monetary policy tightening has been generally—though not everywhere—accompanied by a scaling back of fiscal support, which had previously propped up households’ disposable incomes. Broadly speaking, nominal policy rates are now above pre-pandemic levels in both advanced and emerging market and developing economies. With high inflation, real interest rates have generally not yet reverted to pre-pandemic levels. Tightening financial conditions in most regions, with the notable exception of China, are reflected in a strong real appreciation of the US dollar.

In eastern and central Europe, the effects of the war in Ukraine have exacerbated the shifting global risk appetite. Beyond monetary policy alone, China’s COVID-19 outbreaks and mobility restrictions as part of the authorities’ zero-COVID strategy and Russia’s invasion of Ukraine have pulled down economic activity. China’s lockdowns have imposed sizable constraints domestically and gummed up already strained global supply chains. The war in Ukraine and deepening cuts to supplies of gas to Europe have amplified pre-existing stresses in global commodity markets, once more driving natural gas prices up.

INDIAN ECONOMIC OVERVIEW

Strong economic growth in the first quarter of FY -23 helped India surpass the UK to become the fifth-largest economy after it recovered from repeated waves of the COVID-19 pandemic shock. Real GDP in the first quarter of FY 23 was about 4% higher than its corresponding FY 20, indicating a strong start to India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intense services sector will probably be the main driver of development in FY 23. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitisation of tax filings. In the medium term, greater capital spending on infrastructure and asset-building projects is set to increase growth multipliers and, with the revival in the monsoon and *kharif* sowing, agriculture is picking up momentum. The contact-based services sector has largely demonstrated its promise to boost growth by unleashing pent-up demand over April-September 2022. The sector's success is being captured by a number of HFIs (high-frequency indicators) that are doing well, indicating the beginnings of a comeback.

The economy grew 6.3% in the second quarter of FY23 following double-digit 13.5% growth in the first quarter. The slowdown was due to the normalisation of the base and a contraction in the manufacturing sector's output. However, both sequential improvement and good growth over the pre-pandemic level (Q2 FY20) signal the economy's resilience despite global growth and financial uncertainties.

Q2 FY23 GDP growth was only slightly higher than consensus expectation (6.2%) mainly because of higher-than-expected growth in trade, hotels, transport and communication-related sectors. Sequentially, domestic economic output expanded 3.6%, reversing the contraction in the previous quarter, with services gaining momentum. Compared to the pre-pandemic period, GDP recorded 7.6% growth, with broad-based recovery across sectors. Increasing discretionary spending and greater mobility have augured well for the services sector. The industrial sector's performance was pulled down by manufacturing, which contracted 4.3% (y-o-y).

Both private consumption and the investment rate edged up in Q2 FY23 compared with the corresponding quarter of the previous year and supported by greater economic activity. However, the global growth slowdown weighed on net exports. The agriculture sector grew 4.6% in Q2 FY23 compared with 3.2% in the corresponding quarter a year ago.

Q2 FY23 industrial output contracted 0.8% y-o-y, compared with 7% growth a year ago. This was mainly because of the poor performance of the manufacturing sector, marred by high input costs. We can expect the sector to fare well in coming quarters due to the festival-push and easing commodity prices. The services sector, with the highest proportion in GDP, recorded 9.3% growth in Q2 FY23 owing to the revival of contact-intensive sectors. Output in sectors related to trade, hotels, transport, communications and broadcasting grew in double-digits (14.7%) benefiting from pent-up demand. Compared to the pre-pandemic period, however, these sectors were only slightly better.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world in the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

India's FY22 nominal gross domestic product (GDP) at current prices is estimated at ₹ 232.15 trillion (US\$3.12 trillion). With more than 100 unicorns valued at US\$332.7 billion, India has the third-largest unicorn base in the world. Besides, the government is focusing on renewable sources to generate energy and is planning 40% of energy from non-fossil sources by FY 30.

The McKinsey Global Institute says India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 to increase productivity and economic growth. The net employment rate needs to grow 1.5% a year from 2023 to 2030 to achieve 8-8.5% GDP growth between FY 23 and FY 30. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, was 2.1% of GDP in the first quarter of FY 23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Ahead, the contribution of merchandise exports may waver as several of India's trade partners experience an economic slowdown. According to one of the studies, Indian exports are expected at US\$1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments accounting for 70% of economic activity. With the improved in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to the World Bank, India must continue to prioritise lowering inequality while putting growth-oriented policies in place to boost the economy. In view of this, some developments have taken place in the recent past. Some are mentioned below.

