2. Stringent environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures

Our operations are subject to environmental, health and safety and other regulatory and/ or statutory requirements in the jurisdictions in which we operate. We are subject to various national, state, municipal and local laws and regulations concerning environmental protection in India. Non-compliance with these laws and regulations could expose us to civil penalties, criminal sanctions and revocation of key business licenses. Environmental laws and regulations in India are becoming more stringent and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment and emissions management

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations, financial condition, or cash flows. In addition, we could incur substantial costs, our products could be restricted from entering certain markets and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. 4. *Our customers expect us to maintain high quality standards and any failure by us to comply with such quality standards may have an adverse effect on demand from end customers and on our reputation, business, results of operations and financial condition.*

We are committed to ensuring and maintaining the required industry and regulatory compliance standards while providing high quality products to our end customers. Mould base products need to have precise dimensions to ensure proper fit and function in the moulding process. Any dimensional inaccuracies can lead to problems such as improper mould alignment, defective parts, or difficulty in assembly. This can result in production delays, rework, or scrap, impacting the overall efficiency and cost-effectiveness of the manufacturing process. The surface finish of mould base products plays a crucial role in the quality of the moulded parts. Any imperfections or roughness on the mould base surface can transfer to the moulded parts, resulting in cosmetic defects, poor surface finish, or functional issues. Mould base products require strict tolerances to ensure accurate and repeatable moulding. Any lack of precision in the manufacturing process, such as machining errors or poor quality control, can result in deviations from the desired specifications. This can lead to issues such as flash, dimensional variations, or misalignment in the moulding process, affecting the quality and consistency of the final products. This may further lead to loss of reputation and goodwill of our Company, cancellation of the orders, loss of end customers, rejection of the product, which will require us to incur additional cost, that may not be borne by the end customer, to replace the rejected product, which could have an adverse effect on our business and financial condition

Our relationship with our end customers is therefore dependent to a large extent on our ability to regularly meet their requirements, including consistent product quality. Any significant failure or deterioration of our quality management systems could result in defective or substandard products, which, in turn, may result in delays in the delivery of our products and the need to replace defective or substandard products. It may further lead to decrease in orders or cessation of business from affected customers which, in turn, may adversely impact our reputation, business, results of operations and financial condition

5. *Our revenues are dependent on clients in various industries such as automotive, heavy manufacturing, plastic, consumer goods and electronics. An economic slowdown or factors affecting this segment may have an adverse effect on our business, financial condition and results of operations.*

We provide machining parts & mould base products for the automotive, heavy manufacturing, plastic, consumer goods and electronic industry. Our revenues are dependent on clients concentrated in the above mentioned industries. The performance of the above mentioned industries depends on macroeconomic factors, and any downturn in the global economy could negatively affect our business, financial condition and results of operations. Further, due to the concentration of our clients in the above sectors, the success of our business also depends on our ability to innovate and develop relevant skills and capabilities to address the rapid developments in these industry and integrating new technologies in our products.

6. *If we fail to attract and retain highly skilled employees, we may not have the necessary resources to properly staff projects, and failure to successfully compete for such skilled employees could materially adversely affect our business, financial condition and results of operations.*

Our success depends largely on the contributions of our skilled employees and our ability to attract and retain skilled employees. We may encounter higher attrition rates in the future. A significant increase in the attrition rate among employees with specialized skills could decrease our operating efficiency and productivity and could lead to a decline in demand for our mould base & machining parts products. The competition for highly-skilled employees may require us to increase salaries, and we may be unable to pass on these increased costs to our customers. This would increase our operational costs which may adversely affect our business, results of operations and financial condition. We incur various employee benefits expense, including salaries and bonus, contribution to provident and other funds, gratuity expenses, annual leave encashment and staff welfare expenses. For the period ended March 31, 2023, and financial years ended March 31, 2022 and March 31, 2021, our employee benefits expense accounted to ₹ 202.34 Lakhs, ₹ 169.04 Lakhs and ₹ 149.19 Lakhs, respectively, representing for 18.72%, 20.91% and 22.46%, respectively, of our total expense for the respective year. For further details, kindly refer section titled “Restated Standalone Financial Statements” beginning on page 134 of this Prospectus.

If we are unable to attract and retain the highly skilled employees we need, we may have to forgo projects for lack of resources or be unable to staff projects optimally. Our failure to attract, train and retain skilled employees necessary to

fulfill the needs of our existing and future customers could materially adversely affect our business, financial condition and results of operations. We believe that there is significant competition for skilled employees in India and that such competition is likely to continue for the foreseeable future. Failure to hire, train and retain skilled employees in sufficient numbers could have a material adverse effect on our business, results of operations and financial condition.

7. *Increase in cost of raw material will have adverse impact on profitability of the business.*

An increase in steel prices can indeed have a significant impact on the mould base industry. Steel is a primary material used in mould base manufacturing, and fluctuations in its price can affect the overall cost structure and profitability of the industry. An increase in steel prices directly affects the cost of raw materials for mould base production. Steel prices can be influenced by various factors such as supply and demand dynamics, global market conditions, and trade policies. When steel prices rise, mould base manufacturers face higher costs for procuring steel, which can reduce profit margins. Higher steel prices can also impact the production costs associated with mould base manufacturing. Steel is used for various components of the mould base, including plates, inserts, and cores. Increased material costs can lead to higher manufacturing expenses, affecting the overall cost of producing mould bases. Mould base manufacturers may face challenges in adjusting product pricing to reflect the increased steel costs. If they are unable to pass on the increased costs to customers through higher prices, profit margins can be squeezed, impacting the financial viability of the business. Rising steel prices can impact the competitiveness of mould base manufacturers, particularly in a competitive market. If some competitors manage to secure steel at lower prices or have alternative material options, they may be able to offer more competitive pricing, potentially leading to a loss of market share for companies facing higher steel costs. Increases in steel prices can also disrupt the supply chain. Suppliers may face challenges in obtaining steel at affordable prices, leading to potential delays in material delivery. This can impact production schedules and customer commitments, affecting the overall efficiency and reputation of the mould base manufacturers. Overall, an increase in steel prices poses a significant risk to the mould base industry, and companies need to carefully manage their costs, pricing, and supply chain to navigate through these challenges successfully.

8. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.*

Our Company requires certain statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Pursuant to conversion of our company in to public limited company, our company is yet to make applications with respective authorities for updating all the certificates to reflect its current name. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of the relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business. If we fail to comply with all the regulations applicable to us or if the regulations governing our business or their manner of implementation change, we may incur increased costs, or be subject to penalties or may suffer a disruption in our business activities, any of which, could adversely affect our business or results of operations. For further details, please see "Key Industry Regulations and Policies" and "Government and Other Statutory Approvals" beginning on page nos. 101 and 173 respectively of this Prospectus.

