Time

All references to time in this Prospectus are to Indian Standard Time. Unless indicated otherwise, all references to a year in this Prospectus are to a calendar year.

This Prospectus may contain conversions of certain US Dollar and other currency amounts into Indian Rupees that have been presented solely to comply with the requirements of the SEBI (ICDR) Regulations. These conversions should not be construed as a representation that those US Dollar or other currency amounts could have been, or can be converted into Indian Rupees, at any particular rate.

FORWARD-LOOKING STATEMENTS

This Prospectus contains certain “forward-looking statements”. All statements in this Prospectus that are not statements of historical fact are ‘forward-looking statements’.

These forward-looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “expect”, “estimate”, “intend”, “likely to”, “objective”, “plan”, “propose”, “project”, “seek”, “will”, “will continue”, “will pursue” or other words or phrases of similar import. Similarly, statements that describe our strategies, objectives, plans or goals are also forward-looking statements. All forward-looking statements are subject to risks, uncertainties, expectations and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Actual results may differ materially from those suggested by forward-looking statements due to risks or uncertainties associated with expectations relating to and including, regulatory changes pertaining to the industry in India in which we operate and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India which have an impact on its business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes and changes in competition in the industry in which we operate.

Certain important factors that could cause actual results to differ materially from our expectations include, but are not limited to, the following:

- If we fail to identify and effectively respond to changing consumer preferences and spending patterns or changing dietary habits in a timely manner, the demand for our products could decrease, causing our business, results of operations, financial condition and cash flows to be adversely affected.
- Our brands and reputation are critical to the success of our business and may be adversely affected due to various reasons, which could have an adverse effect on our business, financial condition, cash flows and results of operations.
- The launch of new brands or products that prove to be unsuccessful could affect our growth plans which could adversely affect our business, financial condition, cash flows and results of operations.
- Our dependence on suppliers for all our products subjects us to risks, which, if realized, could adversely affect our business, results of operations, cash flows and financial condition.
- We may be subject to unfair competitive or trade practices, which may reduce our sales and harm our brands, adversely affecting our business, financial condition, cash flows and results of operations.
- Product liability claims and product recalls could harm our reputation, business, financial condition, cash flows and results of operations.
- If we are unable to identify consumer demand accurately and maintain an optimal level of inventory, our business, results of operations, cash flows and financial condition may be adversely affected.

For discussion regarding factors that could cause actual results to differ from expectations, see “Risk Factors”, “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 25, 97, 107, and 237, respectively. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

There can be no assurance to Investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, Investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

Forward-looking statements reflect our current views as of the date of this Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are

based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, KMPs, the Selling Shareholders, the Market Maker nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

Summary of the industry in which our Company operates

INDIAN SNACK INDUSTRY

A snack is everything we eat or chew either between main meals or to replace those meals. Snacking in between the meals has always been traditional in Indian culture. Further the Covid-19 forced lockdown has increased this habit of snacking multi-fold and is driving the growth of this industry.

Indian Snack Industry Statistics

64%	71%	85%
consumers say they prefer to eat many small meals throughout the day, as opposed to a few large ones	consumers around the world snack at least twice a day	consumers take special note of the brand, packing, and nutritional value while purchasing RTE snacks

The Indian snack food market is estimated to be US\$ 6.6 billion and is growing at a CAGR of 6.3%.

Consumers are increasingly replacing meals with snacks and reporting higher likelihood to eat a snack across all three standard mealtimes. With a significant increase in main meal skipping, it is important to note that 40% of consumers “skipped at least one main meal” in 2021 vs. 30% in 2013, with breakfast being the most skipped. Over half (55%) report their households make a meal out of snacks at least weekly. Members of Gen Z (those aged 16 to 24 years) along with slightly older millennials (25- to 34-year-olds), and specifically women within those demographics drive snacking growth.

The market is characterized by a large number of unorganized players across the product segments. However, with time, large FMCG companies understood the potential of the snacks market and entered it in a big way, using their existing supply chain to their advantage. These companies are typically characterized by a large product portfolio across multiple product categories, aggressive advertisements and promotions, active R&D, etc.

SECTION II: RISK FACTORS

An investment in Equity Shares involves a high degree of risk. Prospective investors should carefully consider all the information in this Prospectus, including the risks and uncertainties described below before making an investment in the Equity Shares.

We have described the risks and uncertainties that we believe are material, but these risks and uncertainties may not be the only risks relevant to us, the Equity Shares, or the industry in which we currently operate or propose to operate. Unless specified or quantified in the relevant risk factor below, we are not in a position to quantify the financial or other implication of any of the risks mentioned in this section. If any or a combination of the following risks actually occur, or if any of the risks that are currently not known or deemed to be not relevant or material now actually occur or become material in the future, our business, cash flows, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment.

To obtain a more detailed understanding of our business and operations, see this section in conjunction with the sections titled “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 97, 107 and 237, respectively, as well as other financial and statistical information contained in this Prospectus. Unless otherwise indicated or unless the context requires otherwise, our financial information used in this section are derived from our Restated Consolidated Financial Statements. In making an investment decision, prospective investors must rely on their own examination of our business and the terms of the Offer, including the merits and risks involved. Prospective investors should consult their tax, financial and legal advisors about the particular consequences to them of an investment in our Equity Shares.

This Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including but not limited to the considerations described below. For details, see “Forward-Looking Statements” beginning on page 16.

Unless otherwise indicated or the context otherwise requires, in this section, references to “we”, “us” and “our” are to Proventus Agrocom Limited together with its subsidiaries on a consolidated basis.

INTERNAL RISK FACTORS

- 1. Any actual or alleged contamination or deterioration of our products could result in legal liability or damage our reputation. Further, food safety and food-borne illness incidents or other safety concerns may materially and adversely affect our business by exposing us to lawsuits, product recalls or regulatory enforcement actions, increasing our operating costs and reducing demand for our product offerings. Further, the loss of certain independent certification and accreditation of our products and the practices that we have adopted could harm our business.***

We are subject to various contamination-related risks associated with the dry fruits and healthy snacks industry, such as product tampering; short shelf life; improper storage of products and raw materials; adulteration of products with any substance unfit for human consumption; labelling and packaging errors; inferior quality raw materials; non-compliance with food safety and quality control standards; cross-contamination of products during manufacturing; as well as contamination of products during manufacturing or transportation.

Our products may contain undetected quality issues, especially during the manufacturing process or in process of developing new products due to various reasons including but not limited to inferior or contaminated raw material. While we believe that we have implemented stringent quality control procedures at our own and contract manufacturing facilities, including inspection of raw materials procured and monitoring of the processing and packaging process, there can be no assurance that our quality control procedures at our own or contract manufacturing facilities will be adequate or will not fail, or that the quality tests and inspections conducted by us will be accurate at all times.

Any actual or alleged contamination or deterioration of our products, whether deliberate or accidental, could result in legal liability, damage to our reputation and may adversely affect our business prospects and

consequently our financial performance. The risk of contamination or deterioration exists at each stage of the processing cycle, including during the storage and delivery of raw materials, packaging, storage and shelving of our products by our indirect distributors and end retailers until final consumption by consumers. While we follow stringent quality control processes and quality standards at each stage of the processing cycle, there can be no assurance that our products will not be contaminated or suffer deterioration. We also employ third-party transportation providers to deliver our products to our various indirect distributors. Further, there can be no assurance that contamination of our raw materials or products will not occur during the transportation, processing, distribution and sales processes due to reasons unknown to us or beyond our control. If our products or raw materials are found to be spoilt, contaminated, tampered with, incorrectly labelled or reported to be associated with any such incidents, we may be forced to recall our products from the market and we could incur criminal or civil liability for any adverse medical condition or other damage resulting from consumption of such products, which we may not be able to fully recover from our suppliers or insurance coverages. We may also be subject to liabilities arising out of such violations under the provisions of the erstwhile Prevention of Food Adulteration Act, 1954 (“**PFA Act**”) and Food Safety and Standards Act, 2006 (“**FSS Act**”) along with relevant rules and regulations. We cannot assure you that we will not be subject to any legal proceedings under the FSS Act. We may be also subject to legal proceedings under Export (Quality Control and Inspection) Act, 1963, Consumer Protection Act, 2019 and the rules framed thereunder.

The occurrence of food-borne illnesses or other food safety incidents could also adversely affect the price and availability of affected ingredients and raw materials, resulting in higher costs, disruptions in supply and a reduction in our sales. Further, any instances of food contamination or regulatory noncompliance, whether or not caused by our actions, could compel us to conduct a recall in accordance with the applicable regulations, including the FSS Act.

Further, contamination of any of our products could also subject us to product liability claims, adverse publicity and government scrutiny, investigation or intervention, product return, resulting in increased costs and any of these events could have a material and adverse impact on our reputation, business, financial condition, cash flows, results of operations and prospects. Although historically we have not experienced any significant product liability claims or similar allegations against us or our products, there can be no assurance that there will not be any such claims or allegations in the future which could materially and adversely affect our business and financial performance or lead to civil and criminal liability or other penalties. Any negative claim against us, even if meritless or unsuccessful, could divert our management’s attention and other resources from other business concerns, which may adversely affect our business and results of operations. Any such event may have a material adverse effect on our reputation, business, financial condition, cash flows, results of operations and prospects.

Further, we rely on independent certification of our products and must comply with the requirements of independent organizations or certification authorities. Our processing plant is compliant with the requirement of FSSC 22000. We could lose the certifications and accreditations for certain of our products if we are not able to adhere to the quality standards and specifications required under such certifications and accreditations. The loss of any independent certification and manufacturing practices may restrict our ability to sell our products, which could have a material adverse effect on our reputation, business, financial condition and results of operations.

2. *Inadequate or interrupted supply and price fluctuation of our raw materials and packaging materials could adversely affect our business, results of operations, cash flows, profitability and financial condition.*

Cost of our products is dependent on our ability to source raw materials and packaging materials at acceptable prices and maintain a stable and sufficient supply of our major raw materials. The raw materials we use are subject to price volatility and unavailability caused by external conditions, such as commodity price fluctuations within India and globally, weather conditions, supply and demand dynamics, logistics and processing costs, our bargaining power with the suppliers, inflation and governmental regulations and policies. We have, in the past, experienced disruption in the supply of certain of our raw ingredients and as such, commodity price increases may result in unexpected increases in prices of our raw ingredients and packaging material costs. The change in global prices makes a significant impact on the prices of these commodities from our raw materials source, which we may not be able to pass on to the consumers and which would correspondingly affect our various margins and financial condition. If we are unable to manage these costs or to increase the prices of our products to offset these increased costs, our margins, cash flows and overall profitability may be adversely affected.

Our business is also dependent on suppliers of our raw materials. We do not enter into long term supply arrangements for our raw materials, *i.e.*, arrangements which are valid for more than 12 (twelve) months. If any of the key suppliers of our raw materials fail for any reason to deliver raw materials in a timely manner or at all, it may affect our ability to manage our inventory levels, processing and packing of relevant products, and ability to supply such products to end retailers. This may also result in an increase in our procurement costs which we may or may not be able to pass on to our customers. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

3. *Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates. Our inability to effectively manage our growth or implement our growth strategies may have a material adverse effect on our business prospects and future financial performance.*

We have experienced growth in our financial performance over the past three years. Our sale of retail packaging (“ProV” brand) increased from ₹ 3,505.01 lakhs in Fiscal 2020 to ₹ 7,676.15 lakhs in Fiscal 2022, at a CAGR of 47.99% and was ₹ 15,207.75 lakhs in the nine months ended December 31, 2022. Our EBITDA increased from ₹ (2,167.47) lakhs in Fiscal 2020 to ₹ 349.91 lakhs in Fiscal 2022 and was ₹ 400.33 lakhs in the nine months ended December 31, 2022. Our EBITDA margin was 0.82%, 1.16%, 0.35% and negative during the nine months period ended December 31, 2022 and in Fiscal 2022, 2021 and 2020, respectively. As a result of significant expansion, our business and organization have become, and are expected to continue to become, considerably more complex. This requires us to adapt continuously to meet the needs of our growing business and could expose us to a number of factors that may negatively impact our business, financial condition and results of operations.

While we have built governance frameworks and operational management systems to manage our business operations and to support our growth, in the future, in particular, our success will depend on our ability to adapt continuously to meet the needs of our growing business, in particular, to:

- maintain and develop a consistent and strong brand identity and further develop our brand strength across a growing organization and an increasing number of markets, especially in light of our expansion and new products;
- ensure safe movement and storage of inventory;
- source, at appropriate prices, the amount of raw materials required for increased business operations;
- attract and retain experienced, high quality management and other key employees;
- identify potential new markets and suitable locations for our processing facilities;
- respond to increasing competition from competitors in the existing markets we cover as well as new markets we may enter in the future; and
- respond to regional preferences in healthy snacking segment and changing customer demands.

We may not be able to adequately respond to any of the foregoing factors or otherwise manage our significant growth which could negatively impact our business, financial condition and results of operations.

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategies include implementing distinctive growth strategies for our core markets, focus markets and other markets, establishing strategically located new processing facilities to pursue growth in our focus and other markets, usage of advanced technology to further optimise our operations, and further strengthening our brand. For further information, see “*Our Business - Key Strategies*” on page 121.

Our ability to expand may be impacted by various factors, including controlling our operating or investment costs, effectively managing our internal supply chain and manufacturing processes, and other business and competitive uncertainties and factors beyond our control such as a shift in customer preferences or a slowdown in the global economic and market conditions, resulting in a decline for our products, infrastructure and logistical challenges, our lack of familiarity with the local culture and tastes, legal regulations and economic conditions in new markets, language barriers, and the lack of brand recognition and reputation. In addition, we could face challenges from global competitors and incumbent local organised and unorganised players in our industry, who may have stronger and more established operations and may have advantages

over us in terms of product diversity, pricing and local knowledge, among other factors. However, there can be no assurance that our future growth strategy will be successful or that we will be able to continue to expand further, or at the same rate.