- At September 21, 2022, India's foreign exchange reserves were US\$524,520 million
- Private equity-venture capital (PE-VC) investments were US\$2 billion in September 2022
- Merchandise exports in September 2022 were US\$32.62 billion
- PMI Services were comfortably in the expansionary zone, at 56.7, during April-September 2022

- In September 2022, the gross Goods and Services Tax (GST) revenue collection was ₹ 147,686 crore (US\$17.92 billion).
- Between April and June 2022, cumulative FDI equity inflows to India were US\$604,996 million.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. It has been effective in developing policies and programmes that only help citizens improve their financial stability but also for the overall growth of the economy. In recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides, a number of the government's flagship programmes, including Make-in-India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, aim to create immense opportunities in India.

Road Ahead

In Q2 FY 23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) did well in July and August 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. In foreign direct investment inflows, India ranked fifth among developed and developing nations for the first quarter of 2022.

India's economic story in the H1 FY 23 highlighted the unwavering support the government gave in the form of capital expenditure, which, in FY 23 (until August 2022), was 46.8% higher than the corresponding period last year. The ratio of revenue expenditure to capital outlay fell from 6.4 in the previous year to 4.5 in this year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, greater profitability, and increasing economic activity contributed to rising capital spending.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August, CPI-C inflation was 7%, down from 7.8% in April. Similarly, WPI inflation fell from 15.4% in April to 12.4% in August. With a proactive set of administrative actions by the government, a flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India appear to be on the decline overall.

OVERVIEW

Our Company was incorporated as Sahaj Fashions Private Limited under the provisions of the Companies Act, 1956 vide certificate of incorporation dated May 20, 2011 in Kishangarh, Rajasthan. Further, upon conversion into a Public Limited Company pursuant to Shareholders Resolution dated April 02, 2018, the name of our Company was changed to “Sahaj Fashions Limited” vide fresh Certificate of Incorporation dated April 17, 2018 having CIN: U17119RJ2011PLC035248 Issued by the Registrar of Companies, Jaipur.

We are engaged in manufacturing of high standard fabric which is used for various purposes such as garments, home furnishings, and industrial applications, etc. We have expertise in manufacturing of primarily cotton suiting fabric and cotton shirting fabric apart from polyester based and cotton-polyester blended fabrics. We also manufacture cotton yarn dyed fabrics which are according to us almost always in demand by the garment manufacturing industry. At present our sales have penetrated our home state of Rajasthan as well as some other states like Gujarat, Maharashtra and Delhi.

Our company was established with an aim to manufacture of high standard textile fabric. Hence, our company purchased land in Kishangarh, Rajasthan to setup a manufacturing unit which we completed and the unit started commercial production on April 04, 2012 in a record time of 6 months from the date of laying the foundation stone.

In the year 2014, we exposed our product to international markets through Merchant Exporters in which we do not have to face the risk of forex fluctuation. In 2015, our company decided to enter into expansion with backward integration which is a pre-process of fabric weaving. As a result, our company installed and commissioned further machinery of Textile Preparatory (Sizing Machine Plant) in our manufacturing facility in Rajasthan thereby improving the quality and timely delivery of the orders.

Justifications for Increases in Profits for the period ended November 30, 2023:

1. In the period there was good global as well as domestic demand of cotton suiting fabric. We believe there are few players who are experts in manufacture of cotton suiting fabric. Sahaj Fashions Limited being one of the prominent manufacturer of cotton suiting fabric benefited from large orders with better profitability margins to the company.
2. The cotton prices were at 30 years high during the period mainly because of low production of cotton at global level. Our company Sahaj Fashions Limited being a reputed and old player in the market with good relations with its suppliers of raw cotton yarns had inventory at cheaper rates which helped the company to improve cost efficiency and maintain good profit margins in the period.
3. The company has also started catering to new clients with their customised demands such as suitings/ bottomwears for which there are comparatively lesser players in the market. This has also helped the company to achieve good profit margins as compared to previous years.

IMPACT OF COVID-19 ON OUR BUSINESS OPERATIONS

The pandemic outbreak has caused an economic downturn on a global scale, including closures of many businesses and reduced customers spending, as well as significant market disruption and volatility. The demand for our products is dependent on and directly affected by factors affecting industries where our products are supplied. Majority of our customer base are engaged in textiles industry which were majorly affected by COVID outbreak. We continue to closely monitor the impact that COVID-19 may have on our business and results of operations. It is difficult for us to predict the impact that COVID-19 will have on us, in the future.

This objective is sought to be achieved by liberalizing controls and regulations so that the different segments of the textile industry are enabled to perform in a greater competitive environment. One of the key focus areas of the NTP 2000 is on the implementation, in a time bound manner, of the Technology Upgradation Fund Scheme (“TUFS”) covering all manufacturing segments of the industry, seeking to build world class state of the art manufacturing capabilities in conformity with environmental standards. Additionally, certain sector specific initiatives envisaged under the NTP 2000 include raw materials, clothing, exports, and knitting. The GoI constituted an expert level committee in December 2013 to review the NTP 2000 and to formulate a new textile policy to address concerns of adequate skilled work force, labour reforms, attracting investments in the textile sector and for providing a future road map for the textile and clothing industry.