9. *Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability*

Our Company has had long standing business relationships with various customers and has been supplying our products to several customers including repeat orders received from them. A substantial number of our customers are engaged in varied industry segments like electrical, consumer goods, automotive etc. However, we have not entered into any fixed contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency, fluctuation in demand for our Company's products and customer's inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products and after sales service such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

10. *Our Company may have potential Conflicts of interest with our Promoter Group Entity as they are engaged in similar line of business.*

Our Promoters have interest in Group Company namely Sunita Die Parts Private Limited which has manufacturing operations related to mould base products. Further, based on mutual understanding between our Company and Sunita Die Parts Private Limited, Our Company has decided to acquire the manufacturing business assets which are used in the mould based business from our Group Company in order to consolidate production capacity of Mould based products of Sunita Group in our Company. Further, based on this, our Company has paid lump sum advance amount of Rs. 285.15 Lakhs as on March 31, 2023 to Sunita Die Parts Private Limited for such purpose. Between April 2023 to date of this prospectus, our Company has already purchased key machineries amounting to Rs. 81.07 lakhs against the advance paid, closing balance of advance given to Sunita Die Parts Private Limited as on the date of Prospectus is 107.78 lakhs. The complete transfer of these assets will be completed within financial year 2023-24 and our Group Company will cease to manufacture in the mould based product business. Hence, in future we shall not have any material conflict of business with our Group Company. For details, please refer to the Chapter titled "Our Management" and "Our Promoters and Promoter Group" on page no 112 and 126 respectively of this Prospectus.

However, no formal agreement is entered for the said transition / transaction or any other non -compete agreement between us. Sunita Die Parts Private Limited has been authorized by its Memorandum of Associations to undertake activities which is similar to that of our Company hence there can be no assurance of any conflict of interests which may arise in allocating or addressing business opportunities and strategies amongst our Company and our Group Company in circumstances where our interests differ from theirs. In cases of conflict, our Promoters may favor other Company in which our Promoter has an interest. Hence, conflict of interest may occur between our business and the business of our Group Company which could have an adverse effect on our business, financial condition, results of operations and prospects.

11. *Our Company has availed certain Business loans- Term loans which are used for working capital purposes and are being repaid on EMI basis. Inability to pay monthly EMI may affect our business, cash flows, financial condition and results of operations.*

Our Company has availed certain Business loans- Term loans from Financial Institution which is used for working capital purpose and is heavily dependent on it. As on March 31, 2023, our company has Business loans- Term loans amounting to ₹ 960.45 lakhs, comprising 57.86% of the total borrowings of our Company. In the event of failure to repay the loan based on EMI for any month, lender may ask for higher interest rate, penalty or even repayment of full loan amount. Our company needs to have planned and funded cash flows for payment of such EMI along with unexpected liabilities. In case of unexpected repayment asked by lender due to default in any clauses, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms which may adversely affect our competitive edge and better bargaining power if entered with other Financial Institution on urgent need basis. Therefore, we may not have adequate working capital to undertake new assignments and complete orders of our customers. As a result, any such events may affect our business, cash flows, financial condition and results of operations. For details in relation to the indebtedness of our Company, see "Financial Indebtedness" beginning on page 167.

12. Product development is a long, expensive and uncertain process and our current expenditure in product development may not provide a sufficient or timely return.

The mould base industry is influenced by advancements in technology, such as 3D printing, automation, and computer-aided design (CAD) software. Companies in the industry need to stay updated with the latest technologies to remain competitive and meet customer demands. The development of our software products is a costly, complex and time-consuming process, and the investment in its development often involves a long wait until a return is achieved on such an investment. We have made, and will continue to make, significant investments in software product development and related product opportunities. Investments in new technology and processes are inherently speculative. Commercial success depends on many factors, including the degree of innovation of the software products developed and effective distribution and marketing. Such expenditure may adversely affect our operating results if they are not offset by corresponding and timely revenue increases. However, significant revenues from new software product investments may not be achieved for a number of years, or at all. Moreover, new software products may not be profitable, and even if they are profitable, operating margins for new software products may not be in line with the margins we have experienced for our existing or historical software products. Moreover, we may determine that certain software product does not have sufficient potential to warrant the continued allocation of resources and accordingly, we may elect to terminate the development of such products. If we terminate a product in development in which we have invested significant resources, our prospects may suffer, as we will have expended resources on a project that will not provide any return on our investment and also may have missed the opportunity to have allocated those resources to potentially more productive uses. In turn, this may adversely impact our business, operating results and financial condition

13. In addition to normal remuneration, other benefits and reimbursement of expenses to our directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding, loan in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters currently holds 96.47% of shareholding of our Company and will hold 72.98 % of post issue shareholding of our Company. We cannot assure you that our directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our directors will always act to resolve any conflicts of interest in our favor, thereby adversely affecting our business and results of operations and prospects.

We have entered into related party transactions which are at an arm's length basis from time to time with our Promoters, Directors, Group Company and Promoter Group Entities. Some of the material related party transactions involved in our company are explained below:

- We have obtained unsecured loans from our directors and related parties therefore our directors and related parties may be interested in interest earned on such loans or repayment of the same. Outstanding details of such loan are mentioned in the summary.
- We have entered into leave and license agreement with Promoter Group Entity for our registered office and manufacturing unit situated at Survey No.66, Plot No.A, Valiv, Sativali Road, Vasai Maharashtra - 401208, India which costs us a monthly rent of ₹ 0.50 lakhs. We have also paid ₹ 143.17 lakhs as a security deposit for the said premise.
- We have paid advances of ₹ 285.15 lakhs as on March 31, 2023 for the acquisition of key business assets for our mould manufacturing business to our Group Company as mentioned in the summary below. based on mutual understanding between our Company and Sunita Die Parts Private Limited, Our Company has decided to acquire the manufacturing business assets which are used in the mould based business from our Group Company in order to consolidate production capacity of Mould based products of Sunita Group in our Company. Further, based on this, our Company has paid lump sum advance amount of Rs. 285.15 Lakhs as on March 31, 2023 to Sunita Die Parts Private Limited for such purpose. Between April 2023 to date of this

prospectus, our Company has already purchased key machineries amounting to Rs. 81.07 lakhs against the advance paid, closing balance of advance given to Sunita Die Parts Private Limited as on the date of Prospectus is 107.78 lakhs. The complete transfer of these assets will be completed within financial year 2023-24 and our Group Company will cease to manufacture in the mould based product business.

In addition to above, the motor vehicles and corresponding loans are booked as an asset and liability in the books of accounts since the acquisition of the said vehicle. However, the RTO registration and the loan documents are in the name of director using the said vehicle for Company purpose.

We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our results of operations and financial condition.

A summary statement of the related party transactions is as follows:

14. Our Promoters and Key Managerial Person play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that they remain associated with us.