4. *Any significant interruption in continuing operations of our production or cold storage facilities could have a material adverse effect on our business, results of operations, cash flows and financial condition.*

As of the date of this Prospectus, we have one manufacturing facility situated at A-793, TTC Industrial Area, Khairane, Navi Mumbai and a cold storage facility located at Agro Fresh Cold Storage, C-256, MIDC, Pawne, Navi Mumbai on lease basis under ProV Foods. The previous manufacturing facility situated at Gen 71/2, TTC Industrial Area, Mahape, Navi Mumbai has been vacated and no manufacturing activity is being carried over there. These facilities are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, directives from government agencies, water shortages and power interruptions. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair the malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same. Our raw materials are perishable products and consequently, any malfunction and break down of the cold storage facility may affect the stored raw materials, which have a limited shelf life, and this, along with any significant impact on other raw materials could result in slow down or cessation of our operations which may adversely affect our business and prospects. Although we have not experienced any significant disruptions at our manufacturing facilities in the past, we cannot assure you that there will not be any significant disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations or the under-utilization of our manufacturing and cold storage facilities, which in turn may have an adverse effect on our business, results of operations, cash flows and financial condition.

5. *We operate in an environmentally sensitive industry and are subject to disruptions due to unpredictable or unseasonal weather impacting the geographies from where we procure our raw material. Consequently, extreme climatic changes or natural calamities impacting such geographies, may have an adverse effect on our business, results of operations, cash flows and financial condition.*

Dry fruits are agri produce and therefore their cultivation is dependent on sensitive weather conditions, including water, rainfall, sunlight, etc. Changes in the weather due to severe, unpredictable or unseasonal changes and abnormalities like draught, unpredictable rainfall or storm may impact the farming of dry fruits, its quality or taste and also impact the availability and price of such agri produce. Such abnormalities may have an adverse impact on our operations across our value chain including but not limited to the procurement operations and processing activities. We may be subjected to decreased availability of dry fruits, nuts, seeds and berries which are the primary raw material for our business operations. Such decreased availability of raw material in turn may increase our acquisition cost from similar or alternate markets and may result in higher cost of operations with material adverse effect on our business, results of operations, cash flows and financial conditions.

Further, while we forecast the demand for our products and accordingly plan our procurement volumes for import operations, any error in our forecast could result in surplus stock, which may not be sold in a timely manner. The raw material procured has a specific shelf life and if not sold prior to expiry, may lead to losses or if consumed after expiry, may lead to health hazards. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations, future cash flows and financial condition.

6. *Our business is subject to changes and the demand for our products may decrease due to change in consumer taste, dietary habits, preferences, perceptions and spending patterns, which could have a material adverse effect on our business, results of operations, and financial condition.*

Our business depends substantially on factors such as consumer preferences and tastes, consumer income, consumer perceptions of, and confidence in, our product safety and quality, and consumer awareness of health issues, all of which affect consumer spending patterns. Our products focus small retail packaging and recently have also introduced low price point segment with mid meal snack concept. A decline in the demand for our products or non acceptability of the newly introduced product segments could occur as a result of a change in any of the factors described above at any time, and our future success will depend partly on our ability to

anticipate, identify or adapt to such changes and to timely implement new advertising and promotion strategies that can attract consumers to our products.

Our competitive position depends on our continued ability to offer products that have a strong appeal to consumers. If consumer preferences change due to shifts in consumer demographics, national, regional or local economic conditions, consumer tastes, dietary habits, trends in food sourcing or food preparation or changing levels of customer acceptance of our brand, and we are not able to adapt our products or customer offering to account for these changes, our consumers may begin to seek alternative options, which would adversely affect our financial results. We cannot assure you that we will be able to adapt our product portfolio to changes in food trends or shifts in consumer preferences and tastes. Customers may turn to our competitors offering healthier convenience food options. We may not be able to introduce new products that are in faster-growing and more profitable categories or reduce our production of products in categories experiencing consumption declines. Additionally, trends and shifts in consumer preferences and tastes may apply downward pressure on sales and pricing or lead to increased levels of selling and promotional expenses. If we are unable to adapt our products to successfully meet changes in consumer tastes and trends, our business and financial condition may be materially and adversely affected. Our success in responding to consumer demands depends in part on our ability to anticipate consumer preferences and introduce new products to address these preferences in a timely fashion. Any failure to successfully anticipate and address changing customer preferences could have a material adverse effect on our business, results of operations and financial condition.

7. *We may not be able to derive the desired benefits from our product development efforts or launch of new brands.*

We currently sell our retail products under a single brand, “ProV” through our subsidiaries, ProV Foods and Proventus Retail, wherein we sell a variety of products and have more than 100 SKUs across various price ranges. Our competitiveness is dependent on our ability to develop new products and more efficient processing and packing capabilities. We place significant emphasis on product development, in particular, to improve the quality of our products and expand our new product offerings or introduce new brands, which we believe are crucial for our future growth and prospects.

Further, there can be no assurance that our newly developed products will achieve commercial success. Even if such products can be successfully commercialised, there is no guarantee that they will be accepted widely by the market. In addition, we cannot assure you that our existing or potential competitors will not develop products which are similar or superior to our products. It is often difficult to project the time frame for developing new products and the duration of market demand for these products, there is a substantial risk that we may have to abandon a potential product that is no longer commercially viable, even after we have invested significant resources in the research and development of such product.

8. *We may incur additional cost on marketing and advertising campaigns for increasing the brand awareness of our products and such marketing and advertising campaigns may not be effective compared to our competitors’ advertising and promotional programs which could adversely affect our competitive position.*

We currently plan to make sustained investment in social media and mass media channels, such as regular advertisements / commercials and big ticket and high impact media properties, to promote our products, as increasing the awareness of the ProV and related brands of our Company is an important part of our strategy to expand our business into new regions and locations in India. However, our marketing and advertising campaigns may not be effective to the extent planned or at all and we may, therefore, fail to attract new customers or retain existing customers. In particular, an important part of our business strategy is to position our brand for millennials through our marketing and advertising campaigns, both on television / print media and social media. In order to achieve the same, we need to continuously innovate and develop our mass media and social media strategies in order to maintain brand appeal with millennials and our other customers. In addition, we may fail to penetrate new target markets if our marketing and advertising programs are unsuccessful or not appropriately tailored to appeal to the target market or if our competitors increase their spending on advertising and promotion or their marketing and advertising campaigns is effective than ours. If our marketing and advertising campaigns are not as effective as our competitors, our ability to increase our brand awareness and our competitive position could be adversely affected, which would have a material adverse effect on our business, results of operations and financial condition. In addition, if we increase our

investment in marketing and advertising to remain competitive, our profitability could be adversely affected, which would have a material adverse effect on our financial condition.

We currently plan to make sustained investment in social media and mass media channels, such as regular advertisements / commercials and big ticket and high impact media properties, to promote our products, as increasing the awareness of the ProV and related brands of our Company is an important part of our strategy to expand our business into new regions and locations in India. However, our marketing and advertising campaigns may not be effective to the extent planned or at all and we may, therefore, fail to attract new customers and retain existing customers. In particular, an important part of our business strategy is to position our brand for millennials through our marketing and advertising campaigns, both on television / print media and social media and in the packaging of our products. In order to do this, we need to continuously innovate and develop our mass media and social media strategies in order to maintain brand appeal with millennials and our other customers. In addition, we may fail to penetrate new target markets if our marketing and advertising programs are unsuccessful or not appropriately tailored to appeal to the target market or our competitors may increase spending on advertising and promotion or their marketing and advertising campaigns may be more effective than ours. As a result of any of these factors, we may have to make additional investment in marketing and advertising or lose market share. If our marketing and advertising campaigns are not as effective as our competitors, our ability to increase our brand awareness and our competitive position could be adversely affected, which would have a material adverse effect on our business, results of operations and financial condition. In addition, if we have to increase our investment in marketing and advertising to remain competitive, our profitability could be adversely affected, which would have a material adverse effect on our business, results of operations and financial condition.

9. *Reliance on celebrities and social media influencers as part of our marketing strategy may adversely affect our business and demand for our services. Further, our online marketing listings or reviews may constitute internet advertisement, which subjects us to laws, rules and regulations applicable to advertising.*

Our marketing strategies include engaging influencers, entering into celebrity endorsement agreements and maintaining a presence on social media platforms on whom we rely upon for our marketing and endorsement. For further details, see “*Our Business*” on page 107. The risks of engaging with influencers and celebrities include:

- any deterioration in our relationship with our celebrities and influencer network or damage to the reputation of such influencers or celebrities;
- our relationships with influencers may not always include contractual commitments to continue to be supportive of our brands or products, and there can be no assurance that they will continue to do so;
- any negative publicity created by current influencers or celebrities, or influencers or celebrities whom we formerly engaged or who is no longer supportive of our brands;
- celebrities or influencers (including their supporters) could engage in behavior damaging the reputation of such influencers or celebrities;
- if we were held responsible for the content of posts by influencers or their actions, and such posts were found to be illegal or inappropriate, we could be fined or forced to alter our practices, even when we may not always prescribe what our influencers post or act or promote;
- influencers may use their platforms to communicate directly with our consumers without our knowledge in a manner that reflects poorly on our brands and may be attributed to us; and
- any drop in celebrities’ or influencers’ satisfaction to endorse our products, brand, our platform, or consumer experience.

As social media platforms continue to rapidly evolve and new platforms continue to develop, we must continue to maintain a strong presence on these platforms and stay relevant on new or emerging trends on popular social media platforms. Our target consumers often believe readily available information and any negative commentary could drive large-scale social media campaigns and posts against us, our products or brands, whether motivated or otherwise, and result in consumer boycotts, without further investigation and without regard to accuracy of facts. It is not possible for us to prevent or moderate such behavior, and the

precautions we take to detect or restrict this activity may not be effective in all cases. The harm may be immediate and may be long-lasting, without affording us an opportunity for redress or correction. Impersonated or fake e-commerce platforms or websites, and fake social media pages and accounts, fake consumer service calls impersonating themselves as associated with our brand or business or selling our brand of products may lead to fraud and dissatisfied consumers.

Furthermore, as laws, regulations, policies governing digital platforms and public opinion rapidly evolve to govern the use of these platforms, the failure by us, our employees, our network of influencers or any third parties acting at our direction to abide by applicable laws, regulations, policies and guidelines (such as certain guidelines prescribed under the Advertising Standards Council of India (“ASCI”) Code of Self-Regulation (the “ASCI Guidelines”)) in the use of these platforms or in the process of content creation for us or otherwise could subject us to regulatory investigations, liability, fines or other penalties and have an adverse effect on our business, financial condition, cash flows and results of operations. In addition, an increase in the use of social media for product promotion and marketing may cause an increase in the burden on us to monitor compliance of such materials and content. Also, it increases the risk that such materials could contain product restricted by local regulations, or otherwise, or marketing claims in violation of applicable regulations. In certain cases, applicable guidelines (such as the Guidelines for Influencer Advertising on Digital Media, 2021 (“Digital Media Guidelines”) and ASCI guidelines) require that content created by influencers should carry a disclosure label identifying their posts as advertisements. Additionally, pursuant to the Digital Media Guidelines, the influencer must have labels on the advertisements *inter alia* ‘ad’, ‘sponsored collaboration’, ‘partnership’. Such responsibility of disclosure in terms of the Digital Media Guidelines is on our Company and also the influencer. Pursuant to the internet laws in India, we are required to take steps to moderate the content displayed on our apps and websites, such as reviews and images posted by consumers or influencers. These requirements entail considerable resources and time, and could significantly affect the operation of our business, while at the same time also exposing us to increased liability under the relevant laws, rules and regulations. The costs associated with complying with these applicable laws, rules and regulations, including any penalties or fines, could adversely affect our business, financial condition, cash flows and results of operations.

Also, the costs to enter into relationships with influencers and celebrities or engage in sponsorship initiatives may also increase over time, which may also negatively impact our margins, cash flows and results of operations. Also if we are unable to cost-effectively use social media platforms as marketing tools or if the platforms we use change their policies or algorithms, we may not be able to fully optimize such platforms, and our ability to maintain and acquire consumers and our financial condition might get impacted.

10. *Our inability or failure to recognise, respond to and effectively manage the accelerated impact of social media could materially adversely affect our business.*

In recent years, there has been a marked increase in the use of social media platforms in India, including blogs, social media websites and applications, and other forms of Internet-based communications which allow individuals access to a broad audience of consumers and other interested persons. Many social media platforms immediately publish the content for their subscribers and participants post, often without filters or checks on accuracy of the content posted. The dissemination of inaccurate information online could harm our business, reputation, prospects, financial condition and operating results, regardless of the information’s accuracy. The damage may be immediate without affording us an opportunity for redress or correction. Other risks associated with the use of social media include improper disclosure of proprietary information, negative comments about our brands, exposure of personally identifiable information, fraud, hoaxes or malicious exposure of false information. The inappropriate use of social media by our customers or employees or suppliers or other third parties could increase our costs, lead to litigation or result in negative publicity that could damage our reputation and adversely affect our business, results of operations and financial condition.