Our success also depends on our key managerial personnel and senior management and our ability to attract and retain them. Any loss of our key person could adversely affect our business, operations and financial condition. The success of our business operations is attributable to our promoters, directors and the technical team. We believe that our relation with our promoters, who have rich experience in mould base Industry, markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. Our promoters, directors, key managerial personnel and senior management have been actively involved in the day-to-day operations and management since the incorporation of the Company. Further, our Promoters, directors, key managerial personnel and senior management may promote other companies/ firms/ ventures, this will divert their attention to the other companies, we may not be able to function as efficiently and profitably as before.

We also depend significantly on the expertise, experience and continued efforts of our technical team; hence, our performance and success substantially depend on the ability to attract and retain our key employees, including our senior management team and experienced personnel. There can be no assurance that any member of our senior management or other experienced personnel will not leave us in the future. The lack of or loss of the services of such key persons in the organization could impair our ability to manage and expand our business. Our success is also dependent on our continuous ability to identify, hire, train retain and motivate our engineering, product and sales and marketing personnel. Competition for personnel in our industry is intense, and the availability of suitable and qualified candidates is limited. If we fail to hire and retain our employees, the loss of their services could harm our business operations and financial condition could be adversely affected.

- 15. One of the properties given as security for our secured loan does not belong to us and is owned by our Promoter Group. Further, our Promoters have extended personal guarantees in connection with our debt facilities. There can be no assurance that such properties and personal guarantees will be continued to be provided by our Promoters Group in the future or can be called at any time, affecting our financial condition.**

Our Company has obtained loan from Axis Bank for a sanction amount of ₹598.80 lakhs. The said loan amount is secured by an immovable property, which is not owned by our Company. The property is owned by our Promoter Group. If they withdraw, sell or dispose of, the property or decide not to continue it as a security for our loan due to any reason, we may require alternative properties of an equal or greater value. We cannot assure you that we will be able to acquire such a property within reasonable time and of the desired value or at all. If we are unable to arrange suitable collateral within the stipulated time, we may be required to repay a substantial portion of the loan. In order to arrange for collateral, we may have to acquire properties at commercially unviable terms or with unviable prospects, which may lead to a large capital out flow, adversely affecting our cash flow condition and financial stability.

Further, our Promoters have provided personal guarantees for the above-mentioned borrowings to secure our loans. If these personal guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees, or withdrawal of property as security provided in connection with our Company's borrowings.

- 16. Our Company might be unable to meet certain delivery obligations including timelines of delivery, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations.**

Our company is engaged in the business of manufacturing mould base & machining part items and sub-assembling. All of our machinery is occupied with customer's order which is critical to the operations of our customers business. Any failure or defect in our products could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. Our Company has commitments for safe and timely delivery of the product. Any failure to meet the scheduled timelines set by our customers or loss or damage to the goods may lead to our customers raising claims against us. This can have an adverse effect on our business, operations, revenues and earnings.

- 17. Our Balance sheet has a significant portion of Property Plant and Equipment. Any destruction, breakdown, theft our major plants or equipment or failures to repair or maintain the same may adversely affect our business, cash flows, financial condition and results of operations.**

We have invested significantly on plant and machinery of latest technology and higher capacity and efficiency for our manufacturing facility. We own a large number of equipment and machinery used in our operations. To maintain our capability to undertake projects, we may have to purchase machines and equipment built with the latest technologies and knowhow. Further, in order to grow we have purchased second hand machineries in the FY 2022-23. We are in process of acquiring key second hand machineries from our Group Company. Our Company has already paid advance for this transaction and the said transaction is expected to be completed in FY 2023-24. Post this transaction our Company will be sole manufacturer of mould based products manufactured by Sunita Group and there will be no material conflict of interest with Sunita Die Parts Private Limited. We cannot assure you that we will be immune from the associated operational risks such as the obsolescence of our plants or equipment, destruction, theft or major equipment breakdowns or failures to repair our major plants or equipment, which may result in their unavailability, project delays, cost overruns and even defaults in our existing operations.

The latest technologies used in newer models of equipment may improve productivity significantly and render our older equipment obsolete. Obsolescence, destruction, theft or breakdowns of our major plants or equipment may significantly increase our equipment purchase cost and the depreciation of our plants and equipment, as well as change the way our management estimates the useful life of our plants and equipment. We may have to incur high cost when our plants or equipment are not readily available from the market or requires services from original equipment manufacturers. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability of bulk discounts. Such replacement, repair or maintenance failures or price increases may

not be adequately covered by the insurance policies availed by our Company and may have an adverse effect on our business, cash flows, financial condition and results of operations.

18. Trade Receivables and Inventories form a substantial part of our current assets and net worth. Failure to manage our trade receivables and Inventories could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our business is working capital intensive and hence, Trade Receivables and Inventories form substantial part of our current assets and net worth. Our, Trade Receivables and Inventories as on March 31,2023 were Rs. 618.65 lakhs and Rs. 923.21 lakhs respectively. The results of operations of our business are dependent on our ability to effectively manage our inventory (raw material, work in progress and finished goods) and trade receivables. We generally procure raw materials on the basis of management estimates based on past requirements and future estimates. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the finished inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

19. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

As per our Restated Financial Statements, our cash flows from operating, investing and financing activities are as set out below:

(Rs in Lakhs)

Particulars	For the year ended March 31		
	2023	2022	2021
Net Cash from Operating Activities	(274.21)	262.00	321.91
Net Cash from Investing Activities	(233.70)	(50.37)	(31.54)
Net Cash used in Financing Activities	502.73	(200.58)	(294.62)
Net Increase / (Decrease) in Cash and Cash equivalents	(5.18)	11.05	(4.25)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources.

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

For details, please see chapter titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 159 of this Prospectus.

20. Our Company is dependent on the continuing operation of our manufacturing facilities. Any significant interruption in manufacturing at our facilities could have a material adverse effect on our business, results of operations and financial condition.

Our Company manufactures all of the products at our manufacturing facility located at Survey No.66, Plot No.A, Valiv, Sativali Road, Vasai East, Palghar, Thane Maharashtra, India, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, and natural disasters, directives from government and power interruptions. In case of any disruption at such facilities, it may adversely affect the manufacturing cycle, and may lead to time over-run in the execution of the project. As on date of this Prospectus there are no litigations or disputes on our occupancy for the mentioned premise. However, any defaults in complying with the said terms and conditions/covenants on our part may be subjected to penal provisions and it may also lead to the cancellation of such lease, which will adversely affect our business, financial conditions and results of operations. Our manufacturing

facilities require a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect our operations. The manufacturing process of our products requires significant electricity and any disruption may interfere with manufacturing process requiring us to either stop our operations or repeat activities which may involve additional time and increase our costs.

21. *We face foreign exchange risks that could adversely affect our results of operations. We face foreign exchange rate risk to the extent that certain of our revenues are denominated in a currency other than the Indian Rupee.*

We are also involved in export business and thereby face foreign exchange risk. Direct exports income, for Fiscal 2023, amounted to Rs. 24.32 lakhs. Fluctuations in exchange rate between the Indian Rupee and foreign currencies can have a material impact on our results of operations, cash flows and financial condition. Fluctuations in the exchange rates may affect us to the extent of orders being received from the overseas customers. Our Company may enter into certain contracts to hedge exchange rate fluctuations which may or may not adequately cover the potential loss that may arise as a result of such foreign exchange transactions. Moreover, these hedges do not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates that we have not adequately hedged may adversely impact our profitability and financial condition.

22. *Failure in supply of electricity or power can lead to significant disruption in manufacturing process and can affect our operations.*

We consume substantial power and fuel at our manufacturing facility. Electricity expenses represent a significant portion of the direct cost associated with cost of material consumed. For Fiscals 2023, 2022 and 2021, electricity cost was ₹72.68 lakhs, ₹42.98 lakhs, and ₹46.31 lakhs, constituting 6.73%, 5.32%, and 6.97% respectively, of total expenses. If electricity cost rises or supply arrangements were disrupted, our profitability could decline. We source most of our electricity requirements for our manufacturing facilities from the Maharashtra State Electricity Distribution Co. Ltd. The cost of electricity from state electricity boards could be significantly higher, thereby adversely affecting our cost of production and profitability. Further, if for any reason such electricity is not available, we may need to temporarily shut down our plants until an adequate supply of electricity is restored which will lead to the loss of production in progress and may affect our results of operations.

23. *Our Company has availed unsecured loan which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.*

As per the Restated Financial Information as on March 31, 2023, our Company has availed total sum of ₹ 31.28 million as unsecured loans which are repayable on demand of which ₹ 195.75 lakhs is from our directors and other entities. These unsecured loans were obtained and utilised towards working capital needs of the respective companies from time to time.

Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus resulting in shortage of working capital fund. For further details, please refer to the section “Financial Indebtedness” beginning on page no. 167 of this Prospectus. Any demand for the repayment of such unsecured loans, may adversely affect our cash flow and financial condition.

24. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may constrain the working capital cycle of the Company and in turn adversely affect our growth plans. For further details please refer “Objects of the Issue” on page no. 68 of this Prospectus.

- 25. *Failure to perform or observe any contractual obligations could result in cancellation or non-renewal of a contract, which could cause us to experience a higher-than-expected number of unassigned employees and an increase in our expenses as a percentage of revenues, until we are able to reduce or reallocate our headcount and may adversely affect our business, results of operations and financial condition.***

The ability of our customers to terminate agreements makes our future revenues from operations uncertain. We may not be able to honor certain contractual obligations due to lack of manpower, which could lead to termination of agreements and further, we may not be able to replace any customer that elects to terminate or not renew its contract with us, or renew a contract with us on unfavorable terms, which could materially adversely affect our business, financial condition and results of operations.

For example, some of our customer agreements require us to maintain insurances including workers' compensation insurance, professional liability insurance and commercial general liability insurance throughout the term of such agreements, in addition to maintaining testing facilities and round-the-clock IT infrastructure support. Some of our customer contracts also require us to have non-solicitation and limited exclusivity arrangements. In addition, some of our customer agreements specify that if a change of control of our company occurs during the term of the agreement, the customer has the right to terminate the agreement. If we fail to comply with such contractual obligations in the future, our customers may terminate agreements with us. If any future event triggers any change of control provision in our customer contracts, these master services agreements may be terminated, which would result in loss of business and revenues.

- 26. *Our Registered Office which is also a manufacturing facility is taken on lease.***

Our Registered Office which is situated at Survey No.66, Plot No.A, Valiv, Sativali Road, Vasai East, Maharashtra, India, is taken on lease from a member of the promoter group Upon the termination of the leave & license agreement, we are required to return the said premise to the licensor. The leave & license term is of three years. Further, the leave & license agreement may or may not be renewed.

In the event the licensor terminates on non-fulfillment of any conditions and does not accept the new lease terms on commercially acceptable terms, or at all, we shall be required to vacate the premises. We may be required to identify alternate premises and enter into fresh rent agreement. Such a situation could result in loss of business and may adversely affect our operations and profitability. For further details, please see paragraph titled "Properties" under the chapter titled "Our Business" beginning on page no 91 of this Prospectus.

- 27. *We are dependent on third party transportation providers for the delivery of our raw material and products. Accordingly, continuing increase in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.***

We use services of third party transportation providers for the delivery of our raw material and products. Even though majority of our customers arrange their own transportation and have a separate agreement with them, but sometimes we need to arrange such services. Vehicle strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increase in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects. Currently, physical infrastructure is less developed and problems with its road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

- 28. *We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations. We may also be unable to obtain future financing to fund our operations, expected capital expenditure and working capital requirements on favorable terms, or at all.***

As of March 31, 2023, we have ₹ 1,659.96 lakhs total borrowing on our balance sheet. Our level of indebtedness has important consequences to us, such as:

- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future;
- Increasing our interest expenditure and adversely affecting our profitability.

Our business requires funding for working capital requirements. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings. Continuous increase of our working capital requirements may have an adverse effect on our results of operations and financial condition. Further our ability to arrange for additional funds on acceptable terms is subject to a variety of uncertainties, including future results of operations, financial condition and cash flows; economic, political conditions and market scenario for our products; costs of financing, liquidity and overall condition of financial and capital markets in India; issuance of necessary business/government licenses, approvals and other risks associated with our businesses; and limitations on our ability to raise capital in capital markets and conditions of the Indian and other capital markets in which we may seek to raise funds. Any such inability to raise sufficient funds could have a material adverse effect on our business and results of operations.

29. *We have not yet applied for registration of our name and logo and we do not own the “corporate logo” legally as on date.*

We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights. We have not yet applied for registration of our name and logo under the provisions of the Trademarks Act, 1999 and do not own the “corporate logo” used in our communications and other operations as on date. As such, we do not enjoy the statutory protections accorded to a registered trademark or logo as on date. There can be no assurance that we will be able to register the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our logo in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

30. *Our insurance coverage may not adequately protect us against all material hazards and the policies do not cover all risks.*

In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss. Our business could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. We maintain a standard fire and special perils insurance policy for certain movable and immovable assets which includes Plant & Machinery, Building and Stock. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage.

Further, with respect to the insurances maintained by us, we cannot assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected.

31. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

We may have to confront pressures in respect of pricing; product quality etc. from the clients and such pressures may put strain on our profit margins which may consequently affect the financial position of our Company. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. Our Competitiveness is also measured by the technology we adopt as the industry is rapidly growing in India. Our inability to compete with this intense competition; will have material adverse impact on our Company's financial position.