11. *We face intense competition which may lead to a reduction in our market share and may cause us to increase our expenditure on marketing and promotion as well as cause us to offer discounts, which may result in an adverse effect on our business and a decline in our profitability.*

We face intense competition from a number of competitors, some of which are larger and have substantially greater resources than us, including the ability to spend more on advertising and marketing and offer substantial discounts. We also face competition from new entrants that may have more flexibility in responding to changing business and economic conditions than us. In addition, our competitors may introduce new products faster and more efficiently, and new products or evolving sales channels may increase

competitive pressures by enabling competitors to offer more efficient or lower-cost products. If we are unable to change our offerings in ways that reflect the changing demands of offline and online buyers and marketplaces or compete effectively with and adapt to such changes, our business, results of operations and cash flows could be adversely affected.

Some of our competitors have competitive advantages such as longer operating histories, more experience in implementing their business plan and strategy, better brand recognition, popular offline locations, greater negotiating leverage, and established supply relationships. In addition, the markets in which we compete have attracted significant investments from a wide range of funding sources, and our competitors could be better capitalized, which could allow them to increase the incentives, discounts and promotions they offer.

Competition in our industry is based on brand recognition, quality, innovation, perceived value and pricing of products, distribution reach, promotional activities, advertising and other activities. It is difficult for us to predict the timing and scale of our competitors' actions in these areas. We expect competition to continue to be intense as our competitors expand their operations and introduce new products. Failure by us to compete effectively may have an adverse effect on our business and profitability.

12. The emergence of modern trade channels like hypermarkets and supermarkets may adversely affect our pricing ability, and result in temporary loss of retail shelf space and disrupt sales of food products, which may have an adverse effect on our results of operations and financial condition.

We sell our products under the brand "ProV" to retail customers through modern trade channels like supermarkets and hypermarkets. While these retail chains provide us with an opportunity to improve our supply chain efficiencies and increase the visibility of our brands, it also increases the negotiating position of such stores. We cannot assure you that we will be able to negotiate our agreements particularly on pricing or credit, on terms favourable to us, or at all. Any inability to enter into these agreements favourably may have an adverse effect on our pricing and margins, and consequently adversely affect our results of operations and financial condition.

From time to time, retailers change distribution centres that supply products to particular retail stores. If a new distribution centre has not previously distributed our products in that region, it may take time for distribution to commence. Even if a retailer approves the distribution of products in a new region, product sales may decline while the transition in distribution takes place. If we do not get approval to have our products offered in a new distribution region or if getting this approval takes longer than anticipated, our sales and operating results may suffer.

In addition, our increased focus on selling our products directly through our website and e-commerce platforms may further result in us losing our traditional indirect distributors and retailers since customers may prefer buying products directly from website rather than visiting retail channels.

13. We have more than 100 SKUs for our retail products resulting in a high investment in inventory. Also with the growth of business operations, we are required to maintain high inventory levels to meet the demand. Any inability to accurately manage inventory and forecast demand for particular products in specific markets may have an adverse effect on our business, results of operations and financial condition. Also, perishable food product losses could materially impact our results of operations.

In the past three years, ProV has steadily gained popularity as a smart snacking choice for health-conscious consumers and resulting in a CAGR growth of revenue from operations of 47.99% during the financial year ended March 31, 2020 and March 31, 2022. Further, we have expanded our variety of products with more than 100 SKUs for different dry fruits, including flavoured, nuts, seeds and trail mixes. With such large portfolio mix and recent high growth in business volumes, we may face challenges to accurately ascertain the demand for our products and inventory volumes required for the smooth functioning of the business operations.

Demand for our products is forecasted through data analysis, indirect distributor feedback and our understanding of anticipated consumer spending, festive seasons and inventory levels with our distribution network. If we underestimate demand or have inadequate capacity due to which we are unable to meet the demand for our products, we may manufacture fewer quantities of products than required, which could result in the loss of business. While we forecast the demand for our products and accordingly plan our inventory volumes, any changes in estimates could result in surplus stock, which may not be sold in a timely manner.

Though no such event has happened in the past, we cannot assure you that in future we may be able to sell our inventory in the timely manner.

The products being sold by us have a perishable life and accordingly can only be stored for a limited amount of time before they spoil and cannot be sold. Our offering of perishable products may result in significant product inventory losses in the event of extended power outages, natural disasters or other occurrences. We must therefore continuously monitor our inventory and product mix against forecasted demand or risk having inadequate supplies to meet customer demand as well as having too much inventory that may reach its expiration date. While we prominently display the shelf life in the packaging of our products, we cannot assure you that we will not face claims for damages or other litigation, if our products are consumed subsequent to the expiry of their shelf life. If we are unable to manage our operations efficiently and ensure that our products are available to meet customer demand, our operating costs could increase and our margins could fall, which could have a material and adverse effect on our business, financial condition or results of operations in addition to the adverse affect on our reputation.

14. A portion of our revenues are derived from top 5 customers as on December 31, 2022 and the Fiscal ended 2022, 2021 and 2020. A significant decrease in revenue from any of those customers or an inability to expand or effectively manage our customer base may have an adverse effect on our business prospects and financial performance.

A portion of our revenues are derived from top 5 customers who contributed approximately 38.00%, 40.34%, 32.66% and 50.61% as per latest Restated Consolidated Financial Statements for the nine months ended December 31, 2022 and the Fiscal 2022, 2021 and 2020. Although, these top 5 customers continue to vary year on year, we cannot assure you that we will continue to do the same quantity of business with these customers. A decrease in business from such customers or loss of any such customer may materially and adversely affect our business, results of operations and financial condition.

15. A significant requirement of raw materials required by us is procured from suppliers / grower across various countries internationally. Any disruption in the international trade market or economic conditions of such country of import or levy of additional duties on imports may adversely impact our sourcing capabilities, cost of purchases or raw material and results of operations. Further, exchange rate fluctuations may also adversely affect our results of operations as the payments for such imports are being made in foreign currency.

A significant portion of the goods purchased by us are through import from various countries and are denominated in foreign currencies, mostly the U.S. Dollars. During the nine months ended December 31, 2022, Fiscal 2022, Fiscal 2021 and Fiscal 2020, our net purchase from imports amounted to ₹ 13,491.15 lakhs, ₹ 13,516.37 lakhs, ₹ 9,810.73 lakhs and ₹ 23,998.53 lakhs, respectively, which constituted 50.22%, 36.31%, 37.11% and 35.91%, respectively, of the aggregate of purchases of raw material consumed and traded goods. Although such purchases are not concentrated with any one country, however, any disruption in the international trade market or economic conditions of such country of import may impact our sourcing capabilities and we may not be able to get raw material at desired terms or at all. Further, levy of any additional import duties on such raw material or levy of additional taxes by the host country may make our products costly and increase our purchase cost and the results of operations.

Further, we have currency exposures relating to forex other than in Indian Rupees, particularly the U.S. Dollar. Changes in the relevant exchange rates could also affect import cost of raw materials and operating results. We are affected primarily by fluctuations in exchange rates among the U.S. dollar and the Indian Rupee, and our business, results of operations and financial condition may be adversely affected by fluctuations in the value of the Indian Rupee against the U.S. Dollar or other foreign currencies. Additionally, we have earned gains due to these fluctuations in foreign currency in the nine months period ended December 31, 2022, Fiscal 2022, Fiscal 2021 and Fiscal 2020 of Nil, ₹ 16.73 lakhs, ₹ 0.44 lakhs and ₹ 3.11 lakhs, respectively based on the Restated Consolidated Financial Statements. These gains were related to instances where the market exchange rate at the time of payments was in our favour or against us as compared to the rates when we entered into such transactions and were accounted.

In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our business, financial condition, results of operations and cash flows. We closely monitor our exposure to foreign currencies, however, this may not be sufficient to protect us against incurring potential foreign exchange related losses.

Our use of these derivatives broadly subjects us to market and credit risk, including counterparty credit risk and the risk of incurring financial losses when foreign exchange rates move contrary to expectations or if our risk management procedures prove to be inadequate, which could adversely affect our results of operation, liquidity and financial condition. For further information on our exchange rate risk management, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Quantitative and Qualitative Disclosures about Risk – Market Risk - Foreign Currency Risk”.

16. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency. Our management will have broad discretion over the use of the Net Proceeds.*

We intend to utilize the Net Proceeds of the Offer as set forth in “Objects of the Offer” beginning on page 78. The funding requirements disclosed as a part of the objects of the Offer are based on internal management estimates in view of past expenditures, and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to change in light of changes in external circumstances, costs, other financial conditions or business strategies. Our management, in accordance with the policies established by our Board of Directors from time to time, will have flexibility in deploying the Net Proceeds of the Offer. Based on the competitive nature of our industry, we may have to revise our business plan and / or management estimates from time to time and consequently our funding requirements may also change. Our management estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws, and may have an adverse impact on our business, financial condition, results of operations and cash flows.

Various risks and uncertainties, including those set forth in this section as well as in “Objects of the Offer” beginning on page 78, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, the modes we shall utilize to undertake expenditures and investments towards our advertising and marketing strategies are not specific or identified at this stage. Further, the outcome of this expenditure and investment is not ascertainable or quantifiable at this stage and may be disproportionate to the revenue generated or consumer conversion rates. We may also use funds for future businesses which may have risks significantly different from what we currently face or may expect. Further, we may not be able to attract personnel with sufficient skills or sufficiently train our personnel to manage our expansion plans. Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment.

17. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.*

We propose to utilise the Net Proceeds towards the proposed objects of the Offer, see “Objects of the Offer” on page 78. In accordance with Sections 13(8) and 27 of the Companies Act 2013, we cannot undertake any variation in the utilisation of the Net Proceeds without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to Shareholders who do not agree with our proposal to change the objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, or vary the terms of any contract referred to in the Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

18. *Our Company, its Subsidiaries, its Directors and its Promoters are party to certain litigation and claims. These legal proceedings are pending at different levels of adjudication before various courts and regulatory authorities. Any adverse decision may make us liable to liabilities/penalties and may adversely affect our reputation, business and financial status. A classification of these legal and other proceedings is given below.*

Our Company, its Directors and its Promoters are currently involved in legal proceedings in India which are pending at different levels of adjudication before the concerned authority. We cannot assure you that these proceedings will be decided in favour of our Company, its Directors and its Promoters, as the case may be. Any adverse decision in such proceedings may render us liable to penalties and may have a material adverse effect on the financials and reputation of our Company, its Directors or its Promoters which may in turn have an adverse effect on our business. Additionally, during the course of our business we are subject to risk of litigation in relation to contractual obligations, employment and labour law related, personal injury, damage to property, etc.

We may be required to devote management and financial resources in the defence or prosecution of any legal proceedings. Should any new developments arise, including a change in Indian laws or rulings against us by the appellate courts or tribunals, we may face losses and we may have to make further provisions in our financial statements, which could increase our expenses and our liabilities. Decisions in such proceedings, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subject to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure you that similar proceedings will not be initiated in the future. Any adverse order or direction in these cases by the concerned authorities, even though not quantifiable, may have an adverse effect on our reputation, brand, business, results of operations and financial condition. For further details, please refer to "**Outstanding Litigation and Material Developments**" on page 257 of this Prospectus.

19. An inability to comply with food safety laws, environmental laws and other applicable regulations in relation to our processing facilities may adversely affect our business, financial condition and results of operations.

Our business operations, in particular our day-to-day manufacturing operations are subject to a broad range of health, safety and environmental laws and regulations, and violations of these laws and regulations can result in fines, penalties or litigation, which may adversely affect our business, financial condition and results of operations. For instance, the provisions of the Food Safety and Standards Act, 2006 ("FSS Act") and all rules, regulations and subsidiary legislation are applicable to us and our products, which sets forth scientific standards for articles of food and to regulate their processing, storage, distribution, sale and import to ensure availability of safe and wholesome food for human consumption and requirements relating to the license and registration of food. Contravention of the requirement to obtain a license or carry a business without obtaining a license under the FSS Act is punishable with imprisonment for a period of up to three years in ordinary cases and beyond three years in special cases, along with fines. Subsequent contraventions are punishable

with twice the punishment during the first conviction and higher monetary and other penalties including cancellation of license. To remain compliant with all laws and regulations that apply to our operations and products, we may be required in the future to modify our operations or make capital improvements. For details, see “Key Regulations and Policies” on page 126.

We are also subject to laws and Government regulations, including in relation to safety, health and environmental protection. These laws and regulations include the Environmental Protection Act 1986, the Air (Prevention and Control of Pollution) Act 1981 (the “**Air Act**”), the Water (Prevention and Control of Pollution) Act, 1974 (the “**Water Act**”) and other regulations promulgated by the Ministry of Environment and the pollution control boards of the relevant states. These environmental protection laws and regulations impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other such aspects of our manufacturing. In particular, there have been multiple rounds of regulatory changes with regards to packaging material and the use of plastics in packaging and obligations imposed on us to appoint an authorised agency to collect the plastic packets of food products sold to the end consumer. There can be no assurance that there will not be future changes in the regulatory framework concerning this area of manufacturing, which may cause commercial and operational challenges to our Company. Correspondingly, there can be no assurance that we will not be in violation of these regulations in the future even though in the past, we have not been subject to any such violations. However, in the future, if we fail to meet environmental requirements, we may be subject to administrative, civil and criminal proceedings by Government entities, as well as civil proceedings by environmental groups and other individuals, which could result in substantial fines and penalties against us as well as revocation of approvals and permits and orders that could limit or halt our operations.

There can be no assurance that such non-compliance will not occur and regulatory actions including injunction orders will not be taken or passed against us. Further, the loss or shutdown of our operations over an extended period of time, clean-up and remediation costs, as well as damages, other liabilities and related litigation, could adversely affect our business, financial condition and results of operations.

20. *We require certain approvals, licenses, registration and permits for our business, and the failure to obtain or renew them in a timely manner may adversely affect our operations.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous.