32. *The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.*

Our Company intends to primarily use the Net Proceeds from the Fresh Issue towards working capital as described in "Objects of the Issue" on page no. 68 of this Prospectus. In terms of Regulation 262 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue size is not in excess of Rs. 100 crores. The management of our Company will have discretion to use the Net Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Further, estimates of certain costs are based on quotations received from various vendors from time to time. However we have not entered into any definitive agreements with any of the above vendors and there can be no assurance that the same vendor would be engaged to eventually supply the above mentioned items at the same costs.

We may have to revise our expenditure and funding requirements as a result of variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Net Proceeds from the Fresh Issue to achieve profitable growth in its business. Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in SEBI (ICDR) Regulations.

Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

33. *Our Company if not able to manage our growth or to successfully implement our business plan could have an effect on our business, results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and Increasing Operational efficiency. For further details, see the section titled "Our Business – Our Strategies" on page no. 91 of this Prospectus.

Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our products;
- Changes in the Indian regulatory environment in field.

If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to

manage our business and implement our growth strategy could have an effect on our business, financial condition and profitability.

34. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

35. *If our employees were to unionize or our labour costs were to increase, our results of operations may be adversely affected.*

Currently our employees are not represented by a collective bargaining agreement and we believe that our non unionized operations have advantages over unionized competitors in providing reliable and cost-competitive customer services, including greater efficiency and flexibility. However, we cannot assure you that our employees will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. The unionization of our employees could result in an increase in wage expenses and our cost of employee benefits, limit our ability to provide certain services to our customers, cause customers to limit their use of our services due to the increased potential for strikes or other work stoppages and result in increased expenditures in connection with the collective bargaining process, any of which could have a material adverse effect on our business, financial condition and results of operations.

In addition, we enter into contracts with independent contractors to complete specified assignments and these contractors are required to source the labour necessary to complete such assignments. Although we generally do not engage these labourers directly, it is possible under Indian law that we may be held responsible for wage payments to labourers engaged by contractors should the contractors default on wage payments. Any requirement to fund such payments will adversely affect us, our business, financial condition and results of operations. Further, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if we are unable to pass on the increased costs to our customers, our business operations and financial condition may be adversely affected.

Further, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if we are unable to pass on the increased costs to our customers, our business operations and financial condition may be adversely affected.

36. *We may not be able to sustain effective implementation of our business and growth strategies. The success of our business will depend greatly on our ability to effectively implement our business and growth strategies.*

We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

37. *Industrial accidents at our manufacturing facility may adversely affect our operation.*

Our manufacturing facility are subject to operating risk resulting in fatal accidents which can cause injury to the labour and employees of the company and this could also cause damage to the property and plant and machinery situated at the factory which could have an adverse affect on our operations. Though, we have taken adequate safety measures in order to avoid such mishaps, but in case of any such happening of the event out of our control, we cannot assure you whether it will be sufficient or not. Further occurrence of such accidents could impact our production schedules, costs, revenue and ability to meet customer demand.

38. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we might have to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. This could have an adverse affect on our profit and reputation.

39. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Fresh Issue as has been stated in the Chapter "Objects of the Issue" on page no. 68 of the Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

RISK FACTORS RELATED TO EQUITY SHARES

40. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time. The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

41. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have made dividend payments to the

Shareholders of our Company. In Future, the Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

42. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to capital gains tax as per existing laws in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

43. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page no. 101 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

44. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

45. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

46. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of services our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

47. *Our Company is subject to risk arising from changes in interest rates and banking policies.*

Increased interest rates will have a bearing on profitability and credit controls that might have an effect on our liquidity and might have serious effects on adequate working capital requirements. We are dependent on various banks for arranging of our working capital requirement etc. Accordingly, any change in the existing banking policies or increase in interest rates may have an adverse impact on profitability of our company.

48. *With time we might be liable to other labor laws which were not applicable before leading to increase cost and time to be invested in its compliance.*

Employees form the integral part of the operation of our business. Any labor disputes or unrests could lead to loss of production, increased costs or delays which could lead to penalties. We are subject to a number of stringent labor legislation that protects the interests of workers and defines our duties and obligations towards them in the capacity of principal employers, including legislations that sets forth detailed procedures for employee removal and dispute resolution and impose financial obligations on us. We are also subject to state and local laws and regulations. If labor laws become more stringent or are more strictly enforced, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have an adverse effect on our business, results of operations, financial condition and cash flows. Any organizational changes, including changes in salaries and wages and other employee benefits that are, or are perceived to be negative, could result in an increased attrition rate. We cannot assure you that there may not be incidences of labor unrest and absenteeism from work by some of our employees. Labour shortages could increase the cost of labor and hinder our productivity and ability to adhere to our delivery schedules for our projects, which would materially and adversely affect our business, financial condition, results of operations and prospects.

49. *We may, from time to time, look for opportunities to enter strategic alliances, acquire businesses or enter into joint venture arrangements. Any failure to manage the integration of the businesses or facilities post such acquisition or joint venture may cause our profitability to suffer.*

We may, from time to time, look for opportunities to acquire businesses or enter into strategic partnerships or alliances. Such acquisitions may not contribute to our profitability, and we may be required to incur or assume debt or additional expenses beyond our forecasts or assume contingent liabilities, as part of any acquisition. Further, the acquisitions may give rise to unforeseen contingent risks relating to these businesses that may only become apparent after the merger or the acquisition is finalized. We may also face difficulty in assimilating and retaining the personnel, operations and assets of the acquired company. Further, we may not be able to accurately identify or forge an alliance with appropriate companies in line with our growth strategy. In the event that the alliance does not perform as estimated, or the inability on the part of our joint venture partner to meet the customer requirements may lead to a failure of such an arrangement which may adversely affect our business.

50. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates,

commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

51. Any disproportionate increase in labor costs including increase in wage/salary demand, labor unrest or labor claims arising from accidents may adversely affect our business operations and financial conditions.

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labor unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labor costs may increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

52. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

53. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

54. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

55. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

56. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

57. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

58. *We may, from time to time, look for opportunities to enter strategic alliances, acquire businesses or enter into joint venture arrangements. Any failure to manage the integration of the businesses or facilities post such acquisition or joint venture may cause our profitability to suffer.*

SECTION VI – ABOUT OUR COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMIC OVERVIEW

The baseline forecast is for growth to fall from 3.4 percent in 2022 to 2.8 percent in 2023, before settling at 3.0 percent in 2024. Advanced economies are expected to see an especially pronounced growth slowdown, from 2.7 percent in 2022 to 1.3 percent in 2023. In a plausible alternative scenario with further financial sector stress, global growth declines to about 2.5 percent in 2023 with advanced economy growth falling below 1 percent. Global headline inflation in the baseline is set to fall from 8.7 percent in 2022 to 7.0 percent in 2023 on the back of lower commodity prices but underlying (core) inflation is likely to decline more slowly. Inflation’s return to target is unlikely before 2025 in most cases.

The natural rate of interest is important for both monetary and fiscal policy as it is a reference level to gauge the stance of monetary policy and a key determinant of the sustainability of public debt. Chapter 2 aims to study the evolution of the natural rate of interest across several large advanced and emerging market economies. Public debt as a ratio to GDP soared across the world during COVID-19 and is expected to remain elevated. Chapter 3 examines the effectiveness of different approaches to reducing debt-to-GDP ratios. Supply-chain disruptions and rising geopolitical tensions have brought the risks and potential benefits and costs of geo economic fragmentation to the center of the policy debate.

Tentative signs in early 2023 that the world economy could achieve a soft landing with inflation coming down and growth steady—have receded amid stubbornly high inflation and recent financial sector turmoil. Although inflation has declined as central banks have raised interest rates and food and energy prices have come down, underlying price pressures are proving sticky, with labor markets tight in a number of economies. Side effects from the fast rise in policy rates are becoming apparent, as banking sector vulnerabilities have come into focus and fears of contagion have risen across the broader financial sector, including nonbank financial institutions. Risks to the outlook are heavily skewed to the downside, with the chances of a hard landing having risen sharply.

Note: For India, data and forecasts are presented on a fiscal year basis, with FY 2022/2023 (starting in April 2022) shown in the 2022 column. India's growth projections are 5.4 percent in 2023 and 6.3 percent in 2024 based on calendar year.

INDIAN ECONOMY OVERVIEW

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Recent developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below:

- ❖ As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- ❖ The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.

- ❖ Merchandise exports in September 2022 stood at US\$ 32.62 billion.
- ❖ PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- ❖ In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).
- ❖ Between April 2000 - June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
- ❖ In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- ❖ According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- ❖ In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 58,762 crore (US\$ 7.13 billion)

Road ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFLs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN ECONOMY SURVEY 2022-23

Ms. Nirmala Sitharaman, Union Minister for Finance presented the Economic Survey 2022-23 in the Union Parliament on January 31, 2023. The key highlights of the Economic Survey 2022-23 are as follows:

INDIAN MANUFACTURING INDUSTRY

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

India is an attractive hub for foreign investments in the manufacturing sector. One of the initiatives by the Government of India's Ministry for Heavy Industries & Public Enterprises is SAMARTH Udyog Bharat 4.0, or SAMARTH Advanced Manufacturing and Rapid Transformation Hubs. This is expected to increase competitiveness of the manufacturing sector in the capital goods market. With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

Advantages of Investment in India

ROBUST DEMAND	INCREASING INVESTMENT	COMPETITIVE ADVANTAGE
<ul style="list-style-type: none"> • India's manufacturing exports for FY22 reached an unprecedented US\$ 418 billion, an overall growth of more than 40% compared to the US\$ 290 billion from the previous year. • By 2030, Indian middle class is expected to have the second-largest share in global consumption at 17%. 	<ul style="list-style-type: none"> • Propelled by growth in priority sectors and driven by favourable megatrends, India's manufacturing sector has opened itself into new geographies and segments. • Building on the competitive advantage of a skilled workforce and lower cost of labour, the manufacturing sector is also witnessing an increased inflow of capex and heightened M&A activity, leading to a surge in manufacturing output and resultant increased contribution to exports. 	<ul style="list-style-type: none"> • The positive developments in the manufacturing sector, driven by production capacity expansion, government policy support, heightened M&A activity, and PE/VC-led investment, are creating a robust pipeline for the country's sustained economic growth in the years to come.

INDIAN ENGINEERING AND CAPITAL GOODS INDUSTRY

India's Capital Goods manufacturing industry serves as a strong base for its engagement across sectors such as Engineering, Construction, Infrastructure and Consumer goods, amongst others. India's engineering sector has witnessed a remarkable growth over the last few years, driven by increased investment in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of huge strategic importance to India's economy.

The development of the engineering sector of the economy is also significantly aided by the policies and initiatives of the Indian government. The engineering industry has been de-licensed and allows 100% foreign direct investment (FDI). Additionally, it has grown to be the biggest contributor to the nation's overall merchandise exports.

Market Size

Capital Goods sector contributes to 12% of India's manufacturing output and 1.8% to GDP. Market valuation of the capital goods industry was US\$ 43.2 billion in FY22.

Road Ahead

- The electrical equipment market share in India is expected to increase by US\$ 33.74 billion from 2021 to 2025, and the market's growth momentum will accelerate at a CAGR of 9%.
- Investment in engineering R&D sector is expected to reach US\$ 63 billion by 2025.

INJECTION MOULDED PLASTIC MARKET

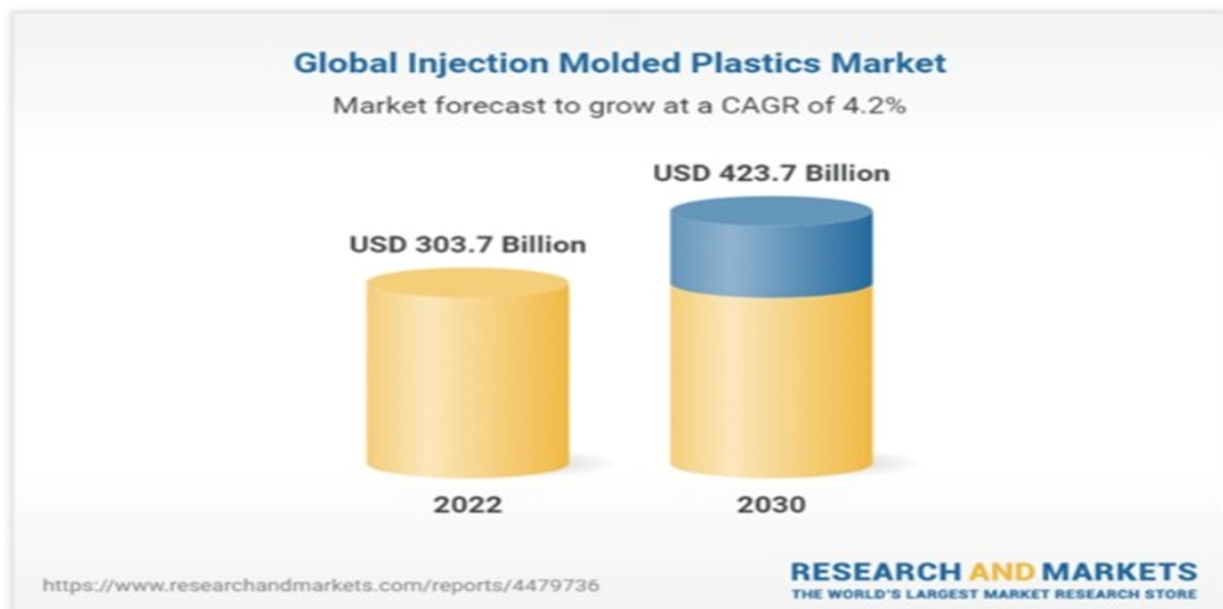

About

The global injection molded plastics market size is anticipated to reach USD 423.7 billion by 2030, registering a CAGR of 4.2% in the forecast period. Growing demand from key applications including automotive, packaging, and

construction, particularly in Brazil, Russia, India, China, and South Africa (BRICS) nations, is likely to drive the growth. The high-growth regions, such as Middle East and Asia Pacific, have witnessed a surge in capacity addition over the last few years. An increasing number of plastic injection molding companies in China on account of low manufacturing costs and ample availability of skilled labor is anticipated to benefit the regional market.