Additionally, we are in the process of applying for certain approvals, licenses, registrations and permits, which are required for our business and further, we have also intended to update the approvals, licenses, registrations and permits obtained by us in the new name of the Company pursuant to the conversion of our Company from private limited to public limited company. Our Company and its Material Subsidiaries have also applied for certain approvals which were yet to be obtained. For instance, one of our Material Subsidiaries, ProV Foods Private Limited, has applied for factory license under the Factories Act, 1948 for our factory located at Plot No. A-793, T.T.C. Industrial Area, M.I.D.C., Khairane, Navi Mumbai, Thane - 400709, Maharashtra, India vide application under Form 1 bearing reference number 100027602321 dated April 14, 2023–, which are currently pending before the relevant authorities. For further details, see “**Government and Other Statutory Approvals**” beginning on page 263 of this Prospectus.

Further, our Material Subsidiary, ProV Foods Private Limited has obtained a Consent to Establish for our factory located at Gen 71/2, TTC Industrial Area, Mahape, Navi Mumbai, Mumbai - 400701 from the Maharashtra Pollution Control Board. However, as on date ProV Foods Private Limited is unable to trace the said Consent and thus the BRLM or our Company cannot verify the terms and conditions of such Consent.

While we have obtained a significant number of approvals, our Material Subsidiary, ProV Foods Private Limited, has not obtained a fire NOC for its factory located at Plot No. A-793, T.T.C. Industrial Area, M.I.D.C., Khairane, Navi Mumbai, Thane - 400709, Maharashtra, India. Further, our Company and its Material Subsidiaries have established a few fulfilment centres in a few states for the purpose of carrying out sales operations directly in such states. While we have entered into lease agreements for use of such fulfilment centres, our Company and Material Subsidiaries do not carry out any activities from such fulfilment centres. These fulfilment centres are not material for operation of our business and have been established only to meet the criteria set out by some of our e-commerce players and neither our Company nor our Material Subsidiaries

employ any person at such fulfilment centres. Our Company has, therefore, not obtained registrations under the laws governing local shops and establishments. If we are called upon to obtain such registrations for the fulfilment centres, any delay in receipt or the non-receipt of such approvals, licenses, registrations and permits could redirect some of our time and attention to such matters. Furthermore, the relevant authorities may impose fines or penalties or both for our failure to obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see "**Government and Other Statutory Approvals**" on page 263 of this Prospectus.

One of our Subsidiaries, ProV-Nova Bio Technologies Private Limited, carries out manufacturing of briquets in the factory premises of our Material Subsidiary, ProV Foods Private Limited. However, ProV-Nova Bio Technologies Private Limited does not have a valid license to operate in the factory premises of ProV Foods Private Limited. We cannot assure you no action will be taken against ProV-Nova Bio Technologies Private Limited in future for non-compliance under the applicable laws.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

21. Industry information included in this Prospectus has been exclusively derived from an industry report commissioned and paid for by us in connection with the Offer. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.

We have availed the services of an independent third-party research agency, Wazir Advisors Private Limited, to prepare and issue the Industry Report, for the purposes of inclusion of such information in this Prospectus exclusively in connection with the Offer. The Industry Report is subject to various limitations and based upon certain assumptions, estimates, forecasts and projections that are subjective in nature. Although we believe that the data in the Industry Report may be considered to be reliable, the accuracy, completeness and underlying assumptions are not guaranteed and dependability cannot be assured. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. As there are no standard data gathering methodologies in the industry, methodologies and assumptions may vary widely among different industry sources. Furthermore, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

22. Information relating to our production capacities and the historical capacity utilization of our manufacturing facilities included in this Prospectus is based on various assumptions and estimates and future production and is certified by third party and capacity utilization may vary.

The information relating to the estimated annual installed capacity and the average estimated annual available capacity of our manufacturing facilities included in this Prospectus are based on various assumptions and estimates of our management that have been taken into account by the chartered engineer in the calculation of our capacity. These assumptions and estimates include the standard capacity calculation practice of industry after examining the installed capacity, calculations and explanations provided by our management, the period during which the facility operates in a year, availability of raw ingredients, expected utilization levels, estimated downtime resulting from scheduled maintenance activities, assumptions relating to unscheduled breakdowns, as well as expected operational efficiencies. Actual production levels and capacity utilization rates may therefore vary significantly from the estimated annual installed capacity and the average estimated annual available capacity information of our facility.

Undue reliance should therefore not be placed on our capacity information or historical capacity utilization information for our existing facilities included in this Prospectus. Further, average estimated annual available capacity has been calculated on the basis of the estimated daily available capacity for the relevant periods, as certified by Sapient Services Private Limited, Chartered Engineer pursuant to certificate dated March 23, 2023. Significant changes from our annual available capacity could adversely affect our results of operations, cash flows and financial condition.

23. *We have incurred indebtedness and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.*

We have entered into agreements with certain banks for short-term and long terms facilities. As of February 28, 2023, we had total borrowings of ₹ 3,560.98 lakhs on consolidated basis. In terms of security, we are required to create a mortgage or charge over our movable properties. We may also be required to furnish additional security if required by our lenders. Additionally, we are required to, among others, maintain the prescribed debt coverage ratio, net total debt, and fixed asset coverage ratio. There can be no assurance that we will be able to comply with these financial or other covenants at all times or that we will be able to obtain the consent necessary to take the actions that we believe are required to operate and grow our business.

Further, we are susceptible to changes in interest rates and the risks arising therefrom. Certain of our financing agreements provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further, under certain of our financing agreements, the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating.

24. *Our Company requires significant amount of working capital for a continuing growth. Increase in business activities may be reflected by an absolute increase in the gap between our trade receivables and trade payables, requiring us to arrange for increased working capital limits. Our inability to meet our working capital requirements may adversely affect our results of operations.*

In our business, working capital is often required to finance the purchase of raw material and for processing activities. In the event, we are unable to source the required amount of working capital, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

All of these factors, including increase in business activities, may widen the absolute gap between trade receivables and trade payables putting strain on our Company's financial resources and may result in increase in the amount of short-term borrowings/ working capital loans. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

25. *We have in the past entered into related party transactions and may continue to do so in the future, subject to relevant compliances under applicable laws and rules as amended, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into transactions with certain related parties, including our Promoters, certain members of our Promoter Group, certain Directors and Key Managerial Personnel of our Company. In particular, we have entered into various transactions with such parties in relation to, amongst others, remuneration, professional fees, sale of goods, rent expense and reimbursement of expenses. While we believe that all such transactions have been conducted on an arm's length basis **and are subject to relevant compliances under applicable laws and rules as amended**, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties. Further, it is likely that we may enter into additional related party transactions in the future. Such related party transactions may potentially involve conflicts of interest.

During the nine months period ended December 31, 2022 and in Fiscals 2022, 2021 and 2020, the aggregate amount of such related party transactions was ₹ 14,494.83 lakhs, ₹ 17,059.66 lakhs, ₹ 8,547.51 lakhs and ₹ 1,919.09 lakhs, respectively including the transactions with subsidiaries of our Company in accordance with requisite compliance of the Companies Act. For further information on our related party transactions, see “Related Party Transactions” on page 256. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition

26. We have experienced negative cash flows from operating, investing and financing activities in the past.

We have in the past, and may in the future, experience negative cash flows from operating, investing and financing activities. The following table sets forth our net cash inflow/(outflow) from operating, investing and financing activities for the periods/years indicated:

(₹ in lakhs)

Particulars	For the nine months ended December 31, 2022	For the financial year ended		
		March 31, 2022	March 31, 2021	March 31, 2020
Net cash flows from / (used in) operating activities	(550.63)	20.84	1,272.04	1,378.36
Net cash flows from / (used in) investing activities	(32.73)	(111.03)	(99.50)	(562.33)
Net cash flows from / (used in) financing activities	(454.36)	216.59	(87.49)	(847.03)

We had net cash outflow from operating activities of ₹ 550.63 lakhs during the nine months period ended December 31, 2022, primarily due to increase in trade receivables on account of expansion of retail operations of the brand. Any negative cash outflows from operating activities over extended periods, or significant cash outflows in the short term from investing and financing activities, could have an adverse impact on our cash flow requirements, business operations and growth plans. As a result, our cash flows, business, future financial performance and results of operations could be adversely affected. For further details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Cash Flows” on page 248.

27. Our business depends on our ability to maintain and scale our technology. Any interruptions or delays in service on our website or any undetected errors or design faults could result in limited capacity, reduced demand, processing delays, and loss of consumers, suppliers or sellers.

A key element of our growth strategies is to continue to acquire new consumers through brand awareness and enhanced consumer engagement, and generate a high volume of traffic on the digital platforms we offer. Our reputation and ability to attract, retain and serve our consumers depend upon the reliable performance of our subsidiary, ProV Food’s website (www.provfoods.in) and mobile websites and the underlying network infrastructure. We may experience interruptions in these systems in the future, such as server failures that disrupted the performance of our websites and mobile websites, which may adversely affect our business, financial condition, cash flows and results of operations. Further, while we undertake architectural changes on the user feel of our website, we cannot assure you that this is sufficient to address the continuously increasing traffic on our platforms.

As our consumer base and the amount of information shared on our website continues to grow, we will need an increasing amount of network capacity and computing power. We have spent and expect to continue to spend substantial amounts on our technology infrastructure to handle the traffic on website. The operation of these systems is complex and could result in operational failures. If the volume of traffic of our consumers exceeds the capacity of our technology infrastructure or if our consumer base or the amount of traffic on our website and mobile website grows more quickly than anticipated, we may be required to incur additional costs to enhance our underlying technology infrastructure.

The volume of traffic and activity on our website spikes on certain days, such as during festival periods, and any such interruption would be particularly problematic if it were to occur at a time of high volume. If sustained or repeated, these performance issues could reduce the attractiveness of our products and platform. In addition, the costs and complexities involved in expanding and upgrading our systems may prevent us

from doing so in a timely manner and may prevent us from adequately meeting the demand placed on our systems. Any interruption or inadequacy that causes performance issues or interruptions in the availability of our website could reduce consumer satisfaction and result in a reduction in the number of consumers purchasing our products and services, adversely affecting our business and financial position.

28. *We are subject to payment-related risks, including risks associated with cash on delivery and payment processing risks.*

Our Subsidiary, ProV Foods, accept payments using a variety of methods, including credit and debit cards, digital wallets and cash on delivery. Cash on delivery is a preferred method of payment for online purchases in India. Although the share of the prepaid orders on our website has increased over prior periods, we are still subject to the risk that cash collected from consumers may be misappropriated. We are subject to the risk of fraudulent activity associated with cash on delivery, such as payment of purchases with counterfeit currency. In addition, if a consumer does not pay the amount due, the purchase will be returned to us, which does not contribute to our revenue. We also absorb the costs of return shipping fees. Increases in the returns of our products may increase our operating costs. For certain payment methods, including credit and debit cards, we pay bank interchange and other fees, although we may receive cashback on certain transactions. These fees may increase over time, which would increase our operating costs. We use various third parties and payment gateways to provide payment processing services, including the processing of credit and debit cards. The suspension or termination of such payment gateways may disrupt our sales and business operations.

We are required to comply with payment card network operating rules, which are set and interpreted by the payment card networks for the third-party payment processors. The payment card networks could adopt new operating rules or interpret or re-interpret existing rules, as revised by regulatory bodies such as the Reserve Bank of India (“**RBI**”) from time to time, in ways that might prohibit us from providing certain services to some consumers, be costly to implement, or difficult to follow. Failure to comply with such rules may render us liable for fines, indemnities or higher transaction fees, or result in us losing our ability to accept credit and debit card payments or other types of online payments. Occurrences of such events could adversely affect our business, financial condition, cash flows and results of operations.

29. *If we are unable to protect credit card or debit card data or any data related to any other electronic mode of payment, or any other personal information that we collect, our reputation could be significantly harmed.*

The use of electronic payment methods on our subsidiary’s website, www.provfoods.in exposes us to an increased risk of privacy and security breaches as well as other risks. Even though we utilise third party payment gateway on the abovementioned website and we do not collect any financial data from the consumers, these third parties may or do have the technology or know-how to breach the security of the customer information transmitted in connection with credit and debit card and use of e-wallets, and our security measures and those of technology suppliers may not effectively prohibit others from obtaining improper access to this information. If a person is able to circumvent our security measures or otherwise gain access to the confidential information that we collect, they may be able to destroy or steal valuable information or otherwise disrupt our operations. We may become subject to claims for purportedly fraudulent transactions arising out of the actual or alleged theft of credit or debit card information or other confidential information, and we may also be subject to lawsuits or other proceedings relating to these types of incidents. Any such claim or proceeding could cause us to incur significant unplanned expenses, which could have an adverse impact on our financial condition, results of operations and cash flows. Further, adverse publicity resulting from these allegations could significantly harm our reputation and may have a material adverse effect on us and our business.

Moreover, we receive and process certain personal financial and other information about our customers when we accept payment. While we do not store customers’ credit and debit card payment information, the use and handling of this information are regulated by evolving and increasingly demanding laws and regulations in India.

If our security and information systems are compromised as a result of data corruption or loss, cyberattack or a network security incident or our employees, or suppliers fail to comply with these laws and regulations, and this information is obtained by unauthorized persons or used inappropriately, it could subject us to litigation and government enforcement actions, damage our reputation, cause us to incur substantial costs, liabilities

and penalties and/or result in a loss of customer confidence, any and all of which could adversely affect our business, financial condition and results of operations.