Major foreign companies are increasing their production capabilities in the region owing to the growing demand for plastic products. Government support in the form of tax benefits and financial incentives in China and India to increase the FDI flow has helped develop the market for plastics in these countries. In packaging applications, High-density Polyethylene (HDPE) is extensively used in thin wall injection molding. Growing demand for food, bin liners, and thing gauge bags is further anticipated to drive the segment growth over the forecast period. Rising penetration of injection-molded HDPE in shipping containers, industrial pails, and houseware applications is anticipated to further drive its demand over the forecast period.

The COVID-19 pandemic has affected the revenue generation of the companies operating in the market owing to the halt or slowdown in the production facilities. Thus, the companies are focusing on stepping up their resources and production capabilities to help in the fight against the pandemic. For instance, G&C products, a U.S.-based plastic injection mold making company that produces plastic products for the fishing and medical industry, started the production of Personal Protective Equipment (PPE), such as face shields and face masks.

DIE & MOULD MARKET

The die & mold market is expected to grow from USD 1.8 billion in 2017 to USD X.X billion by 2028, at a Compound Annual Growth Rate (CAGR) of 3.1%. These dies can be made up of various materials such as copper alloy, aluminum alloys, and steel depending on the pressure and strength required for them. The process of manufacturing die includes designing & simulation, machining, and surface treatment.

Liquid Moulds

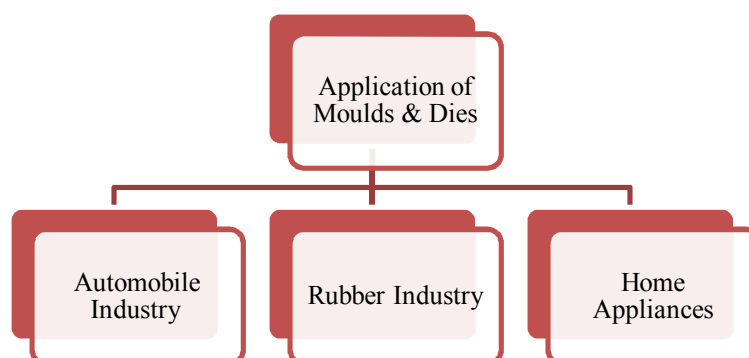

Liquid Moulds are the most commonly used molding process in the die & mold industry. It is a continuous molding system that can be applied to any product that has very complex shapes with several components and thin walls, including medical devices, electronic appliances, etc. This type of molding process is highly used in the automotive and medical equipment industry.

Solid Moulds

Solid Moulds are a type of die & mold which can be manufactured by injection molding, compression molding, etc. It has high dimensional accuracy and surface quality as it involves no parting line removal or core sanding. This type of mold is a good choice for low-volume production and prototyping. It also helps in improving design flexibility and can reduce cycle time.

Dies

A die is a tool used to cut or shape material mainly with press machines. The dies are divided into two types – solid & shell molds depending on their construction. Solid Dies have no cavity, but they also prevent pressure from being applied directly onto the material being cut or shaped. The dies are built with high-quality alloy steel that ensures precision in operations & quality results.

Automobile Industry

Moulds are used for several applications in the automotive industry such as tooling and die casting. Automobile companies use Die to produce metal parts with high accuracy and strength. It is also used for making plastic injection

molds that impact the mass production of vehicles. The global auto-component market has been witnessing significant growth on account of increasing automotive production.

Rubber Industry

Moulds are used in the tire industry to manufacture rubber products, such as tires. A Die is a tool that is used to shape or cut metal into different shapes. It can be of many types including flat die, sanding/polishing dies, and others depending on the application. The mold also known as die is generally made of hard metal like steel or cast iron. It has two halves that are hinged together with a lock to hold the die & mold in place during the manufacturing process.

Home Appliance

Mould is used in Home appliances to provide the proper shape of plastic parts. Mold manufacturing companies are providing various sizes and types of dies Molds that can be suited for different purposes. These dies help manufacturers manufacture the required product with perfect shape, design, and features that meet industry standards.

PRECISION ENGINEERING MACHINES

Overview

The global precision engineering machines market size was valued at USD 13.07 billion in 2022 and is expected to grow at a compound annual growth rate (CAGR) of 6.8% from 2023 to 2030. The rising demand for advanced precision machining solutions and the emphasis on lowering downtime to boost production efficiency, boost accuracy, and optimize machining procedures are the main factors for the expansion of the market. By reducing machining time, advanced machining techniques help to reduce the cost of materials, setup, and custom machining. Because of this, manufacturing companies commonly employ precision engineering machinery in their manufacturing spaces.

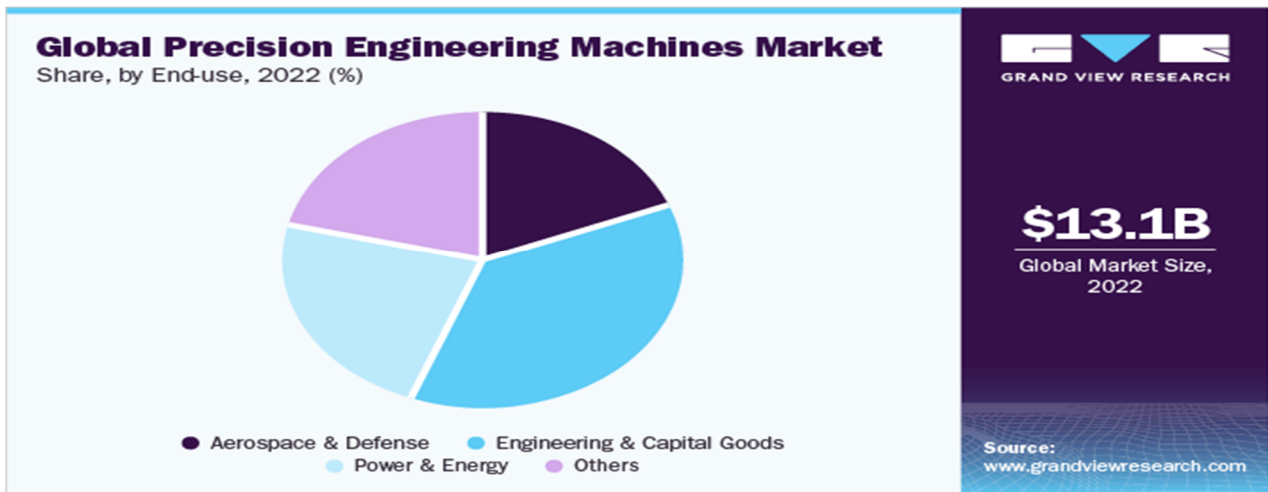

Precision engineering includes the development of precise machine tools and the evaluation of machine design, construction, precision valuation and procedure, research and development, and the manufacturing and very accurate measurement of goods and parts. Precision engineering tools can be used to meet the demands of both mass production and exceedingly fine detail. The accuracy that computerized machining systems provide greatly reduces repeated work and machining time, increasing the effectiveness of industrial operations.

End-use Insights

The non-automotive segment held the largest market share of nearly 78.0% in 2022. This segment includes aerospace and defense, engineering and capital goods, power and energy, and others. The aerospace industry has observed increased demand for advanced materials such as nickel alloys and titanium alloys in recent years, leading to the increased use of machine tools and cutting tools. In the capital goods industry, heavy equipment and shipbuilding are

expected to experience high demand for precision engineering machinery due to the growing production of heavy equipment in APAC countries such as Japan and China.

Regional Insights

Asia Pacific dominated the precision engineering machines market in terms of market share in 2022 at over 33.0%. Precision engineering equipment is rapidly gaining importance in China's manufacturing sector. China is seeing profitable growth prospects in products and services, including CNC manufacturing systems and optimized manufacturing service centers in order to meet the growing demand for advanced manufacturing and CNC machining services. Countries like India and South Korea are also experiencing a growth in demand for precision engineering machinery in end-use industries like the automotive and power & energy industries.

The Competition Act regulates anti-competitive agreements, abuse of dominant position and combinations. The Competition Commission of India ("Competition Commission") which became operational from May 20, 2009, has been established under the Competition Act to deal with inquiries relating to anti-competitive agreements and abuse of dominant position and regulate combinations. The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti-competitive agreement, abuse of dominant position or a combination, which even though entered into, arising, or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

It determines the circumstances in which promise made by the parties to a contract shall be legally binding on them.

The Specific Relief Act, 1963

The Specific Relief Act is complimentary to the provisions of the Contract Act and the T.P. Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. 'Specific performance' means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Transfer of Property Act, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer property by operation of law, is governed by the Transfer of Property Act, 1882 ("T.P. Act."). The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: The transfer of ownership in property for a price paid or promised to be paid.
- Mortgage: The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognizes several forms of mortgages over a property.
- Charges: Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- Leases: The transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.
- Leave and License: The transfer of a right to do something upon immovable property without creating interest in the property.

Further, it may be noted that with regards to the transfer of any interest in a property, the transferor transfers such interest, including any incidents, in the property which he is capable of passing and under the law, he cannot transfer a better title than he himself possesses.

The Registration Act, 1908 ("Registration Act")

The Registration Act, 1908 ("Registration Act") was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Registration Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Registration Act is used for proper recording of transactions relating to other immovable property also. The Registration Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

2.1 Significant accounting policies**a) Use of estimates**

The preparation of the financial statements in conformity with generally accepted accounting principles in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The Company's most significant estimates include those on the useful life of assets, deferred taxes and provision for taxes. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates.

b) Current-non-current classification**Assets**

An asset is classified as current when it satisfies any of the following criteria:

- c. it is expected to be realised within 12 months after the reporting date; or

Depreciation is provided over the estimated useful life of the assets using written down value method. The rates of depreciation used are those which have been calculated as per the method specified in Schedule II of the Companies Act, 2013. The new Companies Act prescribes that the asset should be written off over its useful life as estimated by the management and provides the indicative useful lives for the different class of assets. Other assets are depreciated over their balance useful life.

d) Impairment of assets

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the statement of profit and loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognized.

e) Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

RECENT DEVELOPMENT

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Economic conditions in the markets in which we operate

Our results of operations are dependent on the overall economic conditions in the markets in which we operate, including India. Any change in macro-economic conditions in these markets, including changes in interest rates, government policies or taxation and political, economic or other developments could affect our business and results of operations. Our diversification to multiple sectors in India may perform differently and be subject to market and regulatory developments that are dissimilar to the markets in other parts of the world. While stronger economic conditions tend to result into higher demand for our products, weaker economic conditions tend to result into lower demand. Change in demand in the market segments we currently supply or improvement/deterioration in the market or a change in regulations, customs, taxes or other trade barriers or restrictions could affect our operations and financial condition.

Dependence of demand from end-user industries

We have a diversified customer base and believe that we have strong and long established relationships with most of our customers. Although our products are sold to a large number of customers across various markets, a significant portion of our revenue is derived from our top ten customers, which constitutes 87.39% of our revenue from operations for the period ended March 31, 2023. Significant reliance on these and other major customers may result in certain pricing pressures. Any loss or significant decrease in business from one or more of our significant customers would have an adverse effect on our sales. In addition, the income from these customers may vary from year to year. Demand for our products from these customers has a significant impact on our results of operations and financial condition, and our sales are particularly affected by the inventory and production levels of our key customers.

We cannot predict when our customers will decide to either increase or reduce inventory levels which may have an impact on us. We may experience reduction in cash flows and liquidity if we lose one or more of our major customers or if the amount of business from them is reduced for any reason. For majority of our customers, we have some arrangements which defines the terms and conditions of purchases by such customers. These purchase orders specify the price at which the products are to be supplied and the quantities are supplied based on delivery schedules provided by the customers based on their own demand and supply situation. Although our customers provide us with forecasts of annual business volumes, which enable us to predict our income for a portion of our business, the actual orders are only placed by way of on-going purchase orders. Actual production volumes may vary from these estimates due to variations in consumer demand for the related product leading to underutilized capacity or incurring additional expenditure to deploy additional resources to meet delivery timelines.

Our ability to successfully implement its strategy and its growth and expansion plans

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new distribution agreement, our ability to maintain customer satisfaction, our ability to mobilize sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, availability of cheaper imported / domestic products / brands, competition within each product category from players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public Issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public Issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public offers, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Issue closure to listing is proposed to be reduced to three working days.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – issue LM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Issue Opening Date. All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company and the Selling Shareholders will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after an application is made by the SCSBs to the LM with a copy to the Registrar, and such application shall be made only after (i) unblocking of application

amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB in accordance with April 20, 2022 Circular.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued, issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government.