30. *Inability to maintain adequate internal controls may affect our ability to effectively manage our operations, resulting in errors or information lapses.*

As we continue to expand, our success depends on our ability to effectively utilize our resources and maintain internal controls. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and systems and are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances. We may need to modify and improve our financial and management control processes, reporting systems and procedures and other internal controls and compliance procedures to meet our evolving business needs. If we are unable to improve our controls, systems and procedures, they may become ineffective and adversely affect our ability to manage our operations resulting in errors or information lapses that affect our business. Our efforts in improving our internal control systems may not result in eliminating all risks. If we are not successful in discovering and eliminating weaknesses in our internal controls, our ability to manage our business effectively may materially and adversely be affected.

We are also subject to anti-corruption laws and regulations, which generally prohibit us and our employees and intermediaries from bribing, being bribed or making other prohibited payments to government officials or other persons to obtain or retain business or gain some other business advantage. If we are not in compliance with applicable anti-corruption laws, we may be subject to criminal and civil penalties, disgorgement and other sanctions and remedial measures, and legal expenses, which could have an adverse impact on our business, financial condition, results of operations and liquidity. Likewise, any investigation of any potential violations of anticorruption laws by the relevant authorities could also have an adverse impact on our business and reputation.

31. *Our insurance coverage could prove inadequate to satisfy potential claims or protect us from potential operational hazards and losses which may have a material adverse effect on our business, results of operations and financial condition.*

Our operations are subject to various risks inherent to the dry fruits and healthy snacking industry including defects, malfunction and failure of processing equipment, fire, riots, strikes, explosions, loss-in-transit for our products, accidents and natural disasters. We have obtained insurance policies that we believe are customary in our industry and provide for commercially appropriate insurance coverage for a variety of risks. In the financial year 2022-23, there has been one instance of theft wherein ProV Foods has filed a claim for loss of ₹ 16.45 lakhs in December 2022 and the same is under process. Further, our Company has also filed for two claims under its marine insurance for damage of goods received for an approximate aggregate value of 74,000 USD (approx. ₹ 61 lakhs) in October 2022 for which the Company has received claim of ₹ 23.91 lakhs net of salvage value of ₹ 33.56 lakhs and deduction of amount on account of policy excess and non standard claims. For further information regarding the insurance policies obtained by us, see “Our Business - Insurance” on page 123.

However, there can be no assurance that our current insurance policies will insure us fully against all risks and losses that may arise in the future. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In cases where certain loss or damages are not covered under our insurance policies, or even if such losses are insured, we are required to pay a significant deductible on any claim for recovery of such a loss, or the amount of the loss may exceed our coverage for the loss or the premium charged is significantly increased, our results of operations and cash flows could be adversely affected. In addition, our insurance policies are subject to annual review, and we cannot assure you that we will be able to renew these policies on similar or otherwise acceptable terms, or at all. If we were to incur a serious uninsured loss or a loss that significantly exceeds the limits of our insurance policies, it could have a material adverse effect on our financial condition, results of operations and cash flows.

32. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.*

We own our corporate logo, word mark and trademark "Proventus", "ProV" and "ProV", used as a prefix in the name of our Company our Subsidiaries. Our trademark 'Proventus' ("Trademark"), which is used as a prefix in the name of our Company, is registered in the name of our Company under Class 14, 16, 29, 30, 31, 35, 36, 38 and 39 of the Trade Marks Act, 1999.

Our Company has applied for various trademark registrations in relation to our Company and Subsidiaries.

However, the applications made by our Company for registration of trademark 'ProV' under Class 29, 30, 31 and 38 of the Trade Marks Act, 1999 are under objection, under Class 14, 16, 35, 36 and 39 are accepted and advertised and under Class 14, 16, 35, 36 and 39 is registered. For further details, please see "**Government and Other Statutory Approvals**" beginning on page 263 of this Prospectus.

In relation to our registered trademark, "ProV" ("**ProV**"), we became aware of an infringement of ProV by M/s ProV27 Foods who used ProV as a suffix in their name. On March 17, 2023, we issued a notice to M/s ProV Foods located at 304, Sai Saran Apts, Ananad Nagar Colony, Kharitabad, Hyderabad 500004 for infringement of ProV under the Trade Marks Act, 1999 and claimed damages for the same. Further, on April 28, 2023 we have issued a reminder notice in continuation to our notice dated March 17, 2023. We are yet to receive a reply to the said notices. If M/s ProV27 Foods does not cease the usage of ProV, we may have to initiate legal action against them which may redirect some of our time and attention. We cannot assure that the outcome of such litigation being in our favour.

With respect to our trademarks that have been applied for and/or are under objection or opposed, we cannot assure you that we will be successful in removing the objections or contend the opposition. As a result, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted. We cannot guarantee that any of our registered or unregistered intellectual property rights or our know-how, or claims thereto, will now or in the future successfully protect what we consider to be the intellectual property underlying our products and business, or that our rights will not be opposed or otherwise challenged.

While we endeavour to ensure that we comply with the intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company and our Subsidiaries which carry the prefix "Proventus" and "ProV", pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses.

For further details please see "**Government and Other Statutory Approvals**" beginning on page 263 of this Prospectus.

33. We do not own our Registered Office and other business premises and the operations are being conducted on premises that have been taken on lease. Any difficulty in seeking renewal or extension of such lease terms may cause disruption in our operations.

Our Registered Office and the manufacturing facility occupied by our Subsidiary, ProV Foods are located on leased premises. In addition, we have also leased a cold storage facility from third party service provide based on its requirement. These lease agreements may be terminated in accordance with their respective terms, and any termination or non-renewal of such leases could adversely affect our operations. Additionally, the factory buildings and warehouses obtained by us under operating leases generally have annual escalation clauses for rent payments. Further, the cold storage facilities being used by us on lease basis utilised area of which may vary from time to time based on our requirement.

On January 15, 2023, ProV Foods have the notice of termination of the agreement on January 15, 2023 for vacating the said premises. As agreed by the lessor vide e-mail dated January 17, 2023, the said premises has to be vacated within a period of four months from the date of such notice. The same has been further extended by three months agreeing to allow vacation of the premise by August 14, 2023. Shifting of the processing plant from the existing facility to new facility may result in closure of manufacturing facility for the time within which the shifting of the facility will be carried out.

There can be no assurance that we will be able to retain or renew such leases on same or similar terms, or that we will find alternate locations for the existing facilities on terms favourable to us, or at all. Failure to identify suitable premises for relocation of existing properties, if required, or in relation to new or proposed properties we may purchase, in time or at all, may have an adverse effect on our production and supply chain, the pace of our projected growth as well as our business and results of operations.

34. *The success of our business depends substantially on our management team and operational workforce. Our inability to retain them could adversely affect our businesses.*

Our senior management and key management personnel are difficult to replace. Our success and growth depends upon consistent and continued performance of our employees with direction and leadership from senior management. From time to time, there may be changes in our executive management team or other key employees to enhance the skills of our teams or as a result of attrition. We cannot assure you that we will continue to retain any or all of the key members of our management. We do not maintain key personnel insurance in respect of the risk of the loss of any of our Promoters, senior managers or other key managerial personnel.

The key managerial personnels play a strategic role in developing and building relations with our key stakeholders, including investors, board members, suppliers and other strategic business relationships on a regular basis. They play a significant role in building and maintaining strong relationships with critical stakeholders into the future. If they were to step down from their leadership positions in our Company, our reputation could deteriorate and our business could be adversely affected.

Our success also depends on our ability to recruit, develop and retain qualified and skilled personnel, for all our lines of business. We compete in the market to attract and retain skilled personnel, in areas such as engineering, product and design, technology, sales, digital marketing and brand management, omni-channel retailing and consumer service, supply chain and operations, as well as enabling corporate functions.

If we fail to identify, recruit and integrate strategic personnel, our business could be adversely affected. Any loss of members of our senior management team or key personnel could significantly delay or prevent the achievement of our business objectives, affect our succession planning and could harm our business and consumer relationships. We may need to invest significant amounts of cash and equity to attract and retain new employees, and we may never realize returns on these investments. If we are not able to retain and motivate our current personnel or effectively integrate and retain employees, our ability to achieve our strategic objectives, and our business could be adversely affected.

35. *We rely on third-party transportation providers for both procurement of our raw materials and distribution of our products. Any failure by any of our transportation providers to deliver our raw materials or our products on time, or in good condition, or at all, may adversely affect our business, financial condition and results of operations.*

We depend on various forms of transportation to either receive raw materials for our processing purposes or to deliver the finished products to our indirect distributors and other parties. We are therefore significantly dependent on transportation and logistics companies that we engage with.

The disruption of transportation services due to natural factors such as weather conditions particularly during monsoon or flood seasons, or man-made factors such as strikes, accidents, or other inadequacies in the transportation infrastructure, or any other factor that could impair the ability of our suppliers to deliver raw materials to us and our ability to deliver our products to our indirect distributors and their ability to deliver products to the end retailer in a timely manner, which may adversely affect our sale of products. Such raw materials and our products may be lost, damaged or deteriorated and contaminated due to improper handling, negligence, transport strike or accidents or any other *force majeure* events which may not be within our control. Additionally, if we lose one or more of our third-party transportation providers, there can be no assurance that we will be able to find new or alternative third-party transportation providers at all, or at terms as favourable as those which we have in force with our current partners.

Further, our third-party transportation providers may not carry adequate insurance coverage and therefore, any losses that may arise during the transportation process may have to be claimed under our marine insurance policy. There can be no assurance that we will receive compensation for any such claims in full amount in a

timely manner or at all, and consequently, any such loss may adversely affect our business, financial condition and results of operations.

- 36. *We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our cash flows and results of operations.***

We appoint independent contractors who in turn engage on-site contract labour for performance of certain of our operations. During the month of February 2023, we engaged around 145 personnel on contractual basis. Although we do not engage such labour directly, we may be held responsible to pay their social benefits or shortfall in wages and provide certain amenities and facilities, if the independent contractors fail to do so, by a regulatory body or court, which may adversely affect our cash flows and results of operations. See “Our Business - Employees” on page 123.

- 37. *We do not have documentary evidence for certain details in relation to evidences for relevant work experiences in relation to Durga Prasad Jhawar and Shalin Sanjiv Khanna included in “Our Promoters and Promoter Group”, in this Prospectus.***

We do not have documentary evidence for certain details, such as evidences for relevant work experiences in relation to Durga Prasad Jhawar and Shalin Sanjiv Khanna, as included in “Our Promoters and Promoter Group” on page 155. These details have been included based on the details provided by the relevant individuals, certifying the authenticity of the information provided. We cannot assure you that all the details in relation to the aforementioned Promoters included in the “Our Promoters and Promoter Group” section are complete, true and accurate.

- 38. *We will not receive any proceeds from the Offer for Sale. The Selling Shareholders will receive the net proceeds from the Offer for Sale.***

The Offer consists of a Fresh Issue and an Offer for Sale. The Offer includes an offer for sale of such number of Equity Shares aggregating up to 2,30,147 Equity Shares by the Selling Shareholders, which includes the Promoter Selling Shareholder. The Promoter Selling Shareholder is, therefore, interested in the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale. The Selling Shareholders shall be entitled to the net proceeds from the Offer for Sale, which comprise proceeds from the Offer for Sale net of Offer expenses shared by the Selling Shareholders, and our Company will not receive any proceeds from the Offer for Sale.

- 39. *Grants of stock options under our employee stock option plans may result in a charge to our profit and loss account and will, to that extent, reduce our profits.***

We currently have options granted under our Stock Incentive Plan and may in the future grant further options or establish other stock incentive plans, under which eligible employees may participate, subject to the requisite approvals having been obtained. Our Company shall do the accounting of the stock options granted to the employees on fair value of options and under Indian GAAP, the grant of stock options will result in a charge to our profit and loss account equal to the fair value of options. The fair value of options will be amortized over the vesting period of these stock options. We are not in a position to determine the precise impact of such adjustments on our profitability as of the date and such adjustments may materially affect the financial condition of our Company. For further details, see “Capital Structure” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 68 and 237, respectively.

- 40. *After the completion of the Offer, our Promoters along with the Promoter Group will continue to collectively hold substantial shareholding in our Company.***

As on the date of this Prospectus, our Promoters and members of the Promoter Group held 92.29% of the paid-up share capital of our Company, for details of their shareholding pre and post Offer, see “Capital Structure” on page 68. After the completion of the Offer, our Promoters along with the Promoter Group will continue to collectively hold substantial shareholding in our Company, i.e. 70.84%. Our Promoters will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders’ approval, including the composition of our Board, the adoption of amendments to our certificate of incorporation, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially

all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters as our controlling shareholder could conflict with our interests or the interests of its other shareholders. We cannot assure you that our Promoters will act to resolve any conflicts of interest in our favour and any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further information in relation to the interests of our Promoters in the Company, please see “Our Promoters and Promoter Group”, “Our Management” and “Restated Consolidated Financial Statements” on pages 155, 140 and 163, respectively.

41. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.*

Our ability to pay dividends in the future will depend on a number of factors identified in the dividend policy of our Company, liquidity position, profits, capital requirements, financial commitments and financial requirements including business expansion plans, cost of borrowings, other corporate actions and other relevant or material factors considered relevant by our Board, and external factors, such as the state of the economy and capital markets, applicable taxes including dividend distribution tax, regulatory changes and other relevant or material factors considered relevant by our Board. The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act, 2013. We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Additionally, in the future, we may be restricted by the terms of our financing agreements in making dividend payments unless otherwise agreed with our lenders. We cannot assure you that we will be able to pay dividends in the future. For further information, see “Dividend Policy” on page 162.

EXTERNAL RISK FACTORS

Risks related to India

42. *Our business and operations are located in India and as such, we are subject to regulatory, economic, social and political uncertainties in India, many of which are beyond our control.*

The Indian economy and capital markets are influenced by economic, political and market conditions in India and globally. We are incorporated in India, and almost all of our business and all of our personnel are located in India. Consequently, our business, cash flows and results of operations will be affected by a number of macroeconomic and demographic factors in India which are beyond our control. In particular, our total income and profitability are strongly correlated to consumer discretionary spending in India, which is influenced by general economic conditions, salaries and employment levels and consumer confidence. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, increased unemployment, increased energy prices, rising interest rates or other industry-wide cost pressures could also affect consumer behavior and spending for BPC products and lead to a decline in our total income and profitability.

While our results may not necessarily track India’s economic growth figures, the Indian economy’s performance affects the environment in which we operate. These factors could have an adverse effect on our business, financial condition, cash flows and results of operations.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

43. *Changing laws, rules and regulations and legal uncertainties, including any adverse application of corporate and tax laws, may adversely affect our business, cash flows, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, cash flows, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

For instance, GoI has notified the Finance Act, 2021 (“**Finance Act**”), which introduced various amendments to the taxation laws in India. Under the Finance Act, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. Further, the GoI has announced the Union Budget for the Financial Year 2023 pursuant to which the Finance Act of 2022 has introduced various amendments. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

In India, the Supreme Court, in a judgment delivered on 24 August 2017, has held that the right to privacy is a fundamental right. Following this judgment, the Government of India is considering the enactment of the Personal Data Protection Bill, 2022 on personal data protection for implementing organizational and technical measures in processing personal data and lays down norms for cross-border transfer of personal data and to ensure the accountability of entities processing personal data. The enactment of the aforesaid bill may introduce stricter data protection norms for a company such as us and may impact our processes.

Further, the GoI introduced new laws relating to social security, occupational safety, industrial relations and wages namely, the Code on Social Security, 2020 (“**Social Security Code**”), the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020 and the Code on Wages, 2019, which consolidate, subsume and replace numerous existing central labor legislations, were to take effect from April 1, 2021 (collectively, the “**Labour Codes**”). The GoI has deferred the effective date of implementation of the respective Labour Codes, and they shall come into force from such dates as may be notified. Different dates may also be appointed for the coming into force of different provisions of the Labour Codes. While the rules for implementation under these codes have not been finalized, as an immediate consequence, the coming into force of these codes could increase the financial burden on our Company, which may adversely impact our profitability. For instance, under the Social Security Code, a new concept of deemed remuneration has been introduced, such that where an employee receives more than half (or such other percentage as may be notified by the Central Government) of their total remuneration in the form of allowances and other amounts that are not included within the definition of wages under the Social Security Code, the excess amount received shall be deemed as remuneration and accordingly be added to wages for the purposes of the Social Security Code and the compulsory contribution to be made towards the employees’ provident fund.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, cash flows, results of operations and prospects. Uncertainty in the application, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our businesses in the future.

44. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

India’s sovereign debt rating could be downgraded due to several factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, all which are outside the control of our Company. Our borrowing costs and our access to the debt capital markets depend significantly on the sovereign credit ratings of India. Any adverse revisions to India’s credit ratings for domestic and overseas debt by international rating agencies may adversely impact our ability to raise additional external financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of the Equity Shares.

45. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Foreign investment in Indian securities is subject to regulation by Indian regulatory authorities. Under foreign exchange regulations which are currently in force in India, transfer of shares between non-residents and residents is freely permitted (subject to compliance with sectoral norms and certain other restrictions) provided they comply with the pricing guidelines and reporting requirements specified under applicable law. Further, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. We sell our products on a retail and on a business-to-business basis under the wholesale trading model and single brand retail. Under the Consolidated FDI Policy, 100% foreign direct investment is permitted in a company engaged in manufacturing, wholesale trading as well as single brand product retail, under the automatic route, subject to certain conditions specified thereunder. In the event of foreign direct investment beyond 51%, an investee entity is also required to comply with certain local sourcing norms as specified in the FEMA Rules and the Consolidated FDI Policy. Our inability to comply with any such conditions may restrict our ability to raise capital in the future or in the ability of foreign investors to purchase Equity Shares.

Further, in accordance with Rule 6(a) of the FEMA Rules and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms and conditions or at all. For further information, see “Restrictions on Foreign Ownership of Indian Securities” on page 318. Our ability to raise any foreign capital under the FDI route is therefore constrained by Indian law, which may adversely affect our business, cash flows, financial condition, results of operations and prospects.

46. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us.

Furthermore, economic developments globally can have a significant impact on India. In particular, the global economy has been negatively impacted by the conflict between Russia and Ukraine. Governments in the United States, United Kingdom, and European Union have imposed sanctions on certain products, industry sectors, and parties in Russia. The conflict could negatively impact regional and global financial markets and economic conditions, and result in global economic uncertainty and increased costs of various commodities, raw materials, energy and transportation. In addition, recent increases in inflation and interest rates globally, including in India, could adversely affect the Indian economy.

In addition, China is one of India’s major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. The sovereign rating downgrades for Brazil and Russia (and the imposition of sanctions on Russia) have also added to the growth risks for these markets. These factors may also result in a slowdown in India’s export growth. Any significant financial disruption could have an adverse effect on our business, financial condition, cash flows and results of operation.

47. *If inflation rises in India, increased costs may result in a decline in profits and result of operations may be adversely affected.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. Increasing inflation in India could cause a rise in the costs of third party suppliers and contract manufacturers, rents, wages, raw materials and other expenses. In recent years, India has experienced consistently high inflation, especially and increasingly so in recent months, which has increased the price of, among other things, our rent, raw materials and wages. Further, while the Government of India has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect, and there can be no assurance that Indian inflation levels will not worsen and rise in the future. If we are unable to

increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Risks related to the offer

- 48. *The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.***

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the securities markets in India and other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 49. *Investors may be subject to Indian taxes arising out of income arising on the sale of and dividend on the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Further, withholding tax may be applicable on sale of shares by Non- Resident / FII under section 115E and 115AD.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the Shareholders both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

There is no certainty on the impact of Indian tax laws or other regulations, and which may adversely affect the Company’s business, financial condition, results of operations or on the industry in which we operate. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

- 50. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application, and Retail Individual Investors are not permitted to withdraw their Application after Offer Closing Date.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Application Amount on submission of the Application and are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting a Application. Retail Individual Investors can revise their Application during the Offer Period and withdraw their Application until the Offer Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity

Shares are proposed to be listed including Allotment pursuant to the Offer within six Working Days from the Offer Closing Date, events affecting the Investors' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Application and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors' ability to sell the Equity Shares allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline upon listing. QIBs and Non-Institutional Applicants will therefore not be able to withdraw following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise, between the dates of submission of their Application Form and Allotment.

51. *The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.*

The Offer Price of the Equity Shares is proposed to be determined by us, the Promoter Selling Shareholders and the Investor Selling Shareholders in consultation with the Lead Manager, through a book-building process. This price is based on numerous factors, as described under "*Basis for Offer Price*" beginning on page 88, and may not be indicative of prices that will prevail in the open market following the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. As a result of these factors, we cannot assure you that investors will be able to resell their Equity Shares at or above the Offer Price.

52. *Investors may have difficulty enforcing foreign judgments against us or our management.*

The Company is a limited liability company incorporated under the laws of India. The majority of our directors and executive officers are residents of India. All of our assets and the assets of our Directors are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons outside India or to enforce judgments obtained against us or such parties outside India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 ("**CPC**"), on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties. Some jurisdictions including the United Kingdom, United Arab Emirates, Singapore and Hong Kong have been declared by the GoI to be reciprocating countries for the purposes of Section 44A of the CPC.

However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there may be considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian law. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

53. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer holders of its Equity Shares pre-emptive rights to subscribe and pay for a proportionate number of Equity Shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the Equity Shares who have voted on such resolution.

However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in us would be reduced.

54. *Any future issuance of Equity Shares or convertible securities or other equity linked securities by us may dilute your shareholding and sales of the Equity Shares by our major shareholders may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future issuance of our Equity Shares, convertible securities or securities linked to our Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in us. Any future equity issuances by us, including a primary offering, may lead to the dilution of investors' shareholdings in us. Any disposal of Equity Shares by our major shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. We cannot assure you that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or encumber the Equity Shares in the future. Any future issuances could also dilute the value of your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

55. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of the Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

56. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

OVERVIEW OF INDIAN ECONOMY

India is set to be the second-fastest growing economy in the G20 in FY 2022-23, despite decelerating global demand and the tightening of monetary policy to manage inflationary pressures. The Indian economy was on the path of full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19.

India has also faced the challenge of inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have managed to bring retail inflation below the RBI upper tolerance target. However, the challenge of the depreciating Rupee, although better performing than most other currencies, persists. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size.

Despite this, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the extensive vaccination coverage that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others.

Figure 1: India's Growth Projections by various agencies in FY23

ADB: Asian Development Bank; IMF: International Monetary Fund

The GDP contracted significantly in FY 21 due to the pandemic. The following year, FY22, the Indian economy started to recover, while FY23 opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

Figure 2: India's Economic Growth

Data Source: MoSPI

PE: Provisional Estimates; FAE: First Advanced Estimates

The services sector has become the bedrock of the Indian economy contributing to more than 50% of the GDP. In line with the growth in economy, India's annual household consumption is likely to treble, making India the fifth largest consumer market by 2030. Food and beverage (F&B) is the largest segment of the consumption basket.

INDIAN PACKAGED FOOD & BEVERAGE (F&B) INDUSTRY

The Indian food & beverage industry has been blooming quite well over the last decade. This is due to a change in social patterns and generalized economic growth. From the elementary packaged foods, baked goods, dairy and confectionery products to the deserts, snacks, and ice-cream—the industry has made considerable growth over the years. Even the beverage industry consisting of tea, coffee and other alcoholic and non-alcoholic drinks is making considerable progress. With a prominent agriculture sector, abundant livestock, and cost competitiveness, India is fast emerging as a sourcing hub for processed food.

The food & beverage industry contributes to 3% of India's GDP and around 2/3rd of the total retail market in India. More than 7.5 million people in India rely on the F&B sector for employment and income. This makes it the single-largest employer in the country. F&B also acts as an engine for other sectors of the economy such as transportation, retail, hospitality services and agriculture. The current market size of the Indian Food and Beverage Industry shows a great potential for higher profit and therefore is attracting enormous foreign investments.

Data Source: Aventus Report

In recent years, packaged food and beverage has become favourite among Indians especially in the urban cities. There has been a change in the eating habits in Metros. Due to the fast-paced life in urban cities, about 79% of the people prefer to have ready-to-eat food in their regular meal. The reasons behind the increase in the use of packaged food in urban cities are the steep rise in income, the standard of living and convenience.

Tapping into the F&B Trends in India

- **Healthy lifestyle:** Influenced by trends for physical and mental wellbeing, Indian consumers are seeking healthier alternatives when it comes to food and beverages.
- **Convenience:** With the growing urban population and hectic lifestyles, convenience food and beverages including on-the-go snacks, ready-made meals, and packaged foods are increasingly important.
- **New experiences and flavours:** The millennial population is concerned with experiences and innovative flavours and textures.
- **Influence on Western tastes:** Over the past decade, the health food ingredients market has grown internationally. With western consumers in particular constantly seeking the next new flavour or ingredient with key health benefits, many of these ingredients originate in India.
- **Sustainability:** The younger Indian population is more concerned about environmental and social issues and seek sustainable efforts and initiatives from food and beverage companies.

INDIAN SNACK INDUSTRY

A snack is everything we eat or chew either between main meals or to replace those meals. Snacking in between the meals has always been traditional in Indian culture. Further the Covid-19 forced lockdown has increased this habit of snacking multi-fold and is driving the growth of this industry.

Indian Snack Industry Statistics

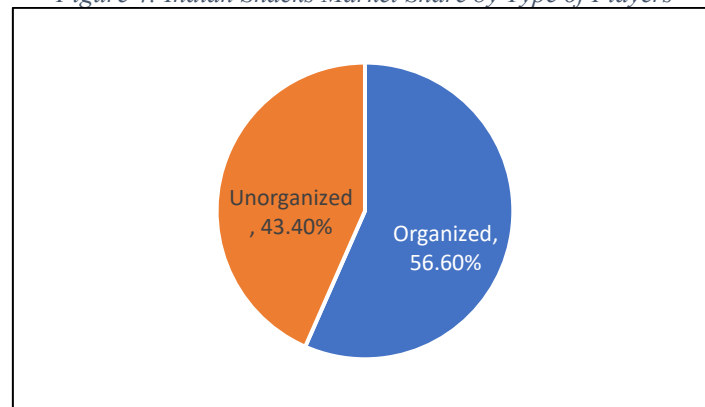

64%	71%	85%
consumers say they prefer to eat many small meals throughout the day, as opposed to a few large ones	consumers around the world snack at least twice a day	consumers take special note of the brand, packing, and nutritional value while purchasing RTE snacks

The Indian snack food market is estimated to be US\$ 6.6 billion and is growing at a CAGR of 6.3%.

Consumers are increasingly replacing meals with snacks and reporting higher likelihood to eat a snack across all three standard mealtimes. With a significant increase in main meal skipping, it is important to note that 40% of consumers “skipped at least one main meal” in 2021 vs. 30% in 2013, with breakfast being the most skipped. Over half (55%) report their households make a meal out of snacks at least weekly. Members of Gen Z (those aged 16 to 24 years) along with slightly older millennials (25- to 34-year-olds), and specifically women within those demographics drive snacking growth.

The market is characterized by a large number of unorganized players across the product segments. However, with time, large FMCG companies understood the potential of the snacks market and entered it in a big way, using their existing supply chain to their advantage. These companies are typically characterized by a large product portfolio across multiple product categories, aggressive advertisements and promotions, active R&D, etc.

Some key macroeconomic trends impacting the Indian snack market are as follows:

- Growing, young, working-age population: India enjoys a favourable demographic profile, as evidenced by the increasing share of its overall working-age and young working-age population. The young working-age population (20-34 years) share in the country’s total population has steadily risen from 24.2% in 1990 to 25.5% in 2020 . The share of the working-age population (15-64 years of age) is also on the rise, expecting to near 70.0% towards 2030.
- Rising middle-class population: India's middle class constitutes approximately 60.0% of total households. As of 2016, more than 12 crore Indian households belonged to the middle-income class (earning a gross annual income between 5 lakh to 10 lakh rupees). The number of households in this bracket is expected to increase to 14 crores by 2025-26. The growing presence of a large middle-class population will be pivotal in driving higher packaged foods, and savoury snacks and sweets expenditure.
- Rising disposable income: Net national disposable income, a key determinant of consumer demand, is expected to rise from INR 185.3 trillion in 2019-20 to INR 319.2 trillion by 2025-26 . An increase in disposable income levels, indicative of a higher standard of living, will help improve affordability and demand for snacks.
- Increasing nuclearization of families: Over 60.0% of the households in India are said to be nuclear. Intensifying nuclearization is expected to drive changes in lifestyle patterns, with an increased inclination towards more convenient consumption.
- Increasing female participation in the workforce: Growing trends of higher female educational qualification attainment and rising labour force participation, giving rise to two-income nuclear families, are a key factor driving convenience and packaged food demand in India.

Growth Drivers of Health and Wellness Focused Food & Beverage Market

- Change in the attitude and increase in the number of health-conscious consumers: post the Covid-19 pandemic, consumers have started searching for food with functional and natural healthy ingredients. There has been a shift in their eating more mindfully – i.e. ingesting food with specific benefits beyond general wellness and nutrition. Owing to this, many Indian companies have positioned their products as super foods and containing healthy ingredients. Some important statistics to take note of are as follows:
 - 108 million health conscious consumers in India
 - 35 million children consuming health food due to health-conscious parents
 - 70% Indians say they will focus on improving overall health post covid by prioritizing dietary changes
- Rising disposable income: increased spending capacity amongst the population has encouraged the trial and adoption of health-oriented products and services.
- Urbanisation: With a higher share of population living in cities, consumers are more aware and exposed to a variety of options when it comes to making choices regarding their food.
- Rising demand from millennials: The 440 million strong millennial population of India are a strong force behind increased popularity of foods with purpose driven positioning like healthy, clean label, and vegan. Health aware millennials with a high disposable income and willingness to spend on their well-being are an important customer segment of this market.
- E-Commerce penetration: today India is home to more than 150 million online shoppers, largely residing in tier-II and tier-III cities. The broader reach of these platforms has reduced barriers to entry for smaller health wellness brands, promoting customer trials.

Increase in Healthy Snacks Consumption

The snacking industry of India is expected to reach INR 1 billion by the end of 2024. This transition in consumption – from regular meals to packaged food, is now embracing a new concept of healthier packaged food.

Healthy snacks is an emerging extension within the snack market. These are food products that are considered nutritious or beneficial for a healthy diet, which are generally consumed in between meals. Health in snack food is a flexible term. In a commercial setting, healthy snacks often include a statement or claim that promote the healthy or nutritional value of the product, for example:

- Snacks with reduced amount of unhealthy ingredients: reduced sugar, less fat, no preservatives, or additives.
- Snacks with ingredients that promote health: omega-3, wholegrain, plant protein, fibres.
- Snacks developed for a specific objective or diet: gluten-free, vegan, energy snacks for sports.

Numerous brands have emerged within this category, offering a variety of products from snack bars to trail mixes, as an attempt to cater to different consumer groups.

OUR BUSINESS

OVERVIEW

We are an integrated health food brand with our presence in entire range of dry fruits, nuts, seeds and berries and healthy snacking products across the value chain. Our approach in the space focuses on diversifying across the baskets and intensifying our presence across the value chain; in the end, being a ‘one-stop shop’ for our consumers. The motto of Proventus is to create expertise in healthy food products and build the revenue stream by moving across the value chain from origination to distribution and creating an integrated business model - from “farm to homes”. The fundamental cornerstone of our approach is to capture the demand and supply stream by developing a stable base of sourcing and distribution.

There is a large vacuum in the “healthy snacking” space in India especially in the dry fruits, nuts, seeds and berries category. In the last few years, there has been a shift in consumer preference from unbranded / loose produce to branded products all the way down to Tier 2 city kirana stores also. As consumer preference gravitates towards better quality branded produce, they are looking for a trustworthy brand offering innovative products from natural to flavour augmented healthy snacks - this is where ‘ProV’ is positioned with its wide range of healthy snacks in the dry fruits, nuts, seeds and berries category. With its pan-India distribution and easy availability, ProV aims to be THE brand consumers think of whenever they want to buy nuts or dry fruits.

With growing consumer awareness, health and nutrition increasingly forming an inextricable attribute of new-age food culture, our snacking items as well as habits are gravitating towards healthy snacking in general. Also, post the Covid-19 pandemic, the world has evolved - be it business or lifestyle. And since this has not been restricted merely to urban areas and big cities but is also developing demand into rural pockets, healthy snacking has become a top priority. Indian households are likely to increase their spending on health-focused foods and beverages in the next few years, as consumers are increasingly shifting to healthier alternatives and buy foods with better ingredients. As health and hygiene increasingly becomes the deciding factor for consumers, they are now consciously avoiding open unpackaged dry fruits and unhealthy snack offerings. Instead, they are increasingly moving to packaged dry fruits and healthy snacks. In recent past, the Covid-19 pandemic scare and increased focus on healthy lifestyle has particularly given a fillip to such packaged products, thereby increasing their demand.

Our business structure is as under:

Almonds

Almonds is one of the first dried fruits and nut products that came into Focus for us at Proventus. With a setup in the APMC, Navi Mumbai, we began with localized trading of Almond Kernel and Inshell Almond. Post which, following the margin, we stepped into the direct imports from origin farms in California, USA and Australia. We increased our reach to the growers and suppliers internationally and simultaneously gained understanding of the intricacies of Inshell Almond Processing via job work partner(s) in Mumbai. With this product knowledge, a hold on Sourcing and distribution both internationally and locally, we were able to set up our own Processing Plant. With this sourcing strength, own processing facility and focus on quality production, we are now supplying to various modern retail houses in India including but not limited to Reliance Retail, Dmart, More Retail and Metro Cash & Carry. Almond is also one of the first products supplied in our own brand ProV. Established and stable sourcing base

We have an expansive supplier community base directly sourcing and importing produce from around the globe - from quality packers and /or direct from farm gates. We import from 8 countries across the globe and having relationship with more than 45 growers and / or suppliers itself. We also have a stable sourcing network in Indian market to procure the local agri produce, being used by us for our business. We focus on maintaining our relationships and growing our network of farms from which we procure agri produce, which we have nurtured and developed over time.

We endeavor to ensure consistency of quality of products through our stringent quality assurance processes. We focus on maintaining quality standards at each step of our process. Our supply chain at the scale and quality at which we operate may require significant investment, effort and time to replicate, which we consider a competitive advantage.

Capital-efficient and scalable retail model to capitalize on the industry growth profile driven by a rapid shift towards healthy lifestyle and hygienic food snacking trends, organized retail and increasing online penetration

We operate a capital-efficient and scalable retail model to capitalize on the high industry growth in the healthy snacking market in India. Since the Fiscal 2019 in which we launched our brand “ProV” under ProV Foods, we have grown at a CAGR of 47.99% and expended our presence to general and modern trade channels, including online e-commerce platforms.

Higher brand consciousness, increasing digitization, greater focus towards healthy lifestyle and hygienic food snacking trends are expected to further drive growth in this market (Source: Industry Report). As consumers seek better quality and a better overall taste with multiple snacking options, with the emergence of aspirational brands

with unique, differentiated offerings, increased trust in safety and pricing, the market is shifting rapidly towards branded and organized offerings. As one of the new generation brand, with more than 100 SKUs in this fast growing industry, we believe, we are well-positioned to capitalise on this shift.

Using dry fruits broken and shells and skins of the raw material to derive maximum value realisation

The general consumer behaviour and trend is to buy dry fruits which are complete in size with good appearance. However, dry fruits are prone to breakage during transportation and handling. Breaking of dry fruits does not result in loss of its nutritional value. To reduce value loss on account of breakage, we have introduced exquisite trail mix as one of our selling product under the brand “ProV Fusion”. Trail mix is developed by us as a mix of dry fruits, nuts and seeds, combined with a great taste, which acts as a healthy snack option on the go. This helps us to maximise the value realisation for our raw materials.

Further, the shells and skins of the raw material received by us, in natural form, are being converted into bio-fuel briquettes through our subsidiary, Pro-Nova Bio Technologies Private Limited. These bio-fuel briquettes sold by Pro-Nova Bio are used primarily for burning in boilers as green fuel.

Experienced Promoters and Management team

Our Promoters, has around 20 years, individually, in agro produce and commodity industry. They have been instrumental in managing our rapidly expanding operations, implementing strategic marketing and business initiatives, and focusing on financial performance.

We have a well qualified senior management team with extensive experience in the commodity and consumer goods and retail industry, which positions us well to capitalize on future growth opportunities. The heads of functional groups enhance the quality of our management with their specific and extensive industry experience.

KEY STRATEGIES

Creating a leading position of our flagship brand ProV to capitalize on the significant potential growth within our category, and further grow our new product offerings

One of our main strategies is to continue focusing on our own brand that we process and distribute. Sales of our own brands accounted for 47.99% of our revenue from operations on consolidated basis during the nine months period ended December 31, 2022 as compared to 3.91% in the fiscal 2020, when we had a significant bulk sales and white labelling business.

We intend to focus on establishing our Company as one of the leading companies in India which provides healthy snack options. We intend to continue to leverage our capabilities in understanding the healthy snacking industry and customer taste and preferences by introducing a wide range of products within the Indian healthy snacks market and emerge as a leading brand preferred by our consumers.

Increasing healthy snack awareness and consumption, and penetrating further into Tier-1 and 2 cities in India

The majority of our consumers are from the top urban centres in India, with top 5 customers contributing 38% of our over all sales during the nine months period ended December 31, 2022. Four out of the top 5 customers comprises of e-commerce platforms and modern trade channels. Our strategy is to increase our focus on the under penetrated markets in major Metros and other Tier-1 and 2 cities across India through similar trade channels. We focus on premiumization of our products when entering new markets to gain customer focus.

Our indirect distribution network enables us to increase the availability and visibility of our brand. We seek to continue to focus on increasing sales volumes in our geographies by expanding our indirect distribution network, optimizing our distribution operations and increasing product supply to the under-penetrated markets. These measures will enable us to increase the availability of our products which will in turn increase brand awareness and revenue.

Strengthening our business through effective branding, promotional and digital marketing activities

We intend to promote our brand “ProV” through different marketing channels to increase our brand visibility and recall. Product launches require significant investment, planning and product promotion through advertisements in local newspapers, magazines, television, social media, print media and other publications and engaging in brand association. As our business requires us to reach out to our target customers as well as indirect distributors, the effort and the exercise around product development is challenging and requires significant time and effort to ensure reach to our target customers and indirect distributors. We also intend to strengthen our existing brand building activities such as retail branding, web marketing, magazine advertising and outdoor advertising for marketing our products. We also engage in digital marketing efforts in order to target customers. We believe that growth in our products segment will lead to growth of our revenues and profitability. For the nine months period ended December 31, 2022 and the fiscals 2022, 2021 and 2020, our sales promotion, marketing and branding expenses were ₹ 16.72 lakhs, ₹ 86.20 lakhs, ₹ 1.69 lakhs and Nil, respectively.

Increasing penetration of consumer in healthy snacking market, a shift in lifestyle among the Gen Z population, and the adoption of healthy lifestyle are some of the key drivers that are assisting the rapid expansion of this industry. With a vision to capitalise on this opportunity, we aim to introduce new products and brands.

Capitalize on the increasing e-commerce penetration in Indian retail as well as within our category

The penetration of e-commerce in the Indian retail market continues to increase due to a number of factors such as an increasing acceptance of online shopping, the convenience of payment as well as a seamless customer experience. As a result, the e-commerce market in India has witnessed an accelerated growth.

The outbreak of the COVID-19 pandemic has accelerated the appetite for online purchasing and the e-commerce market has emerged as a crucial channel for food products. Also the health awareness has increased during the same period. We have made significant investments in our digital capabilities and also our distribution network. We generated 21.96% of our revenue from brand “ProV” through online e-commerce platforms during the fiscal 2022. We intend to capitalize on this position by further increasing sales through online marketplaces and also direct sales on our website, www.provfoods.in.

Increase the range of our products in healthy snacks market to develop a wider portfolio under the flagship brand ProV

Indian consumers often struggle with finding healthy snacking options for themselves and their families and often end up snacking on unhealthy snacks like chips and namkeens. The few healthy alternatives that exist tend to have higher price points not suitable for impulse purchases or to stock at local kiranas, or lack in flavour and taste. Recently ProV foods announced the launch of a new line of products called ProV Minis, which are small snack-packs of flavoured dry fruits, nuts and seeds that are ideal for healthy on-the-go nutrition. We intend to develop a wide portfolio of products for our customers, including beyond dry fruits and nuts & deed mix. and increase the range of products offered by our brands in adjacent healthy snacks categories. We intend to continue to develop new variants of our products to meet the taste of the consumers.

Continue to invest in our brands

We have created consumer brand “ProV” for our products being sold through ProV Foods. Further, ProV Foods have also entered into an agreement with Chef Sanjeev Kapoor and KS Narayanan having experience in food & FMCG for endorsement, advertisement and promotions of and providing services in relation to the brand, products and ProV Foods. The said agreement also gives a right to ProV Foods to exclusively use SK IP and attributes for the brand, products and ProV Foods during the term of the agreement and KSK shall also assist in development of new product recipe under the brand of ProV Foods. We will continue to invest in our brand building activities to educate Consumers about healthy food options and increase our brand awareness while maintaining our proposition of health and well being. Our approach is to invest in successful mediums of advertising, while also expanding our marketing presence to capture shifts in Consumers’ media consumption habits, such as in social media, digital media and embedded advertisements.

Enhance and expand operational efficiencies

We will keep focusing on expanding our operations and boosting operational efficiency at the manufacturing plant. Higher operational efficiency leads to increased production volumes and sales, allowing us to distribute fixed costs across a larger number of packages sold and so increase profit margins. We will also keep identifying new strategic initiatives to improve our operational efficiencies and save operating costs. We will continue to invest in automation, contemporary technology, and equipment to improve operating efficiency while also upgrading our products, particularly their quality, to meet changing customer demands.

Competition

Fair value is determined using quoted market prices in an actively traded market, for the instrument, wherever available, as the best evidence of fair value. In the absence of quoted market prices in an actively traded market, a valuation technique is used to determine the fair value. In most cases the valuation techniques use observable market data as input parameters in order to ensure reliability of the fair value measure.

If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The

reduction is treated as an impairment loss and is recognized in the statement of profit and loss. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of the depreciable historical cost.

7. FOREIGN CURRENCY TRANSACTIONS

Foreign currency transactions are recorded at the rates of exchange prevailing on the date of the transaction. Exchange differences, if any arising out of transactions settled during the year are recognised in statement of profit and loss of the year.

Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the closing exchange rates on that date. The exchange differences, if any, are recognized in statement of profit and loss of the year and related assets and liabilities are accordingly restated in the balance sheet.

8. INVENTORIES

Long term investments are carried at cost less diminution in value which is other than temporary, determined separately for each investment.

Defined Benefits Plans

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. The company has recognized the gratuity payable to the employees as defined benefit plans. The liability in respect of these benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employees' services.

15. TAXATION

Tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the Income Tax Act, 1961) and deferred tax charge or credit (reflecting the tax effect of timing differences between accounting income and taxable income for the period).

Current tax

Provision for income tax is recognized based on estimated tax liability computed after adjusting for allowances, disallowances and exemptions in accordance with the Income Tax Act, 1961.

Deferred taxation

The deferred tax charge or credit and the corresponding deferred tax liabilities and assets are recognized using the tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the asset can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of the assets. Deferred tax assets are reviewed at each balance sheet date and written down or written-up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realised.

Minimum Alternative Tax (MAT) credit

MAT credit asset is recognized where there is convincing evidence that the asset can be realized in future. MAT credit assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonably certain to be realised.

16. PROVISIONS AND CONTINGENCIES

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognized in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognized in the period in which the change occurs.

BUSINESS OVERVIEW

We are an integrated health food brand with our presence in entire range of dry fruits, nuts, seeds and berries and healthy snacking products across the value chain. Our approach in the space focuses on diversifying across the baskets and intensifying our presence across the value chain; in the end, being a ‘one-stop shop’ for our consumers. The motto of Proventus is to create expertise in healthy food products and build the revenue stream by moving across the value chain from origination to distribution and creating an integrated business model - from “farm to homes”. The fundamental cornerstone of our approach is to capture the demand and supply stream by developing a stable base of sourcing and distribution.

There is a large vacuum in the “healthy snacking” space in India especially in the dry fruits, nuts, seeds and berries category. In the last few years, there has been a shift in consumer preference from unbranded / loose produce to branded products all the way down to Tier 2 city kirana stores also. As consumer preference gravitates towards better quality branded produce, they are looking for a trustworthy brand offering innovative products from natural to flavour augmented healthy snacks - this is where ‘ProV’ is positioned with its wide range of healthy snacks in the dry fruits, nuts, seeds and berries category. With its pan-India distribution and easy availability, ProV aims to be THE brand consumers think of whenever they want to buy nuts or dry fruits.

With growing consumer awareness, health and nutrition increasingly forming an inextricable attribute of new-age food culture, our snacking items as well as habits are gravitating towards healthy snacking in general. Also, post the Covid-19 pandemic, the world has evolved - be it business or lifestyle. And since this has not been restricted merely to urban areas and big cities but is also developing demand into rural pockets, healthy snacking has become a top priority. Indian households are likely to increase their spending on health-focused foods and beverages in the next few years, as consumers are increasingly shifting to healthier alternatives and buy foods with better ingredients. As health and hygiene increasingly becomes the deciding factor for consumers, they are now consciously avoiding open unpackaged dry fruits and unhealthy snack offerings. Instead, they are increasingly moving to packaged dry fruits and healthy snacks. In recent past, the Covid-19 pandemic scare and increased

focus on healthy lifestyle has particularly given a fillip to such packaged products, thereby increasing their demand.

Our business structure is as under:

Proventus Agrocom commenced its business operations in the agro produce segment by undertaking bulk trades to capture the demand and supply stream by developing a stable base of sourcing and distribution with efficient risk management practices. The motto of Proventus is to create expertise in healthy food products and build the revenue stream by moving across the value chain from origination to distribution and creating an integrated business model - from “farm to homes”. Today Proventus imports majority of the dry fruits, seeds, nuts and berries which are sold directly by Proventus Agrocom and also used by its Material Subsidiaries to meet part of their requirement for retail brand business under “ProV” and creating new products.

On the strength of stable capabilities in sourcing and procurement, the Company gradually expanded its operations in entire range of dry fruits, nuts, seeds and berries and healthy snacking products across the value chain and creating a business model that covers sourcing from farm / mandi to secondary processing, packing and sale with support of bulk sales and white labelling activities. With a presence in the APMC, Navi Mumbai (“Agricultural Produce Market Committee”) and broker network & indirect distributors in various states, Proventus Agrocom is able to sell bulk produce both processed and unprocessed across various products. The Company has also displayed its ProV brand products for retail sales at its shop in APMC, Navi Mumbai.

ProV has a FSSC 22000 compliant processing plant admeasuring 3,025 sq. mtr situated at Gen 71/2, TTC Industrial Area, Mahape, Navi Mumbai. However, ProV Foods has taken a new premises on lease, admeasuring 1,800 sq. mtr at Plot No. A-793, TTC Industrial Area, Khairane, Navi Mumbai for shifting its processing plant from the present location. ProV Foods has received the notice of termination of the agreement on January 15, 2023 for vacating the said

The same has been further extended by three months agreeing to allow vacation of the premise by August 14, 2023. ProV Foods will plan shifting in a manner which will minimise the impact of closure of production facility supported with increased holding of stock of packaged products to meet any demand due to any shutdown of facility.

ProV offers something for every consumer in terms of price points, produce size or flavours. ProV has six brand segments, namely 'ProV Select' which is the economical at home daily consumption category, 'ProV Premium' which is the flagship high quality category, 'ProV Regal' which is the luxury jumbo sized produce category, 'ProV Flavours' which is augmented with flavours, 'ProV Fusion' which is a line of exquisite trail mixes, and the most recently launched 'ProV Minis' for pick-and-go needs and replacement to unhealthy junk snacks at a price point of just INR 30 each pack. The "ProV" brand is used by our subsidiaries ProV Foods and Proventus Retail for the consumer packs sold through retail channel.

Apart from our own website, ProV products can be found and ordered from all leading ecommerce websites like Flipkart, Amazon and Bigbasket and are also available in retail stores like Dmart, More Retail, Metro Cash & Carry, etc as well as in the neighbourhood kirana shops.

ProV Foods has taken a new premises on lease situated at Plot No. A-793, TTC Industrial Area, Khairane, Navi Mumbai for shifting its processing plant from its present factory premises. Once ProV Foods shifts its factory premises, Pro-Nova Bio Technologies Private Limited will find a separate premises for its business operations and will obtain necessary approvals, accordingly. SIGNIFICANT DEVELOPMENTS SUBSEQUENT TO THE LAST FINANCIAL PERIOD

After the date of last financial year i.e., March 31, 2022, the following material events have occurred after the last audited period.

1. The Board of Directors of the Company approved the Initial Public Offering and Offer for Sale of Equity Shares of our Company in their meeting held on April 12, 2023.
2. The Shareholders of the Company approved the Initial Public Offering and Offer for sale of our Equity Shares in the Extra Ordinary General Meeting of the members held on April 13, 2023.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subjected to various risks and uncertainties, including those discussed in the section titled "Risk Factors" beginning on page 25 of this Prospectus. Our results of operations and financial conditions are affected by numerous factors including the following:

➤ ***Key raw materials prices, quality and packaging material costs***

Our raw material requirements include procurement of quality dry fruits for our business. We presently procure all these raw materials from our various suppliers, locally and also imports, and our procurement is based on our requirements on an on-going basis, through purchase orders at an “as needed” basis. For the nine months period ended December 31, 2022 and in Fiscals 2022, 2021, 2020, the cost of goods sold was ₹ 30,335.39 lakhs, ₹ 38,535.54 lakhs, ₹ 28,539.63 lakhs, and ₹ 88,804.59 lakhs, and accounted for 95.40%, 95.56%, 94.86% and 99.09% of our revenue from operations.

The raw materials we use are subject to price volatility and unavailability caused by external conditions, such as commodity price fluctuations within India and globally, weather conditions, supply and demand dynamics, logistics and processing costs, our bargaining power with the suppliers, inflation and governmental regulations and policies. Also being farm produce, the quality and supply of the raw material is highly dependent on the climate of the region where such crops are cultivated. Any change in global prices may result in significant impact on the prices of these commodities, which we may not be able to pass on to the consumers and which would correspondingly affect our various margins and financial condition. If we are unable to manage these costs or to increase the prices of our products to offset these increased costs, our margins, cash flows and overall profitability may be adversely affected.

➤ ***Distribution network and market penetration***

We are a pan-India snack food company. Our extensive nationwide indirect distribution network along with the modern trade channel and e-commerce platforms enables us to reach to a wide range of consumers and ensure effective market penetration. Points of sale for snack food products include traditional retail points, such as grocery stores, as well as modern retail outlets including supermarkets, hypermarkets and convenience stores for sales in urban areas.

We continue to focus on increasing our retail presence in all zones. There is an increasing trend toward modern retail trade and e-commerce platforms in the urban markets due to the availability of multiple brands and varieties, offers and discounts, and the option to purchase all products under one roof. We intend to increase our retail presence in modern retail outlets, in addition to the focus on expanding general trade channel.

In digital marketing, we intend to selectively create presence across social media platforms and directed marketing through search engines. The robustness of our sales and distribution network and effectiveness of our marketing activities and is key to our future growth and expansion and result of operations.

➤ ***Ability to maintain brand image and cater to changing consumer preferences***

We derive substantially all of our revenue from the sale of our food products, which depends on the strength of “ProV” brand. We have consistently allocated significant resources to establish and strengthen the *ProV* brand and increase our brand recall as one of India's leading dry fruits and healthy snacks brands through various marketing initiatives. We have consciously developed our product portfolio under the *ProV* brand, allowing customers to associate with one brand. We have also entered into an *agreement* with Chef Sanjeev Kapoor and KS Narayanan having experience in food and FMCG, for endorsement, advertisement and promotions of and providing services in relation to the brand, products and ProV Foods. The said agreement also gives a right to ProV Foods to exclusively use SK IP and attributes for the brand, products and ProV Foods during the term of the agreement and KSK shall also assist in development of new product recipe under the brand of ProV Foods. We believe that the scale of our business provides us the ability to focus on branding and promotion to further increase our visibility and market share. Accordingly, a significant part of our success has been and will continue to depend on our ability to maintain our brand image and at the same time continue to manufacture high-quality dry fruits and healthy snacks adapted to the consumer’s tastes.

➤ ***Pricing pressures from the competitive business environment***

The market is characterized by a large number of unorganized players across all product segments who in most cases operate only in traditional snacks items. The organised industry is also expanding rapidly in the healthy snack segment. Competitive factors in the healthy snack food industry include product quality, taste, price, brand awareness among consumers, advertising and promotion, innovation of products, variety,

nutritional content, product packaging and package design. We compete in the organised sector principally on the basis of product taste, price and brand recognition. Some of our competitors have been in their respective businesses longer than we have and have substantially greater financial resources, wider distribution tie-ups, larger product portfolio, technology, research and development capability and greater market penetration. Our competitors might have significantly higher marketing and promotional budget compared to us which would increase their visibility in the market.

Other factors effecting our business:

- General economic and business conditions in the markets in which we operate and in the local, regional and national economies
- Substantial capital expenditure & working capital requirements
- Default or delay in payment from customers
- Changes in laws, rules & regulations and legal uncertainties
- Inability to obtain, maintain or renew requisite statutory and regulatory permits and approvals or non-compliance with and changes in, safety, health and environmental laws and other applicable regulations, may adversely affect our business, financial condition, results of operations and prospect

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the Lead Manager will be required to compensate the concerned investor.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Issue Opening Date. All SCSBs issuing facility of making application in public issues shall also provide facility to make application using UPI.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India ("DPIIT").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DPIIT, has issued consolidated FDI Policy Circular of 2020 ("FDI Policy 2020"), effective from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI and Master Direction –Foreign Investment in India (updated upto March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.
